**Submission**

this is an opportunity to have a world class policy focusing on sustainable precincts with integrated cycling, pedestrian and public transport, access to health, education, affordable housing and community facilities. There must be no more high rise with overshadowing...Copenhagen has human scale low rise integrated precincts. Let us be world leaders and avoid wind corridors and high rise and cherish our unique harbour and waterways access. Please rethink and do not opt for high rise features for the few at the expense of integrated community focused human scale opportunities.

**I agree to the above statement**

Yes
