Dear Sir/Madam,

My partner and I are writing to you in regards to the Aerotropolis zoning plan and its impact on our property located on [REDACTED] road. According to current maps, most of our property is zoned Non-Urban and only a small portion zoned Flexible Employment/Urban.

Currently the topography of the land is such that there is a natural path for water to flow (from rural properties to the west), approximately mid-way through our property into a water channel on the eastern boundary. The proposed non-urban boundary currently starts to the north of the natural stormwater path which makes more than 2/3 of the property non-urban. I would like to make a second submission, to highlight that in Liverpool council's South Creek Flood Plan Management Study, our property has not been identified as being affected by flooding - see attachment. So it should be possible for the majority of our land to be zoned mixed Flexible Employment/Urban Zoning. This adjustment will maximise the land available for the Aerotropolis, and allow for a reasonable financial outcome for our family.

Please reconsider the zoning border on our property and reposition the border so that the Flexible Employment/Urban Zone encompasses the vast majority of our property.

Thank you.
