Unlike these proposals, we need a local community and harbour based plan that has green threads of ecological connection, pathways and parklands that follow the harbour and connect the community. It should not be based on mass tourism needs.

All design and planning should seriously reflect the threat from Covid and other potential disease transmission. 1-2 people in lifts issue, numbers per office space.

There should be a hard cap on heights, like Paris, and not mega buildings for the wealthy, big business and casinos.

All planning should seriously involve local communities not perfunctorily. When the government doesn't like the independent arbiters decision they must not be allowed to have a tantrum and change the whole system to their and big business's advantage.

I agree to the above statement

Yes
