Submission: We are an elderly couple who 3 years ago purchased a property in Wallarah NSW 2259 which took a substantial chunk out of our retirement finances, on the understanding that the Warnervale Airport (Restrictions) Act 1996 limited the amount of air traffic using said airport. The purpose of choosing this quiet area was for my husband's health, he suffers from Parkinson's Disease as well as diabetes and hypertension. Here we are close to hospitals, doctors and specialists. This has taken a huge amount of stress out of caring for him. Please don't increase the air traffic at Warnervale Airport as the noise level would impact not only on all the residents in this area but especially on us leaving no option but to look into a nursing home. Whilst I realise the airport is a business the Warnervale Airport (restrictions) Act 1996 was invoked for a valid reason and therefore would like to see it remain in force.

Submission: The current Warnervale Airport (Restrictions) Act 1996 needs to be kept in place to protect the health and wellbeing of our community. The residents of Bruce Crescent. Wallarah are in the direct flight path of the proposed expansion of the airport, this means as planes accelerate to full throttle on take off and reverse thrust on landing the noise level will be deafening and there is a fallout of aviation pollution landing on the roofs and the vegetables we eat. The roof is the ONLY collection point for our drinking water and household needs e.g showers, washing clothes and dishes etc. Take all this into account and our home becomes unsalable. We bought it 3 years ago in good faith having been assured that the airport would not expand to a regional centre. As we are elderly and my husband is not in good health the proposed increase of air traffic is very distressing and causing deep concern. Thank you for taking the time to read this submission
