2574

**Submission**

1. Please don't use the word "potential" on structure plans, or "investigation area" - it is infuriating. Is it happening or not? Is it proposed or not? Don't hedge your bets...tell us what you want to do! Don't dangle potential public infrastructure in front of people then take it away once the rezoning comes through. Either commit to it or don't! We need to know now if sufficient public open space and facilities are proposed in order to make an assessment of the merits of the proposal.

2. Why is there a block in the south-eastern part of the site (north of the Leppington rail line) that is half residential and half public open space? Just make the whole block public open space - don't be greedy! Give the people a whole block for their park - it should be surrounded by streets for passive surveillance.

3. The proposed public parks near the intersection of Campbelltown Road and the Cambridge Avenue extension would have pretty poor amenity because of road noise.

4. What is the purpose of the proposed Hurlstone land to the south of the Leppington train line?

**I agree to the above statement**

Yes
