Submission: I support removing operating restrictions on non-jet aircraft at Central Coast Airport and relaxing the restrictions for jet aircraft. Central Coast Airport is an underused economic asset for the Central Coast. Opportunities to develop it further should be explored and the current operating restrictions under the WAR Act are an impediment to this. The restrictions should be removed for non-jet aircraft and relaxed for jet aircraft to support the asset as a job creator for the region. Too many people have to leave the region to find meaningful work. I believe the Central Coast Aero Club is very good for the region. It is a unique training resource, a tourism asset and adds to the diversity of the region's social fabric. I understand why the current operating restrictions significantly threaten this community organisation. That is another reason I support their relaxation and removal. Residents like the man who puts all the material out with scaremongering nonsense about large airliners need to accept the airfield was there long before they were and that they should stop being small minded and dishonest in the lies they spread. The fact this person is so closely tied to a small minded councillor is frightening for local government on the Central Coast.
