Submission
Inner West Council (IWC) strongly supports the development of the Design and Place State Environmental Planning Policy (the SEPP) and the integration of the BASIX SEPP and SEPP 65- Design Quality of Residential Apartment Development (SEPP 65). Overall Inner West Council supports the principles of the SEPP, however the principles and intended effects are general and open to interpretation potentially hindering the attainment of the principles. It is therefore important that there are clear, strong, and measurable standards developed in order to deliver tangible, desirable outcomes from the principles of this SEPP.

Council's detailed submission is attached.

I agree to the above statement
Yes
