Submission: I'm a former Parkes resident who grew up and schooled in the town. This is all very exciting and in general a wonderful concept which look as though is being considered carefully. However I do have a comment in terms of the proposed Land Use Table in the Explanation of Intended Effect document. The proposed Permissible and Prohibited Uses make zero sense as they're highly conflicting. As an example; Air Transport Facility; Permissible - Air transport facilities; heliport; helipad Prohibited - Airport. Commercial Premises Permissible - Commercial premises; retail premises; bulky goods premises, etc etc. Prohibited - Business premises (??) Educational Establishment Permissible - Educational Establishment. Prohibited - Schools. The examples go on and on. Hopefully this is not the actual Land Use Table which will be used, otherwise it will be terribly confusing and will render the whole thing worthless. However other than this, good job, keep it up and good luck...
