with a 1 in 100 flood area, we have found this area very peaceful. We now have three young grandchildren who also benefit from being on this land. As we approach our retirement, we feel that the government as well as the Department of Planning has ripped out our hearts. With the proposed dezoning, we will most likely have our future retirement plans held in stagnation and leave us under compensated on the sale of our property.

The proposed zoning changes has not been of any help to improving her health as she tries to understand the issues that she has to cope with into the future. Upon our having to relocate to allow for progress, we are at a loss as to where we may be able to relocate to a property af similar characteristics as we now enjoy, within a central position as to services that we currently enjoy.
