Dear Director,

Submission in relation to the Warnervale Airport (Restrictions) Act 1996 review.

I understand and agree that my submission will be made public.

The statement below represents my personal opinion pertaining to the act review:

Boeing predicts a shortage of 800,000 pilots in the next 20 years as baby boomers retire and the Asia-Pacific geopolitical heart flourishes and economies boom.

QANTAS has opened the first QANTAS pilot academy in Toowoomba do develop an Australuan talent pipeline to help bridge the gap.

Warnervale Airport is the ONLY LOCAL OPTION for residents and ratepayers of the Central Coast to undertake aviation training. For a region supporting a population of 330,000 people and growing, we can not afford to lose the only option we have for youth on the central coast to participate in and become part of the aviation industry.

My son is 13. He is a proud member of the Australian Aur League. He joined the Central Coast Wing at age 8 and has spent four years learning about aviation as part of the Toukley Spitfires. Recently awarded the OC's Cadet of the Year, Nathaniel takes his opportunities seriously and has supported the Air League's community spirit

in the Toukley RSL ANZAC parades annually since his joining the league.

An officer and a gentleman, today my son fulfilled a childhood dream and commenced his pilot training with his first instructional flight.

Thanks to the community spirit and partnership of the Central Coast Aero Club, the Australian Air League and the reality of Warnervale Airport, this young boy's dream is beginning to come true.

I call on the council and decision makers to proactively support the Central Coast Aviation community and our youth in preserving and developing Warnervale Airport activities and presence for our best future and the future of the children and youth of the Central Coast.

Is the Warnervale Airport (Restrictions) Act 1996 (the Act) relevant or necessary?

The Act is neither relevant nor necessary.

- The Act was enacted to protect the community from large jet transport operations. The runway has never been sufficiently long enough for any jet transport aircraft operating in Australia.
- The airport is surrounded by terrain which makes it very difficult to physically lengthen the runway (wetlands immediately South, a major road and rising terrain to the North).
- Environmental zoning surrounding the Airport requires that State Government must consent to any lengthening of the runway.
- There is no economic case for jet airline or freight operations at Warnervale, as Warnervale is within a 2 hour radius of Sydney, Newcastle and soon, Western Sydney Airport, all of which cater to these operations.

If the Review concludes the Act is to remain.

Clause 2 of the Act limits aircraft movements to 88 per day in the event the runway is lengthened. The department has made a determination that the former Wyong council lengthened the runway, triggering this clause.

- The current flight training provider has operated for over 4 decades without

being constrained by the movement cap and at the time the Act was put in place was regularly performed over 300 movements a day.

- Training aircraft regularly perform up to 20 movements per hour. Multiple training aircraft may be operating at once; therefore the movement cap may be reached within 2 hours or less of commencing operations for the day.
- Once the cap is reached, no other users of the airfield will be permitted to operate, save in an emergency.
- As the movements will almost exclusively be absorbed by the flying school, the Aero Club members based on the field and itinerant operators wishing to fly into Warnervale, including patient transfer and Rural Fire Service refuelling and positioning flights, will regularly be excluded from operating.

Clause 2 of the Act should be removed, or amended to apply only to aircraft above 5,700 kgs – a figure used by the Civil Aviation Safety Authority to designate large aircraft. This still gives the community protection from large and jet transport operations, but allows the existing operators to continue their current, low impact operations.

Warnervale Airport is the only aviation infrastructure servicing the 340,000 residents of the Central Coast. The Act is unique, no other airport of this type in Australia is constrained by such a limiting piece of legislation. The Act, and Clause 2 specifically, serve to heavily cripple the ability of the Airport to serve its purpose, and threaten to heavily restrict, or completely destroy, the ability of operators to continue a viable business on the site.

I respectfully recommend that the Reviewers take appropriate action through repealing of the Act, or amending its structure, to create a legislative environment which is fair and workable for the Central Coast community and the operators who rely on this important asset.

I thank you for taking the time to consider this submission.

Yours Faithfully

Tracey Fisk
