Dear Director,

Submission in relation to the Warnervale Airport (Restrictions) Act 1996 review.

I understand and agree that my submission will be made public.

The statement below represents my personal opinion pertaining to the act review:

I believe that the cap of 88 movements per day is totally unreasonable and would contribute to the current flight training operations being greatly restricted. This would make any flight training company unprofitable due to the limited number of students that would be able to participate in flying training. If air movements are restricted to 88 per day there is a very real chance that the aviation businesses at the airport will become unviable and close down. With no business income there could then be the concern that the aerodrome could close down and the local area would lose this very valuable facility. This airport has provided a valuable service to the Central Coast Community for many years in harmony with the local residents despite movements far in excess of the 88 nominated in the Act.. The aeroplanes that utilise the airport are classed as light general aviation and are all under 5,700kg. There are no jet aircraft using the airport and with recent developments it will not be too far in the future when electric aircraft will become popular with the general aviation community. Being the only light aviation aerodrome between Newcastle and Bankstown, Warnervale also provides transitting aircraft with an emergency facility if required.

Is the Warnervale Airport (Restrictions) Act 1996 (the Act) relevant or necessary?

The Act is neither relevant nor necessary.

- The Act was enacted to protect the community from large jet transport operations. The runway has never been sufficiently long enough for any jet transport aircraft operating in Australia.
- The airport is surrounded by terrain which makes it very difficult to physically lengthen the runway (wetlands immediately South, a major road and rising terrain to the North).
- Environmental zoning surrounding the Airport requires that State Government must consent to any lengthening of the runway.
- There is no economic case for jet airline or freight operations at Warnervale, as Warnervale is within a 2 hour radius of Sydney, Newcastle and soon, Western Sydney Airport, all of which cater to these operations.

If the Review concludes the Act is to remain.

Clause 2 of the Act limits aircraft movements to 88 per day in the event the runway is lengthened. The department has made a determination that the former Wyong council lengthened the runway, triggering this clause.

- The current flight training provider has operated for over 4 decades without being constrained by the movement cap and at the time the Act was put in place was regularly performed over 300 movements a day.
- Training aircraft regularly perform up to 20 movements per hour. Multiple training aircraft may be operating at once; therefore the movement cap may be reached within 2 hours or less of commencing operations for the day.
- Once the cap is reached, no other users of the airfield will be permitted to operate, save in an emergency.
- As the movements will almost exclusively be absorbed by the flying school, the Aero Club members based on the field and itinerant operators wishing to fly into Warnervale, including patient transfer and Rural Fire Service refuelling and positioning flights, will regularly be excluded from operating.

Clause 2 of the Act should be removed, or amended to apply only to aircraft above 5,700 kgs – a figure used by the Civil Aviation Safety Authority to designate large aircraft. This still gives the community protection from large and jet transport operations, but allows the existing operators to continue their current, low impact operations.

Warnervale Airport is the only aviation infrastructure servicing the 340,000 residents of the Central Coast. The Act is unique, no other airport of this type in Australia is constrained by such a limiting piece of legislation. The Act, and Clause 2 specifically, serve to heavily cripple the ability of the Airport to serve its purpose, and threaten to heavily restrict, or completely destroy, the ability of operators to continue a viable business on the site.

I respectfully recommend that the Reviewers take appropriate action through repealing of the Act, or amending its structure, to create a legislative environment which is fair and workable for the Central Coast community and the operators who rely on this important asset.

I thank you for taking the time to consider this submission.

Yours Faithfully

Ray Vincent
