Dear Director,

Submission in relation to the Warnervale Airport (Restrictions) Act 1996 review.

I understand and agree that my submission will be made public.

The statement below represents my personal opinion pertaining to the act review:

The current campaign by residents to restrict movements at Warnervale is being driven on the basis of a past study of hypothetical operations at the airport. These operations are neither likely or, indeed, possible as the airport is far too small for the aircraft type concerned. There is no room to expand it to become suitable, even if this were desired.

The vocal opponents of the airport know all this, yet are misrepresenting their case by leading residents to believe otherwise.

Warnervale is a thriving local facility which has existed for many years. Along with providing important infrastructure and local employment, the airport is ideally positioned as an emergency destination for light aircraft encountering poor weather in the area. Being near sea level, and away from high terrain, it is often the only place to land in the case of unforecast conditions making continued flight unsafe. Restricting operations there will have a detrimental effect on flight safety.

Is the Warnervale Airport (Restrictions) Act 1996 (the Act) relevant or necessary?

The Act is neither relevant nor necessary.

- The Act was enacted to protect the community from large jet transport operations. The runway has never been sufficiently long enough for any jet transport aircraft operating in Australia.
- The airport is surrounded by terrain which makes it very difficult to physically lengthen the runway (wetlands immediately South, a major road and rising terrain to the North).
- Environmental zoning surrounding the Airport requires that State Government must consent to any lengthening of the runway.
- There is no economic case for jet airline or freight operations at Warnervale, as Warnervale is within a 2 hour radius of Sydney, Newcastle and soon, Western Sydney Airport, all of which cater to these operations.

If the Review concludes the Act is to remain.

Clause 2 of the Act limits aircraft movements to 88 per day in the event the runway is lengthened. The department has made a determination that the former Wyong council lengthened the runway, triggering this clause.

- The current flight training provider has operated for over 4 decades without being constrained by the movement cap and at the time the Act was put in place was regularly performed over 300 movements a day.
- Training aircraft regularly perform up to 20 movements per hour. Multiple training aircraft may be operating at once; therefore the movement cap may be reached within 2 hours or less of commencing operations for the day.
- Once the cap is reached, no other users of the airfield will be permitted to operate, save in an emergency.
- As the movements will almost exclusively be absorbed by the flying school, the Aero Club members based on the field and itinerant operators wishing to fly into Warnervale, including patient transfer and Rural Fire Service refuelling and positioning flights, will regularly be excluded from operating.

Clause 2 of the Act should be removed, or amended to apply only to aircraft above

5,700 kgs – a figure used by the Civil Aviation Safety Authority to designate large aircraft. This still gives the community protection from large and jet transport operations, but allows the existing operators to continue their current, low impact operations.

Warnervale Airport is the only aviation infrastructure servicing the 340,000 residents of the Central Coast. The Act is unique, no other airport of this type in Australia is constrained by such a limiting piece of legislation. The Act, and Clause 2 specifically, serve to heavily cripple the ability of the Airport to serve its purpose, and threaten to heavily restrict, or completely destroy, the ability of operators to continue a viable business on the site.

I respectfully recommend that the Reviewers take appropriate action through repealing of the Act, or amending its structure, to create a legislative environment which is fair and workable for the Central Coast community and the operators who rely on this important asset.

I thank you for taking the time to consider this submission.

Yours Faithfully

Glenn Bridgland
