#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as a self funded retiree I am already eligible for an age pension but refuse to claim the pension while receiving a modest income through this Airbnb home sharing business.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds of dollars for a permit to simply share their home. For hosts who share their home for about 6 months a year, this is a significant barrier to home sharing and will make hosting uneconomical.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. **Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because in my area, it is fairly difficult to find a long-term housemate with a reasonable price. I have been living in a two bed unit by myself for the majority of the time in the past three years.

Putting my spare room on airbnb provided me a different channel to effectively rent my room out from time to time. The little income received from the travellers or local visitors helped to cover a very small portion of bills. Surrounding cafes, restaurants and shops also benefit from this increased traffic.

In a current soft economic condition, stagnant wage growth, rising and unaffordable housing costs especially in Sydney, I feel disheartened and deeply saddened by the little concern that NSW Government have had for average household. I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it much harder and more expensive for me and others to make use of their spare room.

Anticipated consequences would be fewer houses or apartments would be eligible to be listed on the airbnb or it would be costly or troublesome to get it listed. The concept of gig economy is really about the mutual private exchange of services and monetary rewards that fall short from the commercial accommodation and traditional income distribution structure. Shouldn't government be more supportive and lenient to citizens who find an additional channel to contribute to the financial wellbeings privately and economic health community wise.

Thank you for reading my submission.

Regards,  
Qiong Tang  
33 Moruben Rd  
Mosman, Nsw 2088

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

To whom it may concern,

As a local Airbnb host for 4 months, I wanted to provide my feedback on the Government's proposed regulations. <https://www.planning.nsw.gov.au/STRA>

I'm from a new skilled immigrant family just settled in Sydney. It is not easy to start up in a brand new environment. Home-sharing helped us rely on our own efforts. We have never claimed any cent from benefit and we are always proud of that.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy". However, I am deeply concerned that the proposed rules will make it even infeasible for us to share our home.

Specifically, I want to comment on the following:

Per: Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, especially for the evacuation lighting systems.

First of all, I don't see any official data or reports supporting that properties for STRA are easier to catch fire than regular renting or residential dwellings. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests.

Moreover, as a strata-scheme property owner and owner corporation member, I understand how difficult, time-consuming and expensive it would be. Except for the cost of replacing the detector itself, according to the by-law, I'll need to pay even extra and go through a special resolution on an extra general meeting before any modification can be applied to the existing fire safety devices.

Of course, I understand that it's always important to do improvements for guests' safety. I'm already looking for batteries operated emergency lights which could be activated by siren and motion. I believe these products could provide the same protection as those smoke detector incorporated lights in the requirements.

Per: Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home-sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

Please be advised, I am not anti-regulation by any stretch, but I need fair and reasonable regulation. Generally I support the Government's approach of regulating this industry, however, parts of the proposals are just unfair.

Thank you very much for your time!

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I like to meet new people and share my local experience with others while making money to help me with the mortgage payment. The extra money I make goes toward supporting my retired parents, providing them additional cash to spend without digging into their limited saving.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it enables me to provide primary caregiving to my young children with a part time, home-based business. I have council authorised dual occupancy and comply with all zoning requirements. Being close to Sydney I have a lot of young families with small children come to experience a small, family run farm stay.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because the guests come to seek refuge from the busy hustle and bustle of city life, and they are able to enjoy the tranquillity and peace of a country village. They come mostly for two nights and are able to relax and walk in the National Park, view the wildlife and find pleasure in the simpler aspects of life in general.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host, this is my feedback on the Government's proposed regulations.

Airbnb provides me with quick access to insurance verified ID of people staying with me.

AirBnB is the legal upgrade from couchsurfing that I have been doing for 20 years. Before it was free to help people feel home away from home. Now thanks to Airbnb, my services can also help me pay my bills.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

AirBnB hosts are not hostels, and if the requirements are too high, you will just generate a black market...

Regulations needs to be "fair" and "supports the sharing economy" that can boost the global economy of the all country.

Generally I support the Government's approach, however parts of the current proposals are unfair and go too far in my eyes.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits.

For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing.

Maybe 2 permits could be created, depending on the income generated, or the amount of time renter per year?

Some people make it a full time business, competition to hostels. But others are just renting their room while they are away few weeks per year...

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – if my house is approved to be safe for me and my family to live in, if I can receive friends for free, then it should be the same for paid guests.

I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I have no other job, I need to support myself and my family. I was very happy to find Airbnb as a source of income. I meet new people and it makes my life happier and it takes me away from depression.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host, I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides an opportunity to share and showcase our community through utilising our holiday house.

The village of Mt Victoria has less than 1000 residents and the population has not substantively changed in the last 120 years. About 65% of the houses in the village are holiday houses with most residents coming up from Sydney. The houses are left vacant when not used, and so there are few employment drivers in the area apart from the local school and services. Inviting people from Sydney, interstate, and overseas to stay in these homes has strong community support - the local laundries, restaurants, hotels, garages, supermarkets, orchards, vineyards, wedding destinations, weekend markets, day spas, and other eco and boutique tourism providers benefit. We promote national parks, Jenolan Caves, and sites from Wentworth Falls to Oberon.

The argument that Airbnb hosting detracts from a sense of community is thus manifestly untrue, particularly in Mt Victoria, where our community depends on tourism as a lifeline.

To impose the same legislation on communities such as Mt Victoria as are imposed on inner-city units ignores the unique circumstances of the village. It is a complete misunderstanding of the economic context and community situation of small villages such as Mt Victoria, where the support is great for any form of tourism or visitation.

The BMCC has not consulted with the 600+ community of Mt Victoria, nor given them any voice in its 180-day prohibition of Airbnb.

A further important point is that Airbnb houses are assumed to be more dangerous because the guests are not aware of all the intricacies of the house and the area, i.e. safety concerns. We operate by forwarding guests in advance, full instructions on how to operate each appliance, how to enter and exit the house, local hospitals, doctors, dentists, and safety services. We also ensure guests are advised of the sensitive nature of the local flora and fauna and are provided with comprehensive bushwalking advice developed and made available by local experts. We also purchase many copies of these guides for our guests.

We are immediately responsive to guest requests and needs by phone and have a team of reliable local builders, plumbers, electricians, and tradespeople who provide services to the house.

We have spent many hundreds of thousands of dollars to both comply with Council standards, and to meet high guest standards to enhance the guest experience: providing panoramic valley views, architect-designed living, custom made safety railings, accessible staircases, ducted RC systems, and environmental standards.

We have a number of people in our community who are elderly and who have been unable to sell their homes to be with their children in other places. Some of these houses have been on the market for over 2 years. We cannot consider purchasing these houses for future holiday rentals with this current threat of punitive legislation hanging over our head, as there are no other growth drivers in Mt Victoria.

I would love to see the community of Mt Victoria consulted regarding this legislation as I believe I have the support of the vast majority of local residents in providing the very best accommodation for guests to the area.

Any time a local representative wants to go down the main street of Blackheath and walk into the laundromats or

the holiday rental businesses, they will see a very large part of the small economy is based around holiday rentals. I personally abhor the idea that we should be regulated other than by our guests and their reviews. I believe our guests should be free to choose where they wish to stay and how they wish to holiday.

I am happy to meet in Mt Victoria and show BMCC and other government representatives the village tourism opportunity and, having lived in Mt Victoria for the last decade, I am a vocal advocate of the area and its needs.

I understand that the Government has made commitments to support “fair short term rental accommodation (STRA) regulation that supports the sharing economy”.

I wish to comply with any future legislation that includes housing occupation certificates, rules on overcrowding or diminishing the guest experience, and any rule that considers the needs of neighbours. But, this should be balanced against the needs of the people of Mt Victoria and the benefits to them of using these largely empty houses.

Specifically, I want to comment on the following:

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it’s safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don’t want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. **Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

Hi Alex!

Thanks for all the work you do for our community.

(You know me as Maggie via the CLOSE campaign but I am using my real name for the submission.)

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

We host a part of our home on Airbnb full-time, because the cost of living in the city is painfully high and our home is large enough to share. We would not be able to stay in our current home were it not for the Airbnb income. We declare every cent of the revenue and essentially run it as a business.

Doing this enables us to stay in Darlinghurst and send our kids to Sydney Secondary College Balmain. It also enables us to stay close to my 83 year old mother and help her stay in her home in Potts Pt.

We are fully tax compliant and spend around \$5,000 per year with local businesses on supplies, furnishings and trades people for the rental. We also recommend local businesses to our guests, including restaurants, shops, barbers, entertainment venues and other local attractions. The net income we earn, is spent, mostly in NSW on things and services which we couldn't otherwise afford. More cashflow in the economy.

Whilst I appreciate that legislation and regulation has to keep up with the technology driven changes in how people do business, I am deeply concerned that the proposed rules will make it harder and more expensive for us to share our home and will potentially mean we have to move the family out of the area which we have lived in for over 20 years and which is our home.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. An expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. Also see below re lighting etc requirements will will make getting a permit very difficult and expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to make costly alterations, such as expensive lighting/fire systems, in order to continue hosting and therefore stay in our home. Airbnb and hosts are not purporting to provide hotel standard accommodation and therefore should not be held to the same fire safety standards. I am actually offended that the government is effectively saying the systems and standards currently in place for residents/rate/tax payers are inadequate for tourists who should be offered more protection..

It also feels like a convenient distraction from the issue of the state government not providing adequate public housing for those who have no income and can't pay market rent. Shutting down Airbnb listings like ours won't help those people. The listings will either not be available to anyone outside the family, or they will be rented out on the old-school rental market on 6-12 month leases. If the goal is to free up more mid-tier accommodation for those with incomes, will I still be required to install lighting and fire systems and evacuation diagrams? If no,t why not? It's not

logical that short term renters should require different standards to those who rent for 6 or 12 months. I am fine with guests having to acknowledge that they will be staying in someone's home (gasp!) and not a hotel, and hence different fire safety standards apply. Guests should be able to make this educated choice. Not everyone wants the hotel experience.

The other possibility is that onerous systems will push listings to platforms like Facebook where unscrupulous landlords are packing several backpackers or migrants to a room and charging a fortune, all cash based. Onerous and prohibitive regulation won't make it any harder to do this. It is more beneficial to support legal and tax compliant hosting via platforms such as Airbnb which support data sharing with governments.

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. I would like to know what benefits the registration will offer and to whom? I feel strongly that hosts should provide their TFN to Airbnb and Airbnb in turn should send an annual 'Payment Summary' to the ATO for tax compliance purposes. This would provide a level playing field and ensure that hosts are not evading taxes. Taxes which the government can spend to benefit the community. I can't see much benefit in registration with local or state government.

I would only support a simple and cheap system such as the one in Tasmania, a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support a Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the draft Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform. This is already working really well.

In summary,

Please work with the other MPs and the community to develop fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want prohibitive home sharing rules and expensive planning requirements, and registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is a means of generating much needed income to supplement my husband's pension and my loss of income. A series of events over the last 2 years were financially catastrophic for us which has included:

- serious ill health
- few job opportunities in a rural area with little income potential in spite of years of professional contribution to this community as Director of Monaro Early Intervention Service
- loss of assets and mental health issues which have resulted from all of this.

Hosting our house on airbnb has returned a vital sense of purpose to our lives, a small income source that is making the difference between survival and losing everything, and most importantly a sense of hope and reason to live.

We have only been hosting since the beginning of July and it has been a powerfully positive experience. We have hosted many different people from many different countries and shared our home, this beautiful snowy mountain region & the wonderful experiences of this natural environment, nature & ecology. The feedback from guests has been of the highest recommendation. Having the opportunity to stay in a home and experience not only the magic of this rural natural setting but also the opportunity to come together and share interactions, stories, and cultures is beneficial for guests & hosts. What airbnb offers is truly unique. This is reflected in the significant increase in the number of people visiting regional NSW and staying in airbnb. Obviously airbnb is meeting a need that other tourism operators are not. The current regulations being discussed for implementation by the government will have negative repercussions and in its current form make hosting untenable for many hosts.

With the increasing number of pensioners every year and burden on the tax payer system it would seem appropriate for government to be looking at ways to encourage active pensioners to seek supplementary means to generate income, like airbnb hosting. This would alleviate some of the burden. It seems timely for government to look at potential ways to address a growing problem rather than place insurmountable hurdles in the way.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows us to top up our income and provides a cheaper option to hotels for guests.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. **Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations, some of which concern me greatly.

I host on Airbnb because it has allowed me to earn an extra income which has been incredibly helpful as I live in a regional town and work here is seasonal. I also really enjoy it - its a wonderful way to welcome visitors!

As part of hosting, I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism which is so important in a town like Byron Bay.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

I strongly oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts like me who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

I do support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

I think that often, hosts are not heard as all the press seems to focus on the negative voices. I attended an Airbnb meeting here in Byron Bay which was sabotaged by people complaining about holiday letting in Byron Bay. I feel that compromise is the way forward but many of those in opposition aren't prepared to even open a discussion. They are just negative and want to turn back the clock.

There are so many benefits to home sharing to many people across the shire! It has created jobs and helps people pay their mortgage! Some regulation is required, as listed above, and most hosts agree about this.

Why not start with baby steps rather than sweeping changes that would over regulate, be costly and unnecessary.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

Thank you for reading my submission.

I host on Airbnb because it provides my family with the ability to recoup some costs from our huge investment. As we are self employed, we don't have much superannuation. Our Airbnb house will become our super, when the time's right.

As a Professional Property Manager I understand there can be issues surrounding short term rentals but also know that in my AirBnB area we have generally very few problems.

As a Property Professional I agree with the need for high standards in terms of safety, security and neighbourhood concerns. At the moment, each guest decides if they accept the safety and security of any property they choose to rent.

If you make Airbnb owners jump through huge compliance hoops there will be a massive hole in the local economy of many small towns and villages which rely on tourist trade. We will lose precious income and no longer be in a position to maintain our investment, which of course then has other flow on effects for us personally as well as for our local community.

While I can see the need for regulations, I think the current proposals are totally off the mark and have been created from a place of reaction rather than pro-action. The whole point of short term accommodation is that it's simple and easy for both hosts and guests. It's what the industry thrives on and if you change that, you will kill our (small, hardly big business - industry.)

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an

ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

My wife and I are retirees and as Airbnb hosts, this gives us a way to augment our income so that we can self-fund our retirement. We also live in the Pittwater region which is not well served by hotels, so AirBnB provides an effective option for the many visitors that want to enjoy our area. This is important for our local businesses, many of which are already struggling because there are so many restrictions placed on them (eg very limited parking, high rents, limited retail premises etc).

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. We have had a very positive experience with AirBnB over several years and feel that a very sensible and viable accommodation option that is being slowly strangled by a small number of vocal detractors.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it means I can be independent and pay my own way in life as well as contributing to the economy. I am a 60 year old widow and without it I would be just another unemployment statistic.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as a retiree, I enjoy the interaction with guests to our rural town together with the opportunity to encourage those guests to enjoy and exploit the local attractions and businesses. The income generated by hosting is not the main reason for undertaking that but it does help to supplement my superannuation monthly pension.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

Dear Mr Griffin

I am an Airbnb host I wanted to provide my feedback on the Government's proposed changes to the regulations. I live in Seaforth and have a holiday rental property in Berry as an investment and source of income for retirement.

I host on Airbnb because I choose to do short term rental rather than long term. I love the experience of providing a lovely holiday experience for my guests. Berry is a very popular area for weekend escapes and school holidays, and hosts thousands of visitors every weekend.

There is limited alternative holiday accommodation in the Berry area other than the many holiday cottages in the area. There are over 200 holiday cottages, which are booked every weekend throughout the year. The alternative to accommodate this number of people would be large hotel complexes which would spoil the character of the area.

People stay in my house because they want to have more space and have a kitchen, because they have children or pets, they are a group and want to be together, or simply because they don't want to stay in a hotel. The visitors to Berry give economic security for local cafes, restaurants, shops and other businesses I use to provide for my guests. I employ a local cleaner and the laundromat. As a result Berry is a thriving town compared to many country towns.

I am concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I oppose the requirement for costly permits which may cost hundreds or thousands of dollars for a permit to share our home. This will end up making holidays across NSW more expensive. It will also cost the government money - as a business expense it is tax deductible.

I do not want to alter my home to host. I have renovated recently and it complies with council regulations which should provide safety if either I am living there or my guests.

Thank you for reading my submission.

Regards,  
Rose Smith  
78 Harley Hill Rd  
Berry, Nsw 2535

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I simply can't afford the total rent of \$700pw on my own!

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because... I have a beautiful house with much spare space and as I am now retired, I wish to still make some income so I don't have to go through all the ridiculous hurdles to receive aged pension. I love to host and look after my guests personally - something lacking in other hotel accommodation. I offer far more quality and value for money. I have all safety issues covered.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation,

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is the only way I can hold onto my own home and at 63 there just aren't any employers willing to consider someone my age as an employee never mind pay them a wage that can sustain the cost of living.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it helps me to pay my mortgage. I have a fully self contained 2 bedroom apartment on the bottom floor of my house and use this to earn extra income to help pay the mortgage. Without this additional income I would not be able to afford to own a home. I have at times had permanent tenants in the apartment but they caused so much trouble - failure to pay rent and utilities, noise complaints, rubbish on the property - that we had to stop doing it.

We have never had any issues with any visitors, and have never had any complains or issues raised by any of our neighbours. In fact some of our neighbours make use of the apartment when their family and friends visit.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I like to share my holiday homes at Lower Portland NSW and Toogoom QLD with other people for them to enjoy what the region offers. It boosts the local economy by bringing in tourism dollars as people use the nearby public facilities and shops, cafes, supermarkets etc. People also go to the local tourist attractions. In Lower Portland, people go to wineries, farm gate trails, art galleries, national parks and walks which I let them know in my Welcome Kit and also supply brochures provided by those operators. In Toogoom, people go to Hervey Bay, Fraser Island, whale watching etc. I provide information about what they can do while in the local area.

The bookings I receive enable me to maintain my properties and meet the running expenses (eg electricity, water, rates, mortgage, insurance etc).

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I believe there is a need for apartment style holiday homes on the Northern Beaches area as well as I enjoying meeting people from all of the world.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

Due to family circumstances (my sister had triplets) i had to move to Wollongong, my original home town. Rather than move out of my unit completely and put my furniture in storage I chose to host on Airbnb because it gave me the flexibility to still be able to stay in the unit i love, keep all my furniture and belongings but also share the place and location i love with travelers. As an avid traveler myself i know the option of using AirBnB is such a great experience and opportunity to really see a city from a local perspective and enjoy hidden gems like local cafes, shops etc that really help the local business and community.

Also moving back to Wollongong to support my family i had to take time off work, so Airbnb hosting became an economic lifeline (like it does to most of the AirBnB community) to help me pay my mortgage and bills.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my rental property in South West Rocks doesn't get booked enough through the local agent (we use both Airbnb & agent). We have a property in Sydney which we can't use personally on a regular basis so we do a little Airbnb renting to help with costs- the managing agent is aware of this situation.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb for these reasons:

1. We paid about 25% more for our house because it had the potential for facilities for extra accommodation for paying guests.
2. We bought this because we are retired and our superannuation is not enough to live on and we don't want to take out a pension or Centerlink.
3. Also we have a son with severe mental health issues. We heavily subsidise his living and medical costs as the mental health system cannot support him fully. This costs us more than a thousand dollars a month and as he gets older the cost it is steadily increasing.
4. If we have to pay for expensive permits and do expensive modifications to operate these facilities we will not be able to cope.
5. Our guests support the local businesses like restaurants, cafes and transport here in Bangalow and the Northern Rivers as our accommodation does not provide cooking facilities and we do not provide meals.

I can only think that you are doing this to stop subletting and houses being bought to rent out without the owners residing in them. To counter this it would be better if you passed a law stating that the AirBnB owner must proof that they reside in their homes permanently while renting out part of their homes to Air BnB. Or if the owners are residing there part of the year then they should be restricted.

Please consider our situation and our submission to oppose these restricting new laws.

Peter and Gill Sutherland.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

## STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

## Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,  
Peter Sutherland

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I believe it brings a competitive edge to the short term rental market. It also brings tourism dollars to the South Coast area. My neighbours are aware we are Airbnb hosts and are comfortable with us hosting guests.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I think you should listen to us. Australia is one of the most over-governed countries in the world. A German visitor to us recently said, 'Australians have so many RULES!'

I host on Airbnb because it is another source of accommodation for people visiting Dungog, because I love showing off our town, because the people Airbnb send (due to their incredible system of cross checks) are always lovely. I recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I can't afford to spend money following some new 'rules' that the Government thinks up. Airbnb's system is so excellent they shouldn't be necessary. I oppose the unprecedented requirements to introduce red tape. If my house is safe for me and my family to live in, it's safe for my guests.

Because I already carry out the following, I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

Thank you for reading my submission.

Now it's over to you to support us, and our tourism industry.

Regards,  
Lisa Mylchreest

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host in Armidale, NSW, I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because of the love I have for sharing our farm with Australian and overseas tourists. Farm education is more important than ever, and it is a passion of mine to offer unique experiences for young and old alike. In addition, the diversity of this form of income to our farm business has been crucial to our survival on the land through this record-breaking drought. We couldn't survive without it.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I encourage all my guests to patronise the local cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my wife and I are preparing for our retirement part of the planned income being our Airbnb rent. Since we first started renting we have always fully declared our income for taxation purposes so have tried to do the right thing at every point. Putting unnecessary Airbnb "registration" or other NSW government burdens upon us will simply make it more difficult for us to earn a retirement income. If we can contribute to our own retirement funding in this way then hopefully we can minimise our need to seek government welfare funding.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because the additional income supplements the income I earn from my employment.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

I feel not only have an income from the services but offer an alternative to travelers to benefit from staying with locals.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. I feel strongly against the government monitoring my every move. As we are already sharing our home. It is somewhat instructive again and again.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I would like to ask the government what assets have they made available for sharing with visitors? Especially their own premises???

Generally I support paying Gst on services I provide, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because the Wingecarribee Shire, NSW, suffers from a shortage of tourist and wedding accommodation. Entering this niche market allows me to contribute to the Shire's economy and to rent my property to achieve retirement income.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I haven't worked since 2014 and need an income. It's pretty clear the Australian government doesn't want to pay for unemployed or old people to survive so if I didn't make money from letting the unused bedrooms in my house I'd be left high and dry.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

Mainly: It creates holiday tourism for Toukley on Central Coast, Offers short stay holidays to Sydney families only 1hr north of Hornsby and is located on the lakes, a holiday destination.

I help investors lease their holiday home & share it with holidayers from Sydney.

I also run a home (real estate) business & rely on the income to support my family, as a self employed member of the community. It supports food & clothes to raise my children

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

**Categories:** emailed to DCS, David submissions, Air BNB run

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is an effective platform that provides an alternative and cost effective booking service to both the guest and the host.

Where other platforms charge excessive fees for providing the a similar booking device.

I live and provide for 2 children in the small south coast tourist destination town of Kiama NSW. This town thrives on being a tourist destination as well as place for retirees to settle. It is a small industry that is sustaining itself through a variety of natural attractive environmental features, rain forests, bush and beach walks, surf beaches and a growing cultural and sporting event calendar that is underpinned by the providing of affordable accomodations.

Short term holiday rentals are an essential part of this vibrant communities ability to sustain itself. It brings money to the community, shops and its culture.

We have small festivals and tourist activities that rely on the short term holiday rental market to house the incoming tourists who frequent our restaurants, cafes and shops whilst attending the various cultural, sport or tourist activities.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to manage the portfolio of homes I have in my care.

i live locally so I am on hand to answer to any issues that might arise from a guests stay. The people who live near all my properties have my number or know me personally. And I scrutinise the guest enquires so there are no parties allowed at any of my properties.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive. This market is already shrinking with the retail downturn in the economy.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to properties before hosting, such as expensive lighting systems.

Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations.

Put simply, if a property is approved to be safe for a family or individual to live in, it's safe for potential guests.

I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of houses and properties to be used for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected.

In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. As a result of this the tourism industry in these states has also boosted their individual economies.

In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints.

I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today.

We don't want punitive home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

Please see below my feedback on the Government's proposed regulations.

The air Bnb host started as a concept where people can easily and cheaply "share" their home.

I do not agree that investors, purchase properties with the sole objective of short term holiday rental, particularly if they do not even live in the area.

There should be regulations to ensure investors do not purchase or build private homes for the sole purpose of running a boutique hotel (full time holiday lett)

The Airbnb platform started as a means for home owners to rent out their family home or a spare granny flat for a few weeks/months a year.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for home owners to rent out their home.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

We are older and retired, it gives us a way of living above the poverty line. We deliberately built this house specifically set up and approved by council to run a BnB. If this legislation goes through we will become fully dependant on the aged pension. Is a way of saving tax payers money.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it has enabled our family to move from the stressful and expensive cbd of Sydney to a peaceful regional area where our 3 kids have space and we can grow our own veggies. Incomes for families in regional areas are so far below CBD incomes that we are forced to diversify our income to survive. AIRbnb has supported our family during our transition to regional life and supports the cash flow stresses we face as we build our own local businesses. That after 6 years now employ 12 local people on good wages. We are not the enemy and we reject the protectionist forces of hotel and traditional accommodation businesses that seek to minimise competition through over regulation of home sharing.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

I am a local Airbnb host and I use Airbnb as a guest. I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I like where I live, and since my children have moved my house has plenty of room - a self contained flat.

The income from Airbnb helps my wife & I pay our mortgage, and means we can stay where we enjoy living.

I have never had a problem with a guest or complaint from a neighbour.

I recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations. I have a four bedroom modern home in Maryville NSW

I host on Airbnb because it provides me with an opportunity to run a small business (with an abn, where I pay all correct tax), as I have a disability, and I would otherwise be on a government paid pension. I pride myself on being self sufficient financially. I provide families and friends an opportunity to stay together in one large house at a very affordable price. These guests spend money on shops, food and tourism whilst in Newcastle every weekend, as I am regularly booked with regional, interstate and international travellers who are attending events such as university / Tafe graduations, weddings, concerts, Hunter Valley, Port Stephens, local markets, conventions/trade shows, birthdays, sporting events and competitions, and local business, etc.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home rendering it unviable and forcing me to close my small business.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired

- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because the flexibility in both, personal accommodation and renting, provides my family and I the options of receiving rental income, and also using the property for our own personal use. It creates another valuable and more flexible form of real estate leasing.

I can only see benefits in providing travellers with an additional form of accommodation option. If the key risks to short term accommodation are managing disruptive behaviour by a few, then these proposed legislative changes are excessive and a significant burden on both owners and Government. I always thought the Liberal Party were for entrepreneurialism, a free market and innovation? These proposed legislative changes do not reflect those values.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because at the age of 58 I was made redundant after 28 years of service. I was unable to gain full-time employment and also struggled as a small business- Airbnb has kept me 'afloat'.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we wish to be self-funded in retirement and to support our local small business, e.g., cleaners, cafe, restaurant and tour operators.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my home is quite large, there is a large demand for short-stay visitors interested in sharing our home experience and providing this service supplements our living expenses.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as a single household dweller it eases the burdens of paying bills on my own. It's also wonderful as I can host other women, like myself that are solo travellers. I make amazing connections with likeminded women and offer a supportive and save place for them to stay. I do not host often, it's only time to time but i run my own company and when sales are tough this makes a big difference.

When guests arrive I tell them them all the local jaunts. I often will take them to a local restaurant or our Saturday market.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

It's a grave fear thinking that a government wants to control my own property. A fear of a future where we are 'policed' or 'over governed' in our own homes.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I have a lovely Cottage which has provided enjoyable holiday stays for families and other travellers for about 10 years.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism in Cooma and the Snowy Mountains.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for others to enjoy my unique property.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

My experience over 10 years indicates that any changes/regulation of my use of the property will not enhance the guest experience in any way, as I am already a responsible property owner.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because, since losing my job, i have managed to make ends meet by renting out a spare room in my house. It is not making massive amounts of money, but is better (yet not much unlike having a boarder or renter share) as I have my daughter staying with me, week about, so only have it listed for when she is not here. Something that can't be done by traditional methods.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is an effective way to allow others access to our holiday house (which is near a beach on the NSW Central Coast) when we are not using it. It provides cheap holiday accommodation which would not otherwise be available, and makes better use of housing resources.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I have an intellectually disabled sister that lives interstate and I need to travel there frequently to support her. When I do this I am unable to earn an income and therefore, I rent my home out to guests while I am away to financially support me whilst I fulfil my carer responsibilities.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I enjoy being a part of a worldwide community. I am proud of the work I do and the appreciation my guests show towards my efforts and the respect they show for my property.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. This is just over the top and let's not continue to be known as the nanny state of Australia. Let's be progressive and welcoming and make it a fair and easy system that respects the community but not to the extent to make it onerous on hosts. Are you trying to cripple the system?

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it generates more than twice the income that I could achieve if the property was in a fixed lease. Without this level of income I will be unable to maintain the mortgage repayments so will have to sell it. I enjoy two cleaners and another co host so their work would end also.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we love to share what we have to offer in friendship and community spirit.

The Airbnb host community depends on hosting as an economic lifeline. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for our guests to enjoy a home stay which provides friendship and comfort far superior to a common motel.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I live in a remote rural location which in essence is nature based tourism. There is nothing better to assist those that live in such areas and for farmers in times of difficulties, it is a godsend!

As I live in a remote location I depend on hosting as an economic lifeline to help us pay the mortgage and the bills. I do also recommend my favourite cafes, restaurants and shops so small businesses get a boost.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits especially for nature based experiences. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home.

For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical.

I imagine also for holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests.

I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

For many reasons, I host on Airbnb. These are:

I am a 72 year old male (nearly 73) whose earning capacity declines with each passing year. I need the supplemental income to maintain myself and my wife.

Current returns on cash investments at these very low interests rates have played havoc with our retirement.

In addition, our Airbnb activities provide a wonderful and meaningful existence for us - we meet amazing and interesting people who come to stay with us.

We have established real friendships with guests who come back to stay with us.

We enjoy sharing our experiences as migrants to Australia and we take delight in sharing the wonderful things we have found here in Australia.

All the above are important to the quality of our lives and in place of becoming doddering elderly people awaiting old age and death, we are alive each week with new possibilities. Do not underplay the importance of this for hosts like ourselves. As long as we are engaged in meaningful work and activities, we do not risk becoming a burden to our children and indeed to Australia.

We are active in recommending our favourite cafes, restaurants and shops in consequence of which, small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach. However, parts of the current proposals feel unfairly onerous and seem to fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

## Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides extra income to help my family with living costs. This is a brilliant way to pump money into local economies. It helps mums and dads like me.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I like to share what I have with others and people who live overseas so they get a unique experience.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

How different is this to renting out a holiday rental with an agency. I could do this with a local agent but prefer to use Airbnb as my holiday letting agent. The current proposals are unfair and directly aimed at Airbnb. If this goes ahead surely it will have to apply to all holiday rentals and short stays around NSW. Big mistake.

Also, you can home share with international students. Will the rules apply to this or is it truly just Airbnb hosts.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because Bondi is a tourist attraction and there are not enough hotels in the area to cope with the number of overseas or interstate visitors. I enjoy having visitors to stay and I am there to answer any questions about Bondi and Sydney. The laws that the Government is introducing must be fair as it will bring positive benefits to the people of NSW.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

Hi Tim,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I was made redundant and this is now my only source of income.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. As well I take overseas guests on a free 1-2 hour tour of our beautiful city to give them an idea of where to come back to and experience further.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform. I currently take out extra costly insurance to cover my guests.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because MY WIFE AND I DONT QUALIFY FOR THE PENSION. WE NEED THIS INCOME TO SURVIVE !!! IS THAT OK FOR THE GOVERNMENT? WE ARNT SAVY ENOUGH AND TOO OLD TO TRY TO COMPLY WITH MORE GOVERNMENT RED TAPE. PLEASE KEEP IT SIMPLE FOR ELDERLY PEOPLE WHO DEPEND ON THIS INCOME.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my family and I live in a beautiful area and have extra rooms available most of the time. We enjoy sharing our space, love and resources with other people. It is an additional income for us, as a young family and my husband studying full time it is a convenient way to earn a little more. We buy all our items to support local businesses and promote the local businesses and services to our guests.

The Airbnb host community depends on hosting as an economic lifeline to help us earn more than would be possible, considering I am a stay-at-home mum and my husband studies full time, plus we are caring for my elderly father who also lives with us. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. #### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it gives me the freedom and flexibility to manage my apartment as I wish whilst I travel away from home. When I was made redundant last year, this was the only way I was able to cover my mortgage for a temporary period and keep my home. I also love meeting and liaising with the many people I have hosted - they thoroughly enjoy the more personalised and local experience I provide them, especially as there are no decent hotels in the vicinity.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I want to enable less wealthy travellers to enjoy Sydney, and, at the same time, maximise my income by offering my spare room to travellers.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as a self funded retired person it helps me have a better life style and pay my bills. I also enjoy meeting people from all around the world and giving them a unique and enjoyable experience of Australia.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we love the area we live in and enjoy sharing with visitors to Sydney and/or Australia, why we live where we live. We are responsible hosts abiding by the current rules of safety (lights, alarms etc.) and security of anyone visiting our home and abiding by all financial responsibilities. Guests staying at our place are encouraged to support local supermarkets, cafes, chemists, gift shops, post offices and transport and encouraged to explore not only our area but further afield.

I believe that the implementation of most of these requirements is based on solely cynical merits on behalf of the government and local councils and at the behest of hotels and other commercial enterprises, most of whom have no connection on a personal basis with their guests in the way we do, and offering a genuine and comfortable and convenient place to stay whilst visiting N.S.W. Australia.

Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because the property is an SMSF and I am trying to create wealth for my future while providing affordable accommodation in a region where hotel rooms are in low supply during peak periods.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. **Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my wife and I both retired and it provides a small income, allowing us to stay in our home, which we own and have lived in for more 43 years. Without this we would need to sell and move - this we do not want to do for obvious reasons. It also introduces us to a host of people, who we would never meet otherwise. We love it and feel that a raft of regulations would most likely end our happy retirement.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host an Airbnb because I live in the midst of a beautiful tourist region in the NSW Hunter Valley situated on a golf course estate and zoned tourism.

I have a separate apartment in my home perfect for home hosting.

I am a retired self funded retiree and it is the only means of income that allows me to stay in and maintain my home.

I give back to the community by doing at least 30 hours volunteers work a week in this region... assisted in part by living where I am. I provide employment to a cleaner and recommend to my guests the wonderful attractions, restaurants, vineyards and services this region has to enjoy

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills and small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it enables me to pay off my mortgage while sharing my home. My Guests always explore the Local areas so it's a win/win for individuals and the local business communities.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because NSW property rental yield has reduced significantly due to almost unaffordable property. The only way for people to survive paying the mortgage is renting it through short term holiday rental.

Also many suburbs have seen alot less rental demand and has been vacant for weeks. The only way out for many people is to short term rental their property. However setting it up the first time is not a small amount of money and if you limit the number of days to 180days, it would be an issue for many hosts to resetup as demand for fully furnished apartment is not as attractive as non furnished apartment.

In addition, I own a cafe business in Surry Hills and from time to time are visited by tourists staying in the short term rental accommodation and I find short term rental would benefit many smaller local business like us.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I enjoy meeting and entertaining people, the Airbnb concept allows me to offer an alternate accommodation style to travellers, I live in Broken Hill so I also help the local community by recommending places of interest and places to eat, it also helps me financially to stay in my own property.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I want to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as a retiree I have no alternative means to increase my income by about \$2500 p.a. gross (1200 net) in times of low interest rates and world economic uncertainty. My income is less than half of average weekly ordinary time earnings (AWOTE) and it is hard to maintain a home in Sydney on that amount let alone do normal things like a trip to the cinema or a meal out. I am 71, thrifty and sensible but as I get older my house gets older and so house maintenance/appliance is required and Airbnb helps to defray those costs. I take a guest for about 40-50 nights p.a. at low cost to reach desired budget. As the margin is already so low then any added Red Tape costs will make me question its worth.

The other benefit of hosting to someone of my age is that it keeps me on my toes as it is quite demanding to service guests to guests expectations today, it also keeps my brain active re helping them with queries, sight-seeing planning for them, managing the finances etc, also the physical part of constant cleaning/washing laundry/gardening to maintain standards is far better than any gym workout to keep me active daily. Out of season I am constantly doing spring cleaning, house/garden maintenance if I want to maintain 5 star status for following season, so there are unseen benefits---better health, less drain on hospital services, no subsidies of drug scripts, no depression, less part-pension paid due to increased income and finally the incalculable---the goodwill generated for NSW by a warm welcome to Aussie/overseas guests who leave thinking it's a fantastic place due to my enthusiasm and hosting ability and who knows what that generates when they return home and talk about Sydney to their friends and family.

If I have to be subject to special regulations other than fire safety which is already met in my home for myself, I would not continue.

It is 2019 and the way business is done has changed, at 71 I have accepted Airbnb, Uber, online businesses run from people's homes, employees working online from home, jobs which can be done online sent off-shore for cheaper employees and it's time Government accepted this too. I pose a question to you--is there as much scrutiny of Uber drivers and their cars? I doubt it yet you allow people to put their lives in the hands of unlicensed-by-industry drivers and vehicles. Providing breakfast of regulated food supplies of bread, milk and butter for self-preparation is hardly in the same category is it?

I also recommend favourite cafes, restaurants and shops so small businesses get a boost from local tourism. I recommend public transport to city so cars not driven to city but parked at my property---every single guest has taken my recommendation even for visits to the Blue Mts. They listen to what I say as I am a local and after, always grateful they listened

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

## STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

## Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I have a mortgage that needs payment . On top of this is all the rates taxes etc. Soon I will be a pensioner and to rent out rooms under my roof will support myself , my sister and husband. My sister and husband are pension age but continuing to work to pay the mortgage. Until we reach negative interest rates as in Denmark where we have to pay less than what we borrowed Australians need Airbnb and other such strategies to repay our greedy Banks. Banks that commit fraud and are unethical but supported by Governments.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I want to provide a unique experience for my guests. Guests are attracted to my space because it is private, quiet, has a large outdoor space and has all the facilities they need for a getaway on the Coffs Coast. For example there is full sized fridge and kitchen, washing machine, undercover clothes line, undercover outdoor area, large bathroom with bath and separate shower, free wifi, netflix and quality linen and bathroom products. I also provide breakfast. My space attracts repeated accommodation to professional medical specialist and teaching staff as they find my accommodation is the perfect place to come home to at the end of a busy working day.

My Airbnb apartment is purpose built and council approved and looks out onto garden and bushland. I spent a substantial amount of money building the addition to my home.

The small income I receive from Airbnb enables me to pay for some basic day to day expenses. If I didn't have this additional income I would have to depend of the government for a pension which would equate to the amount I am making through Airbnb. I am a self funded retiree.

In this current economic climate, it's difficult to get a good rate of interest on the savings that I have. The income I receive from Airbnb helps in this regard.

I believe that Airbnb is filling a gap in the market place. Guests love the customer service that is available through Airbnb. As well, they feel valued because the host offers personable service and is available if their Wifi goes down or a light bulb needs replacing.

Guests have a wonderful choice of properties at different prices on the mid north coast however I would like to point out that as a host it's also very competitive. Since I started hosting in 2017, I have had to reduce my nightly price substantially because of the competition. If other fees are introduced so many hosts will be forced to discontinue providing this amazing hospitality because they are currently doing so on reduced rates.

Airbnb has provided a platform to bring more people into the Coffs Harbour area which is a tourist destination and it would be devastating to see this disappear.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my child has left home, I have a house and a mortgage that is too big for me alone. AIRBNB gives me an opportunity to meet new people from around the world and it assists me in paying my costs. It is not worth an enormous amount of money but it does mean I am not in the position many women of my age are in. They are unable to pay their mortgages are thrown out of their homes and the numbers of homeless women is rising as the government would know. This is an innovative sensible idea. I do agree with the points highlighted below.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

The initial purpose I host on Airbnb is to help with my rent and bills. But for the past year and a half the life of being a sharehome host has been a joyful experience. It has given me the opportunity to meet new people from different countries and backgrounds. Some of them have become great friends.

The Airbnb host community is one place that brings this opportunity. It is also an economic lifeline to help us pay the mortgage and the bills, small businesses to get a boost from tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my husband is unemployed, I'm employed as a casual and our home provides some extra cash to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it generates a second income to help support our family and is a long term real estate investment towards our retirement.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

Don't be another sheep!

Have some self-respect and do something right for once.

Make a real difference not just in this case either.

I don't have the solutions but more regulations on everyday people is not the answer. Making it harder to share is not a good thing

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I enjoy providing safe, comfortable, clean affordable short-term accommodation to young and older budget travellers. I also enjoy the brief social contact with guests.

I also recommend local sights and activities, cafes, restaurants and shops in my local area. Guests appreciate this and businesses are promoted to boost tourism - a large industry in the Blue Mountains.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. #### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides me a stable income. This revenue enables me to stay at home with my toddler.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. Dear Director, Housing and Infrastructure Policy,

I am an Airbnb host in a Sydney suburb.

I host on Airbnb because with a high mortgage, the increasing costs of electricity and water and no wage growth I am in danger of not being able to afford my own home.

I also know that hosts pay much higher taxes to the government than international companies which pay next to nil tax so we contribute much more to the economy.

I also host in an area that is not serviced by any commercial hotels so my guests spend money in the immediate area as opposed to guests stuck in tourist traps. Hosts in my area recommend our favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following as I believe most are being introduced as difficult and unnecessary red tape and road blocks to make it near impossible for hosts to implement. ( I have used pre written copy as a base and have edited it to reflect my views and my own experiences):

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. Holiday homes have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Private holiday homes fill a gap in the lodging market. Most of the hotels in existence and being built are in the 4-5 star market. Families may not be able to afford this level and welcome a more budget friendly 2-3 star accommodation, then spend more on food and attractions. This is much better for local businesses.

With the complex rules making fewer properties available on the market for families visiting Australia from overseas will mean much less tourist spending in NSW. They will travel to other states and countries that will suit their budget. Not every family can afford a 4-5 star hotel in the CBD so holiday homes fill a gap that will never be filled by commercial lodgings. Both in price AND location.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests.

I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb a holiday house in a small town on the NSW south coast. The support this provides to the local residents who clean, maintain, and repair the property and provide local services is essential for the small town economy.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I provide a unique service to families not available through the traditional hotel industry. I am deeply concerned the NSWgovt is seeking to overregulate and spoil something that has been going on well before Airbnb even came into existence. This over regulation would cause a significant decline in regional tourism and economic activity my region of the blue Mountains. This area is dependant upon this industry and the range of alternative hotels here is very poor and not able to offer the same product

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have a beautiful home which we love sharing with others.. We would have to move as the rates are so high.. By having Airbnb guests we are able to stay in our own home and not move .

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I have chronic health problems that limit how I am able to work as I am not eligible for health benefits.

I also see first hand how local businesses are supported by my guests, especially during the week in the daytime when residents are working.

It's been an issue for a long time that there is a lack of accommodation in Sydney when popular events are on, if people have no where to stay they can't come to Sydney.

No everyone is built for backpacker accommodations.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because this is a right we have always had in Palm Beach. My parents rented our holiday house out back in the 1960's and 70's. We enjoy sharing our home and offering hospitality for people to experience living in this beautiful district. There are many wedding venues and beautiful sights that depend on this type of rental property as there are no motels in this area of Sydney. Airbnb is a great way to share our tourist sights without inviting overdevelopment.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

James, it's Sam.

I am a local Airbnb host and I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I had no choice but to seek rental avenues that weren't some lazy agent who didn't care and didn't fill my calendar with bookings as they promised. I would have had to sell my flat if it wasn't for Airbnb coming to my rescue.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,  
Troy Gercek

**Submission**

11 September 2019 - Tim Hochgrebe - Byron Bay NSW 2481

Submission in response to the 'Short-term rental Accommodation - A new regulatory framework' Discussion Paper.

At present, STRA is regulated differently (or mostly not at all) in different local government area (LGAs) across NSW.

It has to be understood that different councils also have different requirements. Small regional communities might

be happy to have visitors come to their area and contribute to their economy in a responsible fashion and have no issues with buck's parties, weddings and schoolies.

However, some communities with a high influx of visitors on an ongoing basis might need a very different approach. Especially if there is already a thriving, licensed tourism accommodation industry present.

Byron Bay is a great example where it is going wrong. Just like other popular places such as Margaret River in Western Australia, Tasmania, Amsterdam, Venice, Barcelona and New York, Byron Bay struggles with a partially unlicensed tourism accommodation industry.

Byron Bay actually already offers a variety of licensed accommodation styles ranging from luxury resorts to hotels, motels, serviced apartments, backpackers and B&Bs. The licensing of those business is challenging for the proprietors. They comply with fire safety regulations, they pay commercial council rates and contribute to the infrastructure maintenance and upgrade through their licensing.

The Byron Shire Council has a DCP and LEP regulating the accommodation industry. It is clearly stated what requirements are needed, business owners go through the process and there are and should be areas where things are allowed and other things are not allowed. Nobody wants a holiday apartment block in a purely residential zone - that is not why people buy a house in a residential zone.

With the advance of ease of listing any kind of building (!! garage, sheds etc) for tourist accommodation purposes this has completely gotten out of hand in Byron Bay. Dwellings built to accommodate a family now host twice the number of people it was intended for most of the time, putting pressure on existing infrastructure such as drinking water and waste water facilities. In addition those houses do not offer adequate parking for the extra cars.

Houses are being purchased and sold with the sole purpose of letting them out as holiday letting places, which inflates the purchase prices to a level that no one can afford to just live in them.

Importantly, the rental pool is shrinking and existing rentable places are at a premium. Ironically, some people that do rent, sub-let their place and move in with relatives when they receive a booking.

Backpackers, who are particularly vulnerable being from overseas, have been charged \$500 per week in a shared room in a house!

The houses built with a DA for a 'residence' should be mainly used for this purpose.

NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"

Neighbours of those residences used for unlicensed holiday accommodation - who thought they had moved into a home in a residential street - suffer from sleep deprivation and stress as there is generally no host on-site. Council can't do anything as it is a residential house not a business, police might not always be able deal with the noise issues long term. All they can do is visit ask the visitors to turn it down. However, the next day with new people staying, the neighbours have to go through the whole process again. Hearing the people arrive, music starts but it is still early and then wait until it is past 10 pm.....

Byron Bay tried self-regulation by the Holiday Letting Organisation (HLO) who funded a Holiday Letting hotline. The idea was that a host would get three strikes and they could no longer operate. It doesn't work. The hotline recommends anybody who complains in the middle of the night to call council and report. Council, the next day, says to call the hotline or the police. The police has better things to do as their hands are tied anyway: every time it is a different person causing the noise, so no one can be held responsible. Neighbours give up and sometimes try to confront the perpetrators, resulting often in verbal abuse and revenge vomiting, vandalism and littering by the tourists who feel entitled to have the time of their life.

The next week those poor people seize up when they hear the roller bags coming down the drive way next door.

The proposed Code of Conduct for STRA sounds admirable, but to have an exclusion list for hosts and guests is not realistic.

As owners of licensed accommodation, we have seen a significant decline in viability of our business. Before we even open our doors we have a long lists of costs to keep our license current and up to date. Unlicensed premises are able to charge a much lower fee without having all those costs and there is no GST they need to pay despite offering exactly the same service we do.

Surely, the government is missing out on an enormous amount of GST they can't collect.

The number of people staying has not increased, instead people expect to pay less. Our prices are back at what they were 15 years ago! We can't afford staff anymore, we had to let them go.

Many of our colleagues have left the industry, their business being considered worthless. Why get a DA if you will be restricted by the number of people that can stay, have to provide off road car parking, disabled access and pay extra to top it off?

As the unlicensed operators do not pay any contributions, do not have to pay for fire inspections once a year or increased council rates it is impossible to compete with the low prices these rogue operators can charge.

AirBnB uses the 'average' of incomes to show how little money is made by individuals, but they have not published the median or spread of money made. If one person can have 30 odd places and uses so-called 'super hosts' to manage them, you can't tell me that there is no money to be made.

Of the many, many listings in the Byron Shire there are 1331 listings for whole houses/apartment with only 359 landlords, which means that those hosts are not just your regular mum and dad trying to make an extra buck they are full blown commercial operators.

To suggest that these operators can operate 365 days a year is a ridiculous proposal. The hosts/landlords know it is worth their while, why don't they go through the process of obtaining a license. They had their go at seeing if it works for them financially. They could even do a business plan!

Even if Byron Bay would get a 90 day limit it would be not workable for our community. This would still be 45 weekends. This would still be the whole month of January and then 2 more months.

And what does it mean 90 days? Can the property be available for 90 days in total or does it mean 90 nights booked? What if there is a cancellation of 4 days, can that place be re-booked for another 4 days at another time? Can they keep the cancellation fee? How will this be monitored? What about direct bookings? How would this work? How can you expect the on-line booking platforms to keep track on this and be honest about it if they make a 20% commission on each booking.

This does not provide any clarity at all!

It is understandable though as politicians - for example the Deputy Premier - have their own property listed as a holiday home as well.

The proposed framework states that un-hosted bookings of 21 or more consecutive days will not have to comply with the applicable day thresholds.

If a family comes for a 3 week holiday and rents a house, the owner can do two lots over summer and still have 90 days for the rest of the year?

This certainly offers a loophole. Someone can just rent out their property to someone else for 6 months and they can sub-let it on an overnight basis. How is this going to be policed?

The fact that unlicensed tourism accommodation is put under the banner short-term rental is terribly confusing.

The overall proposal seems to have the attitude of “It is all too hard to police, so we are just going to allow it and pretend there is a system in place”. Meanwhile, our town is being taken over and no locals will be left. No staff available for restaurants, schools, the hospital, etc because they can’t afford to live here.

It is a fact that a regulated industry is being de-regulated, all for the short-term benefit of realistically only a few and the on-line booking agents. This is no longer about home sharing or someone letting out their holiday home on a few occasions a year.

## SUMMARY

- The proposal is that a regulated industry has been de-regulated and needs to be re-regulated, but is ridiculously unfair compared to the existing licensed businesses in that same industry
- Unlicensed tourist accommodation providers are not paying GST even though some of them supply overnight accommodation, breakfast, room service just like hotels, motels and B&Bs. They are not paying commercial rates and are not subject to Council inspections for fire safety and compliance
- The proposed Code of Conduct is not a realistic approach. It can not be policed and implemented. The process to bring awareness to hosts and guests about their unruly behaviour and solve the problem of loss of amenity to the neighbours that way is flawed thinking.
- Owners of a property responsible to the noise/interruption to daily life of their neighbours should be held responsible by law when rented out to tourist or visitors. That way there is clarity for the authorities, neighbours, hosts and visitors.
- If people/hosts want to rent out their homes/properties on a commercial basis to tourists or visitors, ie more than twice, thrice a year, they need a DA and contribute to the community as has been decided on by the local council. If local councils feel there is no need for a DA than let them do that!
- Our town of Byron Bay and surrounds and our business are severely negatively impacted by unlicensed operators. A maximum 90 night limit should apply to Byron Bay’s unlicensed tourism accommodation, but 60 days (or less!) would be much more preferable.
- We are not confident that the proposed reforms are realistic.

My experiences with AirBnb neighbours over the last few years has been totally negative. Our street is clogged with parked cars, our neighbourhood is divided, and the local Council will do nothing to stop this commercial activity on residential zoned properties. This is a destructive force for our community.

I oppose whole houses that could be for permanent rental, being used for Air BnB holiday accommodation. It is unfair when many many people in the Byron Shire struggle to find anywhere (affordable) to rent.

2023

**Submission**

Dear Sir/Madam,

In 2018 my community successfully motivated Woollahara Council to issue an Order to Cease short term letting of my neighbour's property. This is the only order that any NSW council has issued since the State government announced the review of short term letting.

I worked for many years as a NSW public servant in compliance and regulation. I am a very experienced investigator. I used all my training and knowledge to achieve an Order to Cease. After having gone through the process of investigating my neighbour's business and the behaviour of his short term tenants, I'm not surprised this has been the only order issued.

I would like to share with you the following insights and concerns:

#### A. Investigating Short term Letting

A neighbour lodging a complaint regarding short term letting is placed in the position of proving there has been a breach. The primary basis of complaint is proving that the neighbour has rented the home out for the purpose of short term letting.

A neighbour has very limited ability to prove the property is being let short term. The only way to prove it is to act as a private investigator and collect evidence by observation (notes and photographs). This requires diligence and many months of work to prove "short term letting".

The amount of time, effort and skill it takes to establish short term letting is extreme. Neighbours should not be expected to essentially stalk the neighbouring business to provide proof of short term letting. If a matter is lodged at the tribunal, the government should require platforms and business owners to provide booking and income information for the period of the alleged breach.

The business owners, real estate agents and rental platforms possess documents to prove short term letting. They must be required to provide that information to the tribunal.

#### B. Noise Complaints and Behaviour

The current residential noise regulations do not adequately address short term letting.

Our neighbour's property was let out for parties every weekend for months. The occupants would party every Friday and Saturday night; they would follow up with an after party on Sunday morning. This went on for months. The community was exhausted and frazzled.

We lodged numerous noise complaints with NSW Police. We discovered that noise complaints are of the lowest priority for local commands (please refer to NSW Police annual report). Their response was either very late or not at all. Police recommended that we take the matter to local court ourselves. We soon discovered that the level of proof required for an application was far greater than just general observations and video recordings. We were required to provide professional noise measures and to employ a solicitor to present our case. The minimal cost was approx \$15,000.

It is unrealistic to expect a neighbour to bear these costs. Therefore, business owners should be required to register any parties with police (there is currently a process available) and parties should be limited to 2-3 a year (which would reflect current home owners use).

Limits should be set on the use of out door areas and amplified music. Current accommodation providers set limits; it is reasonable to expect short term let business owners set similar limits.

The current noise regulations were not written to address short term letting in residential areas. Therefore, the new regulations and code of conduct must address the short fall.

#### C. Complaints to Owners, Rental Platforms and Real Estate Agents

Naively, we followed the complaint procedures expecting the situation to improve. Disappointingly this did not occur and we forced to pursue the matter with council. This was particularly galling as all parties claimed to endorse the Voluntary Code of Conduct.

After council had issued the Notice to Cease, we lodged the notice with the various Rental Platforms and Agents with a request to delist the property. We were advised that they could not respond to our complaints due to privacy laws. The property continued to be listed.

Eventually, the business owner delisted the property after the council threatened fining the owner.

All business stake holders should be held accountable for compliance. Fines should be issued at a rate that is commensurate to the value of the property.

Ours neighbours property is valued at \$6,000,000 and his rental income per week was \$10,000. A fine of \$20,000 would not be a deterrent.

Airbnb's current value is conservatively \$80 billion plus. A commensurate fine must be applied to ensure compliance.

#### D. Code of Conduct

In our experience, a voluntary code of conduct was worthless. It may well be, but not as a voluntary

The only reason short term letting ceased was because regulatory compliance was required.

Sadly, regulation is required. Because they cannot be relied on to "do the right thing".

Just ask anybody living next door to a poorly managed short term accommodation provider. Profits often get in the way of reasonable outcomes.

NSW residents should be protected.

I am happy to provide further information about my experience. Please feel free to contact me on 0424063289.

Yours faithfully,

Karen Plummer

As founder and owner of the holiday rental agency Sydney Holiday Rentals Pty Ltd I wish to register the strongest possible objection to the code of conduct and proposed 180 night cap. This is going to totally decimate this industry in the same way the Lockout Laws have decimated Sydney nightlife. Thankfully those laws are now being lifted but not before major and permanent damage has been done to the worldwide reputation of this city, to local businesses and to local people who worked for and used those businesses.

Having worked in this industry for 7 years I know once the cap is introduced there is simply no way my business will survive; your legislation will run me out of business and force me to make the staff that work for me redundant and me unemployed. Whilst your legislation makes an exception for bookings of 3 weeks or more not counting towards the cap this had anyone contacted anyone with significant experience in this industry to ask what percentage of

bookings are for 3 weeks or longer everyone would have said these make up a tiny minority of bookings and there is simply no way the remaining nights of the year can be filled with these bookings. The idea of the 3 week exception was allegedly to help support a mobile workforce but this again is ridiculous; I ask the reader to count how many people they know who travel for work for 3 weeks or more at any one time. I wholeheartedly expect you'll struggle to know more than one or two people unless you're in a very rare and niche industry.

Our normal occupancy levels mean we will hit this cap in a couple of weeks over six months because we are good at our job and making sure we ensure our owners can meet the financial obligations relating to their properties and income needs. What this legislation does is force owners to make a choice. It kills the prospect of holiday rentals meaning they can use that avenue to ensure a property pays its way when they are not using it and forces them into long-term rentals (meaning they have to surrender having their own place in Sydney they can stay in) or sell the property. The alternative is to place the huge burden on them of having to cover the costs of the property based on income from only half the year because the fact of the matter is, direct from my own lengthy experience of managing bookings for 7 years, bookings of 3 weeks or more will never ever make up the remaining availability for the year. Anyone who thinks there is any chance of this is simply lying or has no direct industry experience. Bookings of 3 weeks or more over the last 7 years across numerous properties in Sydney make up less than 5% of our total bookings.

Whilst I appreciate some poor property hosts may allow guests to cause noise and nuisance my agency has had one noise complaint in 7 years from over a thousand bookings and this one incident was dealt with quickly with a simple call to the guest. We meet all our guests in person to move them into the property to ensure they know the proper standard of behaviour required of them and to ensure they seem to be reliable and trustworthy people. Instead of ruining the industry for all those in it what about making all hosts complete some kind of annual training to make sure they can manage guests better? If hosts fail to manage guests properly then by all means use a three strikes system to forbid them from managing property. The way real estate agents are managed by the government suggests far better ways of approaching these kinds of problems than what is being proposed by this code of conduct forcing blanket restrictions on all and suffocating the industry.

A better exception than the proposed 3 weeks would be that bookings of 1 week or more do not count towards the cap. When thinking about the lockout laws which decimated Sydney nightlife wouldn't it now be better to take a measured approach to dealing with the perceived problems in the holiday rental industry and start with gentle restrictions slowly increasing if needed rather than being heavy handed from the start? Allowing an exception for bookings of 1 week or more shows people protesting about problems you are taking them seriously without putting businesses like mine out of business which is inevitable with the current proposals. It reduces the regularity of the turnaround of apartments between departing and arriving guests which is what many protesters have been asking for whilst still ensuring owners can cover their costs and professional licenced agencies like mine can actually continue to operate in this field. I urge you to consider this strongly as it is the only vague glimpse of light at the end of the incredibly dark and depressing tunnel you are proposing to take us down.

Almost no one wants furnished rentals for more than 3 weeks, especially over winter which is when people will want to try to find longer bookings to make the most of summer demand for holiday rental bookings so the prospect of apartments paying their way once the cap has been hit is totally impossible. I've spoken to many rental agents in the field and they all say the same, demand for furnished properties for 3 or 6 months or more is a tiny percentage of the market and they actively avoid taking on these types of properties because no one wants them. I understand one key need which has led to this proposed legislation is the desire to increase the supply of properties to the rental market but what has not been considered is that the vast majority of the properties made available for holiday rentals are not the entry level properties that people are so desperately seeking.

Has the impact of this legislation on tourism been considered properly? Let me spell it out for you. This legislation means owners who wish to keep a property in the city that they use occasionally and have it still pay its way through holiday rentals (which is the only means of having a property you can use sometimes and still have it cover its costs) will no longer be able to afford to meet their financial commitments like before so they are faced with two alternatives, to move to long term rentals meaning they can no longer stay in a place they consider their home in the city or they sell the property. They will most likely be financially disadvantaged by doing either in the current market of low rents and dropped property sale prices. The reduced number of places for tourists to stay means prices of the remaining properties will go up, hotels will put prices up too because there will be increased demand

for their rooms both of which means visits by tourists get more expensive and more expensive visits means fewer will be able to afford to visit Sydney therefore reducing the available tourist dollars to be spent elsewhere around the city. Sydney already has a reputation for being an incredibly expensive city for tourists and this proposed legislation is just going to make that worse further damaging the reputation of this city worldwide. A drop in tourism and tourist dollars being spent will lead to issues for other businesses who are not making as much money anymore leading to pressure on finances and jobs and many other things. You must not underestimate the impact of this proposed legislation as it stands; it will strangle this city further in so many other ways that the government does not seem to have considered!

I also want to touch on how totally irresponsible it was of the government to make the vague announcement that it did many months ago that this legislation was coming. To have lived in limbo since that date, desperately waiting for actual details and useful information has taken a massive toll on my physical and mental health. Every day since the initial announcement I have felt worried, anxious, stressed and been unable to sleep properly knowing that with this hanging over my head and over my business my future was uncertain and it would be likely I would lose my business and my income. I've been prescribed sleeping pills, sedatives and antidepressants. How am I going to provide for my family when I lose my business because we can't take any more bookings and no one wants to stay for 3 weeks or longer? How will I be able to pay my bills? I'm not the only person feeling like this. The proposed legislation as it stands intends to rip the heart out of this industry taking away the businesses people have built and their livelihoods. The legislation needs to be better, it needs to make use of a licensing system like for estate agents (which I am by the way because I believe in doing this to a proper professional standard), it needs to not strangle this city, it needs to not make things even more expensive for prospective tourists, it needs to find a way to let people who live out of town keep their homes in their city that can still pay their way. You need to do better than this and go back to the drawing board!

Totally opposed to the Draft - it is a malignant toxic proposal that will further destroy residential areas. If you wish to inflict commercial party houses on me, then I see no reason not to treat you to noisy 3 am protests outside of your residence.

The proposals sabotage existing residential areas planning controls that restrict, but already allow, holiday accommodation in present Residential Living Zones to onsite managed DA advertised and Council authorised Bed and Breakfasts and Serviced Apartments, and will destroy existing authorised accommodation providers (which Council already gets few complaints about)

The proposals completely sabotage existing, and all projected State Government required, supply of residential premises - every state Residential Strategy would become invalid

The proposals will incite conflict between residents and tourists, with the likely result of violence, property damage

and arson - residents have to get up early to work, and babies need to go to sleep early. Tourist accommodation can not co-exist 1 metre from residential bedroom windows.

With only 5 Council Compliance officers there is no capacity for Council to manage Compliance even on the existing 2,572 illegal, presently Local Environment Plan prohibited, criminal holiday letting business developments in Byron Bay. And no capacity to to manage compliance over the Proposals certain increase of these business parasites that are already destroying residential areas and who are the main cause of BYRON'S PRESENT SITUATION OF NO AFFORDABLE RESIDENTIAL ACCOMMODATION FOR WORKERS, PENSIONERS, STUDENTS, OR THOSE ON HEALTH OR UNEMPLOYMENT BENEFITS.

While Byron has one of the lowest per capita, and household, incomes in the State, turning residential houses into illegal Holiday Letting tourist accommodation business' has made the price of Byron houses to be the most expensive in the State - a complete breakdown of social justice and social coherence.

There is no basis for you to place me as the first responder to non compliance, including noise, parking etc, - I'll work out my own response which wont comply to your completely deficient compliance regime - I dont believe in violence, and would actively engage against it, but who would care if every one of the present 2,572 unauthorized unlawful Holiday Letting premises were burnt by arson to the ground - I wouldn't.

Either you act for all the community, or be rightly treated as failing to quit your elected role, and be treated as an invalid body that has usurped your claim to be a democratically representative State Government.

Either you scrap this proposal or the public will move to shut these premises down, I have already raised the capacity with Council of using Councils Compulsory Acquisition powers to start buying these premises and turn them into social housing.

If you want to auspice these Residential Zone prohibited business, then resign from government and go and work for you criminal cohorts and put your defense of these presently illegal developers to the courts - you dont represent the residents of this State.

I suggest that consideration be given to amending S137A of the Strata Schemes Management Act as follows:

A by-law made by a special resolution of the owners corporation may prohibit a lot being used for the purpose of a hosted short term rental accommodation arrangement if the lot is not the principal place of residence of the person who pursuant to the arrangement, is giving another person the right to occupy the lot.

A by-law has no force or effect to the extent to which it purports to prevent a lot being used for the purpose of a hosted short term rental arrangement if the lot is the principal place of residence of the person who, pursuant to the arrangement, is giving another person the right to occupy the lot.

In this section, short term rental arrangement has the same meaning as in S54A of the Fair Trading Act 1987.

“Hosted short term rental accommodation” means the person giving another person the right to occupy the lot

must reside at the lot at all times, apart from absences for bona fide holidays, illness and emergencies.

The proposal will it is submitted enable good management and enforcement of by laws of Strata Properties.”

Object to the day caps of 180 days per year.

Either you support short term residential accommodation or you don't. Capping STRA at 180 only pretends to support it but actually undermines STRA On average STRA gives owners an extra 30% compared to what they would earn renting it out on a long term basis - so you're undermining the whole rationale of doing it in the first place. Besides which, what are owners going to do with the property for the other 180 days?

I can half see an argument for a 180 day cap for apartment blocks, where there are shared common areas and much denser living. But it seems arbitrary to insist stand alone houses should also comply. What you'll actually be doing is forcing owners to stay in the long term rental market and that is over interference in the market. The GIG economy

has well and truly arrived - incremental income is the new income - you cannot pretend that the world is not moving increasingly in this direction.

What is the intent for these new proposed regulations? Is it to curb STRA? Or is it to ensure its smooth running? These are the questions that really need to be asked.

Byron Bay

**Submission**

I want to register my concern of the current policy on short term rental.

In the town in which I am a community member we have a severe shortage of long term accommodation due to a high percentage of houses being used for holiday let.

This has a number of detrimental effects on our community. It causes a shortage of houses available for long term rent forcing rental rates to a near impossible level for normal working families or single people. This either results in overcrowding with people having to share rooms in order to reduce the rent(ie. slum landlords) or forcing people to live out of town and travelling unnecessary distances to their place of work. The ongoing effect of this is severe congestion on the roads into town (Byron Bay only has two entrances to town - north and south).

We have whole streets where there is only an occasional permanent resident. There is effectively no community in these streets. The knock on effect of this manifests itself in numerous ways.

Short term rental policy needs to take these situations into account.

These AIRBNB holiday house listings are ruining Byron Bay on many levels.

Residents have to put up with party houses in residential areas not in holiday zone areas approved by council.

Holidays Letting businesses in holiday zone areas are losing business.

Locals can't afford to live in Byron as all rental properties are becoming AIRBNB holiday houses.

Its a domino effect thats got to stop.

Please stop this in Byron Bay residential areas .

I request that there be a limit of 60 days for all residential short term properties in areas already inundated with holiday rental properties. The increased rise in unavailability of permanent rentals in the tourist sectors has dire consequences for residents who are part of the employed needed to service the peak seasons. There should be a bed tax implemented on all private residences that rent out a full house or apartment as is done in many cities around the planet that already have witnessed the negative impact of airbnb and other short term internet rental sites.

No tax on a room rented with the owners residing in the same residence.

NSW is out of step with locations all over the world. Major towns and cities are placing restrictions on Air BnB but in NSW the state government appears to have allowed the short term letting accommodation industry to write the rules.

The new legislation places a cap on days allowed for letting, where the host is not present, of 180 days per year or 365 days in regional areas. Byron was promised a 90 day limit in the run up to the last election but it is still to be approved and Council has to prove its case as to why Byron gets special treatment before it is approved. 90 days is still 45 weekends a year and, given weekend prices, this is likely not a deterrent to making owners return houses to the permanent rental market.

Unlimited days - no caps: Also, a loophole has appeared in the proposed regulation: a booking for 21 or more consecutive days will not count towards the limit when a host is not present. So a cap is not really a cap!! This

means the true extent of short-term letting can never be monitored or measured. A host could add as many 21-day letting periods as they want and it would not be counted in the annual total!

As a resident of Byron Shire I am appalled at the abuse of BnB business creep in our shire and strongly object to the relaxation of the rules pertaining to the strict monitoring of Bed and Breakfast businesses in our shire. This has allowed the growth of this industry to spoil the neighbourhood community to the advantage of many distant land lords.

i am happy for rooms to be let in homes where residents reside and provide a true BnB experience and wish the rules were adjusted to this style of management

It is a total abuse of the idea to permit rentals for longer than 3 weeks yours faithfully

Ruth Winton. Brown

For private investors who rent out a property, these measures will create significant expense.

What plans are there to mitigate this? in particular I'd expect that new regulations would be phased in, say, over 5 years.

For a layperson, these documents are difficult to navigate and understand - a summary of "How this effects you" would be helpful and an extension of the review period.

KEY POINTS: phased introduction of measure, longer review period.

**Submission**

The uncontrolled commercialization of private homes, in residential areas, in the Byron Shire is having an adverse effect. According to Inside Air BnB in the 3 years since 2016 the number of Air BnB properties, in the Byron Shire, have almost doubled from 1172 to 3306. The effect of this invasion in the residential areas in the Shire is considerable and includes the following:

Opportunities for purchasing a home, by local residents, is reduced because of inflated pricing.

Local residents also find it difficult to rent a home when the property rental market is dominated by property investors in Air BnB or similar organisations.

Urban areas have become party zones with behavior more fitting in a commercial zone than in quiet residential areas where families including children and workers are trying to live normal lives.

Many major towns and cities around the world are placing restriction on Air BnB, and similar organisations, but the NSW State Government is lagging behind. We need the NSW Government to Catch Up and place a cap on days allowed for letting where the host is not present. A 90 day cap when the host is not present is the preferred option while ensuring there are no loopholes. Strong and multiple applications of an appropriate definition with emphasis on 'residential' is needed to under pin any new legislation.

To the Department of Planning, Industry and Environment and the Department of Customer Service

My family is against allowing private homes to be let to airbnb. Our neighbourhood has already changed as a result of it. Most so-called granny flats are short term rentals, more cars parked, more people in our rural subdivision. My friends have to move out of the area because they can't afford to live here anymore, since property owners don't rent to them but to the higher paying airbnb guests. It is easy money for those who are already well endowed. Our shire is beset with problems of homelessness and people not being able to afford the rents anymore. Also as a long term resident I object to the commercialisation of my area. If I choose to live away from the commercial areas of town I don't want it to follow me in the form of airbnb. It is not for nothing called a disruptive economy. It disrupts my way of life and the quality of life in my shire-- Byron Bay.

Below are some further points.

Regards

Marita Kohl

NSW is out of step with locations all over the world. Major towns and cities are placing restrictions on Air BnB but in NSW the state government appears to have allowed the short term letting accommodation industry to write the rules.

The new legislation places a cap on days allowed for letting, where the host is not present, of 180 days per year or 365 days in regional areas. Byron was promised a 90 day limit in the run up to the last election but it is still to be approved and Council has to prove its case as to why Byron gets special treatment before it is approved. 90 days is still 45 weekends a year and, given weekend prices, this is likely not a deterrent to making owners return houses to the permanent rental market.

Unlimited days - no caps: Also, a loophole has appeared in the proposed regulation: a booking for 21 or more consecutive days will not count towards the limit when a host is not present. So a cap is not really a cap!! This means the true extent of short-term letting can never be monitored or measured. A host could add as many 21-day letting periods as they want and it would not be counted in the annual total!

The state govt is also proposing an industry-led register to keep track of all short-term lets. It is expected to record the name of the host, the property's address, the duration of each booking and whether it complied with bylaws. The industry self-regulating? Really? This takes the power away from local councils to monitor non-compliance for their residents.

It is also known that a number of NSW MPs own short term rental properties, including the Deputy Premier. Politicians with clear conflicts of interest should not be allowed to vote on this issue.

The law supports residents - NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"; relying particularly on *North Sydney Municipal Council v Sydney Serviced Apartments Pty Ltd (1990)* 21 NSWLR 532 and *Derring Lane Pty Ltd v Port Phillip City Council (No 2) (1999)* 108 LGERA 129.

I would like to see restrictions put on the amount of short term rental accomodation in Byron Bay

Nearly all of my friends have had to leave Byron Bay as the short term rentals have taken over and the owners and landlords do not want long term tenants any more because they can make far more money using platforms such as Air BnB

The locals do need to be able to live in their town , after all , it was they who gave Byron Bay its unique character in the first place

We should be mindful of the negative outcome if we do not keep a balance in our policies and determine real

strategies around this situation, which seems to be getting out of control here in Byron Bay these days

**I agree to the above statement**

**Submission**

What is the real objective of the regulatory framework that is being proposed by the NSW Government for Short Term Rental Accommodation in NSW?

Clearly there are multiple organisations with vested interests.

However, there is no representation on the committee for “everyday Mum and Dad” hosts.

There should be no annual cap on how many days an STRA property can be rented

The current proposal is to reduce this to 180 days ... what does this achieve?

Why should honest hosts with great reviews and with no complaints be penalised, based on how many days their property is rented?

Ban 1 night or 2 night stays for STRA properties to assist hotels / motels and stop “party houses”

This is more likely to stop so-called “party houses” rather than the proposed introduction of a 180 day annual cap. Wouldn't it be better to ban 1 night or 2 night stays which also negatively impact the hotel / motel properties in both Sydney and regional NSW?

I do not own a 3, 4, 5 or 6 bedroom house. I own a 1 bedroom apartment where we have 1 or 2 guests come and stay ... hardly conducive to ongoing partying.

Bookings of  $\geq 7$  days should not contribute to the proposed annual cap

The updated proposal is 21 days. It would be far more realistic at 7 days. Who really travels for business for 3 weeks at a time?

The point of the exemption is that it “reflects feedback that longer bookings tend to have fewer amenity impacts and are key to support a mobile workforce”. An exemption of  $\geq 7$  days would still achieve the same outcome if they truly want to support a mobile workforce.

Registration of STRA properties should be for tracking complaints not number of days booked

The “3 strikes policy” has some merit. However the registration should be used to track complaints, not to measure how many days of bookings that a property has throughout the year.

The government should not have the ability to over-rule the Owners' Corporation if the OC of an apartment building is happy with STRA within the building

Some apartment buildings in Sydney are well suited to STRA as they were previously a hotel prior to the property being strata-titled, and lot owners are supportive of STRA and holiday makers staying within the building.

Why is there “nanny state” intervention where it is not needed?

Surely the government should not be able to dictate how my apartment operates?

Based on a 180 day cap, the inference is that “it is OK that my revenue is decreased significantly”?

I am retired and rely on the rental income that is generated by my apartment – is the government suggesting therefore that there will be compensation for my drop in income?

NSW, the “nanny state” ... not a good look!!

**I agree to the above statement**

The latest data from Murray Cox at Inside Air BnB shows that Air BnB properties In Byron shire have jumped from 1,172 in 2016 to 3,306 in August this year.

Of those, 1,331 listings for an entire home/apt are listed by 359 landlords only - evidence of multiple landlords with multiple properties. How can people possibly find a place to live when investors and property speculators are driving up prices and destroying the permanent rental market in our Shire.

NSW is out of step with locations all over the world. Major towns and cities are placing restrictions on Air BnB but in NSW the state government appears to have allowed the short term letting accommodation industry to write the rules.

The new legislation places a cap on days allowed for letting, where the host is not present, of 180 days per year or 365 days in regional areas. Byron was promised a 90 day limit in the run up to the last election but it is still to be

approved and Council has to prove its case as to why Byron gets special treatment before it is approved. 90 days is still 45 weekends a year and, given weekend prices, this is likely not a deterrent to making owners return houses to the permanent rental market.

Unlimited days - no caps: Also, a loophole has appeared in the proposed regulation: a booking for 21 or more consecutive days will not count towards the limit when a host is not present. So a cap is not really a cap!! This means the true extent of short-term letting can never be monitored or measured. A host could add as many 21-day letting periods as they want and it would not be counted in the annual total!

The law supports residents - NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"; relying particularly on *North Sydney Municipal Council v Sydney Serviced Apartments Pty Ltd* (1990)21 NSWLR 532 and *Derring Lane Pty Ltd v Port Phillip City Council (No 2)* (1999) 108 LGERA 129.

Air BnB, holiday letting is eroding the core community in Byron Bay. Long term or permanent residents are being so badly impacted by this flood of Airbnb activities. Neighbours and friends are turning on each other as one decides to rent out a room unrestricted and no fire safety in place just for the money. Many rentals are experiencing noise levels that were never an issue before Airbnb. Imagine every few days new 'guests' all hyped up wanting to party. Many house owners who now Airbnb leave town so they themselves are not impacted! We simply must have some controls as all this leads to an unhappy and non functioning community. How sad for our kids when they have to leave their homes at school holiday times just so tourists can move in so the owners can cash up a bit. Please let's have laws and restrictions in place to save our communities!

Our families, old folk, kids and medical workers especially are suffering due to sleepless nights from unrestricted holiday makers.

Lorraine Ward Byron Bay 2482

Bexhill 2480 NSW

**Submission**

I was a resident of Byron Bay for 19 years. I owned the back unit of a two unit strata block. I sold it 18 months ago. Since 2012, the large two storied house next door had become a holiday let. It took me two years of working with police, ranger, Noisy Neighbours Hotline, the letting agent and the Brisbane owners to reach a stage where I wasn't up half the night monitoring the holiday let neighbours' behaviour. in the beginning it was so bad that the day of my mothers' funeral, 6 Jan 2013, relatives who were to stay the night refused to stay at my house after the burial because of the outrageously loud behaviour of holiday makers next door. This is a distinct example of holiday letting interfering with community life in Byron Bay. Another outrageous example was when holiday makers let off large fireworks at 1am in the front yard of the holiday home and one became wedged in my guttering outside my bedroom glass door with cascades of golden sparks festooning onto my terrace and garden and causing a potential fire hazard. The holiday let has a pet friendly category, so often large dogs were left shut in the house while holiday

makers went out for the night. The disoriented animals would bark and howl for hours and no immediate assistance was available from agent or police or ranger. I eventually decide reluctantly to sell and move to a more private area (Bexhill near Lismore) and did my best to find a buyer who intended to live in the unit as a permanent resident. I knew that you can't expect a guarantee that a new owner will really do this no matter what they say. True to form, the new owner (a middle aged woman) vowed and declared that she was moving her business to Byron Bay and would become a permanent resident. As soon as the settlement went through, she began a 6 month 7 days a week renovation program after which the property was listed on Air BnB and now the 3 bedroom 2 bathroom single garage unit is permanently let accomodating 8 people. She has never consulted with the permanent resident owner of unit 1 to gain permission for any of her plans and has no interest whatsoever in the community life of Scott Street Byron Bay. I have met her and despite a wonderful website that indicates that her business is in Byron Bay, she actually resides interstate and works from there. That is my experience in a nutshell. One of my open houses during the sale of my home was marred as a Schoolies group had rented the holiday let property next door. I spent the morning of the open house cleaning out my garden to remove the used condoms that had been thrown over my fence by the holiday makers. When looking for a new house to buy in Byron Bay, before I decided on Bexhill, I was shown several properties in Sunrise and Suffolk Park with garages and spare rooms full of beds for rent through AirBnB and the assurance by the agent that I would make a sound income from continuing to operate this enterprise if I purchased the home. The industrial Estate is another area where short term holiday letting is taking over valuable retail and light industrial spaces that should be available for business people.

A house two doors up from me has now been turned into an airbnb. The problems that have occurred since. While there is onsite parking often there are more vehicles than allocated spaces and they have to park on the road which limits the amount of parking for the permanent residents who pay council rates.

A number of times we have had to ask the people to turn down the music late at night. As the are different people renting this is an ongoing problem.

As a pemanent resident i would like to see the number of days that the property can be rented decreased.

Short term holiday accomodation in residential areas is invasive and intrusive. In a popular area like the Byron shire, holiday rentals are taking over from long term rentals and local residents are finding it difficult to find rentals to live in. It is also pushing up rental prices making it unaffordable for local families.

Short term holiday rentals in residential area does not fit with the local values. Those on holidays often stay up later, make noise and do not respect the environment that they are staying in.

I feel holiday accomodation should be restricted in where they can operate websites such as AirBnb should be under tighter restrictions

Residents of strata units live there to enjoy a quiet life. They do this with the assumption that other tenants in the building will be quiet, friendly and cause as little damage to the common property as possible.

If units are let for short terms, the tenants will be strangers to the strata units, they are more likely to have behaviour that is noisy and transient. Their interest in the property for a short time would be unlikely. They would not know the rules laid down by the Body Corporate and are more likely to have noisier tenants The building the owners/tenants live in is designed for a limited number of people who are familiar with the building and could find their way around the area.

If an owner wishes to run a commercial scheme to his benefit and to the detriment of the neighbours he should not

convert an existing strata unit to do so. He is making a profit to the disadvantage to other people who live in the unit block. He should look for a structure designed for a commercial business .

As I am an owner of a unit, I could make more money by letting my unit for short time purposes, but I respect my neighbours.

I am opposed to the proposed new planning policy for holiday letting. As a resident of Byron Bay, I have experienced the destruction of our community. Since the introduction of holiday letting, property prices have increased as private homes have been used as commercial businesses. Permanent rentals are unaffordable or non existent. Residential streets are filled with cars, as there is insufficient off road parking, especially when so many garages are illegally converted to bedrooms. It is impossible for Short Term Holiday Letting industry to self regulate, and our council is already stretched to the limit with compliance issues.

Politicians with pecuniary interest in holiday letting should not be allowed to vote on this issue. Worldwide there are moves to stop this insidious industry and I have no faith in the idea that it can be 'regulated'. It should be banned.

Neighbors, not strangers.

Suzanne Kelly

Short term holiday letting industry has become a grossly negative impact on small towns like Byron Bay.

The negative impacts have been studied and are now well understood in small towns where tourist numbers are large compared to permanent resident numbers.

The provision of more and more tourists beds across residential zoned precincts forces up real estate prices causing housing shortages for people who would otherwise live here. Otherwise quiet village streets and community spaces become party venues and car parking stations.

In short the town becomes an investment vehicle and not a town. Those making money from the business do not contribute a commensurate amount to the town. They only pay residential rates.

Worse than this is the destruction of community for outsiders profit.

The impact on larger towns can be significantly less. It depends on the ratio of short term rental visitors to permanent residents.

It should be clear that there is no one size fits all solution to the short term rental proposition. Imposing criteria that might work in Sydney to what is appropriate in Byron bay isn't good planning.

Historically short term rentals have successfully worked for the Christmas and Easter periods and this should be the limit of any informal short term holiday letting. This would equate to less than 50 days a year short term rental.

I'll have little faith in industry self regulation. The failures in other industries to self regulate should provide sufficient argument to maintain a government watchdog on any regulations.

New Brighton

**Submission**

We were forced from our home due to the noise and disruption made to our lives by large groups of holiday makers.

- Small 3 bedroom homes allowing 8 - 10 people at stay.
- cars parked everywhere
- non compliant accommodation allowed by council - what I mean is - New Brighton in Byron Shire is on a flood plain
- therefore it is illegal to have accommodation on the ground level. If you were to investigate this you would find this over 90% of houses use non compliant rooms for accommodation. The sad thing is council are aware of this and allow it to happen,

**Submission**

I am overseas at present and unable to read all the documents. However, I have strong thoughts on this so-called "sharing economy".

I agree with the points put forward by OCN:

1. Complying Development: STRA in residential strata schemes must be classed as 'complying development' with inspection by Local Council or a private certifier, not 'exempt development'. This is the only way to ensure the mandatory fire safety standards are met.
2. Day Caps: Un-hosted STRA must be capped at 60 days for the Greater Sydney Region to contain STRA to 'Home Sharing'. All STRA to count toward the cap. No exceptions.

3. Development Consent Conditions: Residential apartment buildings in mixed use and commercial zones with express prohibitions on short term letting must have their development consent conditions respected and preserved.
4. The Register: The planning law changes must not start without The Register, which must be run by Government or a neutral platform not operated or controlled by the short-term letting industry. The Register must include the days of occupation and all the platforms on which the premises is listed, Local Councils must be involved in designing the system. Local Councils and NSW Fire and Rescue must have access to the data.
5. Host Obligation: There must be an enforceable obligation for hosts to register their premises before it is listed and used for STRA purposes. This should be part of the complying development criteria, so it is clear the use of unregistered premises for STRA is illegal and penalties apply.
6. Platform Obligation: There must be a legal obligation for platforms and agents not to list any unregistered residential dwellings for STRA. International experience shows that without such an obligation, platforms will continue to list thousands of illegal apartments. Platforms must also have an obligation to share data with State and Local Government. All listings and other advertising must clearly display the host's unique ID.
7. Charges and Fees: Residential strata schemes must have clear authority to levy additional charges and fees to additional wear and tear and costs whether STRA is hosted or un-hosted.
8. Flexibility: Local Councils must have flexibility to set a lower cap and apply zoning restrictions to meet their strategic planning objectives.

**I agree to the above statement**

Yes

[objection-to-short-term-letting-package-submission-100919-lmn.pdf](#)

**Submission**

My home is an apartment that I own in a multi story building in Milsons Point and I have several areas of serious concern with the short-term letting package proposed by the NSW Government:

1. Preservation of Owners' Rights:

Residential apartment buildings in mixed use and commercial zones with express prohibitions or limitations on short term letting must have their by-laws respected and preserved. There can be no over-riding policy reason which dictates limitations on the right of apartment owners to collectively decide whether or not to permit short-term

letting where this is the clear desire of the democratic majority.

## 2. Collective Cost of Permitted Short-term Letting

Residential schemes must have authority to levy charges and fees on Hosts conducting short-term letting. The disproportionate cost to owners and owners' corporations from STRA operations (e.g. wear and tear of lifts, gyms, garbage and other utility areas as well as administration and management costs) means they are effectively subsidising those running STRA businesses. Security arrangements in individual buildings must not be compromised. The Hosts should also be required to advise the Owners Corporation of intent to let their property on a short-term basis and to pay any extra insurance costs levied on the building.

## 3. Preservation of Local Government Oversight

Local Councils must have the ability to set and apply zoning restrictions to meet their strategic planning objectives. They should be involved in designing and be part of the compliance and enforcement function of any registration system.

## 4. Fire Safety Standards:

The only way to ensure that mandatory fire safety standards are met is for STRA in residential strata schemes to be classed as "complying development" (not "exempt development") which allows for inspection by Local Council or a private certifier. In addition:

- (a) Fire safety standards should be more onerous for short-term holiday visitors in high-rise apartment buildings as the threat to life of all residents is increased significantly.
- (b) Fire standards applicable to residential apartment buildings do not address the fire risks of cooking, BBQ's or smoking on balconies which are common problems with short stay visitors unfamiliar with by-laws or local customs.
- (c) Fire safety in residential strata schemes must not be left to self-regulating platforms or amateur hosts as it poses an unacceptable risk to all residents.
- (d) Fire and Rescue NSW should have direct access to Register data such as how many STRA apartments are listed in a single high-rise building to enable accurate assessment in emergency situations.

## 5. Effective Registration:

An independent, publicly funded registration system is essential to identify STRA properties, the owner/host, their agent or nominated representative as well as having data on address, location, intensity, volume, days of availability, days of occupation, number of rooms, etc. in order to develop a profile and analysis of the STRA industry. Other major cities such as New York, San Francisco, Barcelona, Paris, Toronto and Vancouver, who have experienced this industry, are now devising or implementing legislation to strictly regulate its operation. At the very least, NSW should have controls in place BEFORE allowing STRAs to operate in apartment buildings as well as enforceable and fast-acting conflict resolution processes.

Given the disparate issues involved with the regulation of AirBnB, Stayz and the like, the Milsons Point Community Group regards as essential the establishment of a Register run by either Government, local Councils or a neutral platform, with powers that are time-sensitive, practically enforceable and of real utility to residential strata schemes. This Register must be necessary pre-requisite to any new regulatory framework. STRA can transform homes into hotel rooms and neighbours should not be obliged to give up their right to quiet enjoyment with bland reassurances about conflict resolution. Such a Register has been found to be helpful in somewhat alleviating these problems in cities overseas.

## 6. Host's Registration Obligations:

There must be enforceable obligations for Hosts to register the premises before it is used for STRA purposes. Penalties should apply for unregistered premises. The Host should identify all platforms on which their property is listed, identify days of availability and report nights of occupations. Additionally, there must be a legal obligation for Platforms and agents not to list an unregistered residential dwelling for STRA. Again, there should be no change in planning laws in residential apartment buildings until the Register is in place.

## 7. By-Law Enforcement:

In cases where a strata scheme has a by-law prohibiting STRA, it must not be possible for this to be circumvented by any person who is not an actual owner being registered as a host. In the case of residential tenants, there must be evidence that the landlord has expressly permitted the conduct of STRA by the lessee. STRA in strata buildings must require a complying certificate. This should be part of the registration process as it is essential data for regulatory oversight and enforcement.

## 8. 180 Day Cap:

The proposed 180 day cap is unacceptable and excessive by world standards. It makes a mockery of the original intention that the caps were to be an economic lever to drive apartments back into the domestic residential market. The rapid growth in short-term letting in recent years has had significant impact on apartment buildings as well as

residents on areas such as amenity, strata costs and individual safety. Such growth has clearly outpaced regulation and owner's corporations should be given greater ability to manage these impacts. Under no circumstances should this industry be self-regulated.

9. Some Questions to be answered:

Some questions which demand answers in relation to the proposal by the NSW Government are as follows:

Why are the NSW Department of Planning, Industry and Environment and Department of Customer Service dictating by-laws concerning STRA when there is already an extensive Strata Schemes Management Act 2015 covering the management and control of Strata Schemes? Surely this should be the right of individual Owners Corporations to decide if they want to prohibit STRA in their buildings? This is not an issue for State or Local governments.

Councils reiterated the importance of an enforceable planning framework aligned with the Code of Conduct. How will breaches of the code be policed? Councils currently cannot provide sufficient enforcement officers to police noise legislation. The office of Fair Trading does not currently have sufficient staff to police this.

Who is going to come out during the middle of the night to police noisy short-term tenants keeping residents awake?

Who is going to police short-term tenants dumping rubbish in the carpark?

Who is going to police short-term tenants sorting their rubbish?

Who is going to get the short-term tenants out of the pool or gym, outside of by-law-controlled pool & gym operating hours?

Who is going to stop the short-term tenants smoking or taking drugs in the common areas?

Who is going to ensure the short-term tenants comply with the Fire and Emergency evacuation plans?

Who is going to stop the short-term tenants hanging their laundry on the balcony?

The only answer to all these questions and many others, is no one.

Lot Owners of Strata Plans should be able to enjoy the quiet and peaceful environment of their existing strata plans, without being subjected to STRA.

Byron bay 2481

**Submission**

We have been in the accommodation industry for over 36 years in Byron Bay and we have never seen such a decline in trade as that since AirBnB/short term holiday rentals have started up and taken over our town.

The thousands of homes that are now short term holiday rentals have killed the permanent rental market and the accommodation industry. Businesses are closing and struggling to keep open - that is a fact.

Byron Bay is the jewel in NSW crown and this policy being put forward through parliament is going to destroy the fabric of this unique and beautiful town. A 90 day cap MUST BE put in place, Council MUST BE given the power back to oversee and implement their own policies to protect our town and there needs to be a level playing field.

These holiday houses need to be made accountable, they need to be registered with the ATO, they must have to pay commercial rates, land tax, GST, DA fees etc. All the commercial rates etc that legitimate businesses are having to pay is killing them. There is no incentive to operate a business legitimately, we should all relinquish our licences and practice under these new "share economy" laws and just pay residential rates etc. which will decimate and cripple our councils funds.

Please look at other countries and cities around the world - there are precedences everywhere in controlling these matters - Japan, New York, Spain, the list goes on.

Stand up now to AirBnB before it is too late and they destroy the jewel in NSW crown forever.

Balmain 2041

**Submission**

I live in a townhouse complex where the neighbouring townhouse has been turned over to STRA by a non-resident landlord, without consultation with neighbours or Strata. Having read the discussion paper and draft policies on STRA, I do not see much to address the issues people in my block are facing.

The only bright spot I see is limiting STRA to 180 days per year for non-resident hosts. But how is this policed? It appears it will be up to neighbours to keep track of rentals then complain when 180 days is exceeded. It needs more regulation than that.

What our residents' committee would like is to be able to enforce a a minimum letting period of three months at a time for non-resident hosts. This would give us a more stable living environment and hopefully give us better

guests/tenants. At the moment we don't know from one day to the next who our neighbours will be and how much noise they are going to make at night. This is especially bad in summer when we get a lot of party people coming to Balmain. Furthermore, security in our block is adversely affected as STRA guests have access to the "secure" parking area under the complex.

Having a constant stream of different visitors to the complex affects our peaceful enjoyment of the amenity and affects security. Please put legislation in place that will allow owners' committees to introduce fair and reasonable limits to STRA activity in their strata block. And please, before summer!

Thank you.  
Peter Templeton

I only comment in relation to strata living in Sydney.

As a lawyer I observed disputes regarding a strata owner having six people in a small two bedroom inner city strata apartment as short term boarders. The Strata Roll was not up to date as to STRA occupiers. Such conduct put added pressure on the one lift during busy periods.

Some form of registration of persons present in a STRA lot is required and some by-law permitted to keep registration or strata roll up to date and reasonable method for such by-law to be enforced.

The local council could also be given some powers to manage complaints about abuse of STRA.

Also I live in a security strata unit with mainly one bedrooms and one lift. Security keys should be kept to two per one bedroom otherwise security can be compromised with STRA with keys taken and the owners corporation to have valid by-laws to enforce a fee to provide additional keys to STRA lot. Also have valid by-law to state how many

people should stay in STRA in a one bedroom lot.

“The Government’s short-term holiday letting plan will support the sharing economy and give consumers more choice while cracking down on bad behaviour”, Minister for Better Regulation Matt Kean 5th of June 2018.

“Support the sharing economy”-

These sets of proposals are potentially very damaging and I am yet to find any support in this for the sharing economy.

“Give consumers more choice”-

The Hunter Valley where my property is located regularly host outdoor concerts, which can hold up to twenty thousand people at any time. During the concert season, which also coincides with the wedding season accommodation is very scarce and therefore many people miss out. If this regulation was to be implemented in its current form I would estimate that a large number of properties would cease to operate due to the high BAL, limiting the guests to 12 people making the business just not viable. A number of properties will also cease due to the high costs associated with becoming compliant. This will also be the case with many coastal towns who already struggle to house tourists in peak times. The proposal will do the exact opposite and will give consumers less choice.

“While cracking down on bad behaviour”-

The proposed Part 7 of the code regarding strikes being recorded is very confusing. You propose a host being removed from booking sites when they have received 2 strikes in 2 years. How can the host be held accountable for actions entirely beyond their control? Strike the guest, set a fee to be paid by the host (which can be included in bonds and held in such cases), but you cannot penalise a host with a strike who always seeks to act with the best intention. If, however the host fails on a directly controllable element then by all means record a strike.

I also would suggest that a complaint should first be raised with the owner – such that they can immediately address the concern. As I read this proposal the first a host might know of a complaint is when it’s registered. In the whole time I have been letting out my property I have had one issue raised by a neighbour which I addressed straight away. I have good communication with all my neighbours and regularly check in with them.

The recommended standard of a maximum 12 (or 2 people per bedroom) whichever is the lesser – will not reduce noise and will cause business and community damage. Most of my guests are families getting together in a rural setting giving the kids a taste of country life. A small group playing loud music all night are much more antisocial than a family reunion of 20 people sitting around catching up. Therefore there is no reasonable basis to limit STRA guest total numbers. This is extremely damaging and will make it less viable for operators of large homes to continue. It will cause many STRAs to go out of business and will drastically hurt the communities that rely so desperately on the tourist trade.

Fire Prone Land

There is a section in the State Environment Planning Policy, which I feel, is poorly written and could stop almost all STRAs in a rural setting and it needs urgent attention.

Division 2 Short-term rental accommodation—complying development 13 Complying development—non-hosted short-term rental accommodation (1) Development for the purpose of non-hosted short-term rental accommodation is complying development for the purposes of this Policy if— (a) the development is carried out on land in a zone in which residential accommodation of a type corresponding to the dwelling is permitted with or without development consent, and (b) in the case of non-hosted short-term rental accommodation in a dwelling located— (i) in the Greater Sydney Region, the Ballina area or the City of Lake Macquarie area, or (ii) on land in the Clarence Valley area shown edged heavy black on the Clarence Valley Short-term Rental Accommodation Area Map, or (iii) on land in the Muswellbrook area shown edged heavy black on the Muswellbrook Short-term Rental Accommodation Area Map, the use of the dwelling for non-hosted short-term rental accommodation does not cause the dwelling to be used for that purpose for more than 180 days in a calendar year, and (c) the number of

persons residing in the dwelling at any one time does not exceed— (i) 2 persons for each bedroom in the dwelling, or (ii) 12 persons in total for the dwelling, whichever is the lesser, and (d) the dwelling is situated on bush fire prone land, and (e) no part of the lot on which the dwelling is situated is bush fire attack level-40 (BAL-40) or in the flame zone (BAL-FZ), and (f) the dwelling complies with the requirements of Planning for Bush Fire Protection (ISBN 0 9751033 2 6) published by the NSW Rural Fire Service in December 2006, and Consultation note: It is proposed that paragraph (f) will refer to the most recent version of the publication entitled Planning for Bush Fire Protection. (A 'pre-release' version of Planning for Bush Fire Protection 2018 is currently being shown on the NSW Rural Fire Service website.) (g) in the case of the dwelling being situated in a lot in Zone RU5, there is— (i) a reticulated water supply connection to the lot and a fire hydrant within 60m of any part of the dwelling, or (ii) a 10,000 L capacity water tank on the lot, and (h) in the case of the dwelling being situated in a lot in any zone other than Zone RU5, there is a reticulated water supply connection to the lot, and (ii) a fire hydrant within 60m of any part of the dwelling,

This differs to the RU5 which states OR a 10,000 L capacity water tank on the lot. Most properties cannot comply based on this alone. To have a fire hydrant within 60m of the property I would need access to high-pressure main water supply. With most properties only on tank water the infrastructure is just not there to service the properties. I can provide a 10,000 L tank with a hydrant connection.

Introduction of bushfire and flood prone land in this document is presumably to protect the safety of guests, but such arbitrary measures and the resulting consequences are not logical, are counterproductive and fail to offer any heightened safety at all. The definition of a BAL (for example) is not entirely meaningful when it comes to risk. A property at low BAL but poorly maintained and with high risk exterior items is potentially more dangerous than a well-maintained higher BAL. Things like annual land and undergrowth clearing, ready access for fire services, evacuation plans, blackout periods of renting during catastrophic fire warnings, guarded gutters, exposed flammable items are all examples of more significant measures than BAL alone.

Exceptions need guidelines around genuine safety, not hard numbers that offer no real comfort. As a result, I'd assert a well-managed BAL40 is safer than a poorly managed BAL29 – and this makes the proposal flawed. Additionally, there is no discerning in the guidelines between land that hasn't had a fire for 100 years vs land that has them every year. Codes put in place that would force business closure based on a 1 in 100 year event (when other measures can better deliver the required outcome) is again madness. I believe the same to be true for flood prone land. I would contend that the arbitrary measure completely fails to protect renters on this basis and discriminates against good hosts. As such, a case-by-case approach is required for exceptions whereby an accredited fire company / or the local RFS can review and approve. If it is good enough for my family to live there why is it any different for my guests.

I purchased this property in good faith to provide an opportunity for my family, this is severely going to affect us financially if we are forced to sell it. If these provisions were in place when I was looking to buy the property I would not have purchased it.

With that said like all legislation that is introduced that will affect so many this must have a Grandfathering Provision that would enable current STRAs to operate under the old set of rules.

Feedback from guests who would be excluded from returning

Robyn

Ok so I really don't want to leave this review - I want to keep this place a secret, so that we can book it whenever we want! lol But that would be unfair, so... From the moment we arrived this was truly an amazing experience. I had read about the animals and I thought a farm stay might keep the teenagers happy, but I never expected it to be so good. As we pulled into the driveway the Alpacas came to meet us, then the horse and ponies were close by. All the food was prepared and labelled and we got very clear instructions on what to feed them and when. The kids LOVED it, and took the responsibility very seriously. The house itself was amazing, incredibly clean and well stocked. I cant stand going to those Airbnbs that give you 1 x sharp knife, 1 x wooden spoon, 1 x salad bowl etc. This kitchen was very generously stocked both in the cupboards and the pantry. And lots of little touches - like the night light in the hallway. Plus extra heaters for every room. Then there is the effort Paul and his wife made to ensure your stay is a good one. The fireplace has plenty of wood, the outdoor firepit was built and ready to go, all we had to do was light

it and it took off, roaring into the night. We then all sat around under the stars cooking marshmallows, with the kids getting in and out of the spa. Finally - response time was amazing. We couldn't figure out the TV, Paul answered immediately, problem solved. We ran out of wood, Paul answered immediately and told us about the stack in the back of the ute, problem solved!! It might seem like I am on the payroll at this place - I'm not, but it was truly a great experience. Every Airbnb owner should go and stay there to see how it's done when it's done properly!

Camilla

Paul's home is absolutely stunning, the location is tranquil and picture perfect. The house is finished to a very high standard with all the amenities you desire for a comfortable luxury stay. Spa and fire pit added bonus, we spent many a night around the fire with the ponies to keep us company. The property is excellently well kept inside and out and comfortable for large groups. Paul has been very hospitable and available to help at all times. The animals were gems, so friendly and interested in attention. I have made some lasting memories at the house and would highly recommend to anyone. All 10 guests felt the same.

Tracey

Paul was extremely helpful in assisting us in a short notice request for 12. It is never easy to find somewhere with everything you need for a large group but this property ticked all the boxes beyond what we hoped for. The property was secluded and private yet close enough to town. The kids loved the animals and having to feed them and all the space to run and be kids. The fire pit outside was a fantastic gather point, the facilities inside clean and the beds super warm and comfy. Plenty of room.. I loved this house and this property, can't recommend it enough

Chris

Peaceful & relaxing country getaway! We thoroughly enjoyed our time at Paul's place. The Alpacas and horses were adorable, and the accommodation exceeded our expectations as well. Would happily book & stay here again. Paul was very helpful and maintained great communication throughout our stay when we had questions etc. Thanks!

Vimmi

This place is a fantastic getaway for a large group of people and extremely close to the Hunter Valley wineries. Paul was a great host from the beginning to the end of our stay, in that he regularly checked in with us to ensure that any questions were answered. The outdoor area of the property is extremely spacious, which was perfect for playing ball games with friends. From feeding the animals to star gazing at night, we thoroughly enjoyed our stay and would love to stay here again!

Jodie

Breemiloy Homestead is just wonderful. My friends and I had a wonderful weekend - the homestead has all you need for a country getaway, with the added bonus of all the gorgeous animals!! Breemiloy is a must if you are in the Hunter area - it would suit groups, couples, families - everyone!

Margaret

We took the family (8 adults and 4 children) to Breemiloy for a two night stay in April 19, the accommodation and surroundings were perfect. The kids loved feeding all the animals, and the adults loved the spa and fire pit of an evening, with a lovely glass of wine from the Hunter wineries. Paul (the owner) was super helpful, great at communicating and provided little touches (an already made fire pit, carrots in the fridge for the ponies, and additional bed linen etc) to make the stay a great one. We would recommend unreservedly, and hope to return to this great spot

Breemiloy Homestead Hunter Valley

- In the short time that we have been letting out our property we have received 76 reviews 73 with a 5 star rating and 3 with a rating of 4.5 stars.
- We have had no safety issues.

- Provides guests with a country escape and an introduction to farm life.
- Employs local workers.
- Contributes to the local economy.
- Provides a business for my wife and myself.

Please reconsider this proposal.

**I agree to the above statement**

Yes

**Subject:** Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Kind regards,

Tessa Faucheur

As much as the various documents cover most of the concerns it is all meaningless unless attention is given to ways of implementing and policing these concerns. It would be useful to have a government body such as the Tenancy Tribunal to deal with host/tenant issues, owners should be required to pay a bond to provide a fund for compensation for damages.

Either a local real estate agent or a newly created agency could be employed to carry out inspections relating to compliance and for dealing with arrival and departures etc at unhosted properties.

Local Councils should demand STRA properties be subject to the DA process and thus ensure that advertised features are of a satisfactory standard eg; if the property advertises that it allows pets such as dogs then there should be appropriate fencing and Kennelling facilities. Unhosted properties should not be allowed to have woodfired heaters or fuel stoves as tenants are usually unfamiliar with safe fire practices.

The proliferation of STRA in residential areas is a burden on the permanent residential community and infrastructure, STRA premises should be restricted to specific areas in the same way that caravan parks and hotels and motels are.

**Submission**

I am making this submission as a home owner in a residential area and my concerns relate to non-host STRA. I support the introduction to Regulations and a Code of Conduct relating to STRA.

My first concern relates to the number of guests allowed per residence. Maximum of twelve people allowed per property in a suburban area is too many and will lead to the potential for excessive noise, parking issues and traffic issues. We have a particular situation in my area with a non-host STRA. The property was sold as a four bedroom house, with changes to the interior this property is now advertised as a five bedroom property with a studio and can therefore accommodate twelve people. Fortunately this does not happen all the time but when large numbers of people do rent the property noise has been an issue and cars parked on the footpath is a regular issue. I would like to see the number of maximum guests per property in suburban areas reduced to eight people. I also think that the property owners need to make provision for off street parking and the off street parking needs to be enforced.

My second concern relates to the density of non-host STRA in any particular area. The situation in my area is that we currently have one operating STRA which advertises that it can accommodate twelve guests. Another property has very recently sold and the new owner plans to operate a non-host STRA. This is a three bedroom house and the new owner is advertising it will accommodate ten guests. There is another property in the street which is currently being renovated and the owner plans to operate a non-host STRA. I understand this is a three bedroom property. This means, by the end of this year, there will be three non-host STRA properties in a section of the street of eight houses. Which definitely has the potential for noise issues, parking issues and traffic issues.

This is a quite suburban area where neighbours know each other and look out for each. It is also an area with high pedestrian traffic with people walking dogs etc. The introduction of three non-host STRA in a small area with definitely be detrimental to the street atmosphere.

I would like to see our local council have the authority to (i) restrict the number of guests allowed per STRA; and (ii) restrict the number of non-host STRA allowed to operation and any particular area.

Thank you for considering my submission.

Best regards  
Maree Giddins

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I enjoy providing families who are travelling affordable accommodation. Prior to Airbnb, our family of five struggled to stay anywhere in the inner cities of Australia that was affordable as hotels don't cater well to the family market. I love that now as I travel I can stay in lovely affordable homes and in turn I chose to host families.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I am concerned about the Government's approach, and parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

I am opposed the 180 night cap in Sydney when hosts are not present. I feel there is a real lack of affordable accommodation for travelling families and the introduction of the 180 day cap will significantly reduce the number of available properties for travelling families and will only add to that shortage. If affordable housing is the issue why not introduce a 10% tax after 180 days per annum and use that money towards housing projects.

I believe the 180 day cap should not apply to buildings zoned for short term stays or buildings zoned as serviced apartments. In those buildings owners should have the right to lease out their property 365 days a year because owners invested enormous amounts of money in to those buildings with the belief that there was no limitations to their usage and imposing a 180 day cap to buildings zoned for short term stays or as serviced apartments is unjust.

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I wish to submit my objection to the Short Term Holiday Rental policy that is currently being discussed.

My family has been in the accommodation industry for over 36 years in Byron Bay and we have never seen such a decline in trade as that since AirBnB/short term holiday rentals have started up and taken over Byron Bay.

The thousands of homes that are now short term holiday rentals have killed the permanent rental market and the accommodation industry. Businesses are closing and struggling to keep open - that is a fact.

Byron Bay is the jewel in the NSW crown and this policy being put forward through parliament is going to destroy the fabric of this unique and beautiful town. A 90 day cap MUST BE put in place, Council MUST BE given the power

back to oversee and implement their own policies to protect our town and there needs to be a level playing field.

These holiday houses need to be made accountable, they need to be registered with the ATO, they must have to pay commercial rates, land tax, GST, DA fees etc. All the commercial rates etc that legitimate businesses are having to pay is killing them. There is no incentive to operate a business legitimately, we should all relinquish our licences and practice under these new "share economy" laws and just pay residential rates etc. which will decimate and cripple our councils funds.

Please look at other countries and cities around the world - there are precedences everywhere in controlling these matters - Japan, New York, Spain, the list goes on.

Stand up now to AirBnB before it is too late and they destroy the jewel in NSW crown forever.

**I agree to the above statement**

Yes

Callala Beach NSW 2540

**Submission**

I have strong concerns about two specific sections of the draft State Environmental Planning Policy (Short-term Rental Accommodation) 2019 which I ask are reviewed and modified.

Part 3, Division 2, Clause 13 is too restrictive and does not take into account the size of rooms. This clause should be written in such a way as to specify minimum room sizes. For example, a large single room that could accommodate four people, if converted to two smaller rooms to also accommodate four people, could potentially affect or restrict egress in time of emergency due to additional dividing walls. Many rooms in short-term accommodation properties have been designed to offer substantial open space and freedom of movement within the open space. Forcing owners to divide these open spaces into smaller spaces to comply with this rule is ill considered.

Part 3, Division 2, Clause 13, Clause 1 (e) and Clause 3 states that bush fire attack level-40 (BAL-40) applies. In the case of Callala Beach, this is unnecessarily high given the very limited extent of bushland present. The narrow, ribbon-like nature of the vegetated sand dune would not carry a fire of significance and certainly not to the extent that the code suggests.

If this rule is to apply, hundreds, if not thousands of properties, including all properties on Greenway Rd and Verge Rd. Callala Beach would cease to be able to offer short-term accommodation and would necessitate the closure of dozens of small business across NSW. This rule would also result in the forced sale of those properties at significantly reduced values, causing economic hardship and lost revenue streams to the NSW government. Short term accommodation in regional NSW does not impact on larger hotels, motels or hosted accommodation as it is not typically supplied nor available. This will then cause negative impacts on NSW tourism and associated employment and revenue streams to Government.

Please advise your consideration of the points raised above.

I strongly object to any sort of legislation being passed that will allow short term letting in strata buildings. I believe it is totally contrary to the rights of the people who own and live in the development as opposed to absentee owners who, on the whole, do not seem to care what effect their fly-in/fly-out occupiers have in relation to the generation of noise, rubbish disposal, parties and the wear and tear of the facilities of the strata premises.

We are strongly opposed to the State Government proposed legislation to allow letting periods. Letting periods should be determined by the local government of any area within NSW - NOT the State Government. Each local government area may have specific reasons for choosing letting periods to suit the needs and that local area. More importantly the residents of the local government area should determine what letting periods are appropriate. This should NOT be a State determination but a local government decision.

In addition, the following points support our objection:

1. The proposed policy overrides other legislation that supports residents. Clause 7 (1) In the event of an inconsistency between this Policy and another environmental planning instrument, whether made before or after

this Policy, this Policy prevails to the extent of the inconsistency.

2. NSW is out of step with locations all over the world. Major towns and cities are placing restrictions on Air BnB but in NSW the state government appears to have allowed the short term letting accommodation industry to write the rules.

3. The new legislation places a cap on days allowed for letting, where the host is not present, of 180 days per year or 365 days in regional areas. Byron was promised a 90 day limit in the run up to the last election but it is still to be approved and Council has to prove its case as to why Byron gets special treatment before it is approved. 90 days is still 45 weekends a year and, given weekend prices, this is likely not a deterrent to making owners return houses to the permanent rental market.

4. Unlimited days - no caps: Also, a loophole has appeared in the proposed regulation: a booking for 21 or more consecutive days will not count towards the limit when a host is not present. So a cap is not really a cap!! This means the true extent of short-term letting can never be monitored or measured. A host could add as many 21 day letting periods as they want for the rest of the year and it would not be counted in the annual total!

5. The state govt is also proposing an industry-led register to keep track of all short-term lets. It is expected to record the name of the host, the property's address, the duration of each booking and whether it complied with bylaws. The industry self-regulating? Really? This takes the power away from local councils to monitor non-compliance for their residents.

6. It is also known that a number of NSW MPs own short term rental properties, including the Deputy Premier. Politicians with clear conflicts of interest should not be allowed to vote on this issue.

7. The law supports residents - NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"; relying particularly on North Sydney Municipal Council v Sydney Serviced Apartments Pty Ltd (1990)21 NSWLR 532 and Derring Lane Pty Ltd v Port Phillip City Council (No 2) (1999) 108 LGERA 129.

In summary the State Government should NOT be involved in policy legislation related to letting periods. Such determinations should be made by each respective local government authority as they so determine appropriate for their local government area.

As owners and operators of a small motel in Byron Bay we are strongly opposed to the unregulated short term accommodation situation that exists at present. The proposed "cap criteria " is a series of regulations which will prove to be entirely unenforceable by either State or Local government. We as a commercial operator are now being penalised and challenged by Airbnb who are not subject to the same regulations and costs. This leaves the local Byron community bearing the brunt of what is now a very dire situation in relation to living and working locally.

Whether the statistics on whole home rentals are only perceived as half accurate the situation regarding the number of whole home rentals available (with no onsite owner/manager) extremely challenging as well as the fact that these properties are only increasing in number and will ultimately prove disastrous for the future of the Byron Shire community.

Director, Housing and Infrastructure Policy  
GPO BOX 39  
Sydney, NSW 2000  
Dear Sir/Madam

RE: Short-term-rental accommodation reforms

Thank you for the opportunity to provide comment on the draft instruments and regulations that will introduce the state-wide planning framework and mandatory Code of Conduct for short-term-rental accommodation (STRA). The Sutherland Shire supports STRA from a tourism perspective. There are over 400 Airbnb listings in the Sutherland Shire. STRA provides additional accommodation options for visitors to the Sutherland Shire, at a range of price points. It allows more people to stay here, bringing economic benefits to the area, especially for local businesses. Council has found that the development of traditional forms of tourist and visitor accommodation has not been feasible for developers and STRA helps to fill the gap.

Council's submission is intended to assist the drafting of the reform package to make it stronger and to ensure community confidence in the operation of this industry.

Due to the timeframes required to provide a report to a Council meeting, the attached submission has been endorsed by the elected Council. Council will consider the matter on 21 October after which a final decision will be made.

Yours sincerely,

Mr Mark Carlon  
Manager Strategic Planning

Submission: Sutherland Shire Council

While the package of reforms is generally an improvement on previous proposals and has responded to Sutherland Shire Council's earlier submissions, the following deficiencies and risks are noted. Council requests that these are addressed to ensure that the community can have full confidence in the operation of STRA.

#### Fire Safety

The draft State Environmental Planning Policy does not directly refer to the proposed Short-term Rental Accommodation Fire Safety Standard. When a host, neighbour or Council officer are reading through the draft SEPP, there is currently nothing to indicate that a higher standard of fire protection is required for STRA. This may lead to hosts operating short-term rental accommodation without installing the correct fire safety devices or procedures. Including a direct reference in a note or other provision of the draft policy would make it more obvious to hosts that additional fire safety requirements apply.

The proposed exempt development process does not provide any mechanism for checking that the fire safety requirements have been met and maintained. The risk is that the problems with a property will not be identified until after a fire occurs. A requirement for regular fire safety inspections and certification as part of host registration could be a way to address this problem. A certifier could provide something like an occupation certificate to verify that the existing dwelling meets the requirements of the exempt development provisions and that all fire and pool safety requirements have been met. This occupation/STRA use certificate could be provided as part of the short-term rental accommodation registration process.

Annual fire safety inspections could be implemented through an amendment to Clause 167 of the Environmental Planning and Assessment Regulation 2000 which would extend existing fire safety inspection provisions to STRA.

#### Public Notices & Signage

Signage or a notice at the entrance to the property should be used to indicate that it is being used for short-term rental accommodation. In a multiple dwelling situation, the notice should be attached to the front door. In a detached house, the signage could be located in the front yard.

Signage helps to set the expectations of neighbours, and ensures that any impacts of the activity do not come as a

surprise. Secondly, the signage should provide contact information for the host so that issues can be resolved directly between neighbours and the host as much as possible. Finally, the signage should list the unique registration number for the short-term rental accommodation property so that neighbours can verify the rules under which the property is operating and easily make complaints directly to the Department of Fair Trading.

#### Waste Management

The draft requirements at present do not mention waste disposal. A property which is almost continuously occupied by up to 12 people is likely to produce far more waste than a typical residential property. High occupancy properties should be required to provide sufficient waste storage or disposal services to meet the needs of their occupants.

#### Clearer Exclusion of Ancillary Structures

Council's previous submissions expressed concern that ancillary structures such as sheds and studios should not be used for short term rental accommodation. The draft SEPP gives effect to this indirectly by requiring that short term rental accommodation be undertaken only in an existing lawful dwelling. To avoid misinterpretation, the draft SEPP should also state clearly that ancillary structures cannot be used for the purpose of short-term rental accommodation.

Requiring an inspection and occupation/use certification requirement prior to registration as short-term rental accommodation, would ensure that inappropriate structures are not used.

#### No Exclusion of Caretakers' Flats

Caretaker residences in commercial, industrial or community buildings are not excluded. These residences are permissible under 5A.15 of the Commercial and Industrial (New Buildings and Additions) Code through complying development in many cases. The intent of these residences is to facilitate on-site supervision of premises, but in high amenity locations short-term rental accommodation may be lucrative. Excluding the use of caretaker residences for short-term rental accommodation will help to ensure that they continue to be used as originally intended.

#### Interaction with SSLEP2015 – Dual Occupancies as an Additional Permitted Use

Some unintended conflicts emerge between the draft policy and the provisions of the Sutherland Shire Local Environmental Plan 2015. Specifically, owners of dual occupancies in the E4 Environmental Living and E3 Environmental Management zones will be prevented from undertaking short-term rental accommodation under the draft policy wording.

The draft SEPP requires that short-term rental accommodation can only be exempt or complying development if “..the development is carried out on land in a zone in which in which residential accommodation of a type corresponding to the dwelling is permitted with or without development consent”. This wording does not respond to Additional Permitted Uses (APU) listed in Schedule 1 of Standard Instrument local environmental plans.

The Sutherland Shire has many suburbs which are bushfire prone or could be isolated in the event of a bushfire. Following the recommendations of the Royal Commission into the 2009 Black Saturday Bush Fires in Victoria, the Sutherland Shire has sought to limit permissibility for additional density to mapped Additional Permitted Use areas in the Sutherland Shire Local Environmental Plan 2015 which are bushfire free and do not have restrictions on evacuation. Residents in these APU areas can undertake dual occupancies with consent, despite the use not being permissible in the E4 Environmental Living or E3 Environmental Management zones in the zoning table. The draft SEPP wording would appear to exclude a lawfully constructed dual occupancy in these zones from undertaking short-term rental accommodation.

An LGA specific variation clause, or more flexible wording of this provision is requested so that dwelling types permissible via LEP APU provisions can undertake Short-term rental accommodation.

#### Limited Role for Councils in Regulation

Council will have limited powers to regulate short term rental accommodation, confined only to enforcing the requirements of the draft policy rules or the conditions of any active development consent on the property. Other matters (such as parking issues and neighbourhood amenity) will typically fall within the terms of the draft code of conduct which is enforced by the Department of Fair Trading. This limits Council's ability to deal with neighbour

complaints to onward referral.

It is concerning that the practical responsibility for responding to complaints and investigating breaches of the exempt and complying development provisions will be undertaken by Council, however the Department of Fair Trading is responsible for enforcing the code of conduct through penalties and the exclusion register. This split of responsibilities is likely to create problems of coordination and inconsistent decision making.

Council is likely to be the first point of contact for many complaints, regardless of whether a specific property is operating in violation of the exempt and complying development provisions or the code of conduct. It is suggested that standard minimum information requirements for complaints be published so that Council can collect these complaints in a standard form and refer them to the Department of Fair Trading as easily as possible.

The Department of Fair trading will need to cover its costs for enforcing the code of conduct if the entire framework is to be delivered at no cost to government. Will Councils be able to share in fees or penalty revenue in order to cover their costs? Are there any other options for Councils to recover their costs in relation to managing the impacts of short-term rental accommodation?

#### Concern Regarding the Industry Operated Register

The proposed industry operated register of hosts, properties and guests is critical to ensuring that the industry is regulated and penalties are enforced. The register does not yet exist. It is not clear who will be responsible for the quality of the information in the register or whether Council will have access. Given the scale of the international platforms that dominate this industry, it is not clear how platforms will be compelled to participate. Without an effective register, the proposed code of conduct and other rules are very difficult to enforce.

In order to create certainty in the regulatory environment for STRA, Council requests that the Department of Fair Trading assumes responsibility for operating the register. This will ensure that statistics and compliance matters can be consistently tracked across the whole state and for all participants across all platforms.

The requirement to register all STRA should be included in the proposed SEPP. This will ensure that Council can take action against rogue operators under EP&A Act powers and make it clear to potential hosts that the registration requirement is mandatory.

#### Responses to the Suggested Questions

1. What is your view on the form of and provisions in the STRA SEPP, Regulation and Safety Standard?

A range of issues and risks exist in the draft provisions as detailed above:

- No mechanism to ensure compliance with fire safety standards in the exempt development provisions.
- Caretakers' flats are not excluded, but probably should be.
- Dwelling types permissible through Additional Permitted Use provisions of LEPs are excluded, but probably should not be.
- Beyond existing consent conditions or basic permissibility and some development standards in the draft SEPP, Councils have few mechanisms to regulate this use from a compliance perspective.

2. Are there any elements of the draft instrument that are open to misinterpretation or require further clarification?

There are elements of the draft SEPP instrument that are open to misinterpretation:

- Exclusion of class 10 structures should be explicitly stated in a provision or a note.
- There are no reference or notes in the draft SEPP to fire safety standards applying to different types of dwellings.

3. What are your views on new policy elements relating to days, flood control lots and bushfire prone land?

The register will be crucial for tracking the occupancy of properties and ensuring that they are compliant with the 180 day limits. The requirements on flood control lots and bushfire prone land appear to be comprehensive and should be sufficiently clear for a private certifier to interpret.

Short-term rental accommodation platforms could be of assistance to emergency services by providing an extra mechanism for contacting their customers and hosts during emergencies, and providing estimates of the number of visitors in affected areas.

5. What types of STRA information will be useful for the Secretary to collect to inform the further improvement of

the Code and the STRA regulatory framework? Why?

Sufficient information is required to enable the connection of complaints to the subject short-term rental accommodation properties, hosts and platforms. The register information should be aligned with a minimum standard required of complaints, so that the information in them can be cross referenced and analysed.

6. Are the specific obligations on booking platforms, letting agents, hosts, guests and facilitators in the Code adequate? If not, what other obligations should be considered for each of these industry participants? Why? Hosts should provide house rules based on template guidelines provided by the Department of Fair Trading – such as maximum on street parking, noise and limits on noisy or disruptive activities like parties. This would ensure that the intent of the Code of Conduct is made clear to guests, and can provide confidence to neighbours that the STRA is being appropriately managed.

7. Is the complaints process detailed in part 6 of the Code sufficient? If not, what other matters should be considered or set out in the process? Why?

Councils have historically played a default role in managing complaints between neighbours regarding the use of land and premises. Even if the Department of Fair Trading takes on this role, Councils will continue to be the recipients of many complaints. A dedicated Fair Trading Complaints hotline and website should be created to make it easy for Councils to refer complaints onward.

The Department should provide minimum standards for complaints. Minimum information requirements would ensure Councils can easily refer complaints with a useful amount of information.

8. Are the grounds for recording a strike fair and reasonable? What other matters (if any) should the Commissioner consider when deciding whether to record a strike? Why?

The grounds appear to be sufficiently broad so as to enable a strike to be recorded when necessary.

11. Are the proposed penalty notice offence and civil penalty provisions appropriate? What provisions should or should not be identified as penalty notice offence and/or civil penalty provisions? Why?

The penalty should be comparable and proportional to the financial gain associated with code violation.

17. Which industry participants should contribute to the cost of administering and enforcing the Code? Why?

Platforms and hosts should contribute to the cost of enforcing the code, through an annual registration fee.

19. Is the proposed penalty notice offence amount appropriate? Why or why not?

The penalty needs to be proportionate to the financial gain so that this is not just seen as a cost of doing business.

22. What role should the Government play in developing or overseeing the register, if any?

There are clear risks in self-regulation. Government must have a role in overseeing operation of the register. It is suggested that the Department of Fair Trading should host the register to ensure all participants have confidence that it is independent and fair.

23. Are there other outcomes a register should deliver?

There are many outcomes a register should deliver:

- Tracking of number of nights stayed as un-supervised STRA,
- Tracking complaints about specific properties, guests and hosts,
- Supplying information for guests, providing checks to monitor compliance.
- Collecting statistics for the tourism industry, and
- Tracking the house rules should be available for each property on the register.

24. How can the approach ensure registration applies to all STRA operators, regardless of how the property is advertised for rent?

This will be achieved if strong enforcement and real penalties apply which are proportional to the financial gain a host or platform might have received from non-compliance.

25. What audit and verification processes would be needed to ensure accuracy of data?

Random audits and inspections by the Commissioner should be a feature of the reforms, particularly of properties which attract complaints.

26. Should there be separate or additional penalties for failure to register? If so, which industry participants should they be imposed on?

The penalties should be imposed on both the Host and the platform to ensure that there is a financial incentive to comply.

28. What role should different industry participants (e.g. hosts and booking platforms) play in the registration process?

Hosts should do this directly, and then advise the platforms by providing copies of documentation.

29. What role should Government play in the registration process or providing information for the register?

The State should confirm that all licenses and safety requirements have been met as part of the registration process.

30. Should any information on the register be made publicly available? If so, what information could be made available and why?

- Sufficient information for residents to confirm that a property is being operated in compliance with the requirements of the Code of Conduct and the SEPP.
- Contact information for the host so that complaints can be made directly to the host as a first point of contact.
- A summary of the “house rules” so that neighbours know what to expect from visitors.
- A count of how many days has the property been used for unsupervised STRA, towards the 180 day limit.

31. Should industry be required to report registration information, including number of stays (days), to Government and/or local councils? If so, how frequently? Why?

Yes, continuously through direct access to the register and statistical summary reports for each LGA on a quarterly basis.

34. When should the STRA regulatory framework start? Please provide reasons.

When the register is ready to operate. The proposed regulation framework for this industry relies on the register. Trying to operate without the register could create situations where Council has lost the power to regulate a matter, yet the Department of Fair Trading would not have the register in place to facilitate State level regulation.

36. What data sources could the NSW Government use to inform the review? How can industry and councils assist with data collection for the review?

Ideally, the State Government could join up a range of State and Local Government information sources related to land tax, development approvals, and land ownership. The NSW Planning portal is becoming a central place for planning data and should be considered. Councils also have agreements with third party consultants like ID to provide services such as Economy ID and Forecast ID which may provide useful background information to support a review of STRA.

I own a STRA property in Currarong NSW 2540 and wish to make two points

1. I am deeply concerned about the proposed fire safety standard which will not permit STRA for properties with BALs greater than 40. Currarong is a tiny holiday village nestled between the sea and the bush that is almost totally reliant on holiday rental income and from what I can discern around one third of the rental properties could meet a BAL rating of 40 or greater with a large number of BAL 29 rentals needing to upgrade equipment. Areas like ours are at risk of fire - not just these selective houses but the entire community so to single out some houses above others in a small community surrounded by bush makes little sense. A fire, should it occur, would not do so.

Also, Currarong may not be an isolated case. The entire Shoalhaven region relies heavily on tourism (especially areas

around Currarong, Callala Beach, Kangaroo Valley and Berry) and in many cases the attraction of STRA properties in this region is their small community feel along with their proximity to the bush and/or beaches that are surrounded by bush and where guests get to enjoy visits from the native wildlife in their backyards.

I would ask that areas like this be assessed differently to city areas to ensure that both owners and holiday makers are able to continue to enjoy spending time in close proximity to nature while also ensuring measure are put in place to ensure the safety of these communities as a whole, rather than targeting individual properties.

2. I would ask that existing dwellings be grandfathered. My husband and I are in our 60s and our STRA property was purchased as part of a self-funding retirement plan. I know that at least in our area we are not alone. Many of the properties in Currarong, and in general I am sure, are used as retirement income or future retirement income. Should this legislation come into force I am fearful of the impact this will have not only on our potential income but also on the value of our property. Should holiday villages such as Currarong become unattractive to investors as a result of this legislation then the property market will be adversely affected.

Byron Bay NSW 2481

**Submission**

I wish to submit my objection to the Short Term Holiday Rental policy that is currently being discussed.

As a long term resident and business owner in Byron Bay I can see the demise in our community and the obliteration of the accommodation sector.

We have been in the accommodation industry for over 36 years in Byron Bay and we have never seen such a decline in trade as that since AirBnB/short term holiday rentals have started up and taken over our town.

The thousands of homes that are now short term holiday rentals have killed the permanent rental market and the accommodation industry. Businesses are closing and struggling to keep open - that is a fact.

Byron Bay is the jewel in NSW crown and this policy being put forward through parliament is going to destroy the fabric of this unique and beautiful town. A 90 day cap MUST BE put in place, Council MUST BE given the power back to oversee and implement their own policies to protect our town and there needs to be a level playing field.

These holiday houses need to be made accountable, they need to be registered with the ATO, they must have to pay commercial rates, land tax, GST, DA fees etc. All the commercial rates etc that legitimate businesses are having to pay is killing them. There is no incentive to operate a business legitimately, we should all relinquish our licences and practice under these new "share economy" laws and just pay residential rates etc. which will decimate and cripple our councils funds.

Please look at other countries and cities around the world - there are precedences everywhere in controlling these matters - Japan, New York, Spain, the list goes on.

Stand up now to AirBnB before it is too late and they destroy the jewel in NSW crown forever.

Kind Regards,

**I agree to the above statement**

AIRBNB holiday letting is significantly impacting my business. This must be stopped. These lettings are ruining small business that work within the holiday zoned areas. No residential.

They are also impacting the privacy and serenity of residential areas. I have AIRBNB holiday let homes in my street and they are continuously having parties, the landlords don't live in Byron they don't care, there is a short supply of rental homes for locals who work in Byron Bay.

This is getting out of control and the long term effect will be detrimental to the people who live and work in Byron and the landlords live put of town and don't care.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I have a business that represents home-owners who wish to host on Airbnb. Airbnb helps these home-owners to pay the mortgage and the bills, and to share their spaces to guests so that they can become part of other communities.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share the homes of our home-owners.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,  
Lisa Peterson  
147 Bevic Road

**Submission**

In regard to STRAs (Short-Term Rental Accommodation) properties, my major concern in the tourist area in which I live (The Blue Mountains) is the ever-increasing number of domestic properties being bought and operated as non-host accommodation. The well-being and lifestyle of owner-occupier residents always comes a poor second to the monetary arguments of tourism operators, property developers and cashed-up investors from outside our area. We now have a major "industry" operating in residential areas. People's homes are being surrounded by money-making businesses. I am not compensated or advantaged in any way by this goldrush. Inconvenience, alienation and anxiety are my reward.

For the rate-paying residents who live permanently in this area, the increasing crush of visitors and the transformation of neighborhoods into clusters of money-making crashpads, is becoming demoralising. The character

of neighbourhoods and the appearance of heritage streetscapes are being degraded for financial gain and the sense of community is lost. Government at all levels seem to feel it is only a matter of self-regulation by "the industry" - and when has that ever worked? Yes, a code of conduct and some redress measures for residents in regard to issues like noise and anti-social behaviour will supposedly guarantee harmony. A fair outcome for all. Many of us currently being subjected to the daily imposition of this tourism goldrush beg to differ. This is about a lot more than noisy strangers and parking in people's driveways.

The real issue is the fundamental, corrupting changes imposed on entire communities. Think about what is happening to major tourism sites around the world. Venice, perhaps, being the most profoundly affected and effectively trashed. In the Blue Mountains, the owner-operators of the growing number of STRAs have no real interest in this beautiful and historic area or the daily wellbeing of residents. It's all about their unfettered financial gain, not about our quality of life.

The street in which I live now has five STRAs properties, and no doubt more to come. My recommendation to the Planning Department is to put a cap on the number of properties that can be used for short term rental in any residential street based on a ratio of STRAs to owner-occupied and long-term rental dwellings. Without these necessary constraints our communities will become ghost towns and the golden goose of tourism well and truly cooked.

Thank you for considering these comments.

Sincerely, Marcus Cole.

Dear Director, Housing and Infrastructure Policy,

As a business owner generating more than 100 employments in NSW I wanted to provide my feedback on the Government's proposed regulations.

I have a business that represents home-owners who wish to host on Airbnb. Airbnb helps these home-owners to pay the mortgage and the bills and to share their spaces to guests so that they can become part of other communities.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share the homes of our home-owners.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however, parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their properties.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to the properties before hosting, such as expensive lighting systems. I also wonder, if this is required for hosting, why are these homes safe for us to live in?

Should we then change everything and implement these new requirements to all homes in NSW?

Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations.

I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of homes for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home-sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home-sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it enables me as a professional management business owner to offer alternate accommodation to holiday makers, corporate travellers, locals that may need temporary accommodation due to insurance claims / or renovating their properties at an affordable price.

I have a business that represents home-owners who wish to host on Airbnb. Airbnb helps these home-owners to pay the mortgage and the bills, and to share their spaces to guests so that they can become part of other communities.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share the homes of our home-owners.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

**Submission**

To Whom it May Concern

I wish to submit my objection to the Short Term Holiday Rental policy that is currently being discussed.

As a long term resident and business owner in Byron Bay I can see the demise in our community and the obliteration of the accommodation sector.

We have been in the accommodation industry for over 36 years in Byron Bay and we have never seen such a decline in trade as that since AirBnB/short term holiday rentals have started up and taken over our town.

The thousands of homes that are now short term holiday rentals have killed the permanent rental market and the accommodation industry. Businesses are closing and struggling to keep open - that is a fact.

Byron Bay is the jewel in NSW crown and this policy being put forward through parliament is going to destroy the fabric of this unique and beautiful town. A 90 day cap MUST BE put in place, Council MUST BE given the power back to oversee and implement their own policies to protect our town and there needs to be a level playing field.

These holiday houses need to be made accountable, they need to be registered with the ATO, they must have to pay commercial rates, land tax, GST, DA fees etc. All the commercial rates etc that legitimate businesses are having to pay is killing them. There is no incentive to operate a business legitimately, we should all relinquish our licences and practice under these new "share economy" laws and just pay residential rates etc. which will decimate and cripple our councils funds.

Please look at other countries and cities around the world - there are precedences everywhere in controlling these matters - Japan, New York, Spain, the list goes on.

Stand up now to AirBnB before it is too late and they destroy the jewel in NSW crown forever.

Kind Regards,  
Bec Batson

**I agree to the above statement**

Yes

Airbnb has increased in Byron Bay which has made occupancy in hotels low. Hotels cannot compete with lower nightly rates. There are owners of the airbnb that do not even live in Byron either.

A strata should have the legal capacity to determine the types of letting and businesses that are permitted in their complex. In fact , a strata should be permitted to decide if any business especially one that will impact on other residents, should be allowed. One would not expect a random business to be able to be established in a residential complex. Short term letting is a business and has substantial implications for the strata.

There are a number of issues with short term rental that do not apply to longer rental

- 1) The identity of the tenant is not known or not accessible to the strata manager and the strata meme era
- 2) there are liability issues that are not covered by normal strata or landlord insurance
- 3) noise and other antisocial issues cannot be dealt with when there is a large turnover of occupants

The strata must be entitled to determine the circumstances of how its premisses are used.

**I agree to the above statement**

Yes

As an owner of an apartment, I believe that stratas should have some capacity to have a by-law (which requires 75% support) to limit or eliminate short term lending. I recognise some stratas will support it but there are others where owners' rights are compromised and where short term renting can result in increased maintenance / repair costs and intrusion into lifestyle.

It is also an imperative that any registration system not be in the hands of the short term letting industry but is managed by government or local government. Allowing the industry to manage such a process leads to a very obvious conflict of interests.

Where short term letting is allowed, it does require a strict code of conduct that protects owners and long term residents.

Having lived in Byron Bay for 25years I have been shocked by how damaging to the community the Short Term Holiday Letting, notably Airbnb, is having on our life. Often the accommodation has no owner or tenant home and that leaves it open for holiday makers to be as noisy and antisocial as they like. It also means that local people are locked out of a home in the shire because of the shortage of and incredibly expense housing stock caused by STHL. This place is very community focused and to have that eaten away without any concern is shameful. If we don't care for one another and the diversity of our land then the outcome looks bleak indeed.

This town experiences a high number of tourist, which means we have unique problems that have to be dealt with, as mentioned above. STHL need to regulating in a sympathetic way that takes into account the community of people who live here. With the proper controls in place everyone can have a bit of the cherry.

We would like to make a submission on the following points.

The use of BAL zones to exclude existing holiday homes unfairly disadvantages rural and remote area holiday homes with very limited other accommodation options with ripple effects that will impact jobs and the local economy.

The limitation of guests per bedroom is neither fair or equitable as not all houses are the same.

The current system is not broken so don't try to fix it for rural and remote area's that had holiday homes prior to the sharing economy with no problems.

Byron Bay

**Submission**

I wish to submit my objection to the Short Term Holiday Rental policy that is currently being discussed.

As a long term resident and business owner in Byron Bay I can see the demise in our community and the obliteration of the accommodation sector.

We have been in the accommodation industry for over 36 years in Byron Bay and we have never seen such a decline in trade as that since AirBnB/short term holiday rentals have started up and taken over our town.

The thousands of homes that are now short term holiday rentals have killed the permanent rental market and the accommodation industry. Businesses are closing and struggling to keep open - that is a fact.

Byron Bay is the jewel in NSW crown and this policy being put forward through parliament is going to destroy the fabric of this unique and beautiful town. A 90 day cap MUST BE put in place, Council MUST BE given the power back to oversee and implement their own policies to protect our town and there needs to be a level playing field.

These holiday houses need to be made accountable, they need to be registered with the ATO, they must have to pay commercial rates, land tax, GST, DA fees etc. All the commercial rates etc that legitimate businesses are having to pay is killing them. There is no incentive to operate a business legitimately, we should all relinquish our licences and practice under these new "share economy" laws and just pay residential rates etc. which will decimate and cripple our councils funds.

Please look at other countries around the world - there are precedences everywhere in controlling these matters - Japan, New York, Spain, the list goes on.

Stand up now to AirBnB before it is too late and they destroy the jewel in NSW crown forever.

Kind Regards,  
Katie Wilson

BYRON BAY

**Submission**

The new planning policy will effect the hotel industry in Byron Bay. Working in a hotel, there are a lot of fees that need to be accounted for and so airbnb can charge a low rate. All of the hotel owners are Byron Bay locals so income made is going back into Byron Bay's economy where as people who host their place on airbnb are using that money else where.

**Submission**

The aim of short term home sharing (AirB&B) is that the host resides in the home (on site). Therefore, the host should actually be living in the residence when the guests are utilising the premises.

IT IS ESSENTIAL that multi unit (apartment) buildings have the right to include provision in their By-Laws to require that an owner actually reside in the unit.

161 Castlereagh St, Sydney  
NSW 2000

Att: Director, Housing and Infrastructure Policy  
NSW Department of Planning, Industry and Environment

Re: Proposed STRA Rules for NSW

Hometime Submission

Thank you for the opportunity to comment on the Proposed STRA Rules for NSW. As the largest Airbnb property manager in NSW, we are grateful for the opportunity to provide context and constructive feedback on the proposed regulatory changes.

Summary

Hometime welcomes a fair and considered STRA regulatory environment in NSW that promotes a sustainable STR industry, fosters a professional ecosystem and is easy to navigate and comply with

Hometime supports the proposed 180 night cap, although our support of this particular matter is contingent on exemption of stays of 21 nights or more not counting to the cap

Safety of our guests, neighbours and the community is paramount. However, we would like to see that specific fire safety proposals are inline with current residential requirements set out by body corporates and relevant fire safety standards. We also feel the proposed smoke alarm & lighting requirements are too costly for the average household to afford, thereby rendering them unable to participate in the STRA market

Hometime opposes the STRA property register on the basis it will add needless complexity and cost to the process and will create an onerous administrative requirement

The Code of Conduct is fair and representative of our views, however we ask that it be amended to allow hosts to be covered by insurance directly provided by a booking platform

Hometime supports a review of the proposed STRA rules following 12 months of implementation.

Hometime believes that increasing compliance costs for STRA will make it more costly to holiday makers in NSW. We see STRA as an important, distributed, low cost option for tourists in NSW and that any cost increases in providing the accommodation will have a significantly negative affect the local economy

About Hometime

Hometime began as a small company with big ambitions. Two friends who started a cleaning company that turned into an international startup success story in just 4 years. The tremendous growth of Hometime comes off the back of the incredible demand from Homeowners and Guests alike who relish the opportunity to share their homes and be hosted in a new area.

As the company has matured we have changed our core offering. We are no longer just a management company providing cleaning and guest services. We have transformed into a platform which mentors small business owners and provides them the tools and resources they need to run their own portfolio of Airbnbs. We are helping to foster a new class of micro entrepreneurs who are able to run their own lifestyle business with the opportunity to generate great income.

At Hometime, we love that no two hosts, and no two properties are the same. We put a tremendous amount of time and effort into managing our host's homes and guests because we know great experiences lead to glowing

reviews. This is demonstrated by our fantastic track record after hosting more than 350,000 guests and maintaining an average rating of 4.8 stars out of 5.

Overall we welcome the move to regulate the industry to keep it fair for everyone, however we are concerned that NSW Government's proposed short-term rental accommodation (STRA) rules are taking it to far and will make it difficult for Hometime to viably share the homes of our homeowners.

We represent over 1,000+ active hosts in Australia with the largest portion of them being based in NSW. The majority of our hosts are regular home owners trying to make the most of their assets while balancing personal needs. Some may want to offset their holiday expenses whilst travelling, others are business travellers who want to utilise their assets when they are working interstate -- full-service property management companies like Hometime provide a unique solution for them to do just that.

At Hometime we go to great lengths to ensure a healthy ecosystem of happy guests, owners and neighbours is maintained. If we are not keeping all stakeholders happy then we will not have a thriving business. We offer our guests and homeowners 24/7 communication channels 365 days of the year so that in the event there is a problem we can have it resolved around the clock. We also heavily vet our guests so that we can provide our homeowners peace of mind and ensure that damage and distraction to neighbours is reduced. We have a zero tolerance policy on bad behaviour and we are constantly improving our systems and processes to ensure that bad behaviour is minimised.

We currently employ 25 full time employees in Australia, provide full time work to 40 contracted property managers and casual or part time work to over 100 cleaners. Additionally we also provide casual work to a number of photographers, stylists, handymen and tradespeople. We see our impact on the Australian economy as positive and our continued rapid growth means further job and value creation within the NSW economy. Many of the suggestions outlined below will severely inhibit our opportunity to operate at scale in NSW and may force us to move our headquarters and attention to states with more favourable regulation.

We are glad that the government has been so open to receiving feedback and allowing us a voice in this discussion. Generally we support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, we want to comment on the following:

#### STRA State Environmental Planning Policy

Hometime does not support the requirement that hosts need complying development permits. This expensive permit will be a large burden on many of our hosts and make hosting out of reach for the average homeowner who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. This is also not inclusive of the potentially burdensome time component of getting the permit. Often home sharing is very time sensitive and For hosts who share their home for a few weeks a year, this is a significant barrier to entry and will make hosting uneconomical. Traditionally holiday homes up and down the coast, and in regional areas, have existed for decades without these expensive permits without issues. The net result will only end up making holidays across NSW more expensive, potentially driving tourism to different states and territories where accommodation is much cheaper. This will ultimately have the biggest effect on families wishing to holiday in NSW.

#### Environmental Planning and Assessment (STRA) Regulation 2019

Hometime does not support the unrealistic requirements to which will introduce red tape and force potential hosts to make costly alterations to their homes before hosting, such as expensive lighting and fire detection systems. Both South Australia and Tasmania have stated clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if a house is approved to be safe for and owner and their family to live in, it's safe for guests.

We support the NSW Government streamlining safety regulations which:

Respect the ancillary use of Hosts homes for home sharing

Mandate smoke alarms – either battery operated or hard-wired but ultimately in line with the requirements of the body corporate and relevant residential fire safety standards

Require evacuation or emergency plans and guest education

#### STRA Property Register

Hometime does not support the potentially costly, complex, and onerous STRA property register. We do not believe that it will have any material effect on the industry that is positive. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework. This would also be very difficult to enforce should rogue hosts choose to host on fringe booking platforms.

#### Code of Conduct

Hometime supports the proposed Code of Conduct which overall is fair, reasonable and representative of the home sharing community. It seems to provide strong protections for hosts and guests from vexatious or frivolous complaints. We ask that the Government amend the Code to allow hosts to be covered by insurance directly provided by a booking platform.

#### Yearly Caps on nights booked

We support the need for a restriction of 180 nights booked per year. However our support is contingent on the inclusion of the recent changes to allow stays of 21 nights or more not counting to the cap. These medium term stays are often booked by business travellers, relocating families, students doing terms abroad and locals who are in between housing. As such they are generally having a positive impact on local communities and economies.

We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration. Ultimately the more costly it becomes to provide home sharing in NSW for owners the more costly it will become for holiday makers. Should this balance be tipped to far it will drive tourists out of NSW in search of more affordable options. Considering NSW is already the most expensive state in Australia to find accommodation we believe this could have a detrimental effect on the local economy.

Thank you for taking the time to review and consider our submission. We hope to work with the Government in relation to these issues in the future, and would be pleased to engage further should someone wish to reach out to us directly.

Yours sincerely,

William Crock

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

New Brighton 2483

**Submission file**

[stra-code-of-conduct-and-registration-feedback\\_submission.pdf](#)

**Submission**

Please find attached submission. The holiday home we own in New Brighton has been used as short and long term rentals since my family bought the property in 1954. New Brighton has always been a holiday destination for families living elsewhere and as a child in the 50 and 60'ies we visited the home at least twice a year from Sydney and rented it at other times. There are no motels or hotels in New Brighton and short term holiday letting is the only option for other families to enjoy the area as much as I have for over the last 60 years. My husband and I have used the home more since we have both retired - but as pensioners we rely on short term holiday letting to help us pay

excessive insurance premiums, energy costs, higher rates and general maintenance as we are close to salt air and some flooding as there is no storm water drains in the area.

**I agree to the above statement**

If it's ok for permanent accommodation to be allowed on bush fire prone land then STRA should be treated the same, especially if the new safety standards are adopted or if the dwelling has been built to recent standards. This proposal would exclude a lot of urban housing especially in the Blue Mountains and other areas most people would not think of.

Restricting the number of persons per bedroom would effect many family situations and would be difficult to police where children are involved.

#### **Submission**

I live in a block of 50 units. One owner has been short term leasing for the past three years, with disastrous impact on all other residents. All of us are very frustrated by the sheer length of time that it has taken for the Government to address our concerns on the impact that this is having on our daily lives, with seemingly endless reviews and reports, none of which are solving the problem and which seem to be driven by the short term letting industry at the expense of residents who want to live in a normal residential environment, not a hotel!

Our Strata Committee has been powerless to take action against the short-term letting owner. Despite some 30

breach notices, with subsequent mediation by the Office of Fair Trading at which the owner declared that she would not cease the practice, it appears nothing can be done as the government is sitting on its hands with protected enquiries and reports which to date have lead nowhere, and have only allowed the short term letting industry get a firmer foothold in our communities.

It is clear that this issue is not about "Home-sharing" – it is an industry which has been allowed to take a very strong foothold, ignoring all the rules. It is about a few investor owners being able to buy into an apartment complex and have a devastating impact on a large number of other residents.

Issues that we have had to deal with include:

- Non-compliance with our By laws, our Development Conditions and Council zoning
- Overcrowding of unit - 10 people in a 2-bedroom unit on numerous occasions
- Excessive noise, particularly in outside walkways, entrance foyer and corridors, with many late night and early morning departures
- Complaints from elderly residents who thought they had bought into a secure building, only to find themselves continually surrounded by strangers
- No on-site management - the owner lives 300 km away and "guests" let themselves in. Other residents have had to take on the roles of orienting new "guests" to the building and our area.
- "Guests" unfamiliar with By laws and hence non-compliant on many aspects. In the first year of the short-term letting there were 30 breach notices issued for this unit, and only 6 for the remaining 49 units. In respect of the 6 issued to the other units, there was a 100% immediate rectification of the issue, but in the case of the short-term letting unit, the issues were simply on-going and ignored by the owner.
- "Guests" parking anywhere. There is one car space for this Unit, but often there are many "guests", with multiple vehicles. Residents regularly come home to find their allocated car space taken.
- Inappropriate waste disposal. We have found bags of rubbish in our gardens and there is little compliance with our sorting guidelines for recycling, leading to rejection of some bins on pick-up and added expense for alternative disposal.
- Damage to common property. At least three incidents attributable to careless "guests" but for which we have been able to obtain recompense.
- Breach notices issued have been responded to by the owner's lawyer seeking firm evidence and CCTV footage, meaning that we had to seek our own legal advice - our Strata's costs are now in excess of \$10,000

As a member of the Strata Committee, voluntarily giving up my time, I have spent considerable time and effort orienting short term "guests" to the building and area, listening to the concerns of other residents, rectifying incorrect garbage issues and dealing with issues arising from breaches of our By laws. This is cost-shifting by the owner!

As the way forward, I submit:

- There should be a cap of 60 days on any short term letting where the property is un-hosted. Whilst I support the right of residents to share their home with others, and even lease out their units whilst they themselves are away for short periods, I strongly object to non-resident investor owners using our apartment block as a hotel. The proposed 180 limit is simply not acceptable - it would allow leasing for every weekend of the year, plus another 80 days at other periods - virtually continuous and would be very difficult to monitor and enforce.
- There needs to be a register of properties available for short term letting so that we can readily identify such units and ensure compliance.
- There should be no short term letting allowed where it isn't permitted under Council Zoning and Development Consents.
- There should be the ability for Stratas to levy additional charges and fees to recover the additional costs imposed by having short term letting in their blocks.

**Subject:** Holiday rental regulations for NSW

**Categories:** recorded and not sent to DCS, recorded in DPIE subs register, Purple category

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

**Suburb/Town & Postcode**

Balmain East, 2041

**Submission**

I would like to say that last year at 75 years old I retired from my work of 45 years as a clinical psychologist. I could have stayed in my home in Balmain and drawn a part-pension but I felt that if I down sized my home I would be able to self fund my retirement. I saw that as part of my contribution to my Australian society so that others who were not in my position could benefit.

I purchased my current unit with the belief that it was to be my home for the final part of my life. I carefully chose my new unit on the basis that it was quiet and well run and that has proved to be so in the main. Some short term

letting, particularly in the summer months, has indicated to me the dangers that a growth in this area could have major impacts on my quality of life. This quality of life also relates to other retired individuals and couples. Increasingly it includes families that increasingly live in the complex since buying a house in the inner west is prohibitive. What I would like to convey to you is that these units are not just a money making exercise, these units comprise the 'homes' that people live in and these 'homes' require major protection by agencies like yours, not just juggling some 'need of industry'. Short term stay impacts on the quality of life of residents as people come and go at irregular hours, have no commitment to the ethos of the units, create issues of noise and disruption to recycling practices.

There is a need for a Register that is government run since we have seen over and over again (I am 75 years old) that self-regulation by the industry concerned is not adequate as it will end up being self-serving. Local councils also need to be involved and informed. You speak of the role of industry in developing and managing the regulatory system. That is not providing enough protection of our rights in our own 'homes' whether owned or rented. These protections extend to platforms.

You mention disciplinary action and strikes. Proper regulation has been so badly handled in this state that it is hard to believe that it will be effective. Words are cheap and the reality of dealing with complaints includes stress, anxiety and a capacity to deal with legalistic issues which make any contest one sided. The dice is loaded in one direction and the department should face that reality not blithely ignore it but take it into account and act accordingly.

You are dealing with the quality of people's lives and that has to hold far more value than any monetary value. Please be respectful.

Yours sincerely,  
Lorraine Rose

I have an investment apartment in the Haymarket where I previously resided for 15 years and now live in an apartment in Waterloo so in total 20 years of occupancy. In both buildings its obvious when these people arrive.....rubbish, noise, anti social behaviour, damage to common property. Who pays? We the owners. Adopt Paris and Venice model.

To whom it may concern

I have been an owner and user of sort term accommodation for many years I believe it to be a great help to the tourism market in regional areas. My concern is the caps looking to be imposed on the host, as this would limit the incomes from their investments it would cause prices to rise I think it vital for the government to remember that a lot of these regional areas don't have enough accommodation to meet demand at peak times. Also I have concerns over the cap of 12 guests per home we run homes in the **South** coast and blue mountains and the largest groups we have **are** for family reunion where family groups get together with 3 generation by the time we have grand parents their children and grand children u would hit this cap easily.

I don't want to take these wonderful family get togethers in these beautiful regional areas away they help support the small town economies, I believe there is no one size fits all but I do think any restrictions should only apply to city residents, because the smaller communities really need the tourists to help support their economies.

Regards

Mark Warren

I write as a permanent resident of Byron bay.it is a beautiful place attracting 2.2 million visitors a year , the majority local visitors but also national and in ternational visitors.

Underneath this all is a well functioning essentially family town with sporting , educational and cultural activities which locals support with lots of voluntary effort and concern and pride.

With low interest rates and high house prices and extraordinary rents that can be charged here, investment houses have become dominant.they are located throughout the community but with high rents and party times are often rented to large numbers of people necessitated by the need to share rents.

There would not be a street not affected by this often disruptive behaviour night and day by some pretty ugly noise and conduct of visitors.

Please despite our beauty and attractiveness allow us to keep our neighbourhoods and limit us as promised by Ben Franklin to the exception of 90 days limit and reconsider the 3 week exception although I can see it's directed at more stable renting.

Please let us keep Byron bay as a functioning town and not let air bnb change it forever, thereby killing its golden egg.

With thanks

Sydney 2000

**Submission file**

[motion-amending-by-laws-residential-north-sp-66849.pdf](#)

**Submission**

I'm writing as an owner of a property at King Street Wharf, North Tower (SP66849) and also represent the views of the majority of owners as Chairman of the Owners Corporation, as evidenced through recent AGM and committee discussions related to STRA.

Our Strata Plan was established in 2001 after the construction of the King Street Wharf precinct, and from the time of construction had considered the importance of balancing the needs of a commercial retail, commercial offices, residential and service apartment hotel occupants. Whilst the OC structure is complex, there's a strong working relationship across all OCs.

Specific to North (SP66849) and South (SP66850), there are by-laws that were established at inception covering Short Term Rentals, and these were further refined on legal advice and passed by the AGM in 2019. A copy of the enacted By-Law is attached for your reference. We also wish to point out the limitation of STRA was a Development Approval condition for the development, noting the commercial operations of the Adina Apartments within the precinct.

As the NSW Government proceeded to enact changes to Laws related to STRA, there's been a theme of very limited or cursory consultation. Our local MP of the NSW Parliament, Hon. Alex Greenwich has made representations on this topic, and we wish to reinforce his position as outlined in his speeches to Parliament and submissions. From a citizen's perspective, it's becoming abundantly clear that the NSW Government is bowing to lobbying by the STRA industry and neglecting the interests of the majority of residents in Strata Units like King Street Wharf. Your paper fails to acknowledge and appreciate the views and needs of our Owners and Residents.

In the case of my residential building (SP88849) we've experienced multiple negative impacts from STRA including:

- Security given transient guests. Current security arrangements in our building require all residents to be registered and issued electronic key access (with appropriate ID checking). STRA guests are not registered and we have no idea who is in our building.
- Damage to common property, including signage, furnishings, walls intentionally vandalised.
- Concern over security, including mailboxes and personal safety from transient guests
- Impact of noise from parties which have run beyond reasonable hours.
- Blocking of amenities – for example 'reserving' the pool chairs in such a manner as to block use by owners and long-term residents, even when not in use.
- Safety concerns on the use of the gym and fitness facilities from casual/unfamiliar users.
- Accelerated wear and tear in common areas.

Ultimately, I'll be PAYING MORE in my Strata Levies if we're forced into a situation where additional concierge services, security, maintenance works, utilities for common property is required due to a disproportionate occupancy of STRA due to our prime CBD location. This doesn't provide fairness to owner occupiers or owners of long-term tenancies.

The clause that "Where the host is not present, and the booking is for 21 or more consecutive days, the booking will not count towards the above day thresholds." Is a flagrant disregard for the intent of minimum lease periods (3 months in our Strata Plan) and gives owners the ability to operate a Commercial Enterprise for short term renting at Scale. Whilst your paper suggests such STRA rentals have less impact on the amenity of the building, I hold the position that such rentals should comply with a 3 month minimum period and be a formally lodged lease with Fair Trading, with appropriate bonds etc held in trust by the Government.

At the very least, By-Laws preventing STRA that have been appropriately passed by Owners Corporations should be grandfathered into any arrangements. In the case of SP66849 and SP66850, strengthened By-Laws were passed following Legal Counsel advise in 2019, and it's expected these remain valid after Parliament approves any changes.

As a regular business traveller, I want to return to my home and be a part of a community. I did not invest to live in a "hotel" with transient guests. As it stands now, the NSW Government isn't taking into account my rights for the peaceful enjoyment of my property, and the minimisation of my cost.

In short, we expect the right to continue to prohibit STRA in our development.

Sincerely,  
Jason Trump

Chairman, SP66849  
King Street Wharf, North Tower  
Sydney NSW 2000

The latest iteration of The NSW Government's proposals are as bad and damaging as ever. Proposing an industry led register for something potentially impacting on thousands of innocent parties is shameful and madness. One would have thought the recent governments led debacle of industry led building regulation and non statutory regulation and collapsing apartment blockss would have been a wake up call to the sleepy hollow of NSW planning but obviously not. International experience clearly demonstrates that the potential for Sydney to become another Venice, New York or Paris in terms of loss of permanent residential accommodation to citizens to favour the fast buck brigade and the damage to existing residents particularly in apartment buildings is immense. The strictest

possible controls are required and what you propose amounts to free-for-all deregulation. PLEASE DONT DO IT. I list below a number of specific objections and requests;

All STRA in all residential strata schemes must be made a complying development not exempt development to ensure mandatory fire safety standards are met, with inspection by local council or a private certifier.

Un-hosted STRA in residential strata schemes must be capped at a maximum 90 and preferably 60 days for the Greater Sydney Region to contain STRA to “Home Sharing”. All Un-Hosted STRA is to count toward the maximum cap. No exceptions.

Residential strata schemes in mixed use and commercial zones with express prohibitions on short term letting must have their development consent conditions preserved.

Register: The planning law changes should not start without the Register, which must be a government run register or a neutral platform not part of the short-term letting industry. The Register must include reporting of day of occupation (caps), the Host must disclose all the platforms on which the premises is listed. Local Councils must be involved in designing the system and have unimpeded access to data. The Register must generate a unique Host ID.

Host obligation: There must be an enforceable obligation for Hosts to register their premises, before it is listed and used for STRA purposes. This should be part of the planning law criteria so it is clear the use of unregistered premises for STRA is illegal and penalties apply. The Host must display the unique Host ID on all listings.

Platform Obligation: There must also be a legal obligation for Platforms and agent not to list an unregistered residential dwelling for STRA. The international experience shows that without such an obligation Platforms will continue to list thousands of illegal apartments. Platforms must also have an obligation to share data with state and local government. All listings and other advertising must display clearly the Host’s unique ID.

Residential schemes must have authority to levy charges and fees to Hosts conducting STRA.

Local Councils must have flexibility to set a lower cap and apply zoning restrictions to meet their strategic planning objectives.

Robert George

**Submission**

Dear Director,

RESPONSE - Short-term Holiday Letting (STHL) Options Paper

As chairman of SP94816 which is a large residential building complex located at 28-30 Anderson Street, Chatswood, I write on behalf of the Owners Corporation to OPPOSE the use of short term lettings in strata title buildings for the following reasons:

- We highly value the following attributes of living in a building where only permanent residents are permitted with high levels of security, high sense of community; high standards of housekeeping and knowing our neighbours.
- Owner occupiers purchased into this property on the assurance of the Development Consent being of residential use, which in Willoughby LGA is a minimum occupancy of 3 months;
- Tenants have committed to leases of minimum of 6 months on the same basis;
- Increase strata levies to rectify the common property damage by short term tenants;
- Increase in noise and decrease parking availability;
- Time consuming for volunteer strata committees to manage;
- Reduce rental affordability;

We have a large number of owner residents with young children and a numbers of women living alone. We also have elderly residents. We have chosen to live in our building because of the safety and security it offers. We feel secure in allowing our children and grandchildren to play in the garden and pool knowing other users are residents.

All of the above are under threat if strangers are constantly permitted to occupy our apartments on short term lettings and deteriorate our building and community. Many of us would not have considered living in strata apartment as an option if there was a possibility of having to share our building with short term occupants.

We demand the government maintain the conditions of the Development Consent and preserve the integrity of strata living as an attractive choice to live in.

Yours Sincerely

Jam Xia

Chairman SP94816

The Chatswood, 28-30 Anderson Street, Chatswood NSW 2067

This practice of turning your property/home into a short term holiday rental is testament to the greed and lack of equality in our society. Less that a third of units in our strata building are owner occupied . Since this practice began our building is full of transient strangers who have no concern for the building or needs of occupants. The absent owners line their pockets while the owner occupiers suffer. These are the people who care for the building; it's our home, we don't want to have different neighbours every week, it adds to our expenses for security, repairs and maintenance, let alone extra noise.

Please give consideration to those who can afford one home and want a some quality of life not those who are making a profit.

I am writing to support restrictions on airbnb in our shire (Byron Shire.) I believe the platform has been mis-used as its original intent was to CREATE community by enabling visitors to stay in people's homes - but instead it has ERODED our community by creating enclaves of non-permanent homes and has also contributed to the housing crisis we have whereby local residents cannot find homes to rent long term.

I am against the new proposed State Environmental Planning Policy (Short-term Rental Accommodation) 2019 under the Environmental Planning and Assessment Act 1979 as it will entrench Short Term Holiday Letting in the Shire and not support residents.

The proposed policy overrides other legislation that supports residents. Clause 7 (1) In the event of an inconsistency between this Policy and another environmental planning instrument, whether made before or after this Policy, this Policy prevails to the extent of the inconsistency.

NSW is out of step with locations all over the world. Major towns and cities are placing restrictions on Air BnB but in

NSW the state government appears to have allowed the short term letting accommodation industry to write the rules.

The new legislation places a cap on days allowed for letting, where the host is not present, of 180 days per year or 365 days in regional areas. Byron was promised a 90 day limit in the run up to the last election but it is still to be approved and Council has to prove its case as to why Byron gets special treatment before it is approved. 90 days is still 45 weekends a year and, given weekend prices, this is likely not a deterrent to making owners return houses to the permanent rental market.

Unlimited days - no caps: Also, a loophole has appeared in the proposed regulation: a booking for 21 or more consecutive days will not count towards the limit when a host is not present. So a cap is not really a cap!! This means the true extent of short-term letting can never be monitored or measured. A host could add as many 21 day letting periods as they want for the rest of the year and it would not be counted in the annual total!

The state govt is also proposing an industry-led register to keep track of all short-term lets. It is expected to record the name of the host, the property's address, the duration of each booking and whether it complied with bylaws. The industry self-regulating? Really? This takes the power away from local councils to monitor non-compliance for their residents.

It is also known that a number of NSW MPs own short term rental properties, including the Deputy Premier. Politicians with clear conflicts of interest should not be allowed to vote on this issue.

The law supports residents - NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"; relying particularly on North Sydney Municipal Council v Sydney Serviced Apartments Pty Ltd (1990)21 NSWLR 532 and Derring Lane Pty Ltd v Port Phillip City Council (No 2) (1999) 108 LGERA 129.

To whom it may concern.

I have many concerns with regards to affordable accomodation in the Byron shire area.

A limit on Airbnb rentals would be welcomed by myself to hopefully discourage Airbnb rentals and bring back homes to the rental market.

Demand for rental homes in the area have always been in short supply.

Also a positive for Byron is the growing number of people being employed on the Industrial estate with many new

business's starting up over the last few years.

Hence these employee's need local accomodation which will reduce commuter traffic coming in from out of town.

I'm a home owner in Byron Bay and have used Airbnb on a few occasions but would never do it long term as i respect other neighbours.

Sometimes there needs to be a seperation between business ie Longterm Airbnb and basic needs for the local community ie affordable housing.

I support a limit on Airbnb which needs to be regulated by local council.

Regards

Michael Murray

I am totally opposed to the proposed STRA reforms for the following reasons:

Not all apartment buildings have the amenities to cope with STRA

They will be in conflict with by-laws registered that do not allow for short term rental

Effect on fire regulations - how will this be managed?

Damage that may be caused to common property and costs involved for repairs  
Insurance ramifications.

Hi all, my strong stance is that the minimum stay in a strata block needs to be a minimum of 3 months. Short stays through Airbnb get abused by folks that just want to have parties, do drugs and make lots of noise on balconies which impacts buildings and residents all around. These folks should be staying in regulated hotel/motel accomodation.

It is also very hard for police to access floors in large blocks if the offending unit does not provide access. Not all buildings have or can afford 24 hour concierge.

Re: Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

**As a result, regulation for our sector should avoid unnecessary burdens on our operations.**

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

#### Submission

I welcome the opportunity to make a submission as a resident who's life is adversely impacted by a stream of AIRBNB "guests". That they are "ready to party" from arrival to departure is in direct conflict to those who live here & need to go to work.

We have the misfortune of having a "whole house for rent AIRBNB" property 2 away from us. The "hosts", by virtue of their photos, encourage a party house. As we live on the water, most Summer weekends, holidays & often midweek, groups appear, completely oblivious to the noise they make. The property has a small living area so most entertainment is outside. This is a quiet residential Bay, however due to the geography, there is an amphitheatre

effect & noise travels in a variety of directions.

I request the following be considered:

- 1) Hosts should be present at all times. Otherwise the neighbours & overworked police are the ones dealing with antisocial behaviour.
- 2) Immediately adjoining neighbours are not the only residents affected as is evidenced by our situation. This needs to be recognised.
- 3) Hosts need to be responsible for the conduct of their "guests" as they are ones gaining financial benefit from their business. It is imperative that there is a 2 strike provision for the Host
- 4) the limit of 2 people per room per night relies on the honesty of both host & guests. No extra people should be at the property during the stay. That means NO FUNCTIONS or PARTIES! Currently we are seeing 'friends' appear during the day who slowly disappear.
- 5) No pets should be allowed. It's unsettling to both existing & visiting pets, particularly dogs, & barking/howling naturally occurs. Neighbours should not be exposed to unfamiliar, potentially aggressive "visitor" dogs.
- 6) A sign to be clearly posted in all STRA homes requesting them to be considerate of neighbours
- 7) A minimum of 5 night stays to limit the 'party' atmosphere
- 8) All Fire Safety & OH& S, etc requirements MUST be met as with any business. Do not forget, STRA is a BUSINESS.

I implore the decision makers to implement the 'hard but fair' rules to allow those of us who deserve a peaceful life to enjoy it.

With thanks  
Helen Richards

Consistency.

There is nothing consistent about the framework.

Why has the Exempt Development Status been applied to a very limited number of councils, provided different annual caps for STRA stays of 180 days and with some councils wanting DA approvals. It should be the same state framework which applies to everyone.

Lake Macquarie City Council, which is one of these Councils, passed this requirement without any consultation with the Industry and against the recommendation of its own Council Officers.

Lake Macquarie Council has had very few problems with STRAs. There are no major Hotels in its zone, one aging Resort and it operates most of the Tourist parks in the area which are in competition with STRAs. This is tantamount to unfair trade practices and a restriction of trade.

It also shares its borders with the Newcastle City Council with suburbs such as Adamstown. How can State Legislation approve regulations that allows different annual caps on developments on one side of the street to those on the other side?

#### Code of Conduct

A Code of Conduct, together with the requirement that either the Property owner, property owners' agent or property manager must be available by phone 24 hours a day, seven days a week and be able to personally attend the property within an hour, are the key to guaranteeing neighbourhood amenity and the efficient operation of STRAs.

All complaints made on any particular property must be logged and details recorded on the action taken and the results of such action.

A register should be kept by each Council of any Complaints, with the power to ban a property from being used as an STRA if there are more than three justified complaints received in any three year period.

No more controls are required. Anything more would be simply bureaucratic red tape.

#### Register.

A Register, regardless of how it was kept or by whom, would be either totally useless or cumbersome and expensive to maintain. Individual STRAs are added and taken off the market on a regular basis, (in some areas up to 75% in a year).

Ensuring individual operators registered or de-registered would be impossible.

#### Data Collection

Again, this would be impossible to collect: a restriction of trade and could also be confidential business information.

The development of a one size fits all data system would be almost impossible and who would be required to supply, collate and confirm its accuracy.

It is fanciful and far too complicated to suggest that a Government Dept. (Dept of Fair Trade) local Councils or an industry body (whoever or whatever that industry is!!!) look after a STRA register for NSW.

#### Submission

Please closely consider the Byron Shire when making reforms around capping Short term Accommodation options. It's my opinion that Byron needs to have strict laws around letting out whole houses on Air BnB. I believe the shire needs the 90 day cap on short term let or even a shorter cap like 60 days. This will support the local families to be able to rent and buy within our community. The devastation to families that have had to move after years of settling here is real! Not to mention the atrocity of seeing families live in a caravan park or single people living out of their car. This is a very real issue happening in our shire daily. As someone who supports young people to find jobs and housing in the area, it is impossible to help young people born here to become independent people living and

working in society when there are NO AFFORDABLE rentals..!

Please consider capping and regulating the Byron Shires, short term holiday letting to a 90 or 60 days limit with no exceptions for a 21 day loophole!!

I support short term rental (airbnb) as a form of benefit to both owner and guest to our city

Owners should have this form of rental as a choice and overall , not allow the fear of others control a right to welcome visitors to this great city

I say.

Stop trying to control what the current law already provides for in direction relating to acceptable behaviour in

society

The lock out laws and meter parking as two other perfect examples of governance over stepping its responsibility to provide safe havens for Sydney CBD visitors

Part Five of the Code requires hosts to provide neighbours with specific information, including the host's contact details. I don't believe that this is appropriate as personal information can be misused. In addition, how will a host know if existing neighbours move away and new neighbours move in, requiring the new neighbours to be provided with the host's contact information. Should a host be responsible for monitoring who his/her neighbours are and whether they have been provided with up to date contact information?

Part Seven of the Code covers 'Strikes'. This is arguably one of the most emotive aspects of the STRA and one where

all participants will be looking for clear definition of grounds for a strike. Unfortunately the statement 'the Commissioner is satisfied that it is appropriate to record a strike' does not adequately define what constitutes grounds for a strike, particularly regarding noise complaints from neighbours. Will STRA guests be held to the same standard as other members of the community when it comes to issues like noise, or will the Commissioner require a higher standard? This is not clear from the draft code. Perhaps STRA guests should be be subject to the same council/police regulations as other members of the community, including home owners and long term renters. This would certainly make the rules clear.

**I agree to the above statement**

Yes

**Submission**

Please consider my attached submission.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will

make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support “fair short-term rental accommodation (STRA) regulation that supports the sharing economy” and has passed fair and balanced rules for home sharing following extensive community consultation. These common sense rules will protect people’s choice to responsibly share their space without burdening them with unnecessary red tape.

However, the latest proposals are dismissing the findings of a bipartisan Inquiry, the majority of respondents who made a submission to the NSW Options Paper, the Parliament which rejected onerous registration, and the millions of locals who choose to host or stay with Airbnb. The current proposals will burden local families and small businesses with onerous red tape. It’s simple – more red tape means less choice and higher prices. It would make going on a family holiday in New South Wales harder and more expensive.

Generally, I support the Government’s approach, however parts of the current proposals are unfair and fall short of the Government’s commitments. Many of the issues with home sharing apply to homes where the host does not also live at the property. I can see why some of these rules may be applicable to those situations but they should not be blanket applied to all STRA properties, especially those where the host also lives at the property.

Preservation of owners' rights.

Residential apartment buildings in mixed use and commercial zones, with express limitations on short term letting must have their by-laws respected and preserved. There should not be any over-riding policy which dictates limitations, on the right of the apartment owners to decide whether or not, to permit short-term letting where this is a clear desire of the democratic majority.

Residents' homes should not be allowed to be turned into a hotel by short term rentals, and the quite enjoyment of

their homes impacted adversely.

The rapid growth in short-term letting has significantly impacted on apartment buildings, as well as residents' amenity, strata costs and individual safety.

I believe that Airbnb contributes greatly to the local economy by bringing more visitors to the area. Supply and demand should regulate this not regulations. From my experience long time renters are louder and more disruptive to our neighborhood. Short term renters are easier to control and are more respectful to their surroundings. There doesn't seem to be any supporting evidence that short term renters generate any more complaints.

Short term rental accommodation

Discussion Paper

A new regulatory framework

August 2019

1. Thank you for the opportunity to comment on the draft framework for regulating STRA in NSW. I have significant concerns about the framework particularly from the perspective of somebody who lives in a Strata in Byron Bay, specifically Kiah Beachhouses.

2. Kiah has 16 units within the strata, but no manager who might otherwise deal with STRA issues. STRA is a burden on the long term residents, particularly on the strata committee, and its agent. As a rule STRA guests and the agents handling bookings have little or no regard for the bylaws of the strata, and in particular the treatment of common property. STRA guests can be disruptive, noisy, leave our pool area in a mess, overuse parking spaces, and generally have little respect for the amenity of longer term residents. Clearly not all guests behave badly, but even the more well behaved are only here for a short time and detract from the sense of community that can exist between long term residents, whether owners or long term lease holders. The coming and going of so many people and the associated cleaners and other service providers needed to operate a unit as a STRA rental is also a security risk with unknown people wandering around the property, and an increasing number of people knowing our gate code.

3. Neighbourhoods are being gutted by STRA, particularly in tourist hot spots like Byron Bay. STRA removes long term rental accommodation from the market, exacerbating the ability of many of the work force needed by the tourism industry to live locally. It thus also exacerbates the traffic problems that Byron experiences.

4. Local Government is not resourced to regulate STRA. Local Councils need to retain strategic planning powers to reduce STRA caps, and exclude STRA from precincts and buildings. STRA breaches planning laws, fire safety standards, strata laws, and undercuts operators of tourist accommodation. It is a commercial non-resident use of residential premises.

In my view the draft framework is markedly deficient:

1. It allows 365 days a year rental for regional areas where the host is not present, with an option of local governments to apply for a 180 ceiling. Sydney would have a 180 day ceiling. Why different ceilings would apply to Sydney versus the regions has never been fully explained. Nor does the draft framework mention the concession that a Government minister has already announced for Byron Bay, being a 90 day limit.

2. I believe that the regulations should have a zero limit for STRA where the host is absent, and that the government should honour the commitment given to grant Byron Bay a 90 day limit where the host is present.

3. This discussion paper introduces a new feature of the framework and that is that rentals of 21 consecutive days or more would not be counted in the 180 limit. In a long drawn out consultation process this is the first time this feature has been proposed, without it seems any specific justification. I oppose this feature as it will allow the 180 (or 90 days in Byron Bay should that eventuate) to blowout significantly. It would allow owners and agents to significantly increase the occupation of STRA properties defeating the very purpose of the regulatory framework, that being presumably to manage STRA within acceptable community parameters. Furthermore it is open to rorting by intermediaries who could take out block bookings of 21 days or more and sublease them to the public. At the very least any longer term booking should comply with normal leasehold regulations, which I believe apply to rentals of three months or more.

5. The register of STRA properties will not be available to the public, due it is claimed to privacy concerns. This is unsatisfactory. I think the public has a right to know when the bookings are being made for a property, and the conditions of those bookings (e.g. no more than two people per bedroom, no parties etc etc). Residents in a strata are particularly affected by STRA. As the code of conduct is going to be reliant on members of the public having access to information about STRA in their neighbourhood, this feature further undermines the ability to enforce that code. Some commercial in confidence information could be concealed, but even then there are ways of finding out about rental rates through the booking platforms, so the arguments for confidentiality are weak. If the government balks at public access it might like to consider access for strata corporations or their managing agents to ensure compliance within a strata.

6. The draft framework requires a 75 per cent vote by a strata to opt out of STRA. This is back to front. Given how intrusive STRA can be within a strata it should require a 75 per cent to opt in.

I hope my views are taken into consideration and look forward to the government introducing a more balanced approach to STRA.

Thank you  
Paul Belin

**From:** Sarah Ogilvie <sarah@luxico.com.au>  
**Sent:** Monday, 9 September 2019 3:51 PM  
**To:** DPE PS STHL Mailbox  
**Subject:** Holiday rental regulations for NSW - Byron Shire specifically

Dear Minister,

I have worked in the short-term rental accommodation industry in the Northern Rivers of NSW for the last 10 years. It is an important driver of economic growth and job creation for the NSW tourism industry.

At Luxico we focus on hosting Australian family groups on their holidays. We are often hosting multiple generations all getting together for annual holidays, 70th's, anniversaries etc.

We have staff members on the ground offering 24/7 contact with guests and face to face check-ins. Our houses are signed, booking rules strict, bonds high and guests very well informed of the neighbourhood noise regulations before booking, again before arrival and again at check-in.

These processes that we have in place create an environment where guests have peaceful holidays and neighbours are not disturbed and are very supportive of our services.

These families coming in Byron Bay and surrounds create an enormous amount of important economic support to the local community. We promote and book only local chefs, tour operators, therapists etc. Our welcome hampers and in-house products are all locally made.

It would be incredibly disappointing and destructive to so many locals careers if the 90 or 180 day restriction was actually rolled out. Instead of putting a noose around the neck of the industry, I would suggest that the following was enforced...

- \* if a home is 3 bedrooms or less an annual fee of \$500 was paid to council to be a registered holiday rental
- \* if a home is 4 bedrooms or larger an annual fee of \$1000 was paid to council to be a registered holiday rental

There are over 2000 holiday houses in the Byron Shire, this would be an amazing injection of funds for council.

Then these homes need to pass a check-list of safety and staffing rules...

- \* pool compliancy certificate
- \* signs by the pool saying no use after 10pm
- \* signs at the front of each house with contact info of the property manager
- \* manager to live in the Byron Shire
- \* functioning fire alarms, fire extinguishers, blanket etc
- \* no more than 2 adults per bedroom (additional children allowed)
- \* bookings of 7 days or longer are exempt from any annual allowed booked night restrictions
- \* visitors/functions/parties not allowed

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Warm regards,

Strata complexes - additional impact on common property and services: The 'package' (amendment Act, proposed Code and proposed Regulation do not address a very real issue for Owners Corporations, being the cost of increased wear and tear, maintenance, cleaning and services use (water and electricity) of common property and common services (including waste disposal) caused by STR. Guests (of STR) are indifferent about such matters and mostly do not think or act like owners.

These costs are borne by the Owners collectively and owners who engage in and profit from STR are receiving a material benefit from other owners, which is inequitable. This needs to be addressed by permitting Owners

Corporations to pass bylaws to impose a levy on owners of lots used for STR to reasonably contribute to these additional costs.

Your plans need to provide a focus on looking after local residents and communities first, before financial gain and commercial interests.

You have defined zones for a variety of industrys such as commercial and industrial business, you must enforce the same around holiday letting. I live in the Byron shire and see first hand the significant negative affect platforms like Air BNB have on our community. They eroded community and local values, it separates neighbors and this is during a time when we all need a sense of community more than ever.

It means children aren't as safe to play outside (parties, drinking, more vehicle movements, noise, increased rubbish from people who have zero connection to the local neighbourhood or knowledge that a child may be out playing). These tourists use all our assets that the rate payers have to fund. Many local towns have volunteer groups who are the heart and soul of the area from doing picking up rubbish to environmental conservation - the more you remove local residents and replace them with tourists, the less volunteers you have and our great towns and villages will become soulless.

If you continue to allow the erosion some of the best parts of Australia will become tourist only towns.

Secondly allowing STHL means housing stock is removed for local residents, and for what gain? so a tourist can come and spend money. Surely you must put local residents and community first, not the tourist dollar. Of course tourism is important but again simply set clear tourist areas and allow residential communities to flourish - this in turn will make the tourists have a more genuine experience and free up housing for local works, families and residents.

Use your power to define zones and restrict Air BNB and similar from eroding residential communities, ensure tourists pay a bed tax or similar so money is put back into the local council to fund repairs and upgrades as needed. Just because this new business and economy created by Air BnB is so popular doesn't mean it's right? Personally I have stopped using air BnB and know many who feel similar.

Please please think of hard working residents and families, if you don't reduce this wonderful places like Byron Bay will become tired, worn out and lose the soul and magic that people come for.

Thanks  
Simon

## Submission

THIS SUBMISSION IS MADE ON BEHALF OF HIGHGATE OWNERS CORPORATION STRATA PLAN 49822  
127-153 Kent Street Millers Point NSW 2000

## Summary

In making this submission we acknowledge the economic significance of STRA to the State, the Nation and to the individuals participating in this industry.

The proposed regulation, as outlined in the New Regulatory Framework Discussion Paper, suggests an imbalance in favour of the STRA industry at large.

Limited consideration is shown to the varying circumstances of differing residential styles. The Discussion Paper proposals vary only marginally from a "one size fits all" solution. This requires further attention.

An "industry-led register for STRA" raises alarm. Self-regulation of an immensely numerous and diverse trading assemblage is a formula for failure. Recent property development, bank self-regulation, and Boeing 737 Max disasters might well represent this reasoning. Only a state-controlled entity, independent of the industry, can have the potential to regulate STRA. This should be funded by a transaction fee calculated to both fund the regulator and would add to State revenue.

## Content

The attached copy of an earlier submission to the minister forms part of this submission. That paper, "One Size Does Not Fit All", defined and highlighted the diversity of residential styles exposed to STRA, the varying impacts or lack thereof, and dissimilarities between hosted and un-hosted STRA.

The content of this submission is limited to explicit Strata Communities' concerns.

1. STRA imposes negatively on the amenity of strata dwellers. This relates to privacy, added strata costs, stress on the finely tuned levels of amenity and service provisions designed to provide for a stable community of long-term residents, disturbances to established "living and sharing" practices accepted by these communities, and so forth. These issues, and more, have been presented in detail repeatedly.
2. Considering the impositions STRA imposes on strata residents' amenity, every owners corporation requires the right to determine its own STRA position. Decision by special resolution requiring 75% would be appropriate. This arrangement simply affords strata dwellers the right to the quiet enjoyment of their own homes.
3. Given that some owners corporations will favour STRA it is important that these are given appropriate consideration. Accordingly, the ultimate Regulatory Framework should expand to cover issues such as:
  - (a) All STRA related costs incurred by an Owners Corporation must be borne by the individual owners/residents providing STRA. These would include the cost of all conditions imposed by the state e.g. evacuation plans and signage.
  - (b) Distinction between hosted and un-hosted STRA is essential. The proximity of dwellings within strata is unlike any other residential style. As are the shared common areas, facilities, services and resources, as well as the accepted communal consideration for others, abidance by community standards and rules accepted by residents. These arrangements and agreements are naturally unknown to the flow of casual STRA visitors. Hosted STRA does partly mitigate these issues.
  - (c) The suggestion that un-hosted bookings for 21 days or more should not count towards limits where exempt development is given for a certain number of days annually translates to exempt development for unlimited general short term letting. This imposes even harsher conditions on strata residents.
  - (d) Considering the unique arrangements affecting strata exemplified in (b) above non-compliance has far harsher affects than in other residential dwelling types. Given this consideration strata requires special access to enforcement arrangements. These should enable swift/immediate action.

## Conclusion

Regrettably the proposed Regulatory Framework disregards strata dwellers unique residential situation.

While any STRA, let alone un-hosted STRA, is hostile to strata dwellers residential amenity the Framework's limited consideration is the restriction to STRA in apartments that are the host's principal place of residence. Even this

requires a special resolution with 75% support. However the provision appears flawed and impractical to regulate. To optimise the availability of the so-called 'principal place of residence' there is nothing to prevent a host residing elsewhere. What prevents family members each individually declaring separate apartments as principal places of residence while residing as a family unit elsewhere? Furthermore it is an incongruous proposal as once a residence produces assessable income the ATO no longer deems it to be a principle place of residence.

Strata dwellers STRA concerns have been raised time and time again. With the sole exception of some dominated by apartment investors desirous only of optimal returns, strata communities stand practically undivided on these issues. Owners corporations favour the right to determine their own STRA position, for or against, partial or none. This democratic essential is what should be achieved with a 75% special resolution.

As an Owners Corporation it is impossible to express faith in the New Regulatory Framework Discussion Paper.

Owners Corporations do not have the financial power necessary to employ eminent and powerful lobbyists. Yet this appears to be how influence is purchased and favourable outcomes achieved. To our perspective, and our resident's amenity, the Discussion Paper demonstrates absolute capitulation by the Government to the hunger of STRA multi-billion dollar corporations.

STRA's economic value to the State, the Nation and the individuals participating in the industry is achievable without damaging the household amenity of strata residents.

Strata complexes - additional impact on common property, services and costs to owners:

The 'package' (amendment Act, proposed Code and proposed Regulation) does not address a very real issue for Owners Corporations, being the cost of increased wear and tear, maintenance, cleaning and services use (water and electricity) of common property and common services (including waste disposal) caused by STR. Guests (in STRA) are indifferent about such matters and mostly do not think or act like owners. It has also become more and more apparent that additional time and effort is required from building management, caretakers, security and cleaning personnel (or the other owners themselves where such services are not provided by external parties) to deal with the issues caused by the volume of STR.

These costs are borne by the Owners collectively and are not only an additional financial burden but also take personnel engaged by the Owners Corporation away from their respective duties in order to manage the additional efforts required in respect of the STR. Owners who engage in and profit from STRA are receiving a material benefit from other owners, which is inequitable. In addition to imposing appropriate restrictions on STRA, this needs to be addressed by permitting Owners Corporations to pass bylaws to impose a separate levy on owners of lots used for STR to reasonably contribute to these additional costs.

**I agree to the above statement**

Holiday airbandb destroy the community feeling as it's new neighbors continually and unfair to permanent residents who pay the same rates as they are usually not registered so do not pay a commercial rate so money coming in goes straight into owners pockets not towards the community.

It's a no win situation for byron

For genuinely socially acceptable Airbnb lettings, the room toilet should either be:

1. in a unit/house in which the owner resides... has control at most of the time over the 24/7 behaviour of the visitor... OR

2. the airbnb rooms should ALL be contained in one separate building,,, with NO permanent occupiers/owners... and local govt. controls, rangers, police, etc. for neighbourhood disturbances, etc., fire control, etc., etc.

3. At present, strata/community living has NO protection from people outside their own walls... George Orwellian standards. 1984... all living in tiny cells - kept quiet by mobiles, pc.s, TV, etc. We are ALL stripped from these 'normal' protections... so we have already lost immense life-style protections, i.e. police, etc. What more do we have to lose - all fore the greediest/most sociopaths of this world?

4. My son runs an airbnb in Iceland... excellent... separate building... communal kitchen, mostly own ensures, etc. NO TVs or radios... VERY international... VERY friendly... very quiet, very reasonable... 12 rooms/units... in a very good area of Reykjavik...

**I agree to the above statement**

Yes

**Submission**

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

My wife and I have been hosting guests for nearly 7 years now. We make a single room available to guests in our 3 bedroom house, in a quiet suburban street, through listing it on the AirBnB website. It has during this time provided us with some financial security, but most of all it has given us the opportunity to meet with some wonderful and interesting individuals we would otherwise not have had the opportunity to know in our lifetimes.

Home sharing and hosting has been a part of our family for many years, even before AirBnB. In the 1990's we made available a single room in our home to many overseas students that primarily came to learn English at international

schools in the Sydney CBD. Students varied from young foreign high school students, to mature aged married couples. We had the most wonderful experiences with them in the short time they stayed with us – generally 1-2 weeks. We also provided them with directions and guidance on what other places to see and visit here in NSW and interstate.

In 2013, we saw AirBnB as a direct extension of these experiences. As with students, our AirBnB guests come with glowing reviews and are fully verified by AirBnB and ourselves before we let them stay with us. Same applies to travelling and being guests ourselves. There is a total degree of ‘trust’ that flows both ways between host and guest. It is this ‘trust’ that bonds us and makes our experiences even more exciting and pleasurable.

This degree of ‘trust’ and verification does not exist in the Hotel Industry, or in similar accommodation providers such as Stayz or Bookings.com.

Our experiences using AirBnB have been varied and are widely different with each new guest. All have been pleasurable, and some have extended in to friendships, with many being return guests, all because of the fabulous experience they had in staying with us. Many ask us to visit us in their home town or country so they can reciprocate the experience.

AirBnB have provided us with a semi-structured, semi-formal, accommodation providing, income producing platform, that works for all parties be they hosts, guests, families or individuals. We think it works well for us and the many people we know and have met through AirBnB. We feel that the proposed legislation and its regulations have gone too far, and some are not necessary to maintain the already high quality of service we provide to our guests.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government’s proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support “fair short term rental accommodation (STRA) regulation that supports the sharing economy”.

Generally I support the Government’s approach, however parts of the current proposals are unfair and fall short of the Government’s commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it’s safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by the AirBnB booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Wayne Krygsman

Pymont. 2009

**Submission**

I make the following submissions -

1. New Strata by-law. Strata schemes will be allowed to pass a by-law that prohibits STRA for any lot where that Lot is not the Owner's principal residence. Is "Principal Residence" the same as that determined by the ATO for tax purposes? Is there a place of registration where a person's principal place of residence is registered.? How can the strata scheme access this information to determine if a particular Lot is, or is not, the Principal Residence of the Owner. What is the case where a Lot is held in a company or Trust name?

2. Day Caps. Determination of The draft law will allow a unit to be let out under STRA for up to 180 days per year ONLY if the Host is present. I submit that this should be a limit of 30 days per annum, rather than 180.
3. Determination of HOST presence.
  - a. How can the strata scheme determine whether or not the Host is present during a short-term letting?
  - b. How can the strata scheme determine the number of days that a host is, or is not, present during a short-term letting?
4. Complying Development: STRA in residential strata schemes must be classed as 'complying development' with inspection by Local Council or a private certifier, not 'exempt development'. This is the only way to ensure the mandatory fire safety standards are met.
5. The Register: The Register must include the days of occupation and all the platforms on which the premises is listed, Local Councils must be involved in designing the system. Local Councils and NSW Fire and Rescue must have access to the data.
6. Host Obligation: There must be an enforceable obligation for hosts to register their premises on the Register AND with strata scheme before it is listed and used for STRA purposes. This should be part of the complying development criteria, so it is clear the use of unregistered premises for STRA is illegal and penalties apply.
7. Platform Obligation: There must be a legal obligation for platforms and agents not to list any unregistered residential dwellings for STRA. Platforms must also have an obligation to share data with State and Local Government. All listings and other advertising must clearly display the host's unique ID.
8. Charges and Fees: Residential strata schemes must have clear authority to levy additional charges and fees to additional wear and tear and costs whether STRA is hosted or un-hosted.
9. Council discretion: Local Councils should have the right to set a lower cap and have the right to apply restrictions to meet its zoning and planning objectives.

BRUNSWICK HEADS 2483

#### **Submission**

I am an owner of a property in Brunswick Heads in the Byron Shire which consists of 1 holiday apartment, situated in the CBD (commercial zoned). This holiday accommodation is actively managed by a local real estate agency. I have never had any formal complaints from neighbors but when there has been minor concerns then the real estate has handled it efficiently/effectively. Note Brunswick Heads has a small/limited range of accommodation options so need privately owned holiday apartments to provide a different/missing type of holiday accommodation as well as to cater to the high demand. Re: Demand - My property is running at a very high occupancy rate with majority of guests at my property being from Sydney, Brisbane & Gold Coast (we are only 60-90 min drive south of the latter

two). Note Brunswick Heads has always been a 'holiday destination' - Historically, many holiday houses were built/owned by businessman from Lismore/Kyogle/Casino who regularly vacationed here along with many other local/regional families so tourism in town is not a new or developing situation - It's growth over recent years simply hasn't been planned for or managed by Local/State Government so a few anti-short term accommodation residents who shout the loudest are complaining & our 'Green' Council have bowed down to their scare campaign. Hence, I totally reject the Byron Shire Council's request for a special 90 day limit for short term accommodation. I actually also reject the NSW Government's 180 day limit. Instead, I support unlimited time restriction (i.e. allow 365 days) & registration of all private owned holiday accommodation who must abide by a sensible/reasonable code of conduct policy.

**Submission**

Dear Sir/Madam,

I would like to recommend that the point in "Table 2: Proposed safety requirements applying to dwellings used for STRA - No more than 2 persons/bedroom or 12 persons, whichever is the lesser." be reviewed with consideration for families and/or budget travellers in mind, as well as operators within the Short Term Rental Market industry.

I suggest that the above point is overly restrictive and doesn't take into consideration the size of the property.

To provide a real case scenario: my company currently operates Regents Court Sydney. Regents Court Sydney is a collection of 35m2 studio apartments designed for 2-4 people in each studio apartment. Regents Court has been operating as a hotel since the early 90's, catering for a diverse range of clientele. When the building was sold off to individual owners, a majority of the new owners wanted to continue short-term renting their apartments and have done so ever since. Compared to other studio apartments in our suburb our 35m2 apartments are considered larger and spacious.

We have a considerable amount of family travellers who require their children to stay in their room with them, as they are too young to be in another room on-their-own.

Limiting a studio apartment to 2 person capacity would not only hinder operators across NSW just like me, but would also limit the options available for travelling families and budget conscious travellers right across New South Wales, perhaps diluting the amount of these types of tourists from visiting New South Wales.

Please refer to my attached image, an example of a bedding configuration for more than 2 people within a studio apartment.

Kindest,

John McCrea

I moved from Byron shire to Ballina shire because of holiday letting near my home in ewingsdale Byron. Reasons being in brief ,my social amenity in this residential suburb was disrupted eg. Noise,cars ,parties, rubbish,no real neighbours just overnight holiday makers.

Holiday lets in residential zones should not be legal and is not legal.If the government wants to persist with this cancer then they should limit the rentable period to 90 days only and preferably not in residential zones.

They should limit it to owners living in the shire not investors And have onsite management.

Many house are unable to be rented to locals and people looking for work as they are made available only for short

term rents.

In many cities throughout the world they have seen the folly of short term rentals and are one limiting the numbers available,I said 10 years or more ago this was a cancer and it has been proven so .

I am relieved to see government investigating this issue. This market is unregulated and has enormous impacts on residents in their homes.

The disregard to noise, rubbish management, large visitor numbers and a residents right to enjoy their home and community needs careful and expert investigation.

I trust all persons involved in the decision making process who have a conflict of interest will disclose as such.

I think its vital that we understand what the problem is that we are trying to solve. In the draft code the reason given for implementing this regulation is around the notion the "amenity impacts on residential neighbours resulting from inconsiderate or anti-social behaviour by some short-term rental occupants". Understanding that this is a real and valid issue for residents, surely policing of properties and adhering to a rental code are the only relevant solutions. It would seem that restricting the available letting days is not. As a property owner and tax payer for nearly 20years in Brunswick Heads we see that restricting the available letting days puts an unfair restriction on our rights, unfairly impacts our property value,and the result will have a negative impact on the viability of local

businesses that rely on tourism for their revenue. We understand the need for local by-laws to catch up with the rise in online rental platforms and particularity with regard to undue noise and anti-social behaviour but please don't do this at the expense of other's enjoyment of the area and the viability of local businesses. We do also note that in 20 years of regularly staying in Brunswick Heads and leasing a property we have never once had a complaint or even witnessed an issue with bad or anti-social behaviour.

We strongly support the policy position of the Owners Corporation Network of Australia. In particular, we believe it is vitally important that: (1) the proposed register should be government run. It should not be left in private hands; (2) residential schemes should be given the power to levy charges and fees on hosts to ensure they cover the cost of the extra wear and tear that is likely to be generated by short-stay residents and; (3) Local councils should have flexibility to set a lower cap and apply zoning restrictions to meet their strategic planning objectives.

Reducing housing for short-term rental is critical for neighbourly communities.

It is not about caring about 'party houses' it is about allowing our citizens a place to live. Families, workers, students all need housing that allows them to feel settled in their communities without fear of being moved on ... short-term renting in premises meant as homes, is unacceptable for civilised societies.

**To:** DPE PS STHL Mailbox  
**Subject:** Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations. In particular, I would like to not the following;

1. Keeping records for 5 years- This is an unnecessary and cumbersome rule. We are required to keep tax records now and further record keeping will require space and administrative work. These will also require auditing adding extra cost to an already low margin industry. What and who decides what is a "Readily Producing Form"? one days notice ? is that readily enough and what will be the fines for these "Offences" . How do we make a business profitable in a low margin industry? Who will audit these? another public servant we dont need?

2. Exclusion Register- this register could be a burden on either side as who will determine who goes on it and any host may find themselves included unable to carry on a business without having been convicted of a crime or guilty of any criminal offence . Just having upset a guest and facing a tribunal without an objective assessment.

3. Guests to act lawfully- These rules are already covered under common law and dont need repeating here. Also, lawful behaviour as regards noise and damage to property, these are covered under current laws and dont need repeating.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

**Submission**

To whom it may concern,

I strongly believe the reforms being proposed favour the interests of holiday accommodation providers at the expense of local residents and will put further pressure on rental and property prices that are already exceedingly high in the Byron Bay area.

As the father of a 5 year old, I am extremely concerned about the long term sustainability of the local community and environment in the Byron area.

While the tourism/holiday market is a vital part of the local economy, it is also vitally important that we maintain a

livable and integrated community life - which I believe is threatened by proposals to allow the use of the town as an almost permanent play-thing of the short-term rental industry.

As in other holiday destinations around the world, the growth of AirBNB is having the effect of helping inflate property prices, and hollowing out the town so that accommodation providers can afford property here, and others on lower incomes, seeking to build communities and have families are forced out.

Some points of concern about the proposed legislation are as follows:

We need a limit on the percentage of time people can let their places out for holiday accommodation. Although 90 days has been mooted as a possible exception for Byron Bay, even this represents a large amount of time on weekends and over holiday times which will still leave us with the problem of people being kicked out of rentals over the holiday season. We need even shorter limits.

The provision that allows people to get around any overall limit to the amount of days rented by allowing 21 consecutive days to override the overall limit will undermine it completely and should not be implemented.

Councils should be the bodies responsible for regulating the industry rather than the industry its self.

This proposed legislation should not override other planning instruments etc where there are inconsistencies between legislation.

Thank you for your consideration of this submission.

Dr Ray Moynihan

I live in a CBD high-rise building, where short term letting is strongly rejected by the residents and as a consequence we have a BY-Law prohibiting such activity. We are all living in our homes with NO commercial activity and as such I strongly resent the State Government telling me what I can and cannot do in my home with regard to short term letting while the said government bows to the wishes of a minority and AirBnB Stay out of our lives and let us run our Building as we, the owners, see fit

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens and that all parties, specifically Platforms and Guests should be held to account for their actions and that the burden should not just be overwhelmingly borne by Letting agents and property owners as is the current proposal.

Please find attached my Submission,

Kind regards,

Greg

Submission regarding the proposed NSW short-term rental accommodation reforms

Miranda Burne

13 Hoop Pine Lane,  
Suffolk Park, NSW, 2481  
02 6685 3114

I think the reforms that are proposed favour the interests of holiday accommodation providers at the expense of local permanent residents and will put further pressure on rental and property prices that are already exceedingly high. Indeed, the area where I live, Byron Bay, ranks number 1 in the country for property prices. This is having the effect of hollowing out the town so that only accommodation providers can afford property here.

Some points of concern about the proposed legislation are as follows:

We need a limit on the percentage of time people can let their places out for holiday accommodation. Although 90 days has been mooted as a possible exception for Byron Bay, even this represents a large amount of time on weekends and over holiday times which will still leave us with the problem of people being kicked out of rentals over the holiday season. We need even shorter limits.

The provision that allows people to get around any overall limit to the amount of days rented by allowing 21 consecutive days to override the overall limit will undermine it completely and should not be implemented.

Councils should be the bodies responsible for regulating the industry rather than the industry its self.

This proposed legislation should not override other planning instruments etc where there are inconsistencies between legislation.

Thank you for your consideration of this submission.

Dear Minister,

I believe the Tourist areas in Sydney as mentioned above should be exempt from the 180 nights limit. Tourists, families and holiday makers should have available a wide range of choice accommodation to suit their budget, lifestyle and able to enjoy the local area without having to be forced into expensive hotels or the Casino in Barangaroo.

Holiday rental accommodation in the tourist districts such as Millers Point, The Rocks, Barangaroo, Pyrmont should be available year round. Home/holiday rental accommodation has become a life style choice as tourist seek unique local experiences suited to their budget rather than staying in hotels. Since Sydney has a shortage of hotels, holiday rentals provides an alternative place to stay. Not only does this provide tourists with opportunities to discover the local community the but also drive the local economy in the hospitality industry in the surrounding area.

In the case of The Rocks, Millers Point, Pyrmont there are many unique Heritage homes which tourist and families seek out especially for their historical story and value for money. Nowhere else in Sydney can you stay in Heritage accommodation with such historical significance, and by restricting the use of these properties, holiday makers will be forced into expensive hotels and Casino accommodation.

I am deeply concerned the Casino in Barangaroo hotel accommodation will dominate The Rocks and Millers Point, the Casino will be neither family or budget friendly and has no historical significance in the area.

The Rocks and Millers Point is one of Sydney's unique historical tourist hotspots, it should be open for business not just to the big operators but to all. Holiday accommodation is a vital part of this community and should not be restricted to 180 days.

Thank you.  
Mariam Hashim

Stringent new regulations are completely unnecessary. I do not Airbnb my property, but I often stay in homes that have been Airbnb'd. Part of the attraction is to stay in a home - somewhere genuine, with personal effects, and the sense of individuality. I do not want to stay in some mass-produced, identikit environment where everything is sanitised and over-protected. These homes are perfectly fine as they are, and just because they are being rented out, there is no need to make them follow the same standards as hotels that are designed for hundreds of people. This is classic nanny-state overreach, coupled with no doubt vested interest of hotel owners who are rightly worried about Airbnb's threat to their business.

Submission \_ Short Term Rental in Strata Buildings

Sir

My submission involves personal views caused by direct impact of short term rental in my Strata complex in Wollongong.

Short term rentals are currently unfair and, in my view, completely over-whelms other owners. There are a large number of aged residents in this building who cannot speak up for themselves and are bullied by short term rentals.

AirBNB started without any consultation with residents about 2016. It was all done in secret.

Residents purchased into a secure building only to have short term rentals violate long held laws.

It involved total disregard of existing residents bylaw rights and Air BNB turned a well maintained building into their private hotel, where residents paid for the majority of upkeep.

As residents, we had no way of stopping unwanted AirBNB. We were threatened with action if we stopped AirBNB. What individual owner can stop a juggernaut like AirBNB.

In addition, AirBNB completely ignored other by laws for parking, dominating delegated visitor parking. AirBNB operators are currently using the strata fee system as their personal piggy bank to iron out fluctuations in their own income by not paying fees on the due date. One owner owed \$15k + and used the strata as fools while renting for many hundreds of dollars per night.

Also, the AirBNB uses committee time for no financial reward. If there is a violation of rules, committee members have to act on behalf of the strata. Many hours are easily consumed on matters.

The existing bylaws should have prevented AirBNB in our strata and proved ineffective and I feel any new laws will be just as ineffective.

If we have to have short term rentals there are issues need addressing:

Strict compliance to bylaws.

Late strata fees results in immediate cessation of trading. (Non payment of fees would be an immediate Strike).

Strata should be allowed to set fines or payments and amend bylaws to cater for committee time.

Strict compliance of Strata parking. (Non compliance offences result in a immediate strike).

Voting to prevent Short term rental should not require 75%. It should not be the responsibility of existing residents to vote against an unwanted Short term rentals, rather it should be up to the short term rentals to put the effort into convincing existing residents why they should be allowed to start. That puts the onus on short term rental, not existing residents.

Thank you for allowing this submission.  
Owen Liincoln

Rental of whole houses for airbnb in a small town like Byron Bay is a corrosive measure for the bonds of the community. Walking around on a warm summer's night I can pick the airbnb houses. Where there is loud talking, music and noisy outdoor living there is an airbnb abode. I can't complain about this as usually the guests will say they'll be quieter and then it's on again day after day and night after night. Local residents don't do this behaviour. There is an occasional loud party or Christmas celebration but occasional is the norm.

I have one room in my house for airbnb guests. I am always in the house and have 'house rules.' These provide for reasonable and peaceful living. A whole house rental without a manager or owner on site simply allows for abuse of

neighbourhood peace. A maximum of 90 days whole house rental would cover the holiday period and is sufficient for someone to make additional income. In a small town like Byron, having thousands of these houses means the whole town is a holiday town. And that is not on as we have children going to school, people going to work and the elderly going about their business. We need to sleep in normal hours. Holidayers don't have normal hours and have the attitude 'I'm on holidays. I can do what I like. I pay a lot of money for this rental and am entitled to enjoy myself. I don't have to worry about neighbour relations as I won't be here for long.'

More than 90 days may be okay for Sydney or Brisbane: it's not all right in a small town.

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

**Submission**

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

I am opposed to any amendments to legislation that supports any increase in the number of days allowed either by Air BNB or any short term holiday lets in residential areas of Byron Shire. As a resident of Byron Bay for over 50 years I am extremely angry at the damage done to long term rental availability by various holiday letting platforms. The lack of compliance by most operators is disturbing. Even more disturbing is the lack of support for the local community whose amenity has been degraded significantly as a direct result of these illegal operations. Byron Bay is buckling under the pressure of rampant tourism and the side effects which accompany this industry. Albeit tourism whilst it is good for the minority, it causes extreme problems for the majority who do not profit from this rapacious

industries. All around the world, major tourist destinations are realising the problems caused by Holiday let platforms, and are taking action to ring them in and reclaim their communities.

Thank you for the opportunity to have input into the draft Planning Policy

I am seriously concerned by the erosion of 'community' in my neighbourhood caused by short term holiday letting. Half the homes in my direct neighbourhood are Holiday Lets. Therefore my opportunity and those of neighbouring residents to form meaningful relationships is curtailed.

This has resulted in a diminished sense of community.

As those using the short term accomodation are here to party, the disruption to the amenity of residents is

considerable.

In my community, the prevalence of short term Air B&B has led to over 2000 whole properties being used in this way.

This has created a 'hollow' neighbourhood. These homes are lost to the local population as potential homes for workers, for volunteers in community organisations, and for families who have traditionally lived locally.

House prices have escalated beyond the reach of local wage earners. Permanent rental rates have likewise been artificially elevated by the lack of properties available for long-term accommodation.

These properties are now predominantly owned by non-resident investors who live in distant cities and do not participate in the local economy or community.

I believe that there must be licensing of, and a clear category of commercial use when properties are used predominantly for short term letting. The many registered accommodation providers, such as Bed and Breakfast businesses pay many fees to operate as registered businesses. They comply with regulations, and then have their business eroded by unregulated accommodation providers.

This is simply unfair, and I believe cheats the residential community and Local Government of funding for community infrastructure.

It is time that there be a dis-incentive, an additional cost for using properties in this way, or we risk losing communities in coastal locations. Likewise, there needs to be a zone within local planning zones for this type of property use, so that residential areas are safeguarded from this erosion.

This would reduce the need for compliance with set periods of rental as suggested in the draft. The costs of monitoring such requirements would be considerable. Likewise the idea of an Industry managed register to monitor usage rates would not be required. The situation would be made clear, that the zone is for Air B&B use - end of story.

This would not effect the use of individual rooms within permanent residential properties, as was the original style of Air B&B.

This option for residents to supplement their income is a positive strategy. It also lends itself to a positive experience for visitors who are more able to experience the local community at a deeper level than those who do not have the opportunity to interact with 'locals'.

I find that the proposed legislation has missed the opportunity to consider how the many overseas markets are seeking to regulate this type of accommodation. An examination of these strategies would most likely show that the interests of residents should be considered paramount.

The fact that there is a conflict of interest in Members of Parliament owning short term rentals is a concern. Members with this conflict should not be allowed to vote on the legislation.

The legislation must consider the presence of loop holes that allow unrestricted use when bookings extend beyond 21 days.

Just because a booking extends to 21 days in no way lessens the impact on the community and neighbours.

And then the proposed 180 days are apparently still available for short term use!

These properties are very clearly operating on a commercial level, and must be made to pay the relevant fees and charges.

That they are rated as residential properties is a rip-off for the local community, as they only represent a negative impact locally.

I ask that the Government make a clear judgement recognising the cost to communities of the short-term Air B&B industry, that has grown to have such impact due to lack of planning and legislation.

It has found its way into every street in many coastal towns, and now must be made to comply as a form of commercial development.

For the sake of the future of neighbourhood amenity, I believe that areas should be zoned to allow or prohibit use of properties as vacant short term rentals. This would allow better use of Local Government resources, better planning to meet visitor needs, and allow communities to develop with clear guidelines for how neighbourhoods develop.

Best Regards,

Veda Turner

STOP holiday accommodation in homes in residential areas.

Since moving to the Byron Shire 10 years ago I have watched the community slowly disappear.

The rental of full homes on Air B & B, Stays etc... has slowly taken homes from the market that were traditionally family's living within the community. We now have very limited permanent rental accommodation and it has destroyed our community.

More than 2,000 whole homes are now permanent holiday rentals and are a continual disturbance to permanent residents. Everyone is in 'holiday mode' and it has become a very unpleasant place to live.

Why cannot residential areas be residential areas and tourist areas tourist areas?

It is time to say enough is enough and limit the amount of time whole homes can be part of holiday rentals.

Grow the number of hotels, motels, lodges, caravan parks etc.... in non residential area and allow the community to return.

**Submission**

This submission is on behalf of myself and my wife, who are joint owners of a Lot in a Strata Plan. This is our home, and we value the peace and security that comes with living in a residential Strata building whose other occupants, like us, are long-term residents.

We recognise that, inevitably, there is, and will be, turnover among the occupants of such buildings, but we constitute a reasonably stable and integrated community, with a set of behavioural norms to which we adhere. One of the standard By-Laws applying to Strata properties is that relating to noise: “An owner or occupier of a lot, or any invitee of an owner or occupier of a lot, must not create any noise on a lot or the common property likely to interfere with the peaceful enjoyment of the owner or occupier of another lot or of any person lawfully using common property.” There are others which relate to damage to common property, and to plants and lawns, to the behaviour of occupiers, and to car parking, smoke penetration, and fire safety.

The implementation of the proposed short-term residential legislation and regulations will change the current function of By-Laws, which are an important means by which Owners’ Corporations manage their properties, based on consensus among the current owners. The proposed legislation and regulations, if approved as proposed, will put this model at risk, notwithstanding the alleged safeguards which have been put forward. These safeguards do not provide an effective mechanism by which those who fail to comply with By-Laws can be brought to account. Other submissions will no doubt point out the deficiencies of the proposed safeguards in detail, but the notion that disruptive behaviour can be prevented by a registration system is the ultimate example of shutting the stable door after the horse has bolted – and will not be acceptable to those of us whose peaceful enjoyment has been disturbed, and who will be left to clean up the mess - literally.

Owners’ Corporations must retain the option to enact and enforce By-Laws which protect owner occupiers, and are not overridden by either local or state governments. These must include By-Laws relating to limitation of short-term letting.

Minister Stokes is on record as saying that the proposals are relatively liberal by world standards and would allow the [Airbnb] industry to develop by itself. This liberality is for the benefit of local and global business interests, at the expense of the voters and taxpayers who have put him in government, and who pay his salary. This must not be allowed to happen.

We hope that common sense will prevail, and that the legislation and regulations will be constructed and operated in a way which does not put at risk our peaceful enjoyment of our home.

Prof Rufus Clarke MA MD PhD MPH FRACS FAFPHM

**Submission**

I am authorised to make submission on behalf of Owners Corporation SP20771 given our substantial experience in managing the nightmare airbnb causes in strata complexes, destroying the safety, security and amenity of other residents.

It is submitted that the by-law an Owners Corporation may pass should permit the Owners Corporation:

1) to require a bond as security for damage by the airbnb users. To repair our electronic gates damaged by airbnb users was about \$2,000.

2) to require the names, addresses and licence numbers of airbnb users, to assist in recovery of costs incurred by the Owners Corporation to repair damage done by them.

3) to permit the Owners Corporation to post a sign on common property on the conditions applying for airbnb including that the Owners Corporation has no insurance for short term rental if this is the case (where no unit owner has requested the insurance change and paid the additional premium).

4) to require tenants under an RTA lease to provide evidence from their unit owner landlord that the unit owner approves the subletting which airbnb is under an RTA lease. This assists to head off tenants profiting at the expense of the unit owner having strangers in their unit and their landlord insurance potentially not applying.

5) to be able to fine the unit owner where the airbnb guest breaches the Owners Corporation's other by-laws. For example the fine covers the cost of the Owners Corporation paying a cleaner to remove vomit from bins, remove airbnb users dumping bulk waste and to clean common property driveways where drunken airbnb users urinate on them. The fine can also cover the cost of hiring a vehicle to tow away airbnb user cars parked across the car spaces of permanent residents.

6) to permit the Owners Corporation to enter a unit and stop excessive noise or smell where airbnb users abuse units through late night parties. This right to enter also permits the Owners Corporation to confirm that the unit owner or tenant is resident, a key requirement of the new law. Where the unit owner or tenant is not resident, then the Owners Corporation should be able to order the illegal use to end and the airbnb users vacate.

7) the Owners Corporation be permitted to require unit owners or tenants using airbnb to fund security cameras and noise recorders and for the camera footage and noise records to be available to be relied on by the Owners Corporation and neighbour properties especially in the event of damage alleged to be made by the airbnb users or the Police called.

The above are drawn from actual experience of our strata where owner occupier Strata Committee members have spent countless hours of personal time trying to manage the serious negative implications of airbnb users and their antisocial behaviour and abuse of common property. We respect NSW Government but submit that the new law must permit Owners Corporations to pass by-laws on the matters listed above. Otherwise the safety, security and amenity of owner occupiers and long terms residents is lost. This is wrong.

I do not support the invasion of air bnb homes within our residential neighbourhoods. It is already and will continue to undermine our community fabric. I would like severe limits to be placed on air bnb listings and feel nothing more than a room in a private dwelling occupied by the owner should be legally able to be air bnb listed

**Subject:** Holiday rental regulations for NSW

Dear Minister, Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

#### **Submission**

The proposed policy overrides other legislation that supports residents. Clause 7 (1) In the event of an inconsistency between this Policy and another environmental planning instrument, whether made before or after this Policy, this Policy prevails to the extent of the inconsistency.

NSW is out of step with locations all over the world. Major towns and cities are placing restrictions on Air BnB but in NSW the state government appears to have allowed the short term letting accommodation industry to write the rules.

The new legislation places a cap on days allowed for letting, where the host is not present, of 180 days per year or

365 days in regional areas. Byron was promised a 90 day limit in the run up to the last election but it is still to be approved and Council has to prove its case as to why Byron gets special treatment before it is approved. 90 days is still 45 weekends a year and, given weekend prices, this is likely not a deterrent to making owners return houses to the permanent rental market.

Unlimited days - no caps: Also, a loophole has appeared in the proposed regulation: a booking for 21 or more consecutive days will not count towards the limit when a host is not present. So a cap is not really a cap!! This means the true extent of short-term letting can never be monitored or measured. A host could add as many 21 day letting periods as they want for the rest of the year and it would not be counted in the annual total!

The state govt is also proposing an industry-led register to keep track of all short-term lets. It is expected to record the name of the host, the property's address, the duration of each booking and whether it complied with bylaws. The industry self-regulating? Really? This takes the power away from local councils to monitor non-compliance for their residents.

It is also known that a number of NSW MPs own short term rental properties, including the Deputy Premier. Politicians with clear conflicts of interest should not be allowed to vote on this issue.

The law supports residents - NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"; relying particularly on *North Sydney Municipal Council v Sydney Serviced Apartments Pty Ltd* (1990)21 NSWLR 532 and *Derring Lane Pty Ltd v Port Phillip City Council (No 2)* (1999) 108 LGERA 129.

**Sent:** Sunday, 8 September 2019 4:10 PM  
**To:** DPE PS STHL Mailbox  
**Subject:** Re: Holiday rental regulations for NSW

Dear Minister,

We are the owner / operators of a holiday rental in the Blue Mountains area. We are responding to the request for public / industry submissions concerning the proposed new legislative framework for the short stay industry.

In general, we are supportive of regulations which raise and uphold standards of good corporate conduct and health and safety, so long as they are reasonable, fit for purpose and not cost prohibitive.

As you would know, the Blue Mountains is an area possessing abundant tourist appeal, but it is also a region that is economically depressed. Tourism businesses including short stay providers make an important contribution to NSW regions like the Blue Mountains by making it an attractive location for visitors, who in turn spend their time and money in cafes, restaurants, shops and tourism activities. We also employ local cleaners, gardeners and tradespeople to maintain our property. It's a mutually interdependent economic relationship that is critical to the community.

However, it's not an easy business financially. Blue Mountains City Council rates must be among the highest in the country, our energy costs (gas & electricity) have spiralled out of control over the past five or so years, and the scarcity of local tradespeople makes maintenance very expensive. We have found that tourists are extremely sensitive to any passing on of costs, and we have had to reduce our margins year after year to absorb cost imposts. We already find that our business (which is a very highly rated short stay property in the region) to be financially marginal, and we already find ourselves contemplating the selling of the asset.

With this in mind, I would like to submit that our greatest concern is the cost impact of the passing on of all costs associated with the funding of the organisation and resources required to administer and enforce the proposed new regulations. For us, this could trigger our exiting the industry, and we are one of the better players in the short stay industry in Katoomba / Leura. Therefore you can imagine how many others might also exit. As a Liberal / National government, we would fervently hope and trust that the Berejiklian government will remain steadfastly supportive of the needs of small business owners, and that your department will ensure that such costs are contained and that the passing on of those costs is tightly measured. If not, we will exit, and our self-funded retirement assets and our personal energy will be invested elsewhere.

On a more specific level, we would offer these additional comments about the proposals:

- The new requirements relating to fire safety are significant and will be costly to implement. They certainly exceed the standards required of regular homes that people occupy in Sydney whether on an owner/occupier basis or on long term rental basis. This seems quite inconsistent. If they are to proceed with a plan to align short stay property with hotel practices, it must be done with reasonable transitional support. As an aside, with hundreds of holiday houses suddenly installing hallway lighting systems that are synchronised to several smoke alarms, there seems a real risk of a 'pink batts' situation occurring. ie. Short stay owners in inadequately resourced regions hiring whoever they can get to install electrical stuff in their roofs... Also, the cost impact of getting to a point of compliance will be tough for most of us. This in turn could lead to people cutting corners. A measured transition plan will definitely be required.
- We feel that the arbitrary guest limit of 2 per bedroom & 12 per property is unreasonable. Our property has five bedrooms and it currently sleeps up to 13, in accordance with the current rental code rules, which we feel are appropriate if the size of rooms, the bed configuration etc. are taken into account.

Thankyou, for considering our comments,

Simon Willshire / Nora Li  
Owners- Black Cockatoo Retreat, Leura

The apartment block that I live in has short term lets, which are very noticeable. Particular call outs from the proposal is that the fines suggested are no where near high enough. The offending apartments would earn more from the rental to care about the fine. The other is that apart from the first document were does it reiterate that owners can vote ( with 75% of owners corp) to ban short stays. This needs to be much more visible to those reading through these documents. Owners should be able to determine how their block operates , not the council !!!

Its all very well, but like the other owners here we all pay strata fees, which support works including in my instance

the pool and gym. These tend to be the two main areas that get packed and so even residents either do not feel safe to use them, or cannot use them do to the fact there are so many people there. You can tell a sharp difference in the cooler months when its pleasant to live here and enjoy the apartment I purchased to live in, and not buy just to rent out for short stays with no care or consideration.

NSW is out of step with locations all over the world. Major towns and cities are placing restrictions on Air BnB but in NSW the state government appears to have allowed the short term letting accommodation industry to write the legislation.

The new legislation places a cap on days allowed for letting, where the host is not present, of 180 days per year or 365 days in regional areas. Byron was promised a 90 day limit in the run up to the last election but it is still to be approved and Council has to prove its case as to why Byron gets special treatment before it is approved. 90 days is still 45 weekends a year and, given weekend prices, this is likely not a deterrent to making owners return houses to

the permanent rental market.

Unlimited days - no caps: Also, a loophole has appeared in the proposed regulation: a booking for 21 or more consecutive days will not count towards the limit when a host is not present. So a cap is not really a cap!! This means the true extent of short-term letting can never be monitored or measured. A host could add as many 21 day letting periods as they want for the rest of the year and it would not be counted in the annual total!

The state govt is also proposing an industry-led register to keep track of all short-term lets. It is expected to record the name of the host, the property's address, the duration of each booking and whether it complied with bylaws. The industry self-regulating? Really? This takes the power away from local councils to monitor non-compliance for their residents.

The law supports residents - NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"; relying particularly on *North Sydney Municipal Council v Sydney Serviced Apartments Pty Ltd* (1990)21 NSWLR 532 and *Derring Lane Pty Ltd v Port Phillip City Council (No 2)* (1999) 108 LGERA 129.

New Brighton, 2483

**Submission**

We have a beach house at 26 River St, New Brighton. Since 2001 we have accepted holiday rentals through agents in New Brighton and now Brunswick Heads.

New Brighton has been a favourite family short holiday destination for about 100 years. Most of the guests are families from northern NSW or southern Queensland. Since we started letting our beach house 18 years ago the family groups that have stayed have become regular guests and come for a week or two every year. The demographic involved consists of quiet family groups enjoying the natural beauty of the area without rowdy functions or parties.

I understand the problems of noise and drunkenness that have concerned residents at Byron Bay. The demographic involved there is predominately a young often international group who come specifically to have a rousing good time.

Any restriction applied to address the problems that have arisen at Byron Bay would be unnecessary in New Brighton where these problems do not occur. Any complaint from a neighbour regarding noise is addressed immediately by the agent and an uncooperative guest is asked to leave and is not accepted for future rentals at our beach house.

This is not a one size fits all type of problem and any solution must consider the different types of holiday maker staying in the different areas of the shire. Whatever restrictions are placed on guest numbers will also inevitably effect local businesses that rely on tourists for their survival.

Byron Bay, 2481

**Submission**

Dear policy makers,

I am a resident of Byron Bay, having lived here for four years and established two businesses here.

While I believe that short term rentals like Air BnB have their place, I am concerned about the oversupply of air bnb properties in Byron Bay. Our town is being filled with unoccupied short term rentals, pushing residents like myself out of the town we love.

I support owners renting out their homes when they are away, but having investment properties permanently rented as short term accommodation is tearing apart our community. Our streets are filled with transient tourists, rather than permanent residents. Not to mention the fact that it is increasingly hard for residents like myself to find long term rental accommodation.

I am coming to the end of my current lease and will need to find a new place soon, but the prospects are not looking good. As more owners turn to holiday letting, the number of rentals available is diminishing. I am worried I won't be able to find an affordable rental in Byron, or even in the surrounding Mullumbimby or Brunswick Heads.

Please help our town maintain our sense of community and place a true cap on the number of days a property can be rented without an owner present.

We need more housing in Byron, not more Airbnb's.

Kindly,  
Natalie Woods

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Dear BSC,

\*We responsibly holiday let our property through an agent.

\*We provide employment to the real estate and a local cleaning company - a family run business that employ family members.

\*We also employ a local gardener.

\*Our guests are predominantly families, & to date we've had positive feedback from neighbours about our guests.

\*We have off street parking for the guests.

\*We are local residents and we ensure the bins are removed from the curb side each week.

\*Our property is adjacent to a commercial property on 2 sides.

If we're unable to holiday let the property for 365 days, we will most likely need to sell the property.

Kind regards,

Dr Paul Fischer

Further to my recent submission below, I wish to add the following comments: We are one of the significant minority of Airbnb who offer STR accommodation for more than 180 days each year. Our small (2 person) studio is heavily booked all year round and gets very positive reviews - has therefore been awarded special status by Airbnb. there have been no complaints at all about our guests in the five years we have been operating. Perhaps studios like ours should be able to get a permit to allow them to keep operating, as most of our stays are one week or less. Restricting us to 6 months of short stays would mean that we have to close, as the costs of running a good quality apartment in a much sought after location are high.

Consideration should be given to further reducing the 21 day limit for small apartments like ours, which are too small to be used for parties. It should be reduced to seven days so that we can continue to service the many business travellers and conference attenders who use our studio.

Subject: Re: Further consultation on policy for short-term rental accommodation

My wife Rochi and I purchased a small apartment in a little old building in Ward Ave, Potts Point about 5 years ago. Rochi comes from Sydney and so the apartment has been used for visits by us and other family members, about 4 times each year. Because of the quite high costs of maintaining an apartment there, it has also been let as a holiday rental - quite successfully as it turns out, and it is booked most of the time.

All of the 40 apartments in the building are small, most being less than 29 square metres, so it's not really possible to have wild parties! Our studio apartment accommodates a limit of 2 people. Several other apartments in the building are also let as short stay rentals, and there have never in our 5 years there been any reports of bad behaviour, or complaints from resident owners.

These little apartments with their tiny kitchens and bathrooms provide a much sought after inexpensive alternative to hotel accommodation, and so have been heavily used by tourists from Australia and overseas. It is unfortunate that the proposed 180 day limit will almost certainly kill off these successful little businesses, unless there is a workable exemption mechanism. It is my impression that there are many similar businesses operating in our area, and that like us these are the only apartment that such owners have in Sydney.

Dear Minister,

Please do not destroy the holiday home industry for Australians.

Holiday home accommodation is acutely unique in what it offers, and is extremely important for meeting the ranging needs of the community, and supports community and family wellbeing.

It offers 'affordable' and 'self contained' accommodation for large families, multiple families, generations of the same family, and social groups.

No other forms of accommodation offers this ability for families and friends to stay together, connecting people, which is proven to be important for social and mental health and general wellbeing.

Our holiday home is utilised by many people for these reasons. Many guests travel for sporting competitions, social and community events, as well as holidays, and enjoy accommodation where the whole family or group can stay together.

We oppose night limits and maximum per room restrictions.

These restrictions would mean we could no longer offer our home for holiday accommodation.

After 15 years being a holiday home, in order to maintain our livelihood, the property would be converted to a full time rental. We would not be the only ones forced to do this to pay the mortgage.

This would be tragic to the tourism industry as well as for the community service we provide.

Family holidays in a holiday home rental accommodation have created lifelong special cherished memories for many Australians like me and my family, for many generations.

I urge you to consider carefully the importance of holiday homes as a vital accommodation option to the community, and do not impose restrictions which would destroy this industry.

I object to short term rental accommodation. We need community spirit in our building which can only be fostered by getting to know our neighbours. Short term renters have plenty of choice such as motel, hotel, houses.

We have had experience from short term renters. They do not care about our building and are not aware of our by-laws governing our building. There are too much common property being placed at risk with short term renters, such as washing machine and dryers; damage to entrance door hinges; higher running and maintenance cost due to more frequent use of lift etc.

Allowing short term accommodation is unfair to other owner occupiers and long term leasers.

As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

I successfully manage properties in The Rocks/Millers Point/Dawes Point. Without disturbance to surrounding neighbours.

I employ 2 ladies on a part time basis, 3 days per week.

The cleaners rely on me, as I provide a large portion of their income, they recently purchased their first home, they are now dependent on the work I give them.

Then there is the laundrette, paying approximately an annual income of \$60,000.

A few weekends ago I unfortunately had a double booking. When trying to find alternate accommodation there was nothing available in the CBD, The Rocks/Millers Point area. Only very expensive hotels, which was not an option for this family. It certainly makes me wonder how Sydney would cope with less choice of accommodation.

I provide quality accommodation at an affordable price, my clientele are mainly families.

I believe tourist destinations within the Sydney basin should not fall into the 180 nights limit.

The Rocks, Miller's Point, DAWES Point, Barangaroo, Manly, Cronulla and Bondi.

An easy way to reduce the amount of short term accommodation is to stop subletting.

I know in my area, there a number of properties that rent out a house then furnish it and fill up a 3 bedroom house with 10 to 12 people. Any damage to the house is paid for by the owner. No risk to the operator.

If Airbnb/Homeaway had requirements such as a rates notice, a letter from the owner with permission for the house to be managed and a copy of the owner's driver's license. Many of these dodgy operators would sail away.

Director, Housing and Infrastructure Policy  
NSW Department of Planning, Industry and Environment  
GPO BOX 39  
Sydney NSW 2000

Dear Sir/Madam,

My wife and i are an Air B&B host and offer one room accommodation on a short term rental basis in our family home.

We have strong reservations about the proposed regulations & codes for the STRA. These follow recent changes to the STRA industry and we were supportive of those ones. There were known problems associated with this new industry and certain controls and standards were needed to make the Hosts and guests more responsible; and from a social and equitable aspect, to ensure that the supply of rental accommodation in certain areas is still available to other renters on a more long term rental basis.

So, we read these new proposed changes with frustration as we know that we are responsible Air B& B hosts who offer a fantastic, well located, modern and safety compliant room to the market on a short term rental basis. The reviews we receive from our guests are amazing- we are Super Hosts/Air B&B Plus hosts and we enjoy what we offer and do. We have a family home and offer one separate, secure and safe room to the market. The extra cash that our room produces is declared to the ATO and assists us on a week by week basis to cover the bills. Why then are we going to be penalised with these extra restrictions, particularly in the extra requirements for the 'fire & safety' regulations? Our family residence and the Air B& B room have wired smoke detectors and comply with all existing building code regulations.

We see these extra proposed requirements as a blatant attempt by some industry operators to 'kill' off this new industry that helps so many Mum's & Dads keep up with the cost of living and that has created many new affiliated jobs.

If the fire & safety requirements are so important, why then are they only going to be applicable to STLA? If they are to become entrenched in regulation, surely, they should be Industry wide? A Landlord offering their premises to rent on a 6 month lease basis is just as liable to have a fire & egress issue as one on a short term rental basis. We know a number of people who offer a room in their family home to a boarder (not through Air B&B) on a revolving short-term basis- what is the difference?

On the point of the registration as a Host operator, we don't think that as a family home with one room on Air B&B, we should have to register ourselves with our Local Council. We offer a discreet and well managed service and most of our neighbors wouldn't even know that we are part of Air B&B. There is a privacy issue here and we feel very uncomfortable about this. When a property becomes available for rent on a six month basis, there is no obligation for this property/owner to become registered with the Local Council. As we all know, removing unruly tenants who disrupt the peace and quiet enjoyment of their neighbors is difficult and takes time, whereas an Air B&B guest staying in a place like ours tend to be professional and well behaved. We also don't believe that our Council will have the resources, financial & human, to take this on.

On the basis of fairness, the burden of extra costs, we feel these proposed regulations are unreasonable to short term rental accommodation operators and in particular to people like ourselves who only provide one room in their family home, that helps us make some very well needed extra money and offers a choice of accommodation to the market in a modern world.

Yours faithfully,

Nicholas & Natarsha Taylor-Fick  
17 Prince Edward Street, Gladesville.

**Subject:** Holiday rental regulations for NSW

Dear Minister, Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Re: Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

**As a result, regulation for our sector should avoid unnecessary burdens on our operations.**

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

I am an Airbnb host but I don't necessarily support Airbnb on all aspects.

I support people being able to rent out part of their homes, but I do not support short term letting in Strata schemes. I feel it is unfair to other home owners in a strata/company title scheme. Having been an Airbnb host for many years and also previously in a strata I feel I understand the balance required.

I also think companies like Airbnb are avoiding paying Australian taxes and not acting as proper corporate citizens.

They should be made to pay all incomes taxes and follow existing rental and property laws before they should be allowed to operate.

Airbnb is a great way for people to make some addition income from their home which people may not want rented out all of the time to a full time renter. So it actually helps hospitality and tourism in this way. Where hosts are listing homes that are not part of a home, (i.e. could be rented out easily full time), then I am against Airbnb.

In some areas, such as mine there is a definite lack of hotels and motels, which is why we are so busy with Airbnb. Short term rentals are definitely filling a need for places to stay in the Wollongong area. There should be a register for hosts that they need to join and prove they are both insured and have safe home to stay in.

More regulation on Airbnb and Hosts would be a good thing. I am a long term host, but still have limited trust for companies like Airbnb being able to self regulate.

Thank you for reading my submission.

To whom it may concern,

As a local Airbnb host for 4 months, I wanted to provide my feedback on the Government's proposed regulations.

I'm from a new skilled immigrant family just settled in Sydney. It is not easy to start up in a brand new environment. Home-sharing helped us rely on our own efforts. We have never claimed any cent from benefit and we are always proud of that.

I understand that the Government has made commitments to support “fair short term rental accommodation (STRA) regulation that supports the sharing economy”. However, I am deeply concerned that the proposed rules will make it even infeasible for us to share our home.

Specifically, I want to comment on the following:

Per: Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, especially for the evacuation lighting systems.

First of all, I don't see any official data or reports supporting that properties for STRA are easier to catch fire than regular renting or residential dwellings. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests.

Moreover, as a strata-scheme property owner and owner corporation member, I understand how difficult, time-consuming and expensive it would be. Except for the cost of replacing the detector itself, according to the by-law, I'll need to pay extra and go through a special resolution on an extra general meeting before any modification can be applied to the existing fire safety devices.

Of course, I understand that it's always important to do improvements for guests' safety. I'm already looking for batteries operated emergency lights which could be activated by siren and motion. I believe these products could provide the same protection as those smoke detector incorporated lights in the requirements.

Per: Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home-sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

Please be advised, I am not anti-regulation by any stretch, but I need fair and reasonable regulation. Generally I support the Government's approach of regulating this industry, however, parts of the proposals are just unfair.

Thank you very much for your time!

Regards,  
Joy

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I support the creation of a cost-free register of all holiday rental properties listed on a platform and the code of conduct provided these do not add to my costs. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

In NSW we face very high costs, often imposed by governments such as land tax (my second biggest cost after mortgage interest), council rates, electricity, and gas (electricity and gas are included because government policy has caused their costs to skyrocket). Others include mortgage interest, maintenance caused by the severe conditions at our coastal location, and cleaning which in itself employs 3 people. I need higher revenue than 180 nights will provide, in order to cover these costs.

If a 180 night limit is arbitrarily imposed, I foresee that holiday rents will rise as property owners restrict their availability to high demand periods. The consequence of this is that with less supply in off-peak periods, there will be fewer properties available which will then raise their rents. At the same time, property owners will need to raise rents in peak periods such as school holidays in order to generate enough annual income to cover costs for the periods when this proposed policy will force vacancies.

There is an abundance of evidence that when governments have interfered with the free market, there are unintended consequences. Diminished supply and higher rents will be two of them.

Yours faithfully,

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid any burdens on our operations.

As a responsible operator, I strongly oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on. We rely on this income to help pay the mortgage on our home.

We can understand why there might be restrictions in apartment buildings in the major cities, however to impose any kind of restrictions in regional areas is grossly unfair and significantly impacts a desperately needed source of income in these areas.

I can also add that we have never ever had any complaints from any of our neighbours in relation to short term holiday stays at our properties. All our holiday makers are well aware that we have neighbours and have always been respectful in that regard. In fact we have had far more problems and complaints from neighbours in relation to our long term tenants.

In our view the imposition of restrictions is a heavy handed approach that punishes the vast majority of holiday accommodation owners because of a small minority of irresponsible owners in larger cities.

We are also very aware that these proposals are being driven by hotel operator lobby groups in a cynical attack on mums and dads – simply out of greed. Supporting these proposals puts the government on the side of big business and against the voting public. We will be watching you.

Regards  
Matt Fogarty

Jindabyne

**Submission**

Hi

I am a practising town planner with over 20 years of experience.

I own a 2 bedroom town house in the Snowy Mountains - Jindabyne. My property has development consent to be used as a holiday letting. There are prescribed conditions that I am required to comply with.

I have owned this property for over 20 years and there have been no issues. I regularly lease my property all year round for the purposes of holiday lettings.

I am concerned with the draft changes and in particular unnecessary and unreasonable imposition of additional fire safety requirements on my premises. The use is not dissimilar to that of a dwelling. The costs may be prohibitive, and if it is, I will cease my landuse and will switch it to a residential tenancy agreement. I believe NSW Planning is implementing these changes in response to issues raised by the Hotel and Motel industry. This is unfair as my building is not a 700 hundred bed resort where of cause more stringent fire safety measures are required.

There should also be exemptions applied to existing use provisions where any new measures are not retrospectively applied as it is in other building standards such as swimming pool barrier safety requirements etc.

I am also concerned that the proposal includes possible barring as the owner of a property is responsible for the behaviour of the guest. This is completely unreasonable as I live in Sydney and how can I be held responsible if a guest is violent towards a neighbour? This is a criminal act which should be treated as such by a police investigation. Property owners cannot review the character of potential guests as there is privacy legislation protecting all individuals. Hotels and motels would not be held to account if one of their guests were violent towards others, other than their responsibility to report any incident to the police.

I am happy to discuss further and can be contacted on 0412971075

Regards

Jeff

I am opposed to short-term letting in principle for the following reasons:

- it will drive up housing prices and rentals for local residents
- it will increase crowding and congestion. longer waits for services eg lifts
- short-term stayers may not feel compelled to comply with noise and rubbish regulations
- increased number of strangers coming in and out of apartments, whose identities cannot be verified
- increased likelihood of criminal elements using short-term letting to conduct nefarious activities eg meth labs
- increased of risk cigarette smoke and building fires, if short-term stayers feel no responsibility for common

property

The central areas of Sydney where local residents live and work, should be designated "No Short-Term Letting" areas, to maintain equitable access for local residents.

Short-term letting could be permitted for the outer suburbs where there is less population density.

In your decision-making, please consider the impacts on local residents and ensure safeguards can be enforced.

Thank you.

I also oppose the restriction of beds per room. My holiday rental property is in the country and the nearest neighbour is 1km away. It is often rented by families wanting to get together with extended family members. As such the kids, up to four, sleep in one room. It works perfectly for everyone.

Lastly my property on 60 acres supports two families in the village who take care of the grounds, the horses and the management of the house.

Your sincerely

**Submission**

I believe that Development Consent Conditions must be respected and preserved : Residential apartment buildings in mixed use and commercial zones with express prohibitions on short term letting must have their development consent conditions respected and preserved.

My strata scheme has introduced a by-law to limit short term stays. This should be respected and maintained and not over ruled. I also support the submission by the OCN .

1. Complying Development: STRA in residential strata schemes must be classed as 'complying development' with inspection by Local Council or a private certifier, not 'exempt development'. This is the only way to ensure the mandatory fire safety standards are met.
2. Day Caps: Un-hosted STRA must be capped at 60 days for the Greater Sydney Region to contain STRA to 'Home Sharing'. All STRA to count toward the cap. No exceptions.
3. Development Consent Conditions: Residential apartment buildings in mixed use and commercial zones with express prohibitions on short term letting must have their development consent conditions respected and preserved.
4. The Register: The planning law changes must not start without The Register, which must be run by Government or a neutral platform not operated or controlled by the short-term letting industry. The Register must include the days of occupation and all the platforms on which the premises is listed, Local Councils must be involved in designing the system. Local Councils and NSW Fire and Rescue must have access to the data.
5. Host Obligation: There must be an enforceable obligation for hosts to register their premises before it is listed and used for STRA purposes. This should be part of the complying development criteria, so it is clear the use of unregistered premises for STRA is illegal and penalties apply.
6. Platform Obligation: There must be a legal obligation for platforms and agents not to list any unregistered residential dwellings for STRA. International experience shows that without such an obligation, platforms will continue to list thousands of illegal apartments. Platforms must also have an obligation to share data with State and Local Government. All listings and other advertising must clearly display the host's unique ID.
7. Charges and Fees: Residential strata schemes must have clear authority to levy additional charges and fees to additional wear and tear and costs whether STRA is hosted or un-hosted.
8. Flexibility: Local Councils must have flexibility to set a lower cap and apply zoning restrictions to meet their strategic planning objectives.

**Submission**

These proposed changes are being muscled in by a small but vocal and influential body of people and business with their own agendas who undoubtably predominately do not even live in shared strata schemes - Airbnb executives and proponents of the shared economy lack complete consideration for other residents - they are not the people who's liveability and safety is compromised. We are - people who's permanent residences are apartments.

We have families, small children, sick and elderly family members and should not be disturbed by our homes being turned into hotel like facilities. Our safety and peaceful enjoyment of our properties should not be compromised by

those who want to commercialise their properties as they are NOT the ones being affected or sharing common properties.

**I agree to the above statement**

Yes

**Submission**

This submission is in response to the request for submissions in the Short Term Rental Accommodation New regulatory Framework Discussion Document.

I am the Strata Committee Chairman making the submission on behalf of the Strata Committee. The Strata (SP 65600 ) is part of a residential and commercial organisation which occupies a full CBD block containing three stratas two of which are high density residential with 565 lots.

This submission raises three points

1. Fair Trading Amendment (STRA) Bill 2018 Schedule 2.

The proposed Strata Schemes Management Act 2015 amendment, section 137A is welcomed as it ensures that STRA will be hosted, with the property owners in residence.

137A permits a host to be absent during a short term stay. This should not be interpreted as permission for the stays to be unhosted. To avoid any doubt on this it is proposed that an addition be made to the wording of 137A as follows: "For short and irregular absences of the host for work or holidays, the host is to inform the owners' corporation of the dates of absence and the contact details for his representative who will look after his guests and their visitors while he is absent."

2. Draft Code of Conduct for the Short Term Rental Accommodation Industry.

In the definitions 'host' "means a person who, pursuant to a short-term rental accommodation arrangement, gives another person the right to occupy the residential premises to which the arrangement relates."

If the property is it rented is it the tenant or the owner who is acting as host? If it is the tenant he will need the approval of the property owner to carry out short term renting. He will also need to make arrangements with the owner to carry out the prerequisite actions required before a property can be offered for short term rental. In summary these are for a strata lot.

a. In accordance with our existing strata by -laws inform the owners' corporation about the change in use of the property from residential to commercial for short term rentals.

b. Arrange public liability insurance ( draft code of conduct 5.4.3 )

c. Inform his owners corporation and the lot physical neighbours of the intention to carry out short term renting. (draft code of conduct 5.4.8)

d. Arrange for work to upgrade the fire safety equipment to meet the requirements of the Short-term Rental Accommodation Fire Safety Standard and have the work certified. ( Short-term Rental Accommodation Fire Safety Standard )

3. The introduction of a mandatory registration property register of all properties which are qualified for short term rental is strongly supported. All Industry participants should have access to the register which could become the primary industry tool for verifying that a property is available and qualified for short term rental

**I agree to the above statement**

Yes

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

**As a result, regulation for our sector should avoid unnecessary burdens on our operations.**

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you for reading my submission.

Mrs A. Williams

Stratas must be allowed to pass a By-law to limit short-term rental in the building.

The possible income tax should be brought to the attention of possible hosts. "Tax experts have highlighted the "discriminatory" capital gains tax treatment of home owners using shared economy sites such as Airbnb, compared with those who rent out their principal residence for lengthy periods under more traditional leasing arrangements." SMH 3/3/2018.

However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

I particularly object to -

- *Installation of smoke alarms in each bedroom, and the smoke alarms are interconnected where there is more than one alarm.*
- *Installation of a lighting system in hallways that is activated by the smoke alarm system.*

I have a smoke alarm upstairs and downstairs of my house, which I believe is entirely satisfactory.

**Submission**

I respond to the call for feedback in association with the Draft of the Code of Conduct for the Short-term Rental Accommodation Industry. I do so as an owner-occupier in a multi-story apartment building within the North Sydney LGA, an area in which internet advertisements for such short-term rentals are readily found.

The Draft Code of Conduct sets out the rights and obligations of such short-term rental accommodation industry participants, along with methodology and rules to administer and regulate the various components, including obligations and behaviour of the participants, as well as the outcomes of such transactions. Questions have been

proposed in order to address a wide range of issues pertinent to a range of scenarios. This submission is concerned only with that of multi-unit apartment buildings and the fundamental propositions associated with short-term rentals therein. It is agreed that proper and correct fire safety issues should be beyond question for any such building and all unit owners. However, the fundamental issues of concern for owner-occupiers in apartment buildings are, not unexpectedly, those potentially directly attributable to “short-term renters” in a residential building.

Amenity and Security. As an owner-occupier, I have concerns for preclusion or reduction of “homeliness” of our home in our building, along with concerns that short-term non-resident apartment users may not understand or appreciate residents’ issues;

Compliance with by-laws and/or fire regulations. “Short-term renters” would likely not know the by-laws of the building and thus may violate the by-laws out of ignorance or may choose not to respect the by-laws – this could lead to loss of amenity and/or security of other residents, and potentially cause expense and inconvenience to all owners;

Damage to common property. I have concern that short-term non-resident apartment users may cause damage to common property either out of accident or carelessness or even malice, thereby incurring expense and inconvenience to all owners;

Insurance. I have concern that short-term non-resident apartment users’ actions may cause ‘knock-on’ expensive effects to all owners.

It is submitted that commercial premises organized for "short-term renters" account for these concerns in appropriate ways.

It is my view, and one expressed informally by many owner-occupiers of multi-unit residential buildings, that the members of the respective Owners’ Corporation should, at an appropriate General Meeting, determine the plan of action best suited to themselves, analogous to the passage of, or modification to, by-laws. I believe that imposition of rules or other conditions of short-term rental accommodation by government, even including the duration of use of a “short-term rental agreement”, on an Owner’s Corporation is entirely inappropriate but should be the responsibility of that Owners’ Corporation.

**I agree to the above statement**

Yes

I also wanted to send you an email which I sent recently to the team at Airbnb.....

**"I wanted to tell you a little bit more about how much partnering with Airbnb and starting this business has not only meant to me but also for the many people that we have been able to employ and to be able to utilize great skills that our incredible team have.**

Here goes....

**You may or may not know that in my former life I was a professional dancer with the Australian Ballet, performed in musical theatre for 17 years, both here and internationally and was also a professional dancer on Dancing With The Stars when it first started many years ago on Channel 7. Once I knew my performing career was coming to an end I looked into working in some way with my other passion which was real estate.**

**I had started my own Airbnb quite successfully and was approached to start a short term Airbnb division with a former work colleague from Bresic Whitney who now has a Ray White franchise but Ray White wasn't ready to go down the short term road so I decided to start my own business. I was also teaching at NIDA for the musical theatre course as well as extensively choreographing, when I went overseas for a holiday. On my last night I was struck by a car in a very serious hit and run accident, covered by Channel 7, which put me in a back brace for the next 6 months.**

**As a result of the accident I was forced to make this business work and fortunately I was able to live from the earnings on my own Airbnb for the first year which was the instigator of the business. Without going into too much of the detail what I wanted to convey is that not only was I able to start a new career, due to adversity but through what Airbnb has created we are able to offer work to full time, part time and contract workers both in Australia and overseas.**

Here is a list of how our business has created opportunities:

- **We do multiple renovations in multiple states providing work for builders and tradespeople in our extensive makeover arm of the business**
- **Provide work for stylists by promoting that service with that arm of the business (another passion of mine)**

- Multiple cleaning business employment for companies and contractors in 6 states and 1 territory (Sydney being the biggest)
- National linen contracts with two separate linen companies
- Employ staff to do meet and greets
- We were able to employ and help Suzie into a full time role after her business went broke due to the tramworks in Sydney. She is now an integral part of our operation
- We have expanded to Melbourne and now have full time staff there because of the Sydney operation
- Many of our clients have come to us after the rents have dropped severely in Sydney and rather than being forced to sell they are able to achieve a better return with the demand in the short term sector of the market
- We employ tech staff
- Accountants
- Bookkeepers
- Amenities supply companies
- We constantly refer to local businesses, restaurants and cafes
- Promote concierge services such as private chefs and drivers
- Employ photographers nationally
- Printers to create our own welcome guides
- Electricians
- Handymen
- Plumbers
- Insurance companies for short term rental insurance
- Writers for marketing blurbs
- Bloggers
- Lawyers
- Real Estate Agents for referral agreements

These are direct and constant but there are so many other industries that Airbnb and our company are able to Support.

Something that has touched me greatly is working here in Manila with the members of our bookings team and seeing how it helps them and their families. CJ, who has been with us for almost three years went from buying a washing machine for her mum in her first year with us to renovating her parents house this year. Knowing that we can help them to support their families is something well worth fighting for!

One of the big things I am hearing from almost all of our full time property owners is that the properties are maintained to a much higher standard than in a long term scenario as we pay particular attention to it being presented the way it was photographed from the beginning.

The argument of guests disrupting community and strata buildings is generally unfounded as I have had myself in the past and have heard of way more issues with long standing tenants. "There may be one or two noisy guests along the way but at least they are gone after a few days instead of us being stuck with them for 6 months, 12 months or longer like some of our tenants" was an actual comment by my building caretaker.

Whilst some measures are necessary what concerns me greatly are the effects that all of the added safety requirements may have on the decision for some of our owners to want to consider it viable and why there is such a difference between long term and short term for such requirements."

Thank you for reading and I ask you to reconsider some of the implementations.

Regards

Mark Hodge  
Director

However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Also, limiting the number of guests per bedroom makes no sense as sometimes there are large families with young children who all wish to sleep together. Saying they can't would then have to translate across to the use of hotels would it not? Because we have all stayed with our families all together in hotel rooms since we were small children. That would be the alternative for these families, then forcing into smaller spaces with more people and less amenities for a family.

**From:** Neil j Franklin <neil-franklin@bigpond.com>  
**Sent:** Thursday, 5 September 2019 5:21 PM  
**To:** DPE PS STHL Mailbox  
**Subject:** Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

My specific concerns are:

- In regional areas where properties are on acreages no restrictions should be necessary as there would be no impact on amenity or neighbours. The proposal to allow cash strapped local councils to regulate in any way they chose should be entirely unnecessary and potentially risks being used as a cash cow .
- Limiting the number of guests per bedroom. My own property consists of two double bedrooms with ensuites and a bunk room with 2 double bunks. It is set up for two families with 2 children each to get away to the county at relatively low cost. If a limit is to be applied it should be at least 4 (or 2 per room plus 2 ) otherwise they would need to rent two cottages at additional cost. This is not out of line with what is common in budget hotels (which don't exist anywhere near me) and such visitors bring valuable \$ to regional NSW , especially during this drought.
- Day caps. in city(and regional) houses , as opposed to flats, day caps should not apply as any disturbance issues are far less for neighbours as there are no common areas. Moreover where the rental is not for the entire property (because the owner maintains a bedroom for their exclusive use) then the day cap should not apply either as the owner is able to police the rental to some degree.

Thank you

Neil Franklin

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct.

However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Should we be forced to cease holiday renting our property; not only will I cease to employ a Cleaner, Gardener, Pool Man and cease using the local Laundromat for washing sheets etc...which will result in the loss of approximately \$35,000 in income....but multiple local businesses in the South Coast such as cafes, restaurants, supermarkets, butcher, etc etc will lose out on patronage and income....which combined with other beach houses also ceasing to rent, will have a devastating effect on the local economy.

**Does the NSW State Liberal Government really want to be known forever as the Party who put people and local businesses out of work on the NSW South Coast (and other parts of NSW) as a result of Legislative restrictions on the use of our properties?**

Regards

Paul Anstee

**To:** DPE PS STHL Mailbox  
**Subject:** STHL submission - question regarding multiple supporting evidence files

Hi,

I'm looking to make a submission to this consultation, and have approximately 30 to 35 different documents (currently in electronic formats such as pdf, xlsx and docx) I would like to submit as part of my submission, discussing my my recent experience of taking my long-term tenant to NCAT after they breached their lease by subletting the property on AirBNB; which highlights several shortcomings of the proposed legislation and regulations. This sub-letting on AirBNB ran for almost two years before it was identified in the building's security camera footage.

Unfortunately, landlords have few options should their tenants breach their lease by subletting the property on AirBNB, even if they have made it clear it is not to be sublet. Having managing agents able to list properties on the STPL exclusion register would go a long way in preventing such a problem; and would also protect long-term tenants from unscrupulous opportunists who lease properties long term in order to sub-let them short term without the landlord's knowledge. In such unauthorised subletting cases, how would enforcement of the proposed STHL fire regulations work? Who would be liable for breaching the regulations?

Stone-walling from my tenant and AirBNB occurred when I had my lawyers request information about this sub-letting activity; given the damage incurred to the property; has limited the avenues I have to pursue for damages. After my tenant claimed a lack of financial means and assets at NCAT, suggesting that further legal pursuit for restitution would result in his bankruptcy, I would like to be able to take AirBNB to court for restitution (given they administer the payments, provide insurance to their "hosts" for property damage, and have not been forthcoming providing the underlying sub-tenants), and seek to have the proposed regulations facilitate this easily. An even better solution would be to lift NCAT's compensation payment limits, from \$30,000, to say \$250,000, and make AirBNB and similar online service providers entities who are eligible to appear before NCAT, to prevent restitution cases clogging up the court lists in the District and Supreme court.

I'd like to provide my lawyers' letter and the responses from my tenant and AirBNB; again in pdfs.

I'd like to provide a copy of my managing agency agreement with my real estate agent; and a copy of the lease; both in pdf and both of which clearly show no subletting was allowed.

I'd also like to provide a copy of my landlord's insurance policy; which shows that it is void if subletting takes place; again in pdf.

I managed to save down a copy of the AirBNB listing in pdf form; which I would like to provide.

Web-scrapes from InsideAirBNB suggest the property was continuously listed on AirBNB, despite the tenant claiming to reside there full time – highlighting one particular shortcoming of the proposed regulations. These web-scrapes, which have been compiled together, go for approximately 5 pages in an excel spreadsheet; which I would like to provide.

I've also got a range of other suggestions, such as that emergency services, such as the Police, Ambulance and Fire Brigade can also record "strikes" against a "host" or "guest"; as well as strata title body corporates where common property gets damaged by "guests"; and that licencing of properties and hosts should occur through Service NSW; just like motor cars, boats and drivers – that way strikes could come with enforceable penalty notices. There are many parallels between the current system which ensures cars are road-worthy, and a potential system which ensures that properties which are STHL are fire-safe.

Would it be possible to have the electronic submission file types expanded to include zip files, or a similar compressed archive format, enabling multiple files to be submitted?

Alternatively, I could print it all out and send it to you that way; hand deliver it (perhaps via some other DPIE employees I am currently working with regarding regional broadband); or e-mail all the attachments through to this address.

Kind regards,  
Mark

**Importance:** High

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator in the NSW South Coast, mainly Nowra, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. **However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will not only place an important holiday tradition at risk but also will narrow the choice or lack of temporary accommodation for large companies which have large and long term work projects in relative areas and will also deprive many holiday homeowners of income they have come to rely on.**

I have had on numerous occasions over the years, many large companies relying and reserving from 3 to 6 months at any one time for projects in the south coast area but also for work at HMAS Albatross where a lot of subcontractors require long term accommodation and may I say navy personnel families as well.

**Restricting the freedom of choice in lodging or accommodation and for shorter or longer temporary stays will create an unstable and unworkable situation at both ends.**

I have been operating since 2007 and over the years have seen an increase amount of not only holiday makers but increase of work projects in the area.

**By narrowing the choice or the lack of freedom of operators and users will reduce the economy and tourism in any such given areas which local councils and communities rely on.**

Kind regards  
Michèle Jackson

There are no hotels in Mosman or out of the city. The cost of the city hotels are prohibitive for families coming from abroad and also families relocating back to Australia.

Kind regards

Tina Lees  
Mosman

Dear Minister,

I have been renting out my own home for 2/3 months a year for x10 plus years now in an effort to makes ends meet and I am staggered for have met so many wonderful guests in this time who wish to experience Austrlia from the base comfort of a home rather than a hotel and with the support and guidance of a local helping them navigate all we have to offer as a state and City.

I personally know of hundreds of average folks within my network who have become short term rentals landlords and do so without issue. It seems abundantly clear as a responsible operator in this space that see both sides that it is the rouge operators, those managing large scale short rentals for fast and regular gain along with irresponsible renters illegally re-renting their leased homes that are at the heart of 95% of the issues in respect to neighbourly disturbances, theft and general security.

Own homes represent by far our biggest assets and you will find that owners who manage their own homes through the various platform do so with a huge amount of diligence as well as respect for their neighbourhoods and communities.

Short-term rental accommodation is an important driver of economic growth, job creation / replacement for the NSW tourism industry and as a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income that is now an essential form of income as work options become harder for those of us later in life or living as a single parent where responsibilities that makes travelling far for work impossible to manage practically.

Your sincerely

However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

We run a three cottage farm stay that is essential for the survival of our overall farm operation. The cottages are spaced 200-300 meters apart and noise has never been a problem. One of the cottages is a three bedroom cottage with a king sized room, a queen sized room, and a bunk room with a double bed and 3 singles so that a family gathering of 9 people is possible, usually two sets of parents and 4 or 5 kids in the bunk room. There is a large open plan living/dining/kitchen area that easily accommodates those numbers. It is by far our most popular for a number of our return customers. For us to lose this as a farm stay dwelling would be disastrous.

We are being punished for the sins of others that pack far too many people into small places to maximize profits. Allowing us to have an avenue of appeal for a country property with either the registration body or our local council would be very helpful.

Thank you for your consideration.

Sincerely,

Rob and Deb Kane

Tanjenong

1. The proposed maximum of 2 guests per bedroom is too restrictive and highly punitive. A couple with a young baby cannot sleep in the same room as their child - this is unfair to the parents and their baby.
2. The requirements to meet bushfire regulations would be financially prohibitive to owners and would force many owners out of the industry. This would have a major impact on towns that rely on tourism. A more sensible option would be that STR's in bushfire areas must clearly disclose this in their advertising and have a bushfire evacuation plan clearly displayed at the property.
3. Why would restrictions be placed on short-term accommodation providers and the same rules not placed on long-term rentals? - particularly with regard to fire safety.
4. We support having an industry that has professional standards and a clear framework in place in order to eliminate unprofessional operators.
5. We hope that the process to add guests to an exclusion register is a straightforward one as currently guests that cause damage or issues at properties often escape punishment due to the protection of booking platforms.
- 6. The restriction of 180 nights on properties in the Blue Mountains would be extremely damaging to tourism in this area and should be abolished.**
7. Property managers should be supported throughout the changeover process by a designated government body including free legal advice on the changes and a specific account manager that we can receive support from.
8. The changes should be supported by significant investment in technology in order to reduce manual processes (e.g. guest exclusion register portal).

Thank you for your consideration of this matter.

**Subject:** Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

I am involved in short term accommodation in a strata complex of 8 units in Albury NSW, 5 of the 8 units are rented out short term,

I own 4 of the 8 units, My 1 bedroom units have a full kitchen, the kitchen has a full size refrigerator & stove, including all pots, pans & utensils to cook up a storm the bedroom has all linen & towels provided, lounge room has couches TV DVD & Wi-Fi , & of course a stocked bathroom.

I promote them as “just bring your suitcase and cornflakes, and everything else is provided”

The building has been used for short term accommodation since 1953, as it was close the old Albury Base hospital.

This is obviously way before airbnb or stayz were even invented, & way before the internet as well.

My clients are Locums, Lawyers, optometrists, chiropractors, pharmacists etc who come to work in Albury for short periods,

Generally for 3 to 4 weeks to cover for someone who is on holidays or on extended leave.

My very valid point is where are these type people going to stay when the new regulations drive me OUT of business, maybe they could stay in a Motel

And stare at a Microwave for 3 to 4 weeks, as it is the only kitchen appliance in the room, (most Motels will not allow guests to cook in their rooms)

therefore they have to go out to eat every night.

Seriously, where are these type of people going to stay, the shortest residential lease in Albury is 3 months, businesses just cannot afford to rent & supply utilities for the times that they MAY need Locums, I don't think the Government has thought about the working people that need good clean and most importantly affordable accommodation when working away from home.

I imagine that businesses in other regional centres (Tamworth, Dubbo, Orange, Wagga etc.) would have the same problems, needing locums to cover short term staffing, when their people are on holidays or on extended leave.

Please don't hesitate to contact me for further information about short term accommodation,

*Regards*

As a long term owner and occupier of an apartment of Sydney's lower north shore, I would like to strongly voice my opposition to all short-term rentals.

There are a myriad of problems with short term rentals, such as disruption of the ambience and enjoyment of neighbouring properties and lifestyles, security, fire risk, rubbish, damage, theft, etc., etc.

In fact most buildings are not designed for short term rentals and therefore should not be available for this purpose.

Would you please take this submission into account in all decision-making concerning short term rentals.

**I agree to the above statement**

Yes

McMahons Point 2060

**Submission**

As a long term owner and occupier of an apartment of Sydney's lower north shore, I would like to strongly voice my opposition to all short-term rentals.

There are a myriad of problems with short term rentals, such as disruption of the ambience and enjoyment of neighbouring properties and lifestyles, security, fire risk, rubbish, damage, theft, etc., etc.

In fact most buildings are not designed for short term rentals and therefore should not be available for this purpose.

Would you please take this submission into account in all decision-making concerning short term rentals.

**I agree to the above statement**

Yes

**Subject:** Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Kind regards,  
Linda Robertson  
P O Box 402, Kiama NSW 2533

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the 90 night limit sought by Byron Shire Council as unworkable – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Affordable housing is indeed a critical social issue and as such should be dealt with on a State and Federal Governmental level through construction of specific housing. To expect private home owners who have purchased their property under existing legislation, to completely change their use is poor governance. To retrospectively enforce home owners to adhere to a shortage in the market created by lack of governmental land release, affordable housing and DA restrictions that exclude reasonable provision of tourist accommodation, is unethical and short sighted.

Regards,

James Mayson

**Subject:** Holiday rental regulations for NSW

Dear Minister,

**Businesses in my area that been able to open up and survive would collapse if big changes were made to the holiday home sector.**

These proposals are in effect, attempting to change the goal posts mid game.

**This will be a DISASTER for small businesses, home owners, retirees and their communities which have grown around the great business and opportunities short term rentals bring to an area.**

**Do not make MORE regulation and onerous changes - the average person is ALREADY struggling to keep up with endless regulation and make ends meet.**

**I oppose the night limits and use restrictions for properties.**

**Restrictions of this kind will result in**

- **collapse of property prices in holiday areas**
- **collapse of small business that have grown to cater to holiday makers**
- **deprive many homeowners of income that they were allowed to have when they purchased their property.**
- **destroy home owners retirement planning.**

**In a word, its UNFAIR and DAMAGING to everyone - government included when retirees are deprived of possible pension-reducing income.**

**If onerous regulations happen, I will have to sell my property - probably at a loss- and this will have severe effects on me and my possibility of retirement in my own home.**

**Why is the government tampering with something that is working so well?**

**Is it to raise more revenue from home owners?**

**Good grief with huge rates and outgoings we only just get by as it is.**

**Leave this fledgling and beneficial industry alone, or you will destroy it.**

Kindest regards,  
MGA Arnold.

**Subject:** Please here our point of view

Dear Minister,

In the area we rent our house, Pearl Beach, the local economy around Umina rely heavily on the tourism industry around the central coast.

This is not limited to all the tourists we bring to the area and the local hospitality business but all the trades we employ just to keep the houses in their best working order. Because the properties receive a high volume of traffic, local cleaning companies, maintenance, plumbing and electrical (just to name a few) receive so much business from the holiday rental market.

To impose restrictions and price prohibiting fees for not much gain is nonsensical. Whole areas of coastal NSW and the highlands would literally die without that tourism industry... especially without the influx of weekend tourists that so many people rely on.

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct.

However, I oppose the night limits and use restrictions for our properties, this is unfair and restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

I also oppose providing more authority to executive committee's in strata buildings giving them powers to ban short term letting as in most cases short term letting is mis-understood and I have already seen an over use of powers and bullying within the industry from over zealous executive committee's to short term let property owners.

Fire regulations should also be consistent across the board for all rental properties.

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions on the amount of guests in a room for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on. Let me give you our example.

Our home is a 6 bedroom property on 5 acres, and is able to sleep 14 in beds, and 18 people if the two double futon beds are utilized. We are very popular for those wishing to have a family reunion or Christmas In July, whilst visiting the beautiful Hunter Valley. If these restriction are put in to place, it means that we could only host 12 people at the most, and larger families will have very limited probability to get together under the one roof.

I appreciate your consideration of my concerns.

Dear Minister,

The following reflects my views on the proposed changes to STR letting.

Short-term rental accommodation is an important driver of economic growth, government income and job creation for the NSW tourism industry.

We pay significantly more tax and penalised heavily under a PAYG system up to 50% of our income as opposed to nil for a lot of multinational hotel companies who have lobbied for these changes.

We put more money into the local area as well as government coffers. Our homes are generally in areas where hotels are not located so we put more money into local areas that generally don't see tourists.

As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct.

However, I STRONGLY oppose the night limits and use restrictions for our properties – while I am a stay at home host, I may want to list as a whole home in the near future.

This is a very obvious ploy to discourage people listing whole homes which is the most popular option for tourists. Limiting to letting 50% of the year simply makes it unprofitable for hosts and they won't list. It does not limit any noise or issues that come with whole homes. So the limit DOES NOT address that issue correctly.

Furthermore. 99 percent of hosts DO NOT want parties or bad guests in their home. We don't want our homes trashed and we do want to be good neighbours. We monitor and screen guests to the best we can.

But with our incomes restricted we may be forced to take more chances with guests so I can only see this measure increasing a problem.

Regards.  
Mel

**Submission**

I disagree with the proposal to limit bedrooms to 2 persons. It is common for parents to wish a cot or toddler bed be placed in the master bedroom. Cots and toddler beds should be excluded from this limit.

Clarification on connected fire alarms in every bedroom where the host is present. For a standard size home the fire alarm going off near the kitchen when the toast is burnt in the morning can already be clearly heard in all rooms and by the neighbours.

**I agree to the above statement**

Yes

Dear Minister, Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the smoke alarms requirements - the cost of installing all required smoke alarms and security lightning etc will be unaffordable for many owners and therefore you will deprive many holiday homeowners of income they have come to rely on. Maybe a requirement for normal smoke alarms in all rooms will be much better (to follow the requirements in normal long term rentals).

Kind regards

**Categories:** Purple category

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Please consider amending the following proposal:

- Where the host is not present, and the site is not on bushfire prone land or a flood control lot, STRA is 'exempt development' for: ▪
  - 180 days in Greater Sydney
  - 365 days if the STRA owner's principle place of residence is within a 10 km radius of the STRA in Greater Sydney
  - 365 days in regional areas; except where a council varies this to no lower than 180 days.

As a property owner, I do not necessary need to be present at the property to ensure that the guests needs are met and that the neighbours right to peaceful enjoyment of their place is maintained. Many of the problems with Metropolitan areas such as Sydney are due to 'agents' operating multiple STRA without appropriate oversight. As the property owner, I have a vested interest in maintaining good condition of the my property and good relations with the neighbours. As I live in the neighbourhood, I can attend the premises immediately if there are any issues. This addition would still meet the intent of the regulations and reign in rouge STRA agents but also give property owners a little more flexibility on how they lease the premises if they are prepared to manage the property themselves in person.

Thank you for your consideration

Jacob Ralph

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Stevan

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Byron Bay visitors will be most hard hit as night limits will reduce the number of accommodation options available to the extent that there simply will not be enough beds to meet the demand.

Kind regards

Dear Minister,

I own two houses in NSW that are dedicated short stay holiday rentals, one in Orange and one on the Central Coast. I am 61 years old and they will contribute significantly to my retirement income.

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Yours sincerely,

**Submission**

I write to record my vehement objection to the amendment of the regulatory framework relating to Short Term Residential Accommodation to the extent that it is directed at restricting the ability of a strata plan to pass by-laws prohibiting "Air B-n-B" by providing that any such by-law be "adopted by special resolution, with 75 per cent of votes supporting the proposal at a general meeting" as set out in the Discussion Paper (Background Section) We live in Milsons Point, a Sydney suburb with extremely high population density. Its public resources including on-street parking, open parkland and waste/litter management are strained. Our suburb has no requirement to house

“FIFO” workers, a group whose need for accommodation appears to have been an important consideration underlying the policy.

The “special resolution” requirement would render it easier for owners to run apartments as private hotels in residential home unit buildings not approved for such commercial use. Such an operation can, and does interfere substantially with the quiet enjoyment of the occupation of other residents.

We have had such an experience in our strata block wherein a non-resident owner (the original developer of the property) made his penthouse apartment available and promoted its use for weekend “bucks’ parties” resulting in:

- Scattering of litter including cigarette butts in common areas and balconies of other apartments;
- Spillage of liquor in hallways and lifts;
- Excessive loud music and noise throughout the night;
- Visitation by strippers and sex workers to entertain the partygoers; and
- Provision to itinerants of access to secure car residents’ parking areas.

The codes of conduct to be observed in residential home unit buildings are regulated by the passage of by-laws under the legislation. It is entirely appropriate that they enable the residents to determine the manner in which their building may be used with consideration to the impact of such use upon their lives.

Like almost all others in our area our apartment block does not have the security, permanent cleaning and reception facilities required in the operation of a hotel business; the use to which the building could be put under the proposed framework.

In my submission, in a home unit block zoned residential it should be the ability of the owners’ corporation to pass by-laws permitting the use of apartments for STRA that should require a special resolution, with 75 per cent of votes supporting the proposal at a general meeting. The proposed framework is founded on the presumption owners of residential apartments should be allowed to operate a hotel in their apartments unless 75% of the other owners object. Such a presumption is abhorrent to the principal that an owner is entitled to the quiet enjoyment of his home.

Advertisements for tenants should not be allowed to discriminate by targeting young singles and couples in shared accommodation which leads to numerous late night parties.

Councils need ample resources and powers to investigate breaches as they presently claim limited resources.

I am very concerned about this! Why do we have to take the FUN out of life in this state!

What bothers me is this -

In this country housing is so unaffordable. We have never rented our house to anyone however we live in a beach suburb where many people visit (Avoca beach NSW). Our beach is packed in summer and when I speak to people visiting - many of them are here staying in air bnb's. Most of these people do this because holidays for MOST people (particularly in Sydney) are unaffordable. People can't go away like they used to because mortgages are so high so air bnb is what people use to have FUN in life!

The government wastes all this money campaigning on improving people's mental health and yet the same govt makes housing unaffordable and now want to destroy people's ability to go on an affordable holiday and keep people miserable ! A family of five can no longer afford to go to Qld and stay in a hotel - they have to use things like

air bnb so they can take their kids on a trip to the beach! What are you all thinking? This country used to be about everyone being able to have a break. I have met so many families visiting up here that can only ever afford to visit coastal nsw. Other holidays are out of their reach. Imagine being a child living in western Sydney with no prospect of a holiday.

Honestly no wonder people are miserable around this country. We are making life so difficult for large groups of people by making things unaffordable! It's SO wrong and unAustralian! Let people rent out their houses and obviously they have to have fire detectors - but all of that other nonsense is just a way to rip people off and keep people miserable. It will mean families will have less opportunities to take their children out in this horrible housing affordability state we are in and it will just mean councils like Gosford reap money in to spend at their Xmas party! How many personality bypasses did it take to come up with this garbage proposal to over regulate house sharing. There are more concerning things to be worried about - such as keeping hard working Australians happy!

I do support the installation of smoke detectors, fire blankets, escape plans etc. Most short term rentals I've stayed in do have these.

However, most residential houses already have these devices as standard. I would not stay in a rental that said there was no fire safety devices.

Does adding more "red tape" have any real benefit? I would have thought that people who opened their not often used "beach shacks" would be right across safety issues so that their rental property would get return customers. This sharing accommodation era we're in all relies on reviews.

Finally, why is there a difference between short term and long term rentals? Surely one bill would suit both. I've rented many long term rentals that have no battery operated fire smoke sensors, let alone professionally fitted linked alarms throughout the property.

To the dept of planning and the Govt. I own a short stay house in rural NSW. If you intend/do introduce tougher rules & compliance regime on short stay homes that's fine. But you must go ahead and implement a set of rules that we can work with. Stop talking about what you'll do. Go ahead and do it.

Protection from bullshit complaints from neighbours is most important. Nobody wants so-called party houses. But jealous/crazy neighbours making unfair & unreasonable complaints must not be permitted to shut down a holiday house.

Hi there, as an owner in Hyde Park Towers at 148 Elizabeth Street, Sydney I would like the new laws with regards to strata and short term letting to be passed asap. My strata refuses to let me as an owner short term let my apartment. As a small business owner who lives alone and travels a lot with my work it makes absolute sense to be able to short term let my apartment to responsible parties via Airbnb to not only bring extra money to help me run my own business but will also help me spend more within my local economy. It just simply makes sense to let owners who's homes are their principle place of residence short term let. The strata committee is harassing myself and other owners within the building and constantly sending threatening letters stating that we cannot short term let our own homes otherwise they will fine us \$1100 each time we try to do it.

I am the owner of my apartment and should be allowed to supplement my income whilst I am away working.

Thanks very much in advance.

Tiffany Benn

Our building has gone to considerable trouble and expense to ensure the security of property and residents. This security will be undermined by allowing short term renters to access the property without any oversight (through submission of leases). The amenity of owners will also be lessened. There is no real means to inhibit bad behavior by short term renters in the short term - by the time a complaint is dealt with the offenders are long gone.

I strongly object to any legislation that prevents Stratas being able to control their own Apartment blocks.

If a BY LAW is passed by owners that prohibits any short term letting than the BY LAW should be enforceable. Owners should have the ultimate say on who enters their building for obvious security reasons. The proposed Legislation does not recognise the rights of owners to control their own apartments.

**From:** Sally Anderson  
**Sent:** Tuesday, 3 September 2019 3:40 PM  
**To:** DPE PS STHL Mailbox  
**Subject:** FW: Have Your Say - STRA Reforms - STEVAN PEJIC

Hi Deborah,

I'd like to take this opportunity to provide a statement in response to the, Have You Say on STRA reforms;

<https://pp.planningportal.nsw.gov.au/exhibition/have-your-say-short-term-rental-accommodation-reforms>

I've made a submission via the aforementioned website, but would also like to send you my statement directly as a fellow colleague of the DP&E.

Upon review of the discussion paper, it seems that there'll be restrictions on STRA opportunities for rural properties that are zoned within a bush-fire prone & flood zone area.

Given that a vast area of NSW beyond the Sydney Metropolitan area is subject to being within a bush-fire and/or flood-prone area this automatically deems any private rural zoned land and associated dwelling potentially not eligible to be Short-Term leased.

Various platforms beyond Airbnb, e.g, Bookings.com, Homestayz.com, Youcamp.com, have been in operation for many years prior to the arrival of Airbnb and these platforms have been used successfully to Short-Term lease various rural properties all within bush fire & flood prone areas, in various formats, e.g, camping sites, single rooms or entire properties.

The point is, all these websites provide an opportunity for all owners who are people, groups and minorities, for urban dwellers to have access to private rural land and associated dwellings as means to share and provide a stream of income and promote and celebrate the local rural area and its offerings.

For constantly struggling rural communities which have inadequate employment opportunities in their local area this is an opportunity to provide income to these rural areas that don't even have enough accommodation to cater for during the course of a year.

Please take note that all income received is taxable so this also gives the federal government additional tax revenue from the proceeds of completed bookings of non-cash funds exchanged from user to owner, which is completely transparent and submitted to the ATO by the STRA platforms upon completion of each financial year.

My suggestion is to apply the proposed reforms related to the Sydney Metro area only, whereas a separate criteria is applied to properties with a **land zoning of R1, R2, R3, R4, R5**, which doesn't include any restrictions related to Bush-Fire and Flood-Prone areas, as these owners are already living and/or using their land for personal and dwelling/housing activities, so then why should they be restricted to share their land and associated dwellings with the public. Unfortunately, if you apply restrictions related to bush fire and flood areas this will minimize any legal opportunity for rural land owners to earn much needed income outside their already struggling farming or other income generating operations.

Finally, in the context of safety for all persons using rural land or dwelling/s for short term use, the purpose of all STRAs is a sharing economy platform which when used correctly can benefit all users. If taken advantage of and no consideration is given to safety by the owner, particularly in a metro environment, then I completely agree that strict restrictions must be applied to multi-unit/strata residential properties, however, as stated above the proposed reform shouldn't be applied to rural zoned blocks which are subject to bush-fire and flood zoning, as evacuation of these areas when an emergency occurs is managed and coordinated by the land owner, SES and all associated Emergency Services.

I thank you as a fellow colleague of the DP&E for reading my statement and I hope that my suggestion will genuinely be considered.

Kind Regards,

**Stevan Pejic**

This is diabolically poor policy. I have just completed a development in bushfire zone greater than BAL 29 for the express purpose of holiday rental. The house is built to comply with the latest bushfire codes and now i find i am unable to rent it for its intended usage.

Regional economies rely on this kind of accomodation which have been letted out prior to websites like Airbnb coming into existence.

Please do not apply unnecessary red tape which will have significant ramifications for regional economies.

Commercial accomodation providers do not provide the same service, particularly in the blue mountains, where commercial hotels dont provide family or group friendly accomodation and are often either very high end (escarpment group) or of a very low standard. Neither option is family friendly.

A very significant portion of homes here are holiday rentals located on bushfire affected land where the host is not present. Many people have traditionally built homes here as holiday homes and not as a primary residence.

The system isn't broken so why is a NSW Liberal govt trying to 'fix' it with red tape. It does not make sense? Just because apartment tenants have made complaints about STRA in Bondi why change the rules for the whole state? The NSW govt have obviously not done sufficient research.

This policy will stifle my business with red tape, i find this unacceptable and will be considering launching a legal class action with some of the many other holiday home owners in bushfire zones against the NSW government should it proceed with these changes.

I dont believe that council will approve any development via DA for STRA where the rating is greater than BAL 29. I have found myself educating council about these new proposals which they have not seemed to be aware of. Council don't seem to know anything about this policy and who will be policing it, they are not resourced to do this.

This needs an urgent rethink

**I agree to the above statement**

**Submission**

I have reviewed the draft discussion paper and the proposed plans for exempt and complying development.

I note that it is intended to permit hosted short term stays with respect to Strata properties, and I note that it is intended to encourage compliance with strata by-laws through education and enforcement of by-laws. The current regime of enforcement of by-laws through NCAT is time consuming, expensive and slow. Furthermore, the maximum fines that NCAT is permitted to levy are paltry, when compared with what some properties may lease for when they are the subject of short term stays.

It is my strong view that all Strata Schemes should be permitted to introduce by-laws which prevent any short term stays in their building, whether they be hosted or non hosted. This will result in the whole short term stay "industry"

being more self regulatory.

If such a position is not acceptable, then the system of enforcement of by-laws arising out of short term stays should be streamlined and given some real strength, through larger fines and a willingness on the part of NCAT to strictly enforce any breaches.

Kind Regards  
Peter Kennett

I Agree with the draft instruments and Regulations that will introduce the state-wide planning framework and mandatory Code of Conduct for short-term-rental accommodation (STRA). Provided it does not ask for the hosts to pay extra fees for any type of council licensing fee later on.

I beleive it regulates the industry and provide guard rails both for host and tenants.

Thank you for making available the ability to make more detailed submissions regarding the short term rental accommodation industry.

While I acknowledge most short-term rental takes place in Sydney and its surrounds there are aspects which I feel needed to be addressed for regional areas as well.

From talking to owners and from our own experience a lot of noise complaints are usually associated with the use of swimming pools and out door spas. There should be a time limit until which these facilities can be used by guests as the associated noise is a real and ongoing problem particularly in the summer months.

While setting the maximum number of guests at 12 may seem realistic not many houses are set up the facilitate 12 people. Normally you would have the ability to accommodate a maximum of about four vehicles off street for a large house. If you are going to increase the amount of parking owners would at least have to provide, constructed,

marked and made available parking for the number of cars which 12 guests would bring somewhere between four and six designated car spaces would be needed. It follows that access to such properties should at least have a proper design and construction as guests may not be used to unformed and un-formalised roads or access.

In rural areas where untreated water is used owners of short term rental properties should provide water of a quality suitable to the Department of Health. Although this water may be suitable for long term residents whose system may be adjusted to the untreated water guests with low immune systems may be at serious risk using and drinking untreated water. A Water Quality Assessment should be at least a minimum requirement along with the appropriate signage, first flush system and a water quality assurance program.

The draft Plan does not make it clear to whom one should contact regarding complaints and what steps are to be taken to overcome frivolous and vexatious complaints.

Guests using motorcycles should be prohibited on home sites of at least five hectares as I can give examples of motor bikes being used on a one hectare site which really disturbs the neighbours.

Sites used for short term rental should be fenced. I have personal experience of Air B&B guests wandering over our property and in one case cutting down a five metre tall green Illawarra tree to use in a pizza oven.

Setting the maximum guests at 12 may be satisfactory in an area which has a reticulated sewerage scheme but in a rural area with the normal household septic such a system could, and more likely, would be severely overloaded by the sudden influx of 12 people using such a system even for such a short time as a weekend. From a health point of view obviously the maximum number of guests should be limited by the licenced design size of the domestic septic system.

For short term rentals supplying open or slow combustion fires, pizza ovens or wood fired barbeques provision should be made for the safe storage of such firewood.

Thank you for allowing me to make comments on the short-term rental accommodation.

Yours faith fully,

Trevor Kilner

**Submission**

We have two (2) "air bnb" style accommodations adjacent to us. One is across the road and one is next door. We live on the beach in a very quiet suburb, and these two properties give us a horrendous time, particularly in the Spring to Autumn months.

I will clearly state that four in five short term renters are extremely nice, give positive economic input into our community, and generally add to the colour of our post code. This means one in five are atrocious, rude, completely disrespectful and generally make our summers miserable. Given that each place will be booked solid on a weekly basis through the beach period, we will have at least one week in four or five where we regularly have to intercede, call the police or generally put up with crap. For both properties the owners dont really care.

My wife and I have young kids, and I regularly work away from home. My wife feels that we need to move. We have renters with drugs, swearing, leave piles of rubbish or stay up to early morning making enormous noise levels. I'll wake up on a Saturday morning and there will be beer bottles, rubbish and occasionally a passed out drunk on the front lawn. I have countless video and photograph evidence, much more than 256mb limit.

I feel it is not fair to my street that we are house proud and have a caring community, pay rates and generally contribute to land care but have to put up with these idiots. The owners dont live any where near us so never intercede. I suggest it is mandatory that the owner lives on the property or within 20 minutes. This is the spirit of airbnb as I know it. else have a manager and charge a bond that can force these geese to at least be civilized.

I actually beg you to do it or the consequence is my young family will be forced to move.

Shaun

I believe you should not put any strict rules to share your house on air bnb reason this is helping us to support our ongoing increasing expenses also providing people other cheaper options for accommodations.

Example uber providing fast and cheaper options for consumers.

**Submission**

I am the owner of a typical suburban home within 300m of the beach on The Central Coast. Since Christmas last year my neighbour has used the Airbnb platform to rent out his house, which used to have an occupancy level of 2 to 3 people through an agency. The use of Airbnb has been a personal nightmare for my partner and I.

The guests are typically large groups from Sydney who stay predominately on the weekend creating a constant source of noise and disruption and create an intrusive presence in a quiet neighbourhood where people are trying to relax so they can recharge for the working week. In the colder months he rents the house to itinerant road construction workers who often work the night shift returning to the property at 3 am and wake up the neighbourhood showering and talking loudly. The owner has crammed beds everywhere and sees nothing wrong with allowing additional people to sleep in vans parked outside his property or bring extra mattresses into the house

to sleep even more people.

In the warmer months the house will be occupied most weekends with up to 12 people in an average size house. The noise and disruption level increases markedly with the number of guests allowed to stay at the property.

I have read the latest Code of Conduct document and apart from the strike policy for serious offences there is little to improve the situation for people in my situation except for the new limit of 2 people per bedroom contained in table 2 of the Discussion Paper.

This will be a godsend for people like myself as it will reduce the number of cars, people and noise that we have to put up with. I expect you will get a lot of submissions from hosts wanting to increase the occupancy levels so they can make more money however I think the draft planning documents provide a good balance. Please retain this proposal in its current form.

Palm Beach,2108

**Submission**

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I like sharing my holiday house with others. I personally prefer to stay in peoples homes and where my house is situated there are no Motels. The AIRBNB industry falls into the tradition of offering rental homes in the Palm Beach area which has been the practice since my parents had a holiday house in the area in the 1960's. It is far preferable to continue this style of accomodation than allow high density accomodation facilities in this tourist dependent end of the Northern beaches.

Airbnb enables me to provide accomodation and meet the costs of owning this second home and sharing it with others. I enjoy welcoming people to this beautiful area and recommending my favourite cafes, restaurants and

shops so the many small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Sincerely Katharine Glass

I have multiple properties on Airbnb and made a lot of money off it! But it is out of control and it's overloading towns and infrastructure in areas like the snowy mountains because there is too much accommodation on offer compared to the facilities. Not to mention the people that don't have holiday letting approval. I also own a motel and have been massively impacted by this unregulated accommodation on offer. It's making it so the ski resorts actually stop letting people enter the resorts if you don't get up there by 830 on busy weekends. Which would be pretty shit if you spent thousands of dollars to be there and you can't get there. Not to mention that Airbnb would not be paying any tax to our country to fix any of these infrastructure problems either. But in the meantime I'm gonna keep using it as it makes me a lot of money. But I'm ready for it to change..  
Shut it Down!

Q.5 - The Secretary should collect financial information on the benefit of STRA including assistance with mortgage repayments, mobile workforce provisions, older persons able to live in their houses longer, single parents able to afford rental.

Q.7 - Complaints process should be clearer and ensure an appropriate appeals process.

Q.8 - Clearer guidelines on representation of the property - e.g. requirements for clean bedding and premises, changes to the property or layout to be updated on the website.

Q. 9 - Inability to participate for 5 years is too long. Should be reduced to 2 years or a maximum of 3 years. Note should be made of complainants that are malicious/vindictive e.g. in a Strata where 1 resident complains about every STRA in the Strata or there has been a history of negative relations between neighbours.

Q.10 - Where the host is overseas and may not be contactable, the notice should be provided to the Property

Manager as the customer support services can be handled by external agencies who ensure compliance with the Code. The host should also be given more time to respond, especially if they are travelling overseas.

Q. 12 - Clause 22B(1) should include property management services where cleaning and supervision of the property is provided where the host is not present. Therefore the Code should include those industry participants and should apply to them.

Q. 31 - Information on the register should not be made public to local Councils on an individual basis. This could result in certain areas being seen as STRA hang-outs which may be detrimental to the local area, and to the safety of local residents.

Hawks Nest, 2324

**Submission**

My wife and I are residents of Hawks Nest in an area known as Winda Woppa. Over the last 25 years we have seen a dramatic increase in short term holiday rentals (STHR) in our area. This has seen a reduction of permanent residents in our local area and we know of people who have moved away specifically because of the impact of STHR. The increase in STHR has brought people to town but we have seen an increase in antisocial behaviour, increase in crime, increase in traffic, rubbish left on beaches and in parks and a general decrease in the quality of life in our area. STHR do not necessarily help support businesses on a year round basis. As the permanent population decreases business find it hard to get staff and are affected by the ups and downs of visitor numbers. A permanent population allows businesses to plan for a more consistent cash flow, better access to staff and a more sustainable future.

Whilst the new STHR legislation and the code of conduct go some way to addressing some of the issues there are some areas which need further review.

1. The regulations for country areas allow rentals year round versus only 180 days in Sydney. The 180 day period should also apply to country areas to give the permanent residents respite from STHR. This should not be left to local councils to regulate.

2. I do not understand why rental periods over 21 days do not apply the maximum number of days a property can be rented. It should count.

3. There is no mention in the regulations about the maximum number of bedrooms that a STHR property can have. The regulations do specify a maximum of 2 people per bedroom or 12 people whichever is lesser. This indicates a property could have six bedrooms. My impression from previous discussions was that STHR properties would be limited to 4 bedrooms.

4. There is no mention in the legislation in regards to car parking. One house near us had 13 cars one weekend. The street was parked out, cars were parked on neighbours lawns and blocked driveways. Often STHR occupants with numerous cars with 1 person per car. The number of cars should be limited to the garage/off street parking spaces available at the STHR property. One property near us has 2 garage spaces and 2 driveway spaces. The garage spaces are not available as they are locked up with the owners possessions. Therefore only 2 driveway spaces are available.

5. There is a curious mention in the code of conduct about the STHR occupants and "their visitors". What constitutes a visitor? If a 4 bedroom property is rented for a number of nights by 8 people and they have extra stay for one of the nights sleeping on the floor of the lounge room do they count as visitors? A visitor needs to be defined as someone who does not sleep over night at the property.

6. The major impacts of STHR is often excessive noise and antisocial behaviour. Noise in particular is a major problem which includes loud music as well as loud voices and shouting. In our area most STHR houses have outdoor entertaining areas which are especially used in summer periods. The noise travels long distances and often does not cease until the early hours of the morning. Whilst the code of conduct does address this there is no reference to specific noise regulations as set down by the EPA. These regulations need to be referred to in the code of conduct and all STHR hosts need to make their occupants aware of the regulations.

7. I am concerned as to how complaints need to be reported and what supporting evidence is needed to substantiate a complaint. Where noise and antisocial behaviour is concerned neighbouring residents are generally reluctant to approach STHR occupants to complain for fear of reprisal. In our area it is also very difficult to get the police to respond to a noise complaint as our local police station is not manned at night and any calls are to the police are transferred to stations over 30 minutes drive away. So what constitutes supporting evidence. Are photos, videos and recordings OK? There needs to be some more detailed guidelines.

8. I am in full agreement with the "strikes" policy against hosts and guests. Hopefully this will go a long way to improving the overall conduct of STHR guests and will make hosts vet their guest more rigorously. One issue that we have seen with guests is that only 1 person in a group needs to be registered when renting a property. Any complaint to the host or their agent is usually only attributed to that 1 person. The next time that group wants to book somewhere they just book using the name of another person in the group at another property. The only way around this is that all persons in a group renting a STHR should be registered. This is the same as if you were to check into a hotel or motel. That way any strikes or bans would be applied to everyone in the group.

We look forward to the introduction of the legislation and code of conduct and hope it will improve the lives of all residents who have to live with STHR as a neighbour.

Richard Streamer

RE: Public Opinion Submissions- (STRA) through a state-wide planning framework, a mandatory Code of Conduct and

changes to strata legislation.

[https://www.planningportal.nsw.gov.au/exhibition/have-your-say-short-term-rental-accommodation-reforms?\\_hsenc=p2ANqtz-8fz1IxoKrQ3HxOZq8BcXmpDSEgkFLq9jifihqTYKPSEjsB-XN9krB-bC6IO9CSCB4B-5CK-AKnWd43IUWwgNC0cf6fns2rsKJ\\_7ASai-zzpj31FVY&\\_hsmi=75669311](https://www.planningportal.nsw.gov.au/exhibition/have-your-say-short-term-rental-accommodation-reforms?_hsenc=p2ANqtz-8fz1IxoKrQ3HxOZq8BcXmpDSEgkFLq9jifihqTYKPSEjsB-XN9krB-bC6IO9CSCB4B-5CK-AKnWd43IUWwgNC0cf6fns2rsKJ_7ASai-zzpj31FVY&_hsmi=75669311)

Dear Reader,

This submission concerns dwellings where short term renters pass from public property through common property (secured entrances, driveways, hallways, garages, swimming pool, barbecue areas etc.) before entering the rented property, most commonly high rise buildings. Issues concerning short term letting in such properties differ from those in privately owned single, stand-alone dwellings, and it is suggested that separate and clearly defined legislation be introduced to deal with short term rentals in each type of dwelling.

The statement that the initiative is 'business led' is totally repugnant. Any progress with STRA should be community led, involving residents who are directly concerned with its effects.

At the present time, short term letting is essentially a private accommodation system often involving tourists, controlled by local councils (in our case Sutherland Council) with opposition and disputes mediated by Fair Trading. Sutherland Council publicly stated in January 2018 that it knows of 300+ owners who are breaking the council's own laws about short term letting. Despite this Sutherland Council has not prosecuted a single known offender, including the offence occurring in our own Strata where due legal process was initiated by our Strata Management Company, Bright and Duggan under Section 121H of the EPA Act reference number CR17-216175 dated 10th April 2018. Council used its discretionary powers not to proceed with prosecution. Response to short term letting needs to be controlled by a body that will respond to the situation, not simply ignore it.

In Strata titled buildings there is already an established authority, the Body Corporate where the members are democratically elected and have the best interest of residents at heart. Unlike Government authorities and businesses, they understand the effects of short term rental on the lives of residents, and the very real concerns they have for their safety and security when strangers have access to common property.

Strata titled dwellings are in effect being forced into accepting short term rental, denying their basic democratic right to decide as a Strata whether or not the practise is agreeable to residents. What the Government fails to understand is that residents want the right to decide not how many days' short term letting will be allowed but whether it should be allowed at all. The current requirement of 75+% of paid up owners deciding at an annual general meeting to ban STRA renting in strata titled buildings should be retained in any future legislation and all previously registered STRA banning by-laws recognised and retained.

Give the Body Corporate the options to decide at a properly convened General Meeting:

1. Whether short term letting should be allowed on their property.
2. The right to impose, should short term letting be agreed to, a legislated monetary penalty to be charged to owners for infringement of short-term letting rules (noise, parking, damage to common property etc.). If the owners don't pay up then the body corporate should have the legal right to impose a lien or caveat placed on the property when sold.

There is no mention of monetary penalties to owners or renters or the likes of "AirBnB" in the draft... a critical omission! The reader (YOU) fully understand that progressive monetary penalties are the most efficient and effective deterrent of any sort of offences- YOU (personally) avoid parking/ standing in no parking zones or exceeding time limits... why because you don't like paying fines!! A recommended legislated scale of fines should be \$100 for the first offence, \$1,000 for the 2nd, \$10,000 for the 3rd, \$100,000 for the 4th etc. All penalties/monies should become the property of the Strata Title Body Corporation to fund building improvements such integrated CCTV recording technology that is of a sufficient quality to be acceptable as evidence in any dispute forum. Owners would quickly get the message to cease and desist and resume normal/acceptable renting practices. If delinquent

owners have a dispute, then it should be aired at a special annual general body corporate meeting where the community can make a decision.

3. Make these STRA pieces of legislation open to the NCAT for final adjudication and dispense with the need for Fair Trading to be involved as it is a local community/ body corporate issue and NOT a business trading concern. So, there is no need to establish a new bureaucracy/ and new dispute resolution procedure... Government would save millions\$\$\$ and any adversity would not reflect on State Members and/or local Councillors- and businesses (AirBnB) should stay in the "back seat".

4. Legislate to make local councils obey/prosecute their own zonal restrictions/ development application requirements under sect 121H of the EPA Act and prevent local government from using their discretionary powers for not requiring owners to submit a STRA development and thus preventing body corporates from appealing to Independent Hearing and Assessment Panels (Catch 22).

Regards  
Peter White

Re: Short-term Rental Accommodation (STRA) regulatory framework.

My submission concerns Strata Schemes being able to adopt by-laws totally prohibiting STRA and the adverse effects on existing residents with the proposed STRA regulatory framework.

I have lived at Grandview Apartments, (Strata Plan 61694) since January 2000. The original Grandview Owners Corporation unanimously approved by-laws prohibiting short term rentals with a requirement that any lease or

tenancy agreement must be for a minimum period of 90 days. I stress the by-laws were unanimously approved by the lot owners and any new lot owner has purchased their property based on these by-laws.

The majority of lot owners in Grandview are retired and have purchased their apartments due to the quiet and peaceful environment and based on the extensive bylaws protecting lot owners' rights. These by-laws cover issues such as parking, fire and emergency plans, smoke alarms, use of common areas, storage, building works, use of the pool and gym, smoking, use of lifts, security, noise, sorting rubbish, deliveries, mail, laundry items on balconies, permitted use, children in common areas, lease of lots in the strata scheme, to name a view. Grandview's by-laws alone, cover some 50 pages. Experiences of apartment buildings that currently have short term rentals are that the short-term tenants do not bother to read by-laws or comply with them. I am happy to provide evidence of this.

The majority of apartment buildings do not have 24 hour concierge services and owners or their agents operating Short Term Rentals leave keys and swipe cards in combination boxes strapped to railings outside buildings. These boxes are not totally secure and can be opened with the smash of a hammer which creates a major security risk to residents and common areas due to unlawful entry to the building. It also creates an ongoing security risk and costly requirement to replace all common property access swipe cards.

How can an owner's corporation ensure compliance and policing of strata plan by-laws, by short term rental tenants? Any by-law change requires a minimum 75% of lot owners votes and surely this should be a matter for individual Owners Corporations. Strata Schemes should be able to adopt a by-law that totally prohibits STRA whether or not, "a lot is not a host's principal place of residence".

If an Owners Corporation votes unanimously to approve STRA in their apartment building, that is their right and this obligation should not be autocratically imposed on all Owners Corporations in NSW. I suppose the next step of the NSW government, will be to legislate that all Owners Corporations use the same electricity, gas or insurance supplier.

Why are the NSW Department of Planning, Industry and Environment and Department of Customer Service dictating by-laws concerning STRA when there is already an extensive Strata Schemes Management Act 2015 covering the management and control of Strata Schemes? Surely this should be the right of individual Owners Corporations to decide if they want to prohibit STRA in their buildings? This is not an issue for State or Local governments.

Councils reiterated the importance of an enforceable planning framework aligned with the Code of Conduct. How will breaches of the code be policed? Councils currently cannot provide sufficient enforcement officers to police noise legislation. The office of Fair Trading does not currently have sufficient staff to police this.

Who is going to come out during the middle of the night to police noisy short-term tenants keeping residents awake? Who is going to police short-term tenants dumping rubbish in the car park? Who is going to police short-term tenants sorting their rubbish? Who is going to get the short-term tenants out of the pool outside of the pool & gym operating hours? Who is going to stop the short-term tenants smoking or taking drugs in the common areas? Who is going to ensure the short-term tenants comply with the Fire and Emergency evacuation plans? Who is going to stop the short-term tenants hanging their laundry on the balcony? The only answer to all these questions, is no one.

Lot Owners of Strata Plans should be able to enjoy the quiet and peaceful environment of their existing strata environments without being subjected to STRA.

Tomakin, 2537

**Submission**

We have a house in Tomakin that we make available for holiday rentals during certain times of the year.

The property is a 3 bedroom detached, single level 'family' home.

We have the '3rd' bedroom setup for children with 2 single bunk beds - the other 2 bedrooms both have a single queen size bed. I believe this may contravene the new rules on number of beds per room yet I don't believe that what we have is particularly cramped or unsafe. Could exemptions be made available?

The fire alarm rules also seem a bit excessive - perhaps alarms in each bedroom but a linked system with hallway lights seems a bit excessive in a single dwelling.

[feedback-to-gov-on-new-stra-regulations-aug-2019.docx](#)

**Submission**

Hi there,

I have read the documents and below is my feedback. But firstly, I would like to point out that having all these

separate documents, issued by different departments, make for exasperating reading. When a final document is issued, I heartily recommend that all the requirements of a host be consolidated into 1 single document, to avoid any miscommunications/misunderstandings/gaps. Surely this cannot be so difficult?

1. My main gripe is the safety requirements for bushfire zones, as some properties like mine (which is rural residential R3) are classified as bushfire zone, but in reality it is too wet in this region (Byron hinterland) for fires; there hasn't been any for as long as anyone can remember! Years, decades, I mean. This means that there are probably many such affected properties, which penalises us for no good reasons. The worst thing is that the documents ask for fire hydrant to be installed within 60m of each dwelling. Whoever wrote this up must live in the city and has absolutely no idea of what this entails! As far as I am aware, there are no fire hydrants out in the country for miles! How can there be a requirement that would cost millions of dollars to implement??!! And what does reticulated water supply mean?? I think having access road and evacuation plan is sufficient, but definitely not the need for fire hydrant and reticulated water supply (whatever that means). I also recommend making this exempt for hosts who live on the property themselves. Please amend NSW State Environment Planning Policy STRA 2019 accordingly.

2. I agree to providing neighbours with host contact details except there must be a provision made for obnoxious cranky unreasonable neighbours who abuse such access. Probably best to just require email address to be provided, not telephone contact as one can imagine incessant calls at unreasonable hours from such unreasonable neighbours. The state should also retain the right to block email access if a neighbour proves to be consistently unreasonable and abusive, leading to unnecessary stress. There has to be a limit to rights to avoid abuse from aggressive unreasonable neighbours.

3. If public liability insurance is to be made compulsory, the state has to work with insurance companies to provide for such cover at a reasonable cost and to communicate clearly to hosts where they can buy such insurance. I have failed to find such insurance. Please do not fob off with "check with your insurer" statement. It is the state responsibility to enable easy access to such insurance if it is made compulsory; put some pressure on insurers to come up with reasonable solutions.

4. I think the "2 strikes within 2 years to become excluded" is an interesting idea, BUT have some concerns.

(i) "2 strikes within 2 years to become excluded" seems too aggressive; maybe "5 strikes within 2 years" is better, since there may be neighbours who are incessant unreasonable aggressive complainers who actually succeed to push their way through to the Commissioner/Secretary

(ii) I think a "fines" system will actually work better to get hosts to better select and manage their guests rather than a "2 strikes within 2 years to get excluded". Hosts are primarily in the hosting business to make money. Hosts would not like fines and responsible hosts would be ok with "fines" systems as long as it is reasonable and not crazy prohibitively costly (as people do rely on STRA for household income). Why not come up with a system of warnings and fines, like traffic warnings and fines? For example, first 2 warnings incur no fines, but 3rd incident gets a fine of \$100, 4 incident gets a fine of \$150, 5th incident gets a fine of \$200, 6th incident gets \$250, 7th incident and onwards gets \$300 fine. The onus will be on the complainant to get the evidence for the fine to be issued. This will help to deter frivolous and unreasonable complaints as well.

(iii) An exclusion system is costly to administer. I cannot imagine industry players will take this duty on, and making it a government duty is taking away precious tax revenue. The "fines" system, on the other hand, generates revenue for the state, like traffic fines, and can help to pay for the administration of registration of STRA properties.

5) the papers mention that cost recovery of administration will be charged to hosts. This is simply too vague. You cannot issue policy that is vague and subject to individuals' interpretation. Please make it clear and simple to understand and communicate. If you cannot do so, then please remove such wording from the policy.

6) \$550 penalty notice offence amount is excessively high and some of the "offences" are beyond what a host can be reasonably expected to do. For example, how can a host stop a recalcitrant guest from making a copy of a key? How can a host make a guest inform him/her of a dispute/complaint from a neighbour? Again, this rule is too "grey". I recommend to remove it and instead adopt the idea of "fines" proposed in (4) above.

7) Some people have bought investment properties at the height of the real estate boom and relying on STRA income to make mortgage payments. I am not one of them, but to be fair, I think that the government should give 2-

3 years' lead-time to implement new STRA rules as people who are affected by it can then have sufficient time to divest their properties if they decide that the new rules make their past decision to buy a house a bad one. The real estate market is bad enough without a sudden dumping of investment properties brought about by short notice of new STRA rules. Would be more prudent to give more leadtime, don't you think?

8) How can hosts check if guests are "excluded"?? Surely this has to be the responsibility of the booking platforms rather than individual hosts. So much easier for them to add filters to their systems to check against a list than for hundreds of thousands of people to check against the list. So please amend the language in various papers to make it clear that this is the duty of the booking platforms.

9) Just simply remove 5.5.4 and 5.5.6 of the Draft Code Provision Part 5. "A guest must not copy or knowingly retain any key....." and "A guest must notify the host/host representative of any dispute or complaint....". As stated above, it is simply not reasonable to expect hosts to control such behaviours if guests are bad and do such things, even if clearly instructed otherwise in instruction manuals.

10) Any complaint brought against a host/property must have the complainant's name and address clearly stated on it, for transparency and to avoid frivolous anonymous complaints. Please amend the language in Draft Code of Conduct for STRA accordingly.

I would be happy for you to contact me to discuss if you deem it useful.

Best regards,  
Jenny

**Submission**

My name is James Abad. I request the following amendment to the Fair Trading Amendment (Short-term Rental Accommodation) Bill 2018 Schedule 2 Amendment of Strata Schemes Management Act 2015 No 50 Section 137A

137A Short-term rental accommodation

(1) A by-law made by a special resolution of an owners corporation may prohibit a lot being used for the purposes of

a short-term rental accommodation arrangement if the lot is not the principal OR A SECONDARY place of residence of the person who, pursuant to the arrangement, is giving another person the right to occupy the lot.

(2) A by-law has no force or effect to the extent to which it purports to prevent a lot being used for the purposes of a short-term rental accommodation arrangement if the lot is the principal or OR A SECONDARY of residence of the person who, pursuant to the arrangement, is giving another person the right to occupy the lot.

(3) In this section, short-term rental accommodation arrangement has the same meaning as in section 54A of the Fair-Trading Act 1987.

Please refer to the attached submission for reasons and definition of a Secondary Place of Residence.  
Thank you

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

My wife and I have operated an Airbnb property for many years and we have never had any complaints from neighbours. Our experience, both as providers and users of STHL, has been very positive. STHL is our preferred accommodation option when we travel. It would be a shame if government regulation results in onerous costs and unreasonable limitations being imposed on operators and users.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you for reading my submission.  
Hugo Croci

CASUARINA

**Submission**

Hi, I was under the impression that the purpose of any regulation on STHL was to do with "Resident Amenity"? Noise, parking, security, bond etc. It was NOT to do with draconian compliance that in many cases is impossible to retro fit. And if possible is cost prohibitive. STHL in the Tweed is estimated to account for some \$500M. it supports cleaners, laundries, cafes, handymen, trades etc. It brings wealth to the region that would otherwise not be there. Your draft document will drastically effect all country and beachfront homes through the over zealous flood and bush fire regulations require. None of these regulations apply to a standard lease and have no place in STHL.

The draft document on Fire and Flood compliance is totally unrealistic when it comes to existing dwellings. its just not possible in many cases and cost prohibitive in others. Owners that wish to rent their premises for a short period of time (say a few weeks over Xmas etc) should NOT have to be prohibited from doing this because of over zealous government compliance. I suggest;

- 1) All residents must comply with the original conditions of their building approval as it stood at the time. This is the same if we rented our homes under a standard residential lease.
- 2) Compliance should be changed to 2 categories; NEW BUILD and EXISTING DWELLINGS.
- 3) The real issue is community behaviour and security.
- 4) Councils will NOT want to enforce or police this compliance. Its virtually impossible and would take enormous manpower that will become an additional cost to all residents.

In summary, the compliance should be either removed or only apply to new builds. The emphasis of the legislation should not take money out of these tourist regions but encourage more by ensuring community acceptance through behavioral change.

**Submission**

I am concerned that the fire safety requirements of these proposed new laws will mean that it is impossible for me to rent out my house if I go away on holidays for a couple of weeks. My house met all fire safety requirements for a private dwelling when renovated several years ago but does not have mains connected smoke alarms in every bedroom, only the corridors. There would be a significant amount of work and cost to install these and it appears to be too onerous of a demand to place on owners of properties that are rented out for only a few weeks each year.

Please reconsider whether this is a necessary additional regulation.

Yours Sincerely

Heather Clement

I am against short-term-rental accommodation (STRA) because of the following reasons:

1. Increase strata levy due to higher maintenance & damages to common facilities
2. Loss of privacy
3. Increase security concerns
4. Increase insurance cost for landlord
5. Short-term occupants could misbehave and cause noise and other disturbances

6. Rental increase for local due to reduce in long-term accommodation
7. Negative impact on property value
8. There are many hotels and service apartments in Sydney for tourists
9. Investors lost confidence in Hospitality Industry & reduce employment opportunity & tax lost for government
10. There are many AirBnB "storage lockbox" hanging in Sydney CBD and it does not look good for the city image

NSW PLANNING INFLECTING MORE HELL ON R2 ZONE RESIDENTS THROUGH THIS ILL CONSIDERED DRAFT STHL POLICY

The Draft NSW Government policy on short term holiday letting in R2 Zones (low density single dwellings) being proposed by NSW Planning is appalling. It is extremely biased towards those letting platforms and those who wish to use them regardless of the feelings of other residents. 15 of the 16 groups that made up the STRA Advisory Committee were pro relaxing the present law which the courts have concluded does not permit short term holiday

letting in R2 Zoned areas. It is the most disgraceful composed committee I have ever witnessed in my 35 years as a senior government policy adviser. It totally ignores the primary stakeholders who are most affected.....the owners of homes in low density single dwelling zoned areas of the state (especially coastal areas) who were not given an equal voice in this matter. These owners purchased their homes believing that they were protected by law from short term letting neighbours and absentee investors in this market. But now this proposal wants to inflict on them 365 days... or a minimum of 180 days of hell on law abiding home owners from those neighbours who believe that making money, no matter how it might affect others, is what life in Australia is all about. Simply making money is not and should not be the object of human life on this planet. Get real NSW Planning and go back to Australia's policy of a fair go for all.

Short term holiday accommodation leads to many harmful and adverse effects for the permanent resident population. The obvious ones are removal of large numbers of already scarce permanent rental accommodation, lack of permanent neighbours, threats to the sense of community, concern for security, excessive noise, insufficient and overloading of infrastructure and services, rubbish, unmanageable parking, unkempt residential lots, nature strips and footpaths, threats to adequate management of fire zones and recreation areas, threats to water and energy supply, pollution, pedestrian and road safety, natural environment quality and threats to local flora and fauna, and the general ability of permanent residents to enjoy an expected level of quality of life and unfettered enjoyment of their homes and of their surroundings. Anecdotally, Angourie especially, and Yamba, are, to varying degrees, already being significantly impacted adversely by uncontrolled short term accommodation which is taking effect throughout the R2 residential zones. Illegal short term accommodation is now being made available well away from beaches and rivers and increasingly among canal subdivisions and average suburban streets. The NSW Government has a very poor record of following up on their property tax and planning regulations as we see happening in Angourie. So why should we believe things would be any different with this STHL foolish policy. Apart from the real threats to our lifestyle and enjoyment of our properties, allowing STHL in our R2 Zone is already having a detrimental effect on our ability to secure reasonable premiums on our household insurance given the significant increase to the risks being incurred by short term holiday letting in our residential areas.

To allow short term holiday letting in R2 Zones in our area creates another loss to the economic well being of these villages and towns as revenue is siphoned off out of the district. It is becoming another case of negative social engineering by NSW Planning whether intentional or not. My request to NSW Government politicians is to let the planning staff do their job on an objective basis and stop interfering by the apparent politicising of their work. This draft policy smacks to me of politicians kowtowing to the tune of their lobbyists and sponsors.

**Suburb/Town & Postcode**

Byron Bay 2481

**Submission**

I strongly appose the reduction to 180 days of STRA in the Byron Bay area due to the adverse impact it would have on the local working community.

A very high percentage of the local community in Byron Bay rely on income generated by STRA . Not only Shops and Restaurants, but small business and individuals that supply services that cater for visitors to the area year round.

Reducing the number of nights would mean " Hosts" would condense their allotted number of nights in peak Summer months for a higher yield thus creating a low Winter season with much lower income for the locals. Many of these Businesses may not survive these periods of low income. Businesses in the area would struggle with the proposed new legislation.

INSTEAD of reducing the number of nights suggestions include;

- i. A compulsory & regulated register of STRA premises like the Holiday Letting Organization (HLO) in Byron Bay.
- ii. Strict anti social behavior & noise requirements with deregulation or "Time out" repercussions for repeat offenders.
- iii. Council Fire Safety requirements with an annual inspection certificate to stay on the STRA register.

The local councils need a percentage of income generated by STRA to maintain Roads and amenities.

Suggestions include;

- iv. STRA registration fee.
- v. A Bed Tax. This system is very successful in other parts of the world with similar issues. The Tax is collected and distributed by the Booking platforms and out of the hands of hosts. Most Booking platform already use this method.

Implementing the above suggestions have already worked in other parts of the world without reducing the incomes of local residents and their businesses.

Airbnb guests and hosts supported approximately AUD \$214 million in economic activity in one year in Sydney – throughout the region’s diverse suburbs. This economic impact is estimated to support 1,600 jobs throughout Sydney. In addition to staying longer and spending more than traditional tourists, 31 percent of Airbnb guests said they would not have been able to make the trip had it not been for Airbnb as an accommodation option. Admittedly this statistics is from AirBnb website. The businesses around so many tourist spots in this vast nation have prospered due to airbnb. With almost most countries in the world now providing some sort of airbnb equivalent facility for cheaper stays, Short stay Airbnb kind of accomodation is critical for australia to retain its spot as a popular

destination.

As a owner of a unit in a popular place the extra income from letting my unit to short stay is allowing me to have a better life style. However, I appreciate the work done by the government to bring about some structure and regulations in place so that the residents and the short term stay guests can coexist.

Age old strata by laws and age old zoning laws are putting a block to tthe progress of the nation through digital innovation and are acting selfishly with no consideration for the economy and the reputation of the country in the global economy.

Dear Experts. Renting will be the future for the majority. It is a solution not a problem. I suggest social housing for all. Like in Berlin where over 80% rent. This gives more discretionary spending money to make for a more vibrant city. It eliminates the need for ridiculous mortgages. Or Singapore. It makes for better urban planning. It eliminates the need for car ownership. It will recreate neighbourhood market squares. Like in Kathmandu Nepal. These are all cities made for people not car driving suburbanites. That model is a total social failure. Ecologically aside. On ABC RN Health Report it was stated suburbanites are heavier on average by 6 kgs. So let us all live in decent socially designed cities. Saves billions wasted on city tunnels for cars which solves nothing.

The need for this regulation is regrettable as it again is required to regulate those in the "lower common denominator" group i.e the offenders. Most participants act reasonably and with integrity. The concept of STRA has been a divisive debate in the community lead by many who have vested interests and wish to act against property law rights viz. freehold torrens title rights. The proposed regulations are comprehensive and will affect all industry participants. A 12 month review period is necessary.

The legal affect of by-laws restricting Short term letting on strata title needs further clarification as some participants rely on the by-law provisions to prohibit short term letting with ,they claim, immunity from presecution.

The register is a necessary instrument as it has the effect of naming and shaming offenders which historically have remained unknown including strata owners. Privacy provisions are important but should be balanced against the need for prospective purchasers/tenants to enter property in the knowledge they will enjoy a good standard of quiet enjoyment.

Cost sharing is always contentious. The distinction between STRA participants and non-participants is important. The user pay principle seems appropriate it represents a form of insurance .

**Submission**

I have been self employed as a host in the STRA industry for over 6 years, also hiring 3 part-time cleaners to assist me.

I am very concerned about these new changes to STRA legislation, specifically the "180 day limit" which would essentially make me and the cleaners instantly unemployed.

Also, the "proposed registration system" would be an ongoing cost burden for a slim profit margin and not necessary for a self regulating industry.

I love the work that I do, pay my fair share of tax and now fear that I will not be able to sustain a living doing this under those changes.

Under the current proposal, many full time hosts in my situation will become unemployed because of the 180 day limit and cost burden of the registration system. This will essentially increase the social welfare burden as many hosts in my situation have a skill set will be difficult to find similar work being out of the mainstream accommodation industry for many years now.

A 180 day limit is reasonable for smaller towns which would have a greater impact by full time hosting, but large cities are better equipped to accommodate year round hosting and should not have a daily limit. This would greatly minimise unemployment for responsible hosts that have already established a living within the STRA industry. I do agree with the 75% vote for strata and owners corporations to ban hosting in a property as a means of reasonable self regulation within current framework.

Registration is not necessary, cost prohibitive and a burden for the industry. The system already works fine and has been operating for years with minimal circumstances requiring intervention.

For apartments, current framework such as building strata or owners corporations can easily oversee these issues, not a government organised registration system. Perhaps legislation should provide increased powers for strata and owners corporations rather than a cost prohibitive government body.

For stand alone dwellings, regulation enforcement should be done on an "as needed" basis through the proposed exclusion register rather than having the high cost for operating an industry wide register.

The proposed exclusion register is a fantastic idea which can be maintained for problematic hosts, problematic guests, and problematic properties and eliminate the need for a registration system over the entire STRA industry. This would drastically reduce the cost burden and cost recovery effort.

Safety proposals mentioned in the new regulatory framework are also a good idea for the safety of guests that are not aware of the property. Compliance can easily be made compulsory to prove through the booking platform. Airbnb, homestays, etc can enforce pictures to be uploaded twice per year of the evacuation plan on the back of the door, fire blanket and extinguisher in kitchen. This safety compliance could be absorbed by those large booking platforms and could already be included within the fees paid per reservation so no increased cost burden to hosts and removes the necessity of a large and expensive governing body to be created.

In conclusion, I strongly disagree with the proposed 180 day limit for Greater Sydney, and I strongly disagree with the cost burden essentially required with an industry wide registration system.

I urge the 180 day limit to be removed for Greater Sydney to reduce the impact of unemployment for responsible hosts. I also urge the compulsory registration system to be removed from the proposal, instead being replaced by industry self regulation via increased strata powers, booking platforms increased role for safety compliance and a much more affordable exclusion register rather than expensive industry wide registration.

I completely agree with the safety aspects of the proposed framework which can be made the responsibility of the booking platform to ensure compliance as mentioned.

This would strike the correct balance to achieve the desired results of securing compliance of improving the safety standards for guests, control problematic hosts or properties through an exclusion register and reduce negative effects of unemployment and social welfare burden of excessive regulation on an industry already operating with minimal problems for a vast majority of the industry.

Thank you for your time

**Submission**

The proposed SEPP satisfactorily meets the request by Muswellbrook Shire Council to allow STRA to be managed differently according to the location of the premises in the Shire.

Public transport is often not a viable option for travel in rural and regional areas. An STRA with up to 6 bedrooms could generate considerable demand for parking, and potential impacts on neighbouring properties due to on-street parking. We request that consideration be given to adding additional criteria for exempt and complying STRA outside the Greater Sydney Region, to require a minimum of 1 parking spaces per bedroom, which may include

stacked parking in driveways in front of carports or garages.

The concept of an exclusion register is supported, but may not be effective if the exclusion is only incurred by the person who made the STRA booking. It should relate to all guests on the premises at the time the strike was recorded, otherwise a group of friends can overcome the exclusion by taking turns in booking a premises in their different names.

I am a strata manger who's company manages 74 buildings currently. During discussions with the owners corporations, it has become very clear that 73 of the 74 that we manage are strongly opposed to short term letting of whole apartments ( as opposed to short term letting of a room in an apartment with the owner or tenant in situ) for the following reasons;

1. Security of the building
2. No mechanism to control the behaviour of the short term tenants through the by-laws - they can not be brought before NCAT they will be gone.

3. No means for an owners corporation to check that the code of conduct is being applied - how do they know who is occupying a unit from night to night when they have no right to access a unit and may have no part in the dealings of a lot - no means of verifying the short term letting record of the home seems to exist in these documents for owners corporations.

4. There has been discussion that owners corporations may make a by-law to restrict short term letting, this did not appear to be clear in these documents and there appears to be no information of how restrictive a by-law can be and whether it can completely ban short term letting, the code of conduct should clearly contain this information and I would suggest that perhaps model by-laws for strata (of which there are now more than 90,000 in NSW) be contained in the code of conduct that can be used by strata buildings much as those contained in the Schedule of the Strata Schemes Management Act 2015 be added for simplification.

The feeling against short term letting is in many cases so strong on strata properties and other shared communities that unless there is a mechanism for these communities to simply and clearly control the level of short term rentals as they determine, I fear that people will take their objections into their own hands and that eventually it will result in violence.

**Submission**

The STRA discussion paper release in August 2019 has not reasonably upheld the rights of Strata Owners Corporations in general as a decision to have a residential property free of tourist and short term rental stays which change the use of common property, compromise security and the general enjoyment of ones home.

My submission is that Strata Bylaws should override any and all wishes of any individual owners to short term let their lot for the security and fairness that all owners by majority have voted to keep the Strata Property as a residential only property.

There are no workable enforceable method of tracking common property damage by STRA visitors, identifying STRA visitors and their guests who break the existing bylaws and compromise the enjoyment of other owners and residents lots. This is due to the common sense approach that people behave and generally respect their homes more than a place to stay a few nights. We have much experience with parties, noise and unreasonable behavior if guests, so to multiply the effect and then leave less options to enforce the few rights Strata Owners already have should not be allowed.

All exceptions stated with "where a lot is not a host's principal place of residence" cannot be enforced or even monitored as this will become the default administrative method used by lot owners to contravene the Strata bylaws and rent their properties out to STRA visitors to the detriment of existing residents and owners.

Tourist accommodation is now well evidenced to change the character and quality of residential buildings, increase rents, lower standards of residential living and worse cause the inability of Central Worker rental accommodation availability for essential workers.

Lets not devolve the residential standards of our society based on the greedy desire of digital platform entrepreneurs wanting to make money from our invested residential properties in Strata. Individually owned single dwelling properties are a very different case, but where common property and closer community living conditions are already in place, then allowing this is against all the rights of existing Strata owners and their rights to choose the standard and type of living they have worked hard to buy or rent.

Yours respectfully,

Jorge Fernandez

short term leasing should be scrapped as no one can properly regulate it nor control it especially in strata

senario

Renter rents an apartment then decides to make money so they decide to get other accomodation and short term their rental at a higher price

the short termer sets up a brothel /or a drug lab or worst case senario burn the unit down

problem who is responsible and whos going to pay

the renter says they must have broken in while the renter was "away "

the short termmer is gone

the short termmer ...gone

the renter not responsible ..break in

the owner claims no blame

how can any one control or monitor this...they dont

THIS IS ONE SENARIO OF MANY THATS TURNS OUT TO BE A LOSS LOSS SITUATION FOR THE REST OF THE RESIDENTS  
IN THE STRATA

ESPECIALLY THE OWNERS WHO WILL, HAVE TO FOOT THE BILL FOR A RENTERS GREED AND DESTRUCTION

THE COUNCIL TAKE 6 DEGREES OF SEPERATION

I think Air BNB and these other short term rental platforms are a bad idea for almost everyone not directly involved in the transaction - ie everyone excluding the parent company - which will pay no tax in Australia, the owner - who will make 2-3 times a much money as from a regular rental and the people paying for the rental. It is particularly corrosive in apartments and other situations where "wear and tear and security concerns" are very real and cannot be adequately addressed or compensated under the existing framework.

I would agree for Air BNB and the other horrid "don't pay tax in Australia companies like Uber" if they did pay tax at Australian company rates and their activities were restricted only to private residences, that punitive noise pollution

finer, parking fines etc were put into place to protect neighbours, and that they could only be used in apartment blocks etc if 80% of the owners agreed - AND a mechanism is in place to compensate for wear and tear and address security concerns.

yours

j shannon

Haymarket 2000

**Submission**

Dear NSW planning department:

We are Grace and Andrew Curtis, tenants of Darling Rise, 82 Hay St Haymarket. We have been living in Sydney for over 20 years and have recently moved to the new Darling Square complex by Lendlease. Based on the Strata plan of this building, short term letting is not allowed, please see attached.

While we do appreciate the service short term rental companies such as Airbnb bring to the tourists, and the

financial benefits it brings to owners, we believe at certain type of property, it is causing hazard and potentially life threatening. Please allow us to explain.

Based on the conversation with our building manager, more than 50% of the Darling Rise apartments are short term rental. Since we moved in on 10th June, we have had:

- 4 false fire alarms going off caused by people having parties and smoking indoors
- Rubbish shoot blocked twice due to over population which leads to excessive rubbish, please see picture below
- Twice the sewage systems are blocked due to people flushing sanitary items down the sewer
- People pressed emergency exit door button open so their group can come in and out freely
- Items being stolen from garage lockers
- People sleeping in common reception area while waiting to get checked into their apartment
- People drinking alcohol and throw up in the reception area in the middle of the night
- 2 bedroom apartment could easily be booked for family of 8, and if all short term rental apartments do the same, it is a breach of fire regulation. And there is no way of monitoring how many people are staying in each short term rental property.

There are many incidents such as above. We have documented most of them and willing to share the information and evidence.

The false fire alarms are the most serious matter. We have noticed that when the fire alarm went off the first time, most people evacuated. The second time not so much, by the time it was the 3rd and 4th time, almost no body evacuated as they all think it is a false alarm again. What if there is a REAL FIRE??? People will still think it is a false alarm and put their lives at danger!!! Which means negligent short term rental tenants have potentially caused the death of other tenants! And no matter how Airbnb tells people "party is not allowed" on their website, people on holidays are here to party!

We are not here to suggest banning short term rental once and for all. It is a great service if monitored properly. If house owners want to rent out their spare room or granny flat, go for it. However when it comes to a high density apartment blocks, where we are risking over population according to fire regulation, constantly set off fire alarms so tenants are numb to the siren, then we have a serious problem.

What we suggest:

- High density units implement 3 months rental minimum
- Advise owner and strata managers that any short term rental under 3 months is a breach and fines will apply
- Contact short term rental platforms such as Airbnb that certain properties are not to be listed for short term rental on their website. If such platform does not comply, they are not allowed to list any Sydney CBD properties on their website

We operate a local business in Haymarket and love living in Sydney CBD. We hope to achieve a balanced life style for residents and visitors. Together we need to look after our communities so it will attract the right kind of tourists in the future.

If you would like to contact us to discuss this matter we are more than happy to do so. Please email us on [grace@thebearbar.com.au](mailto:grace@thebearbar.com.au)

Kind Regards

Grace and Andy Curtis

20 August 2019

## A SUBMISSION IN RESPONSE TO THE DISCUSSION PAPER ON SHORT TERM RENTAL ACCOMMODATION

This Submission is made on behalf of the Owners of SP 15930, at 1 Waruda Street Kirribilli NSW.

We thank you for this opportunity to respond to the NSW Government's latest iteration of its thinking in regard to promoting STRA across the state.

We wish to make the strongest possible representation in requesting that, in and through all of its deliberations in regard to STRA in the coming months, the NSW Government not deny Strata Committees of Owners' Corporations the right to determine whether or not they wish to permit short-term letting of accommodation in their buildings.

In support of our request, we submit the following:

### Background

Strata 15930, at No 1 Waruda Street Kirribilli, is a residential apartment building of 36 households located on the harbour's northern foreshore, with uninterrupted iconic views of the city skyline, the Opera House and the Harbour Bridge.

We know that our building is a location likely to be highly sought-after by exactly the kinds of STRA occupants whose demonstrated scant regard for the amenity and comfort of long-term residents, and whose sheer lack of respect for the fabric of a property, its facilities and common spaces, is becoming more and more widely documented as it is more and more widely experienced, especially in buildings in prime locations like ours.

At the outset, our Strata Committee was ambivalent about the parliamentary committee's Report on the Adequacy of Regulation of Short Term Holiday Lets in NSW (STHL), and the Government's initial proposed relaxation of the then-existing three-month letting restriction, so long as it did not impact on the capacity of our Strata's Owners making their own decision in response to it. The negative reaction to this aspect of the Report from other Strata Plans with which we are in contact in our area only strengthened our resolve in supporting this point of view.

That Report accepted that Strata Schemes were a special case, but if we are not to be able to retain the right to determine for ourselves whether we are willing to support changes to the minimum three-month short-term let for apartments in our building, then our being a special case means nothing.

It is our considered and firmly held view that as owners of apartments in a strata scheme, we must retain the authority to continue to determine who takes up temporary residence in our building for however short a term, and under what conditions they do so.

The current Discussion Paper is silent on the specific needs and characteristics of Strata Schemes as regards STRA, and we are concerned that the Government remain acutely conscious and fully aware of the different and specific needs of Strata Scheme residents as it plans for the future.

We are somewhat alarmed that the so-called STRA industry appears to have had a very significant influence on the Government's thinking to date – the list of members of the STRA Advisory Committee in the Appendix to the Discussion Paper appears to contain at least nine industry spokespersons, as against just two who might reasonably be expected to advocate for Strata Scheme owners. For that reason alone, we welcome this opportunity to ensure that the voices of some thirty-six owners may be heard, to balance the undoubtedly strong thrust from the industry for greater deregulation of STRA in the future.

We do note with approval, however, the proposal that Owners in a Strata Scheme can adopt a Bylaw with the support of 75% of the owners prohibiting STRA where the apartment is a Host's Principal Place of Residence.

### DEFINING STRA

We are troubled, however, by the Discussion Paper's definition (p5) of STRA in terms of exempt developments. Defining regulated environments by reference to what is exempt to us seems unhelpful and is difficult to understand. We contend that greater clarity and less ambiguity would be provided by definitions of STRA in terms of what was permitted, rather than what was exempted.

We also have difficulty understanding why the presence of a Host should provide the basis of determining the duration of an STRA let. This proposed provision appears to permit a Host in an apartment to let his second bedroom to a paying guest without reference to the Strata Committee or to any extant appropriately approved Bylaw, with a consequent risk that that paying guest may adversely affect the amenity of other residents without demur.

#### STRA IN STRATA BUILDINGS IS DIFFERENT

Indeed, within these definitions of STRA, we would strongly urge that the Government clearly demonstrate its recognition that STRA in Strata Schemes is different from STRA in stand-alone houses, not least because the potential adverse impact of STRA temporary residents on other residents in a Strata Scheme is inescapably and inevitably far greater than in a stand-alone house, because of sheer proximity. A rowdy or poorly behaved STRA individual or group of individuals obviously affects the amenity of neighbouring residences far more in an apartment building than in a neighbouring house.

In response to the Table (p7) listing the changes to previous proposals, we strongly believe unhosted STRA in an apartment building should remain subject to the Strata Committee's Bylaws regardless of the length of the stay. There is no evidence that longer stays impact less on the amenity of other residents. Strata Schemes need to be treated differently from stand-alone houses, and Strata Committees need to have the right to determine who takes up STRA in their building for whatever period, and under what conditions they come.

On the same Table, giving an LGA the freedom to vary the length of a STRA stay does little to enhance the Government's stated goal of standardising the industry. In any event, stays of 365 days or even 180 days are hardly short-term – indeed, many properly drawn-up and regulated residential leases are of exactly those lengths. We reiterate that the definition of a STRA stay should be defined by what it is, not by what it is not. The strength of the STHL Report in 2016 was that it defined the maximum short-term let as three months. Letting local Councils decide this seems to us to be fraught.

#### SAFETY STANDARDS

We welcome the Discussion Paper's proposed tightening of Safety Standards (p8). Virtually all of the apartments in our 110-year-old building would be unable to be registered for STRA because they do not have smoke alarms fitted in their bedrooms, nor sensor lighting in their hallways.

#### CODE OF CONDUCT - OBLIGATIONS OF HOSTS

Considering the Obligations of Hosts in the proposed Code of Conduct (p10), we would urge the inclusion of a further obligation – that they recognise and accept their obligation to report the income they earn from their STRA activity to the ATO.

#### COMPLAINTS

The issue with Complaints (p11) in our experience is that by the time Complaints are made, the STRA guest has long since left the building before the issues can be dealt with by any authority, and recourse is thus impossible. In a stand-alone house, the Host would be immediately aware of damage or loss, wilful or otherwise. In an apartment building, damage to common property may not necessarily come to light immediately, and when it does, nothing can be done to seek recompense.

Strata Schemes are required to have a 10-year plan with allocations of funds to ensure that Capital Works can proceed as required. Common property in a Strata building requires constant maintenance, often at considerable cost, especially in older buildings.

No Strata Committee has the resources to monitor the activities of errant STRA 'visitors' to ensure that they do not cause property damage. They simply have to deal with the aftermath, as has been the case in several recently-publicised incidents occurring in Strata buildings. Residents in Strata buildings do not want common areas to be trashed by short-term renters who could not care less about damage they may cause, and nor do they want

amenities provided at owners' expense to make those common areas pleasant and comfortable to access and utilise, trashed or damaged beyond repair.

A further resultant cost to Strata Committees is the provision of adequate insurance to cover possible damage to common property or to the building fabric or its amenities, caused by STRA tenants. Insurance costs are rising anyway, and insurance companies will not be sympathetic to Strata Committees in buildings which may be caused to make numerous claims, because they are in places such as ours that are likely to be highly popular with STRA tenants.

How does the Government regard the status of STRA visitors anyway? They are clearly not residents; they are not owners; they will not be present long enough to be occupiers. What rights do they have? This lack of clarity must have implications for insurance and all remedies sought under the law as well.

No matter what the Government might think about Strata Committees having recourse to their insurers when incidents occur, experience shows that it is difficult to have confidence that insurers would necessarily honour these kinds of claims, despite their increasing premiums.

In any event, the entity of first resort in any damage or an insurance issue will be the Strata's Owners. The Strata Committee will then have to pursue someone – most likely an untraceable someone who cannot easily be identified and who will be able to test the burden of proof. Strata Committees have neither the time nor the inclination to chase up long-gone guests who may or may not have been responsible for damage. To expect us to do so is unreasonable, causing unlooked-for stress and detriment to the peaceful enjoyment of our homes.

Providing unrestricted access to a Strata building for STRA tenants also introduces the risk of reducing property values, as increased wear-and-tear and the known presence of STRA guests, renowned for disturbing the peace and impacting adversely on the amenity, makes purchasing in the building less desirable. People buying into an apartment building do not want to share it with short-term tenants. Tenants sub-letting their apartments or a room in their apartment – and it is mostly tenants who do - have no vested interest in the long-term presentation and preservation of the building – it is the long-term owners who bear the brunt and carry the risk of their home losing value through no fault of their own.

In short, we do not regard the provisions under the Complaints heading as being adequate, because they do not recognise that a misbehaving STRA tenant who causes damage to common property in a Strata Scheme is extremely difficult to detect and prosecute. Strata Schemes are different and need different provisions from STRA in stand-alone houses.

#### COMPLIANCE

For these and many other reasons, we strongly support the Compliance provisions set out in the Discussion Paper (p11), especially the opportunity to have industry participants excluded who flout the Code of Conduct.

We do wonder why the Commissioner would be bothered issuing a warning to anyone, however. A condition of appearing on the Register of Participants should be that they indicate they understand that if a complaint is received against them that is not regarded by the Commissioner as being minor, the penalty is that they are excluded from the Register automatically.

#### PENALTIES FOR BREACHES

In truth, the penalty for non-compliance is very host-centric. There is nothing in it for neighbours! While a neighbour might make a complaint, as we have said, neighbours in Strata Schemes have very limited capacity to obtain any recourse even if they do make a complaint. For this reason, in our opinion, allowing two strikes in any two-year period is ridiculously soft!

In areas where the turn-over of guests and visitors is high, such as coastal holiday centres, in harbourside settings, in highly popular tourist areas, neighbours get sick of STRA visitors very quickly as their inconsiderate noise, their scant

regard for others' property and their boisterous, boorish behaviour erode the amenity and their enjoyment of their homes.

#### IMPACTS OF BREACHES ON SECURITY AND AMENITY

Issues with STRA tenants most typically occur outside normal working hours. The Discussion Paper is silent on whom it considers should deal with these issues in a Strata Scheme. In our building's experience, most STRA stays occur when tenants sub-let to 'visitors', often to the surprise and dismay of their landlord-owners, somewhat exacerbating the difficulties of controlling such activities and of appropriately responding to incidents when they occur.

Who is the first responder in an apartment building when an incident – usually a real and present incident - occurs? It is utterly unreasonable to expect that it would be the Strata Committee who would deal with these issues. As a member of our Committee, I would not, basically out of fear for my own safety. The Police do not, or not instantly. It is our experience that Police resources in our area are severely stretched, and priority is given to other incidents ahead of attending to noise and party-related issues at short notice.

Yet security and personal safety are core reasons that many people – especially more elderly people and retirees - elect to live in Strata buildings. Ours is a security building, but it is manifestly not like a hotel. We do not have CCTV covering every space in the building, for instance. We do not have 24/7 security guards. We simply do not have the resources or the ability to maintain the sort of standards of security we would all expect of a hotel.

Moreover, our residential authority, the Strata Committee, is a group of unpaid volunteers. We do not have the authority to, and simply are not capable of, enforcing By-laws in the middle of the night. To do so may expose individual members of the Strata Committee to personal attack or extreme disapprobation.

Then too, an electronic lock on the external doors of the building and CCTV at the entrance do not, in and of themselves, make the building secure anyway. Some residents in our building are elderly, having lived here for many years. Others are retirees seeking the serenity and tranquillity of apartment living by the harbour. Most are young professional couples intent on making their way in the world, most of whom are away from home from time to time travelling on business. All desire to live in a secure building where they know and trust their neighbours. This is the core of security in a building such as ours.

STRA tenancies are incompatible with these lifestyles and abrogate the desire to live in a building where feeling secure means everyone knows everyone else who lives there. Often STRA tenants arrive unannounced and unannounced. Being told the name of a new 'two-day' tenant, five minutes before they arrive, does not allow for any semblance of security. Nor does the stream of their 'friends' who arrive to take advantage of their occupancy of a prime-site apartment. Having one's peace of mind disturbed by strangers who are able to bypass the rigid security arrangements residents desire is just not appropriate nor acceptable and removes our protection under the law of trespass.

Defending the amenity of our homes is a further major concern stemming from STRA proposals for residents in Strata Schemes.

In 2016, the parliamentary committee looking into STHLs sought input from Strata Committees. Many Strata Schemes advised that they had significant concerns regarding the potential impact of STHLs on their communities. The parliamentary committee said that there were 'real and serious' issues that had been brought to their attention, but on balance said they were not willing to do anything about those concerns. They suggested that concerned Strata Managers could take their concerns to NCAT.

But Strata Schemes can only bring an action at NCAT on a legal issue. Under the parliamentary committee's original proposal, and in the proposal set out in the current Discussion Paper, there would have been and will be no legal issue to take to NCAT, because the statutory requirements regarding three-month STHLs will no longer be in place.

The real result will be to require Strata Committee members to mediate between residents and non-resident owners, with the potential to create very difficult and often fraught social dynamics within a building. In a large Strata, this is bad enough; in a small community such as ours, maintaining good neighbourly relations is paramount if the community is to remain pleasant and comfortable to live in.

So, in order to strengthen our position in maintaining the amenity and security of our building in the event of our having complaints against a STRA host or STRA tenant residing in it, we would favour a 'two-strikes in not more than six months' policy for complaints received about a particular host.

#### EXCLUSION

For similar reasons, we strongly endorse the suggestion that once excluded from the Register, a host be banned for five years, and support the envisaged penalties set out (pp 12-13).

We regard to the penalty of \$550 for a breach of the code of conduct (p 14; Qn 19) as being manifestly inappropriate given the potential disruption caused to our amenity and home life as Strata Scheme residents by a non-compliant, rogue STRA host or tenant. We would favour an amount at least double if not triple that amount.

Our support for these provisions indicates our preference for a rigorous regulatory environment for STRAs, whether for stand-alone houses or for apartments in Strata buildings. In that context, we cannot understand why anyone involved in STRA to any extent might not be governed by the provisions of the Code of Conduct (p13). This sort of clause seems to us to encourage rorting the system. The STRA industry providers (Airbnb hosts etc) have not altogether excelled in self-regulation thus far! We do not believe that anyone involved in the STRA industry should be excluded from the Code of Conduct.

#### FEES AND COST RECOVERY

In regard to Fees and Cost Recovery (p14) we believe that all participants in the STRA industry should be required to contribute to the costs. Other businesses meet their own costs of operating and fund the regulatory authorities under which they operate through their taxes and other levies. The most equitable way to fund the industry regulator would be one based on each STRA provider's properly recorded and audited STRA revenue as reported to the ATO in their income tax returns.

#### THE REGISTER

We strongly welcome and endorse the basic principle of having a STRA Property Register but find the notion of its being compiled by the industry a little naïve. It is reminiscent of leaving a ten-year-old boy in charge of a lolly-shop in our view.

The STRA industry to date has shown neither the capacity nor the interest in regulating itself. Indeed, the complete down-side of the gig economy is that, sadly, people are basically not honest. We believe the industry register requires a statutory authority to be convened under the aegis of the Commissioner for Fair Trading.

Given the wide-spread existing mistrust of the STRA industry generally, transparency is vital in the processes and procedures the Government sets up for its governance and supervision in the future, especially when exclusion from operating one's STRA business and financial penalties are envisaged. An industry-led authority will never be perceived as being transparent.

We favour a small authority, headed by the Commissioner for Fair Trading and comprising at least one member appointed by the Minister from the industry, and at least one representing Strata Scheme owners, to preside over the management and supervision of the Register. The industry would fund the authority, develop it and administer it under the direction of the Commissioner, to whom it would be accountable and who would approve its basis of operation.

To ensure all operating STRAs were reporting their data correctly (p 16), the Commissioner for Fair Trading should be given the power to inspect and audit STRA premises.

If a person or persons were detected as operating STRA without having registered (p 16), the penalty should be that they are disqualified from ever operating such a venture again.

It is our strongly held view that the Register of STRA should be a public document (p17) and that all information contained within it should also be accessible to the public.

We also strongly believe that the STRA industry should be required to report all STRA stays to the Government, not

least to enable the ATO to ascertain that it has received all of its share of the rental income earned by registered STRA hosts.

## CONCLUSION

We are grateful that the Government has provided an opportunity for NSW citizens to put forward their views on this complex and difficult issue.

We would reiterate the key point of our submission – which is that Strata Scheme apartment buildings are different from stand-alone houses, and thus require different provisions.

In 2016, the parliamentary committee looking into STHLs took the perspective of allowing individual owners in a Strata building the freedom to do whatever they wish with their property. This is not the case, however, with other property owners anywhere else in NSW. It also showed a complete misunderstanding of the legal and social community compact that is Strata living. Most importantly, it ignored the rights and freedoms of other residents of the Strata Plan.

We believe as owners that we should have the right to determine whom we will admit to our building and on what basis they are to be admitted.

A person's freedom extends to his or her doing whatever they want unless or until it interferes with another person's freedom. In that light, the parliamentary committee in 2016 presented a very narrow and one-sided Report.

In 2019, if the Government chooses to deny individual owners in Strata Schemes the right to prohibit STRA in its Strata, it will fail in its duty and responsibility to all the people in NSW who choose to live in Strata-titled properties. Supporting Principles of Democracy

NSW law requires residents of residential apartment buildings to form Strata Plans and Owners Corporations and to elect Strata Committees with considerable powers and responsibilities.

Each Strata Plan in NSW is a specific community with specific issues, individual needs and idiosyncratic inter-relationships, and the elected Strata Committee in every building takes responsibility for managing the building in light of these. The rules covering Strata Plans require a highly transparent degree of direct democracy.

The effective management of a Strata Plan by members of a Strata Committee requires steadily increasing amounts of personal time and effort, and significantly expanding business and management expertise. The Strata Committees of Strata Schemes all over NSW have been making a very satisfactory performance of this job for many years, and do not need or appreciate what appear to be over-riding decisions already made by those Committees for those communities.

The owners in SP 15930 most earnestly request, therefore, that you continue allow Strata Plans, which are fundamental exemplars of democracy in NSW, to make their own decisions.

If most of a Strata Plan's owners want STRA, then they can vote for it within their own community and under their own community's By-laws.

The evidence to date, however, is that many buildings do not want STRA, and our building is one among many that have a By-law prohibiting STRA.

There is no support for STRA in our building's community, and we respectfully request that you permit our community to make that decision for ourselves.

I therefore strongly urge that, in any amendment to legislation that might ensue from this Discussion Paper, you delete any references to, or restrictions upon, the right of Strata Plans to make their own decision regarding STRA in their building.

Hi generally I am in favour of introducing some state-wide regulations / legislation, so long as the administrative burden is not too high for individual hosts (which this appears to do), also any documentation should be user-friendly & easy to follow.

Please find attached a summary of my feedback based on the discussion paper (feedback in red).

The biggest point is that I really think that there should be something addressing damage or theft by guests in the

code of conduct (under strikes)

Thank you for the opportunity to give feedback, if you have any queries please feel free to contact me

Hi, I would like to suggest a capital gains tax free threshold perhaps of or up to \$2000 per year income in clear understanding for Tax agents to advise their customers of. The reason for this is many people have a house or unit with a spare room empty for years. The company for an elderly person could be invaluable. The tourist industry could grow as many tourists starting out in life cannot afford expensive hotels and would like to meet locals. I believe other countries do this and as a result have a thriving tourist industry. It seems restrictive too have people who would love to be part of the international tourist experience but too afraid to let out a spare room for a short stay due to the fact that they may be slapped with a huge capital gains tax on the sale of their house or unit, Terry Meller

We purchased a holiday apartment at Tweed Heads in December 2017 and have used it ourselves and also had STR organised by a local agent. We were recently advised/given 7 days notice of a unitholders meeting to ban STR. We could not attend at such short notice (although did give our proxy to the strata manager), due to a family death. The meeting was held and STR were banned subject to the Proclamation of legislation passed in August 2018 by the NSW Parliament. We find this a ridiculous situation. We do not rent it very often and find this a very big brother approach to something that should be administered by the owners and body corporate. We do agree with a code of conduct but now find us in a situation where our purchase is planned to be hindered by not being able to do the

ocasional STR. The STR helps pay the operating costs and we intend to use it more ourselves as we get closer to retirement. We are currently in our late 50's so this is not to far away. This was a purchase at a time when these rules were no where to be seen and we were going through a heavy year of breast cancer by myself and this apartment was a great diversion from the medical space we were in. Hopefully commonsense prevails and we are to continue our ocasional short term rental. Our property is an apartment.

The links are suspended, I am unable to access to details. I'm expressing my 2 cents opinions base on other indirect sources, such as news articles and discussions with my agency.

1. It is great that The new legislation has included Code of conduct, that can potentially minimise adverse effect from short term leasing. However, it should also apply to long term, negative impacts do not limit to destructive behaviours from short term guests.

2. Since code of conduct is in place, I do not see the point of limiting 180 days.

3. Sydney rental market is currently over supplied, limiting 180 days are not going to boost the economy.

Thanks

I cannot understand why the State Government is dictating to an Owners Corporation as to how the OC runs their building. Surely the OC has the right to decide how the building is run, and if there is overwhelming opposition to short term letting, a decision to ban same should be accepted by the State Gov. or any other body. I note that the City of Sydney Council has no interest in enforcing Development Consents, so why is the State Government so quick to enforce an OC to comply with their proposed regulations. Please State Government leave us alone to run our own building according to the majority of owners wishes

I have owned and been involved in residential Strata since January 1979 and have watched it deteriorate year on year.

Please don't make it worse by facilitating short term rentals. These should be restricted to hotels, motels, backpacking establishments and self serviced, non Strata apartments etc.

If Strata living is to ever improve, we need responsible, long term, caring residents. Not short term rentals.

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

**As a result, regulation for our sector should avoid unnecessary burdens on our operations.**

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

Regards

Murray Oakley

Byron Bay 2481

**Submission**

Short term holiday letting has/is strangling the very heart of Byron Bay. The unrestricted use of residential homes for holiday letting has decimated the number and the average rental for all forms of long term tenancies. In many areas there are almost no permanent residents, and those that are there must continually expect strangers moving in next door, more often than not in holiday/party mode.

The practice erodes the community nature of the town, making it impossible for neighbours to not only not know neighbour; but to form community safety bonds within residential areas.

90 days of STHL in a year is too long and should be reduced to a maximum of 30 days, and this only in premises where the owner is present (living) at the time of the holiday letting.

Policing of any restricted letting scheme is costly, and any cost should be borne by those landlords.

I propose that all short term holiday let premises and landlords be registered with the Byron Shire Council, who will then be given the power to levy annual fees from said landlord. These fees to be used to not only police the scheme; but also to help off set the substantial costs to Council (and therefore rate payers) generated by the numbers of non-residential visitors (additional waste, sewerage etc) to the Shire.

In line with the current proposal, landlords should be struck off the register for failure to manage their properties and visitors to agreed standards.

This practice has the potential (and in our case has already reached it) to remove vast amounts of desperately needed long term affordable rental accommodation from the local area. It encourages people to buy properties in Byron Bay for the sole purpose of STHL and no intention of living there. This is a financial business proposition that is not; but should be, treated and taxed as a business.

Please allow Byron Shire Council to control STHL for and on behalf of its rate payers.

I'd like to put my support behind the ability to allow Short Term residential holiday letting. I believe it allows communities to utilise existing residential housing infrastructure to accommodate peak period overflows in many holiday destinations and reduces the need for additional large scale development which have a far greater impact on the environmental considerations and may be well below capacity for extended periods each year. As a resident and small business owner in a holiday destination, I see significant benefits for both the resident and business operator.

Hi,

I am writing as a person who lives in a suburb that is attractive to holiday makers. I rent out my family home when we go away, whether it be for weekends or for school holidays. The suburb I live in, as well as surrounding suburbs, do not have enough hotel and other types of accommodation to meet the demand.

I am writing to request increased powers or rights for those people who rent out their home. If I rent out the home that my family lives in, I realise that I am risking having a holiday maker decide to not leave, in which case I have been advised we would be unable to return to our home at the agreed time (and my kids couldn't access their school bags/clothes etc). We would have to take them to court and get a court order to have them removed (and my kids have missed school for an extended period of time as have no uniform or school bags, we have had to buy new clothes to attend work etc). I believe that holiday renters should not have the same rights as someone who has entered a rental agreement whereby the accommodation is their home for an extended period of time. My other concern is that if we have agreed to rent the house out to a particular family and give the keys (or entrance code in our case) to one of that supposed group, we are in the situation where they can invite anyone else that they want to come over and we have no control. 2 relevant examples have occurred to us.

One, a woman rented our family home, and said that she and her partner, along with 3 other couples were going to stay. Her husband contacted us and said he was arriving with the other men so they could go for a surf before the girls arrive. Turns out that it was a bucks party, we arrived home to find my kids bouncy balls with pictures of breasts on them and sex toys in the house. That was the tamer of the

2 examples I give in this email. The second example was where a man booked the house for himself, his 6 month pregnant wife, and three other couples to stay for a babymoon. Relaxing weekend planned.....

Another bucks party. This time we arrived home to find a whole window frame missing, broken glass in play room, on trampoline, pushed deep in between the pieces of wood on the deck, throughout the outside wicker lounges. My husband and two kids subsequently got cut by glass that I hadn't seen in the following week. I found drugs (think cocaine) in a plastic bag under cushions (luckily I found it, not my 5 and 6 year old kids) and a bucket full of wee in a bedroom (unsure what sex game that was aimed at!) OUR poor neighbours have had to put up with seeing naked women running around. We were contacted on the second occasion on the Saturday (after the first night of a two night

rental) and told that there were 14 or 16 men leaving our house at 10am with beer bottles, heading towards the beach. Whilst we did not agree to rent our house out to a group of men, we had no rights as owner of the house to get them to leave. We could not call the police to assist us (my husband was too afraid to confront them) as we were told the police would only get involved if malicious damage. PLEASE PLEASE PLEASE GIVE US RIGHTS TO GET PEOPLE OUT OF OUR HOMES IF THEY ARE NOT WHO THEY SAY THEY ARE.

There is much talk about people renting out their homes and the negative impact on their neighbours. We have amazing neighbours who are WAY TOO patient and understanding. We don't want to have people stay in our family home who are going to party away and make loud noise at night. But we have no power to get rid of people if they do.

We don't even have the right to say no to groups of 18 year old men if we are agreeing to rent our house out to others (otherwise we are breaking anti-discrimination laws - cannot say that there must be a child in the group or they must be over a certain age as we would be being age-ist!) Please help us. We need the money we get from renting out the house to pay the mortgage. Please find a way to allow us to 1. not let people rent out our house if

we think they may be party animals based on their ages 2. have police assistance to remove people on our property that we did not give permission to be there (as they have lied to us about who they are)

Thanking you in advance,

Kathy

I would like to submit my view on Short Term Rental Accommodation

While short term rentals may be suitable in some instances I feel it is eroding the commercial value for providing short term accommodation such as Hotels, Motels, Hostels, caravan Parks, Real Estate Agents,(to name a few examples).I believe most commercial operations adhere to a fairly rigid Code of Conduct which I hope is well policed I know a lot of time ,hard work,investment and passion goes into providing a good accommodation experince for people seeking rental from most of the above businesses.

How well are these short term rentals investigated for overcrowding and there is also a possibility for the use of cash

not being recorded which has an ongoing effect on the economy

How often does the media report bad behaviour and noise especially from the fairly new concept of operations such as AirBNB . This is not fair to the neighbourhood to people who want to live peacefully and not have to put up with unruly raucus behaviour,property neglect and thoughtless disposal of rubbish and noise.

I can see Short Term Rental Accommodation encroaching on the same abuse of regulation as the Free Camping Movement which I also do not support.

I have read the Guidelines for the Code of Conduct and feel non compliance should be acted upon immediately for those who do not adhere to this document.Afterall it is there for a reason.That being compliance.

Too many times complacency has resulted in bad consequences so no warnings,and immediate action should be implemented if the Code is breached

In conclusion there cannot be too many regulations in ensuring Short Term Rental Accommodation does not become another self regulated industry within itself

Thankyou

Julie Payne

I think 180 night cap is very unfair . Should let market to decide how many nights a host can rent out . For the properties poorly managed , that can not get 180N bookings anyway . For the well managed hosts , it's very unfair to cut the income that they can gain from investments and hard work .

People supposed to be encouraged to do more good to boost economy , instead of being tied the hands and struggle with life.

Holiday letting is part of the Australian way of life, my grandparents hired holiday houses on the coast as an affordable way to include the extended family, as do I and my children so my grandchildren can also be included. The way we rent / book them has changed so now more folk can access them. This is the way of the future. Also people should be able to do what they like with their own property.

Misbehaviour is a Police matter, and would occur in a minuscule number of properties.

How many people on panel making the decisions have actually experienced short term rentals where they reside I wonder?

We have and know how different life is without it.

Our apartment "Watermark" is considered to be a very successful example of strata living and much of that success we put down to the fact that we were able to introduce a Zoning By-Law, which links to the Wyong Shire Council 2013 LEP and the R3 Medium Density Residential zone defined within this LEP. The LEP currently requires the prior approval of the Owners Corporation before council will approve development consent for any short-term rentals

within the building. Since implementation, our Zoning By-Law has proven very successful in prohibiting short-term holiday letting, stopped the associated problems, enhanced our quality of life and provided a safe and secure environment for lot owners and occupiers.

We had the support of the local council and should the current proposal to introduce the State Environmental Planning Policy (Short-term Rental Accommodation) 2019 be successful, we will lose the ability to rely on the zoning to support our desire to maintain our way of life.

We are one of the few complexes that have experienced both living with and without short-term rental so we KNOW what awaits us if 26% of the owners - or more likely future business driven owners - override the desires of the majority.

From our experience - If the hosts live on-site there is much less chance of anti social behaviour but it still can (and has) occur but because we live in a regional area, we may have to put up with this for the rest of our lives in our home! From our experience we doubt owners would put up with the behaviour of guests that the rest of us have had to endure!

Our building security wasn't designed for segregating short term visitors and when short term letting was occurring here, we saw a spike in the occurrence of theft; littering and noise levels. Damage to common property has to be proven so things like super glue put into in locks upon leaving to prevent access to the unit has had to be paid for by the owner's Corp.

Additionally, having had reason to report continual noise and anti-social behaviour to NCAT before, we know how hard it is to prove a case or for the complainant to achieve justice as it is often impossible to present the amount of evidence required. More time & effort needed by innocent parties.

My concerns:

\*Too much weight given to the importance of generating income and funds for the government and not enough importance given to quality of life to owners and occupiers of homes affected by STRA.

\*Time-frame for review? Once adopted the state will rely on income generated and will be loathe to change their decision no matter the impact on the lives of people NOT making money from STRA.

\*The lack of attention given to previously adopted By-Laws introduced at great time and monetary costs to prevent such issues by our Strata Committee. If the existing by-law was made under the Strata Schemes Management Act 1996 and was validly made, then I believe there is a good argument for THAT by-law to be valid.

\*The increased costs to be borne by other residents -namely increases in insurance; cost of repairs caused by guests; cost in time to Strata Committee members and others involved with reporting any anti-social behaviour; costs involved with repair and maintenance to common areas due to increased use & traffic in pool; gym; foyers; car-parks etc.  
and most importantly.....

\*THE IMPACT on residents not involved in this whole monetarily driven scheme.

Thank you for the opportunity to submit my response to this unfair and pecuniary legislation.

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

Melissa and Richard Hopkins

My issue with the Short Term Leasing regulations/law is that whilst it allows for blocks of apartments to have short term leasing within the building with 75% occupier approval, it does not allow for buildings to ban short term leasing even if that building has a majority of people wishing to do so. My apartment block does not want to allow short term leasing because of issues with our security and because we all pay levies for the facilities and amenities and we do not wish to have people making a profit from allowing strangers to use the facilities. We are currently 80% owner occupier with 20% rental. The only people that would want to do short term leasing are the renters. We do not feel they have the right to do short term leasing when those of us who reside here permanently do not. The renters are

not part of our long standing community within the building. I originally wrote about this issue when I was Secretary of our Strata Committee. I have since stepped down from that position but know that the desire in the building is to be able to ban short term leasing. It is only fair that if some buildings have the right to allow short term leasing then by the same token, those buildings that wish to ban it should be allowed to do so. It is frustrating to not be allowed to make decisions about who we allow into building which is our home.

Hi Alex

Thank you for your letter. We all know how well "industry regulation" works. We have seen it in the local building practices where "self certification" has led to Opal Towers and the Mascot apartments with, no doubt, many more to come. Industry regulation in USA led th the GFC after Dubya deregulated Wall Street and Goldman Sachs gave the world CDOs (collateral debt obligations).

Of course there must be a register but a register run by the industry is no register at all.

Keep at the Government on this. They show every sign of being in the hands of big business to the detriment of the majority.

Please allow strata schemes to refuse short term leasing and likes of airbnb. It means unknown people are staying on property - with no accountability for noise and other behaviour & draining use of common resources.

Also landlords cannot monitor if their tenant is unlawfully subleasing space - unless there is a register of premises being offered for short term leasing. And the user of like of aribm may be having a landlord exposed to risk which insurance does not cover- all because much short-term stays happen without landlord consent. Lanflord has no effective remedy if damage done and insurance not cover- the authorising tenant rarely has assets for authoring

airbnb etc. I note that airbnb does not disclose address until someone makes a booking- so landlords not know if their property is being offered for short term sub-lease or licence.

Short term leasing can kill communities as residences are only occupied by short-term visitors and this makes it even harder for local citizens to find long term place to rent - let alone havr community help for say school canteen.

Many european cities have banmed or highly regulated the likes of airbnb & i ask that NSW do the same.

Also there is confusion on whether airbnb is even a lease (as victorian tribunal says) or mere licence (seems to be current law).

Please allow strata schemes to ban short term leasing or licensing. Also require any short term lease or licence of premises to be on a public register so all can monitor for unlawful sublicensing.

Byron Bay/2481

**Submission**

This is a beachside tourist town. Fact.

What does Byron Council propose the thousands of people who rely on STHL to do for employment if the industry is cut off at the knees with a cap on allowance to Holiday Let. We do not want HIGH RISE HOTELS here. The appeal of Byron is that it is not over developed like the Gold Coast and offers a relaxed option for a beach and nature holiday.

I have lived in Byron Shire for 13 years and have solely relied upon this industry for employment and financial support of my family (single parent). My Child attends Byron Bay Public School where there are over 500 students, all who live locally. Byron Council have got it WRONG, who says there is no community here, I am it and so are all

the parents of the school children in ALL local schools here. Do not cut the Industry off, regulate it and make it accountable. This will get rid off the ill-managed properties where objections to quiet enjoyment of neighbours is expected to be respected.

I manage many houses here and most sleep 12 Guests. I very rarely get complaints from neighbours, am registered with the HLO Inc (John Gudgeon's company) and licensed. All my properties have fire checks and safety equipment, rubbish collected weekly and serviced.

It will kill our town if restrictions to amount of days are put in place - do we want half the town closed during non-peak seasons. Look at the rent being charged by Real Estate Agents on the commercial side. One local Physio on Shirley Street who has worked in this town for 30 years had his rent put up by \$2000 pm and had to move out. This is a loss to our community. Only one example - shops are closing and for rent signs all over the place.

We need help for Byron Council to better manage the towns, no facilities for young Children - no skate park or play area other than the toddler area opposite Main Beach, public toilets and facilities. Look at where the Council spends its money and not waste time and our taxes constantly objecting to the only major income stream this town has.

I am submitting as both a Licenced accomodation (hotels and Guest houses 3 hotels and 140 rooms) operator and Airbnb host (8 apartments). I have seen the benefits and pitfalls of both platforms. One area that I think needs further consideration is the 180 day limit. The problem with this is it's extremely difficult to police. One could host for 180 days on airbnb and then 180 days on another platform with similar but slightly different listings and in buildings with multiple units it's extremely difficult to control and police (very time consuming and not partially beneficial to anyone).

I would suggest instead of a blanket cap, that measures are put in place where a strata could if desired place their

own rules. but if there is no strata or the strata agrees, then a system to register accommodation and require the hosted accomodation to comply with similar standards such as fire and accessibility that a hotel must comply with. Hence assisting to level the field of competition.

As you know the Industry has come under even tighter scrutiny since the rise of Airbnb which has unfortunately brought a huge increase in un-regulated and ill-supervised Holiday Letting. A problem not only Byron Bay has faced, it's global. Cities like Madrid, London, New York's have all been addressing the issue, but unlike Byron, their economies obviously survive with or without Holiday 'House' style Accommodation (who wants 50 high-rise Hotels in Byron Bay, not us, nor the local community).

Here in Byron, Suffolk and Brunswick Heads it's complex and I can understand where some of the opposition to our Industry is coming from, certainly with more regulation and possible registration, part of the problems here could be addressed. Large numbers of Tourists vs the number of rate payers does put strain on the Council to support and

even improve infrastructure and amenities. I believe, as many do, that the NSW or Federal Government's Tourism Departments should contribute to Byron Bay's economics as it IS a desired holiday destination, known globally, as is being proven by the numbers of visitors from all over the World. It has really become a 'must go' place. As John Gudgeon, Chariman of Byron Bay's HLO Inc, Byron should be a JEWEL of Australia and needs better Management / funding.

The suggestion of a CAP to the amount of days we will be permitted to rent IS ABSOLUTELY OBJECTED TO. I would think Council just want to limit days which would mean the town is dead for the low seasons - job losses, shop closures - half town closed for Winter, we do not want. It would indeed cause huge problems for sustainability for local businesses and employment, negative effect on Property incomes etc.

Visitors do contribute significantly to many facets of our economy in my eyes - all of the above, employment as a result of Tourism and STHL is also significant. Many Trades and Businesses I deal with rely, on the majority or 100% on the Holiday Letting Industry, which in turn feeds our local economy by having rate payers employed, in work and tax liable.

The commercial retail rental side of Byron Bay is quite outrageous but no-one seems to be looking at what the Real Estate Agents are doing, charging huge amounts of retail rent which in turn kills off local enterprise. This is a point that should be highlighted indeed to Government. Who is going to support the plethora of shops, restaurants and cafe's paying huge amounts of rent with over the top increases per year etc if we limit Tourism. This I don't understand.

Let's see what this 'Consultation' process can provide, but I do recommend that a greater Government Tourism contribution is required. The amount of income these 3rd party booking sites make from our Industry is huge. I think they should contribute part of their commission/booking fee income to the town, it should not just be put on 'us' or the visitors alone. Obviously in addition to this the Federal Government needs to be collecting Tax from these companies who are based off shore but reap huge amounts of income out of our Tourism industry. (Airbnb USA, HomeAway NL etc, Booking.com NL).

Many of my Owners have invested in Superannuation type purchases and have huge mortgages, they need this income to continue Ownership of their properties, not all are money grabbing greedy Capitalists and certainly care for and contribute significantly to Byron Bay/Suffolk Park local economies.

DO NOT LET BYRON COUNCIL CAP OR RESTRICT, THE ECONOMICAL DOWN SIDE WILL BE SIGNIFICANT AND JEOPARDISE THE SURVIVAL OF BYRON BAY AND SUFFOLK PARK.

The amount of income these 3rd party booking sites make from our Industry is huge. I think they should contribute part of their commission/booking fee income to the town, it should not just be put on 'us' or the visitors alone. Obviously in addition to this the Federal Government needs to be collecting Tax from these companies who are based off shore but reap huge amounts of income out of our Tourism industry. (Airbnb USA, HomeAway NL etc).

We have resident live in neighbours both sides of our House, who know us and our Agent well. NEVER any complaints. A licensed Agent in Management who employs many local companies and contractors to service our property.

**DO NOT LET BYRON COUNCIL CAP OR RESTRICT, THE ECONOMICAL DOWN SIDE WILL BE SIGNIFICANT AND JEOPARDISE THE SURVIVAL OF BYRON BAY AND SUFFOLK PARK.**

**I agree to the above statement**

Yes

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

We are concerned that the rules about bushfire and flood affected areas may impact negatively on the holiday rentals in this area of Sussex Inlet and Berrara. This is an area of 25% unemployment and we depend on the income of holiday rentals to boost employment and income to the local businesses in the area at holiday times.

We are an area that has been impacted by floods and bushfires but the local area has developed a strategic plan for evacuation and management in these situations. We feel that if the regulations prevent holiday letting in these areas it could severely impact not only our regional area but also others.

These regional areas are already suffering from drought and lack of NBN facilities. We do not need another blow to our economy and community.

**Submission**

If an Owners Corp choose to make their building no AIR BNB or not short term letting under 3 months, that's a by-law to the building, one in which any new owner has the rights to review before buying into the property.

The argument whether it devalues a building or not is contraversial on the basis that most family orientated people, would think that having an air bnb is actually a security risk with buildnig by-laws often not presented to them and doors often chocked open, as well as it usually being a party/holiday experience sees amenities such as pools, see glassware used around them, when they shouldn't be.

There is a general lack of care by air-bnb type scenarios and as such, if a building chooses not to undertake air bnb - they should be given that right to dictate over how their building functions.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

I would like to add that any regulation being considered should not be applied as a blanket to all regions. My property for example is in Jindabyne in the snowy mountains where the vast majority of properties are used solely for short term holiday rentals and have always been. The introduction of platforms such as Homeaway/Stayz and Airbnb have allowed property owners like myself to manage advertising and bookings without paying substantially higher percentages to a real estate agent but either way my property would be available year round for holiday bookings as that is its sole purpose and its is approved for this by the local council. If regulation were to limit this in some way then I would be very concerned with the economic viability of the property. If owners like myself decide that we can no longer justify use for holiday rentals then we would be force to seek permanent rental arrangements which would availability for holiday tenants in lead to increases in rates. Alternatively we may be forced to sell the property which would lead to a decline in property values.

Thank you reading my submission.

**Submission**

The suggested regulations would decimate the holiday rental market and the income it brings to towns such as Berry. Particularly the proposed fire regulations. I have a small weatherboard house built around the year 2000 on land with a Registered Property Agreement on it which I let as a weekender and have done for many years and would never make the intrusive and draconian changes to the property. I, along with the majority, would simply remove it from the weekend rental market. I would suggest that if a house is safe enough for a family to live in full time it is safe enough for visitors to stay two nights in. Some of the proposed requirements are quite absurd. It will be like living in repressive State where providers go 'underground', risking great personal penalties to do so and

would fan the flames of a general contempt for the legislative intrusion of Government into daily life. The Nanny State is no good for anyone, including its citizens who like to go away somewhere new for a weekend without having to stay in bland custom-built properties with no soul and no character but which tick all the regulation boxes. And has any consideration been given to the expense of these changes to people who own a unique property in a unique location? The country will be the poorer for its people not being able to experience the interesting and having no choice but to stay in increasingly institutionalised buildings. How does Rome or Paris or London manage? Please, see this for the disturbing level of bureaucracy that it is.

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations. My business operates & coordinates short term rentals on behalf of owners. Our services are specific to the holiday rental industry & we follow all laws and regulations like any other real estate. We ensure the premises are safe, clean and well maintained for guests safety. We also screen guests, enforce house rules and promptly deal with any kind of guest misconduct 24/7.

All the properties I manage have restrictions. We limit no. of persons per property, set noise restrictions, cleaning standards, safety checks and inspections, guest screening and terms & conditions of booking. If an owner would like to rent a property on a short term basis outside of maximum limit could professional management be an option?

As a responsible short term rental property management business & operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like the one's I manage become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry and particularly in our area of Port Stephens.

Port Stephens is one of the top regional destinations for both domestic and international tourists. As such, the LGA's employment is also heavily reliant on tourism.

**As a result, regulation for our sector should avoid unnecessary burdens on our operations.**

As a responsible operator, we strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, we oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like ours become more important to the tourism economy, it's our strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading our submission.

Kind regards,  
Michelle and Andrew

Thanks Doug

I thought the attachment didn't upload so I'm glad of your contact. It is now attached. I assume the message went through but I'm copying it here just in case :

Comments on draft Code of Conduct for Short Term Rental Accommodation are attached. I have used the comments tool and hope they are all saved. There are 24 comments. I believe selecting "comments" on right hand side will reveal these if they do not at first show up. Please call or email me if you cannot see them . 0402830872.

I am commenting from the perspective of a strata scheme. In particular, I have in mind small schemes where STRA issues are highly noticeable. My comments, however, would equally relate to a scheme of any size if properly managed. The Code, I believe, needs to consider a fit with requirements of the Strata Schemes Management Act. I would think most STRA difficulties arise within strata buildings and I hope my perspective is useful. Sorry if comments are repetitive - I discovered things as I moved through the code. You should be able to evaluate holistically and consider the best fit. I intend to comment on other documents, given time, and hope you can group my comments. Margot Homersham.

Does the proposed new legislation consider hotel accommodation where it is legislated only for short term only? I cannot see how private STRA would affect such an establishment.

Dear Fair Trading

The issue we wish to address today is our concern re possible government legislation allowing short term leasing in

currently Council Zoned RESIDENTIAL areas. Those strata complexes in a commercial zone are a totally different matter, and our concerns are only for stratum in Residential zones. We would like to raise the following issues and concerns.

#### Issue 1. Residential Council zone.

With reference to: The Lake Macquarie Local Environmental Plan 2014 Land Zoning Map – Sheet LZN\_009B: it is clear that our Strata Complex SP:63468 at 78 Brighton Ave Toronto is zoned R3. MEDIUM DENSITY RESIDENTIAL 78 Brighton Ave Toronto is totally a residential stratum with 22 'Villas' (Units and Town Houses). Our Complex is almost 60% Owner occupied (currently 13/22) with remaining 9 Lots currently tenanted as residential letting (minimum 3 months) - and we are blessed with lovely responsible residential tenants.

We are very concerned re Section 2 of this Council document that appears to allow Council to consent to any Development Application.

The council?? This may be all well for a single dwelling domestic household's Development Applications however, it is a total abuse of Owners Corporation responsibility to manage their strata properties reflecting owner's wishes, such as our residential SP:63468.

#### Issue 2. Special By-Law restricting short term leasing – passed unanimously at the Owner's AGM 2016

Our Owners have demonstrated their preference to remain totally residential by passing this Special By-Law restricting short term leasing. Strata records will confirm that this AGM was attended by both on-site and off-site owners (i.e. those owners who rent their property).

Furthermore, this By-Law restricting short term leasing;

- is registered by with the ATTORNEY GENERAL'S DEPARTMENT
- and appears on our Strata Common Property CERTIFICATE OF TITLE.

Therefore, it should be clear to a current owner or prospective buyer that our Owners' Corporation does not agree to any short-term leasing on their property.

A change in this By-Law should only be possible by our Owners Corporation at an AGM or Special OC meeting, agreeing to rescind the above and make a new By-Law.

No Council or Government Legislation should have the power to overthrow a legally registered By-Law supported by the Owners Corporation of a Strata complex; and in particular, a Strata complex in a Council Residential zone such as ours.

No one single owner should be allowed to abuse the wishes of the combined owners.

#### Issue 3. Insurance implications

- We are insured by Strata Community Insurance (SCI) for value over \$10,500,000.
- To make this clear we are Insured for RESIDENTIAL Strata, with appropriate Building, Public Liability, Legal Expenses, etc for a RESIDENTIAL stratum.
- There is little doubt that a short-term holiday or Airbnb would qualify as commercial usage, and therefore our Strata premiums would rise.
- Furthermore, and as you are aware, Strata is shared common property and there have been many incidences reported of problems created by short-term 'party rentals' abusing common property.
- 

#### Issue 4. NSW Government strata schemes management Regulations and the Act (2016) – Schedule 3 is being ignored and/or compromised.

We know you are familiar with the Strata By-Laws. There is little doubt that allowing any short-term leasing into a residentially zoned strata complex such as Sp:63468 would challenge these NSW Government SSMA &SSMR (2016): in particular;

SSMR By-Law 17. Change in use or occupation of lot to be notified

i. An occupier of a Lot must notify the owners corporation if the occupier changes the existing use of the Lot.

ii. Without limiting clause (1) the following changes of use must be notified:

(a) a change that may affect the insurance premiums for the strata scheme (for example, if the change of use results in a hazardous activity being carried out on the Lot, or results in the Lot being used for commercial or industrial purposes rather than residential purposes),

(b) a change to the use of the Lot for short term or holiday letting.

iii. The notice must be given in writing at least 21 days before the change occurs or a lease or a sublease commences.

With regards to this last point 3, it is clear that as our Strata Plan already have a legally registered By-Law restricting

short term leasing, that any such 'written notice' would still require the owner's corporation to hold an AGM or Special General Meeting to rescind our existing By-Law.

If this does not occur, the individual owner – and indeed the Strata Committee, the entire Owners Corporation and the Strata Manager appointed by the OC would be in abuse of your existing Laws, in particular:

SSMA Division 2 section 36 (3) the following decisions cannot be made by the strata committee

(a) a decision that is required by or under any Act to be made by the owners corporation by unanimous resolution or general resolution or in general meeting.

It would not make sense that an owner can simply notify within 21 days that they intend to break the Law by nullifying a legally registered Special By-Law (which SSMA Div 2 section 36 (3) states it cannot be approved by the Committee of Strata Manager either without a OC so why can an owner simply give 21 days' written notice.

This is a nonsense!! To do so is in clear breach of the SSMA. To make the point clear, – it is against the Strata Schemes Management Act, regardless of any council giving a DA approval or written letter from an owner!

Issue 5. Other NSW government strata schemes management regulations (2016) – schedule 3

The following SSMR By-Laws would also be abused, and/or extremely difficult to enforce.

By-Law 6. Noise.

- An owner or occupier of a Lot, or any invitee of the owner or occupier of a Lot, must not create any noise on a Lot or common property likely to interfere with the peaceful enjoyment of the owner or occupier of another Lot or of any person lawfully using common property.

By-Law 9. SMOKE PENETRATION (Our Owners Corporation voted for Option A), being:

- An owner or occupier, and any invitee of the owner or occupier, must not smoke tobacco or any other substance on the common property.
- An owner or occupier of the Lot must ensure that smoke caused by the smoking of tobacco or any other substance by the owner or occupier, or any invitee of the owner or occupier, on the Lot does not penetrate to the common property or any other Lot.

Please be assured we are not making any reference to those Stratum in commercial, mixed or other zones already allowing some commercial use of the property.

We are only asking you to bring our concerns to the NSW Government regarding this matter for those Stratum where owners have chosen to live in

- a residential stratum,
- with SSMR residential strata By-Laws
- and with a legally registered Special By-Law on restricted leasing which appears on the Certificate of Title
- and with Residential Insurance
- and in a Council zoned Residential
- with residential council rates
- including residential bin arrangements.

Allowing short term leasing into a residential strata complexes such as 78 Brighton Av would undoubtedly put up our Insurance costs (both strata and private content) and would increase our council rates. It would also change our accepted By-Laws and nullify those Special By-Laws passed, registered and paid for by the existing Owner's Corporation.

If the State Government allow Councils an easy road to change conditions in Strata Living, it is affectively changing or challenging several sections of the NSW SSMA and SSMR as well as changing Council zoning regulations.

Regards

Robert and Judith Hall

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

Regards

Greg Apps

Dear Sir/Madam

#### SHORT-TERM RENTAL ACCOMMODATION DISCUSSION PAPER

The Attachment sets out my views, to the questions posed in your recent discussion paper.

I am very concerned by the actions taken by Tweed Shire Council ("TSC") in relation to the Short Term Rental Accommodation ("STRA") situation in their region of 90,000+ people. This therefore forms the basis of my comments in relation to STRAs. This is a strong example where a Council is distracted and acting outside its mandated powers and therefore (as a precedence) we can not risk other Council's acting against NSW State Legislation. Therefore I do not believe that any NSW Local Council should have ANY input into STRA regulation. TSC have proven that NSW Councils can not be trusted on this issue. This is based on the fact that TSC have set a precedent in that they have (and continue) to ignore the NSW Planning and Environment Act 1979 by unfairly, inconsistently and inappropriately targeting STRA owners.

The actions of the current crop of Councillors in the Tweed Shire are suspicious – it is imperative that this does not open the door for other councils to ignore NSW State Legislation in relation to STRAs

TSC is a council divided by a regular voting block of 4 councillors against 3. This proven voting block appears to have little idea of the views of their wider community across a range of issues. A recent example of this is the approved development and building of the Tweed Coast Hospital (the 4 councillors, colloquially known as the Rainbow 4 were opposed to the development and site selection and spent significant amounts of ratepayers money on legal advice when they had no mandate to interfere). At the recent NSW election it was clear that their views were not in line with that of their community (Local Tweed MP Mr Geoff Provest was returned with a higher majority on a platform which supported the hospital and its proposed site). It is my view that this is clearly repeated in the STRA issue (as evidenced by the many locals who agree with me on this – as voiced to me personally).

Cr Warren Polglase correctly pleads for TSC Councillors to unite the community and concentrate on local matters – not matters unrelated to council's mandate

The following is from the Tweed Daily News – 16 August 2019

Former mayor and current councillor of the Tweed Shire has called on his colleagues to put party politics to one side and focus on the betterment of the community.

Councillor Warren Polglase told the chamber at Thursday night's council meeting the political ideology of each individual member was obstructing the main purpose of the council.

During a meeting which at times descended into a 'tit-for-tat' bicker between councillors, the former mayor said he wanted the council to be more united.

"We were elected to look after the community," Cr Polglase told the council.

"We need to get back to basics, put down the swords and the shields."

The impassioned speech was made as councillors debated the merit of overturning a 2018 decision which would ban companies who have held contracts with Indian mining giant Adani, from working on projects for the Tweed Shire Council.

Cr Polglase said he believed the chamber should be focusing more in issues which directly affect residents of the Tweed, rather than matter abroad.

"We have all of these issues locally and Adani seems to take a large platform," he said.

While his comments were not received well by all councillors, Cr Pryce Allsop told the chamber that he congratulated the former mayor for speaking up.

I agree with Cr Polglase. The TSC Rainbow 4 are so focused on things outside their mandate that the local economy, businesses and mum and dad ratepayers are suffering. All you have to do is read the TSC Council minutes to see the

ongoing delays Development Approvals suffer from as Councillors send back asking for more information or delay decisions on matters which (with focus) could be resolved on a timely basis. It is – in my view - truly a shemozzle (and an embarrassment to the region)! STRA owners have unduly suffered under this distracted focus.

A vocal minority is unduly influencing TSC “policy”

It is my view that the TSC Rainbow 4 have listened to a vocal minority in relation to STRAs. Tourism is the largest industry in the Tweed, providing not only jobs and income to those directly involved (ie STRAs) but to the many associated industries and trades. A vocal minority of residents clearly have the ear of the Rainbow 4, and actively targeted STRA owners to shut them down, and in the process ignored The NSW Planning and Environment Act 1979 (“the Act”). The Act is clear - a residential DA consent validly allows people to enter into tenancies under NSW Residential Tenancy Law and stipulates no minimum time limit to apply to a valid lease. Short term rental (as with long term rental) has always been an undefined (innominate) use of a residential dwelling. The TSC therefore has neither power nor authority to intervene in short term accommodation tenancy dealings.

In essence, a voting block of 4 councillors are holding a whole STRA industry in the shire unfairly to ransom (and ultimately the whole NSW state)!

TSC say they are acting on “complaints”. This means that there is not fair and reasonable blanket policy in relation to STRAs, but if an STRA is operating and (like in our case) a neighbor “does not want to live on the same street as an STRA”, then the neighbour can make serious, spurious, unsubstantiated complaints against a property (ie with no police or security company report) and TSC will send a letter invariably citing zoning restrictions (which have no correlation to the noise or parking “complaint” lodged) and threatening large fines if they do not shut down (or get an immediate development approval when the residential DA covers the STRA). All this flies in face of the Act. Go figure!

TSC Locals are being unfairly harassed – we can not allow local NSW Councils to over-ride NSW Legislation

The TSC Rainbow 4 (unsupported by the 3 other Councillors) are attempting (through their LEP2014 zoning definitions) to classify STRAs as tourist and visitor accommodation (suggesting that STRAs are commercial operations – despite having no employees, no restaurants, gyms, cafes etc) and therefore have voted for action which is harassing local STRA owners into closing. More than 80 local STRAs have been targeted in the last 12 months or so. Fines of ranging from \$3,000 to \$1,000,000 + \$10,000 (ours was the biggest we have seen) per day have been threatened if they do not close. As explained above, these threats are based on “complaints” which are not subjected to the usual natural justice procedures (and complaints which generally do not relate to the zoning regulation TSC is quoting to justify their threatened actions and fines).

The delays in the NSW STRA Legislation is hurting the TSC community and economy

Given the expected NSW Legislation in relation to STRAs (which has been in process for more than 2 years – and basically ready to go for the last year), STRA owners have decided not to proceed with expensive legal costs and have been patiently waiting for the NSW Regulation to be promulgated. Please do not delay any longer!

Therefore, based on all of the above TSC are acting disingenuously and denying STRA owners their rights under NSW Residential Law and the indefeasibility of their Torrens title property registrations. I have both seen and made detailed representations to the Mayor and senior Council staff by targeted owners. The answers to my trained eyes, indicates that some people in power are acting as if the hiatus provides a suspension of the need to fully respect the normal rule of law? And the delays are only making the matters worse as there is no let up to the fine-threatening letters. It is just not fair nor reasonable.

We need to support and protect Tourism in the Tweed

Safeguarding tourism on the Tweed Coast has very important inter-generation implications. It offers opportunities for local youth to earn wages, confidence and self-esteem to go on to vocational (supporting our local TAFE) or tertiary education, improve their ‘human capital’ and make a greater contribution to society than they otherwise could. Many local businesses are suffering and the Tweed Shire is becoming the laughing stock of the nation on this

issue. It could take a while for this negative perception of the region's tourist policies to recover and rebuild public confidence in our most important industry.

TSC could have approached this in an entirely negative and unproductive way! Over 12 months ago I suggested that within their annual BEATS (Business and Excellence Awards Tweed Shire), there is an opportunity to encourage excellence in STRA as part of their Tourism and Visitor Experience award. But they don't. With Tourism being the recognized largest industry in the Shire it is shocking that there is not a thoughtful and encouraging approach which supports excellence rather than their big stick approach to shut STRAs down (based on a nebulous and unconfirmed "public interest". The TSC approach does not make fiscal or policy sense – and is a direct contravention of tourism policy at local, state and federal level! They are spending \$100's of \$1,000s of ratepayers money paying contractors through Destination Tweed to promote the region, but are shutting down STRAs. Total nonsense and counter-intuitive in my view. It is time to promote excellence, not punitive "punishment".

Is what TSC doing legal?

I do not believe so and they should be stopped. Please feel free to refer to your government employer as appropriate.

So, I have responded per below, mindful that this proposed NSW regulation is urgently needed and we need to cut Local NSW Council's out of the process. TSC have proven that they can't be trusted.

Yours faithfully

Sally Johannsen

ATTACHMENT

FEEDBACK COMMENTS

Question 1: Agree with recommended standard – although needs to be realistic given we are talking about residential homes which may only be let for short periods. Ie. Don't make the fire safety standard prohibitively expensive given the nature of STRA occupation. It is a personal home after all.

Question 2: Need more information on what type of hallway lighting is required. Per question one, needs to be realistic and fit for purpose (and not over the top as you would expect in a commercial premises where there are a lot more people onsite/at risk)

Question 3: The '21 day rule' is a sensible improvement, However, Councils should adhere to a consistent state-wide "days" policy (ie. No variation in days within or across LGAs)

Question 4: General obligations are realistic and sensible.

Question 5: It would be useful to collect data on whether owners are self-managing and, if so, whether they have accredited property management training. If the data were to show that 'amateur' self-managers are a compliance problem, then an accreditation process for STRAs could be implemented to support owners to comply. Accreditation would be encouraged and a star rating given which could be used by STRA owners to promote their accommodation. I encourage positive action rather than a big stick approach to "punish" people for "non-compliance". This is an opportunity to encourage excellence (like the food quality/hygiene rating system for restaurants).

It could be a three tier program which would encourage "property managers", "property consultants" and "owner managers". Property managers would be registered real estate agents. Property consultants would be consultants who act on behalf of owners in managing things like maintenance and bookings but are not officially accredited through the REIA (particularly relevant as often REIA agents are not traditionally available on weekends when STRAs are occupied but local property consultants are on call. Also licensed real estate agents may not be the most appropriate property managers for an STRA). Owner managers are as it suggests. A star rating (similar to hygiene

rating) could be achieved through positive reviews.

Question 6: Sounds reasonable.

Question 7: Natural justice MUST apply. Based on experience with Tweed Shire Council, a complaint must be third (independent) party verified with appropriate opportunity for an STRA business to defend itself against spurious and unsubstantiated complaints (like what has happened in the Tweed Shire).

Question 8: Fair and reasonable.

Question 9: If a rating per question 5 was instituted, it would be reasonable that an excluded STRA could not apply for a rating during their period of exclusion, therefore limiting their capacity to positively and actively promote their STRA. An exclusion should not be kept as publicly available on past exclusion period (ie, done the time so opportunity to redress the situation and restart). An exclusion should also not apply if the STRA is sold to an independent third party. Ie. Some thought needs to be put in place to ensure that if a property is excluded (and subsequently sold) that the new owner would have a right to apply for a redaction of the exclusion, provided that they agree to adhere to the STRA regulations. I suppose some clarity as to whether the exclusion applies to the person/owner/manager or the property.

Question 10: Fair and reasonable.

Question 11: The provisions are appropriate – there should be discretion available in their application of penalties

Question 12: Yes.

Question 13: Fair and reasonable

Question 14: Yes

Question 15: No others should be excluded

Question 16: Fair and reasonable.

Question 17: Hosts should pay a registration fee which is based on 50% cost recovery for the OFT. A further fee could be recovered through the fines etc (although this will take a while to accumulate). If a surplus of fees are recovered, then this should be used to ensure the OFT remains properly resourced (as a priority) and not siphoned into other government areas inappropriately.

Question 18: Online booking services could be charged a nominal fee per property if there is a shortfall.

Question 19: Yes

Question 20: The letting platforms could report to the Government, although we need to be mindful that STRA owners may list on more than one platform and the report needs to integrate so that they receive correct information (and an STRA has consolidated information across all its platforms). This could be achieved through the common registration number which could be collated by a Government database.

Question 21: The costs to industry would be negligible and easily absorbed in commission structures, if necessary. The registration process would allow an STRA to confirm its figures across multiple listings.

Question 22: There should be NO Government funding. This process needs to be self sustaining and independent.

Questions 23 to 26: If people were encouraged (through my comments in Question 5) to register and which will allow them to achieve accreditation/quality ratings, then guests would soon learn to be looking for accredited/registered choices. If an STRA is not registered, the OFT should have a process which allows people to simply question an STRA's registration – either via searching the register database (publicly available which would

confirm registration and star rating) or by reporting a suspicious STRA. Once industry and guests become used to this process, there will be no need for audits.

Questions 27 to 29: The collection of data ideas are reasonable. Hosts should be able to access and as appropriate update their data (ie. Add in extra nights to their registration to make themselves “super hosts”). It is all about encouraging compliance and rewarding good behaviours/strategies for STRAs.

Questions 30 to 32: Local Councils should have no input into the process. Tweed Shire Council has proven that Councils can not be trusted to act inside their mandates without party political influences. Specific information should not be generally available to the public but STRAs could work towards increasing their ratings for compliance and great service through providing evidence to the OFT about what a great job they are doing (via star rating system).

Question 33: I would suggest that given the delays already experienced and the significant input the industry has had into this regulation, a six month time frame would be sufficient – definitely no more!

Question 34: It is very important that the reforms are promulgated URGENTLY and certainly before the coming Summer High Season. Tweed Shire Council have ‘taken licence’ to smash hosts out of the industry during the prolonged hiatus since passage of the August 2018 legislation. This is wrong (and suspect) as discussed in the covering letter.

Questions 35: Fair and reasonable – BUT NO FURTHER DELAYS please.

Question 36: Councils in key tourism areas (particularly the Tweed Coast and Byron Bay) should be given serious warnings to get with the NSW Government program NOW, or else. People entrusted to operate under the rule of law are behaving questionably in the hiatus period, against the general good and should be not only stopped, but bought to account.

Thanks Doug

I thought the attachment didn't upload so I'm glad of your contact. It is now attached. I assume the message went through but I'm copying it here just in case :

Comments on draft Code of Conduct for Short Term Rental Accommodation are attached. I have used the comments tool and hope they are all saved. There are 24 comments. I believe selecting "comments" on right hand side will reveal these if they do not at first show up. Please call or email me if you cannot see them . 0402830872.

I am commenting from the perspective of a strata scheme. In particular, I have in mind small schemes where STRA issues are highly noticeable. My comments, however, would equally relate to a scheme of any size if properly managed. The Code, I believe, needs to consider a fit with requirements of the Strata Schemes Management Act. I would think most STRA difficulties arise within strata buildings and I hope my perspective is useful. Sorry if comments are repetitive - I discovered things as I moved through the code. You should be able to evaluate holistically and consider the best fit. I intend to comment on other documents, given time, and hope you can group my comments. Margot Homersham.

Margot

Good morning Margot

Thank you for your submission on the Government's proposed draft instruments and Regulations.

Unfortunately the attachment you provided with your submission does not appear to have come through.

If you could send it to this email, I'll ensure it gets submitted through with the rest of your submission.

Thanks

Doug

I am writing in regard to short term letting, airbnb. My husband & I live in an apartment complex We firmly believe that STL, airbnb, should not be foisted on apartment residents when it is not wanted. If the Owners Corp have gone to the expense & trouble of having a by-law that prohibits same, then it is incomprehensible to even suggest that it can be overturned without another bylaw with majority agreement or ignored. Our O.C has had this special bylaw in place for over 12 months (100% support) & now residents are very concerned that some authority who doesn't even live here, could even consider forcing their wishes on us. By all means, allow those apartments who want it, & have a majority in agreement, go ahead. But a lot of us have spent a lot of money selecting a quiet residential block to call

home.

I understand that airbnb is causing havoc in many overseas countries & in New York, the host has to be present.

Hi, my name is Tina, I am a resident and a committee member in Sydney Olympic Park. I would like to take this opportunity to rise a few points. 1. Registration fee should be in place, the Airbnb owner should pay a bond with the department. 2. Each Airbnb units should also need to register with each building's strata and building management to help to monitor the activities. 3. The department of planning also should engage local police for illegal activities or noise complaint more seriously. 4. Each unit should not be rented more than X amount of days per year. 5. The unit must be managed by the owner themselves as the owner should be showing the renter how to use the building's facilities. 5. Strata should have the power to fine responsible units for common property damages.

I own a holiday house in the Casuarina area and believe strongly that as a home owner we should have the right to earn some income from this asset in order to afford to keep it. I completely understand that neighbours needs to be respected with regards to noise etc - but I would vote strongly for allowing short term holiday letting

**Submission**

The Department's proposed STRA legislation, conduct codes etc are fair to all parties and very much needed in NSW.

Prior to our 2016 relocation from Melbourne to the Coffs Coast, we had no experience of strata living and no exposure to STRA activities. We live in a beachside townhouse in a complex of 7 townhouses (KBay Townhouses, built late 2004) and hence, we now have strata living experience (some downsides). Previously, our townhouse was an 'up market' holiday let and until January 2018, two neighbouring townhouses were used exclusively as STRA (many downsides to our amenity).

Our exposure to living next door to STRA's gave us some insight to some issues associated with STRA activities which I'm uncertain whether the Department's proposed legislation will adequately cover and protect residents.

Kbay's strata managers (SMS Coffs Harbour) were 'tipped off' that STRA activities at KBay were in breach of Council zoning laws and illegal. SMS submitted a complaint to Coffs Harbour City Council (CHCC). Eventually, after 4 months, the 2 STRA townhouses ceased holiday letting. This process for the other 5 KBay owners was unpleasant and we were exposed to financial risks. However, living at KBay is now so much better with no holiday letting activities.

During the referred STRA saga, I experienced dealings and issues with CHCC, KBay STRA owners, holiday letting estate agents, Airbnb and other parties. From these experiences, I would ask the Department whether the proposed STRA legislation will resolve the following issues:

1. Councils to be pro-active with adherence to their zoning laws and stop illegal STRA activity without having to wait for a registered complaint (apparently 200+ illegal STRA's presently operating on the Coffs Coast).
2. Managing agents and STRA platform operators to be held responsible for zoning legality of their STRA clients (Sunburst Holidays & Airbnb both advised me that they were not responsible!).
3. Neighbours to STRA's to be advised of STRA's owners, agents, platforms, contacts etc to sort out problems when they arise (we found it almost impossible to contact Airbnb).
4. No STRA activity in zoning areas where STRA isn't permitted and no exemptions.
5. STRA's within strata's compelled to advise the Owners' Corporation, the strata managers and the strata insurers of their activities and pay for additional insurance premiums and building damage caused by their STRA activities.

From our experiences, we would elect not to live in a complex which has STRA activity or, for that matter, live close to STRA properties.

Please contact me should you require additional information and/or clarification.

Kind regards

John Christie

People must be allowed the freedom of choice to use their homes for short-term rental. This includes houses and apartments. To take this freedom away is a deprivation of the rights of the home owner.

Additional income into households assist with the ever increasing bills that individuals and families face on a weekly basis. This extra income can mean the difference in being able to meet or not meet financial debt such as mortgage and vehicle repayments, school expenses for children, food bills, etc

STHL are totally inappropriate in strata title apartment complexes. I live in a 20 unit complex, 2 of these units are AirBnB properties, the rest are all permanent residents. The guests in the AirBnB apartments are often noisy and exceed the occupancy levels for the apartments. Total strangers have access to the underground car park, where we all store our vehicles and other items, leaving us vulnerable to damages and theft. It is very uncomfortable having strangers wandering around the complex, it is having a negative effect on my right to safe and peaceful enjoyment of my property. I am often approached by these strangers asking all sorts of questions about the STHL apartments and the complex, which I also object to. We chose to live here because it is quiet, not a party place full of holiday makers. If STHL is allowed to continue the complex will become a place more for holiday makers, forcing all the permanent residents out, some of whom have lived here for over 10 years.

**I agree to the above statement**

Yes

I am a resident of a building called Hyde Park Towers in the CBD. As the owner of a very well maintained 1 bed room unit and a small business owner who travels regularly I would like to be able to short term let my unit whilst I am away from it. Not only would this ensure that I make extra money to fund my business and assist with cash flow it will also support other local people and small businesses in the form of cleaners and managing agents.

I see no problem at all with having short term tenants as I will be vetting them and ensuring there are no parties or undesirable characters in my home. The building is 75% rental tenants anyway so there is no real argument that the building will take on anymore wear and tear than it currently does.

Providing affordable accommodation to our towns and cities will only increase visitor numbers and bring further funds into our economy.

I understand that it could be limited to 180 days if this is not your principle place of residence but as an owner who lives in the property most of the year using my asset to bring in much needed funds when I am not in it seems like a very reasonable way to make extra money. Having properties empty across the state when there are people crying out for affordable accommodation seems like a ludicrous idea to me.

The hotel industry has been up in arms about this and that I understand. The people who book and can afford hotels most likely wouldn't book short term lets anyway and vice versa. There is room for everyone in the accommodation industry and as a city SYDNEY is nearly always booked out with all the exciting events that happen here. More accommodation than less seems like a no brainer to me whilst making local people extra income to help with cash flow and in turn further spending in our local economy.

I do hope you will allow this new legislation to go through and allow people like me to use our asset to bolster our local economies.

The key thing for people like me is that buildings that have residential only zoning can be used for short term lets which they currently cannot.

Thank you in advance  
Tiffany Benn

Our apartment block is in Manly and is presently classified as long term lease only. Some blocks next to or near us have short term leasing and it becomes an absolute nightmare, especially in any holiday season.

Many holiday makers seem to throw all caution to the wind once they book into their temporary holiday accommodation. This makes it a living nightmare for the permanent residents.

We're hoping to keep our block as a long term leasing block as it is presently. Life in our block is a lot more peaceful... and safer than any of the short term blocks near us.

September 18<sup>th</sup> 2019

Mr John Tansey  
Executive Director  
Regulatory Policy, Better Regulation Division  
Department of Customer Service

Dear John,

[ASTRA's response to the Draft Regulatory Framework Discussion Paper.](#)

We are pleased to provide our response and thank you for the additional time we have been given.

As an independent voluntary organisation representing a wide constituency of owners and managers, ASTRA's interest is concerned with delivering enduring quality outcomes for the industry.

Rather than professional lobbyists pressing a commercial, competitive or ideological agenda *on* the industry, our members are actual operators *in* the industry. As owners, hosts, owner/managers & licensed agents, ASTRA members will be directly impacted by the new regulations and have hands-on responsibility for implementing the associated changes in their day to day operations and service delivery.

As evidenced by our work with Government over the past four years, we have a different perspective to other stakeholders. Ours view is framed against the background of unrivalled experience at the 'coal face' as operators, and through boards such as the HRIA and National Code Advisory Council.

As a result, we have an objective interest in acknowledging and addressing impacts, backed by a strong focus on improving industry standards to limit issues through solutions which are effective and practical.

Reflecting the range of stakeholders and diversity of views ASTRA represents, this response follows a comprehensive, challenging, and valuable review process to form a united representative position.

The review raised a number of important additional questions in relation to the regulation including: Maximum Guest Numbers, Instant Booking, T&C's, Trust Accounts, and Licensing. As we believe these warrant further investigation, but fall outside the responses requested, we seek the opportunity to present the additional questions for your consideration, without necessarily forming a firm position.

In responding, we thank the NSW Government for its initiative and determination to implement quality ,light touch regulation and recognise the importance of the register as a central mechanism.

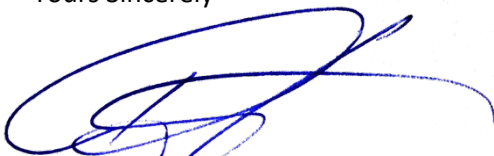

I would also like to acknowledge and thank our regulatory team, all volunteers, for their dedication and hard work through the process of reviewing the Questions and forming this response.

Joan Bird, Lic RE Agent/manager  
Peta Morrison, Owner/manager  
John Gudgeon, CEO, Byron HLO, owner

Allan Evans, Owner/manager, Service Provider  
Phil Spyrou, Manager, Owner/manager  
Zsuzsanna Handelsmann, Assoc Director, Owner

We look forward to working with the NSW Government in implementing this important regulation.

Yours Sincerely

Rob Jeffress  
ASTRA Chair

# ASTRA'S RESPONSE TO THE DRAFT REGULATORY FRAMEWORK DISCUSSION PAPER

September 2019

The Australian Short Term Rental Association (ASTRA), formally known as HRIA, has been an active participant of the NSW regulatory process of the short term rental accommodation (STRA) industry since its inception in 2015/16.

ASTRA represents several groups of the STRA industry participants: the owners & hosts and the owners' representatives either real estate agents or facilitators.

ASTRA congratulates the government for the genuine effort to create a regulatory framework that supports the STRA industry whilst allowing it to develop appropriate standards that the travelling public and industry participants expect.

We have answered all the 36 questions put to us in the discussion paper, but would like to highlight the most important points in our submission:

- **SEPP**
  - Fire safety is too onerous and does not allow for changing technology. We recommend investigation of long life battery operated smoke alarms instead of hard wired systems
  - Day cap – not in favour
  
- **Code of Conduct**
  - The adequacy of the regulations to be reviewed in 12 months
  
- **Registration system**
  - To be developed immediately – ASTRA offers itself as a partner to develop and maintain the database in conjunction with the government.
  
- **Commencement of the regulations**
  - Immediately with the SEPP and the Code of Conduct
  
- **Review of entire regulatory framework after 12 months**
  - Imperative. ASTRA's support of the framework as proposed is based on this review

## Response to Short Term Rental Accommodation Discussion paper

- *Q1 What is your view on the form of and provisions in the STRA SEPP, Regulations and Safety Standards*
  - The STRA SEPP
    - ASTRA welcomes the STRA SEPP. After years of involvement with the formulation of NSW regulations from the *Inquiry into the Adequacy of Short-Term Regulations in NSW* through the *Options Paper* to the present draft regulatory framework.
    - There are several elements of the SEPP that are not in alignment with ASTRA's views but the 12 month review will offer opportunities for changes and amendments.
    - The main issue is that occupancy caps are practically unworkable and will damage economic sustainability. As caps are not effective in addressing any of the impacts identified by the review process, they are also an unnecessary regulatory burden.
    - Overall ASTRA considers the SEPP as a positive step as it provides clarity and settles any dispute about the legitimacy of STRA in a residential dwelling. The SEPP gives owners certainty and the statewide regulatory framework provides consistency thus avoiding duplication, cost and inefficiencies of local hybrid approaches. These are major and far-reaching achievements for the STRA sector.
  - The Regulation
    - As an independent industry association ASTRA recognises that owners and their guests are the key STRA stakeholders. It is the owner's responsibility to ensure that all service providers they employ work within the new regulations. The additional definition concerning the "facilitator category" as industry participants is essential.
    - It creates minimum quality standards for the industry.
    - It removes uncertainty about planning issues, assures properties are safe and compliant, and properly focuses attention on irresponsible behaviour management.
  - Safety Standards
    - ASTRA believes that the *Short-term Rental Accommodation Fire Safety Standard* is going to have a significant impact on the volume of listings as the standard is onerous. It is inflexible in not recognising compliant 10 year battery operated smoke detectors. Many owners will find the compliance too expensive.
    - There is no evidence that STRA poses any greater fire risk than any other complying residential use. In principle, ASTRA supports the Government's concern for safe premises but believes it should consider real risk as opposed to conjecture.
    - It needs to be phased in.

- *Q2 Are there any elements of the draft instrument that are open for misinterpretation or require further clarification?*
  - Yes. The word ‘commercial’ in the definitions will cause confusion and misunderstanding.
  - The use of the phrases: “on commercial basis” or “commercial arrangement” when defining STRA encourages misinterpretation of the approved use of a property.
    - We understand ‘commercial’ is intended to mean that there is a consideration in the STRA transaction, namely it is not free. However, this could have been described by the simple words ‘*payment of rent*’. (In Tasmania they have used this successfully to avoid the undesirable connotation of the word ‘commercial’).
    - Often the word is highlighted by detractors to state that STRA is a business and therefore is an illegal activity in a dwelling in a residential zone.
  
- *Q3 What are your views on new policy elements relating to days, flood control lots & bush-fire prone land?*
  - ASTRA does not support the imposition of day caps. Caps are ineffective in addressing any of the impacts identified by the review process. For a system that provides no tangible benefits, the management of caps will be complex and costly. The use of caps is impractical in the renting of a property that provides STRA to many different categories of guests such as those on contract work, rebuilding, relocating, or requiring extended medical treatment.
  
- Owners rely on regular STRA use to maintain their properties throughout the year. Owners will be forced to focus on peak seasons with higher rates to minimise any loss of income. The focus on high season caps will create booking gaps through the year leaving owners without income to maintain their properties, and local shops, cafes and trades without the guests they rely on in low seasons.
  
- *Q4: Are the general obligations for industry participants adequate? If not, what other general obligations should be considered? Why?*
  - Yes.
  
- *Q5: What types of STRA information will be useful for the Secretary to collect to inform the further improvement of the Code and the STRA industry framework? Why?*
  - Accurate data is needed for the administration of the Code, for tourism, residential and environmental planning purposes.
  - The best avenue for data collection would be through a registry.

- ASTRA has undertaken a review of the information required such as property type, address, LGA, compliance, nights rented, guest numbers etc. to provide data needed for compliance, planning, management and research.
  - The fields suggested in the discussion paper (p16) are comprehensive enough to achieve this objective.
- *Q6. Are the specific obligations on booking platforms, letting agents, hosts, guest and facilitators in the Code adequate? If not, what other obligations should be considered for each of these industry participants? Why?*
  - The obligations appear to be comprehensive and encompassing. The first year of operation under the Code should be used effectively to assess the operation and highlight any weaknesses that can then be addressed.
- *Q7: Is the complaints process detailed in part 6 of the code sufficient? If not, what other matters should be considered or set out in the process? Why?*
  - The process appears to be sufficient, however, until tested it will be difficult to assess effectiveness.
- *Q8. Are the grounds for recording a strike fair and reasonable? What other matters (if any) should the Commissioner consider when deciding whether to record a strike? Why?*
  - The grounds seem to be fair and reasonable; however, the system needs to be evaluated after implementation to measure any unforeseen or unintended consequences.
- *Q9. What are potential ways to facilitate industry participant's access to the exclusion register whilst limiting potential privacy impacts? What factors should be considered?*
  - For the exclusion register to work as intended, industry participants have to have access to fulfil their obligations under the Code.
  - The factor that needs consideration is how this information could be abused and whether there is appropriate legislation or other statutory force available to address such abuse.
- *Q10: Is the review process clear and sufficient?*
  - Yes.
- *Q11. Are the proposed penalty notice offence and civil penalty provisions appropriate? What provisions should or should not be identified as penalty notice offence and/or civil penalty provisions? Why?*
  - Whilst ASTRA is satisfied with the provisions overall, the term 'not minor' is not defined. It is necessary to clarify what this would mean in practice.

- *Q12. Does clause 22b(1) appropriately capture end to end property management services that specifically service STRA properties? Why or why not?*
  - Consideration for other legislative requirements and definitions of property management services in addition to those listed in 22b(2) is required including:
    - undertaking inspections of the property,
    - effecting repairs to and maintaining the property,
    - paying expenses incurred in connection with management of a property,
    - paying accounts for amounts owing in relation to the property
    - advertising the property
    - reviewing the rent
    - transferring rent collected to the owner/host
- *Q13. What other organisations or persons should be prescribed classes of STRA industry participants (if any)?*
  - The current categories are adequate at this stage.
- *Q14. Is it appropriate to exclude the STRA industry participants set out in clause 22C? Why or Why Not?*
  - Yes. They are regulated under another set of instruments.
- *Q15 – What other STRA operators (if any) should be excluded from being covered by the Code?*
  - None.
- *Q16 Is the appeals process clear and sufficient?*
  - Yes.
- *Q17. Which industry participants should contribute to the cost of administering and enforcing the Code? Why?*
  - Ultimately property owners have to take this responsibility as they are the fundamental core of the STRA industry. A property register would be the most effective method to achieve this.
  - If owner industry service providers that facilitate the letting of STRA are required to contribute they will simply increase their fees to cover the cost.
  - Any costs that flow from this regulation will increase the price of STRA.
- *Q18. How should cost be apportioned across different STRA industry participants? Why?*
  - With reference to question 17, this question needs to be reviewed.
  - Who is going to apportion costs?
  - The simplest solution is to raise funds through a fee for registration.
  - It would avoid a long and subjective process trying to apportion costs equitably to a variety of different service providers, who might seek leverage in return.
  - Interest earned on prepayments in Trust Accounts should contribute to funding.

- *Q19. Is the proposed penalty notice offence amount appropriate?*
  - Yes
- *Q 20. How can industry be organised to develop and manage the registration system?*
  - ASTRA supports the introduction of a property register as a key component of the STRA legislative package and a requirement under the Code of Conduct.
  - The industry is built around property owners making their dwelling available for STRA. All other participants listed simply provide services to the owner to facilitate the process.
  - It is the owner's responsibility to ensure that all the participants they engage abide by this new regulation. Collectively, it is in the owner's best interests to develop the highest standards of operation that the Code of Conduct underpins.
  - ASTRA therefore sees a collaborative working partnership between Government and Industry as the most effective approach to managing the registration system in much the same way the Real Estate industry works alongside OFT in NSW.
  - ASTRA, as essentially an owner's association, believes it is uniquely qualified to serve in this capacity with Government.
  - ASTRA has a background of hands-on experience working with STRA owners & managers.
  - ASTRA has a proven record of objectivity in respect of regulation and a focus on targeting and addressing issues and unwanted impacts to assure the best outcomes.
  - ASTRA has actively engaged in working with all stakeholder groups towards the best interests of the industry and been actively involved in developing the original Code of Conduct, through STRA associations including the HRIA, Byron HLO & VicAIA.
  - ASTRA believes that quality education, training and support towards growing industry professionalism and operating standards are just as important to the effective STRA management as the Code of Conduct and Planning regulations.
- *Q21. What would be the costs to industry in establishing and maintaining the register? How would industry propose to meet these costs?*
  - The setup of the Register will require one off establishment funding. Subsequent running costs can be best and easily raised through an annual registration fee.
  - The core of the register is the creation of an on-line database platform, an online website and interactive access to key facilitator to capture data and other inputs.
  - This must be supported by modules to provide generic industry information.
  - A further complex system would be required to monitor occupancy caps if that is deemed a requirement of the initial registration system.
  - Another source of income to establish and support the Register is trust account interest. Enormous amounts of guest booking deposits and prepayments are held at any one time. As with the broader Real Estate regulatory model, the interest earned on deposits and prepayments held in Trust Accounts is viewed as a key source of funding.

- *Q22. What role should the Government play in developing or overseeing the register, if any?*
  - In our view, the Government should have a leadership role in developing and overseeing the register with regard to safe-guarding the data collected.
  - The data will measure the effectiveness of the regulation and guide future amendments.
  - Rather than an isolated operation, we see the register as the central mechanism of a regulatory approach. It could provide an operating framework to establish and maintain quality standards and to assure professional compliance.
  - The register can be the conduit to access education and training, providing forms and templates for Managing Agency Agreements, License to Occupy and T&C's templates.
  
- *Q23. Are there other outcomes a register should deliver?*
  - It is the instrument which owners and managers can utilise to make a formal declaration that they are operating within and accept the terms and conditions set out in the Code.
  - In this respect 'Registration' offers far reaching benefits:
    - Guest confidence that the property is genuine and offered legitimately
    - Guest and community confidence that the property meets industry standards of safety, compliance and quality
    - Community confidence that irresponsible owners, operators and guests will be targeted and excluded
    - Ensures industry participants are professional and compliant and use trust accounts where appropriate
    - It will evolve standards, industry recognition, self-fulfilling operator pride. A Registration Mark can be developed as a badge of confidence and standing. Examples of relevant Registration and other marks include:

- *Q24. How can the approach ensure registration applies to all STRA operators, regardless of how the property is advertised for rent?*
  - If mandated as part of the regulatory package, STRA operators will be required to register regardless of how they advertise.
  - There is a personal benefit for all owners to register. Properly implemented, registration will be recognised as a badge of standing. It would be a condition of the Code of Conduct that both registration mark and number are displayed with

every OTA and professionally managed STRA property listing. Registration will quickly become recognised as a 'qualification' of a professional STRA offering.

- While a comprehensive regulatory approach backed by training, education and generic base T&C's for facilitators will see more benefits for those who comply, it will also clearly distinguish those who aren't registered and are therefore not operating legitimately as part of the mandatory code.
- Registration will also serve to expose and identify those who choose to operate illegitimately. They then can be forced to either address the issues, or voluntarily withdraw from the market.
- *Q25. What audit and verification processes would be needed to ensure accuracy of data*
  - ASTRA has been considering these issues over the past two years and believes accuracy of data can be assured using technology that is common today via a relatively simple 10 step proactive online process. ([see example in Annexure A](#))
  - To streamline the approach, registrants would be required to certify details and property compliance, and upload two key source documents (Rates Notice, Insurance Policy) completing the declaration and issuing a Registration ID with an online payment. Most key information could be verified automatically via online links to Core Logic, OFT, and other relevant sources.
- *Q26. Should there be separate or additional penalties for failure to register? If so, which industry participants should they be imposed on?*
  - Owners or their representatives will be bound to register by the regulation.
  - Failure or refusal to register will invoke the exclusion process.
- *Q27. What information should the register collect? Why?*
  - Referring to p16 of the Discussion Paper, the items listed would serve the basic needs. However, we suggest it could be expanded as per the table attached. [See Annexure A](#)
- *Q28. What role should different industry participants (e.g. hosts and booking platforms) play in the registration process?*
  - Hosts (Owners) have primary responsibility to register. They may delegate this to their representatives. Booking platforms or agencies should not allow any unregistered property to be listed on their platform.
- *29. What role should Government play in the registration process or providing information for the register?*
  - Provide the statutory instrument to make registration mandatory and facilitate access/supply of information by industry participants and relevant bodies.
  - Government should have an oversight role assuring information is secure and protected.

- *30. Should any information on the register be made publicly available? If so, what information could be made available and why?*
  - No. These details should not be made publicly available for privacy reasons.
  - ASTRA doesn't believe this is necessary as the actual number of problems is very low compared to the overall activity.
  - ASTRA operators are required to notify neighbours and provide contacts so that neighbours can readily communicate with owners and managers directly.
  - The register can facilitate connection by forwarding emails for discretionary response.
  
- *Q31. Should industry be required to report registration information, including number of stays (days), to Government and/or local councils? If so, how frequently? Why?*
  - No. Government has set up the legislation and guidelines for responsible management and a system to penalise non-compliance. It is assumed government would have access to specific registry information.
  
- *Q32 Should any information on the register made publicly available?*
  - No. Refer to question 30.
  
- *Q33 How much lead time would industry need to develop & establish the proposed STRA property register?*
  - ASTRA has been involved with the formulation of STRA regulations in NSW since 2016 and has first-hand experience of the process involved and its time element. Following a firm mandate, it will take minimum 12 months and several rounds of hard negotiations, submissions, evaluations in our view just to get to the point where the drafting of the new registration system could start. While ASTRA would like to see the register established and operational as soon as feasibly possible, a conservative estimate is that it will take 18 months to install a register.
  
- *Q34 When should the STRA regulatory framework start?*
  - ASTRA has been promoted the establishment of a property registration system and is disappointed that this has not yet been achieved. In our view the Code will be more effective if it is supported by a robust database of the STRA properties.
  - Despite the above, ASTRA would like to see the ready elements of the regulatory framework, namely the SEPP and the Code of Conduct **commence immediately, with a phasing in period**, because of the many advantages they represent, as below:
    - Both the proposed SEPP and the Code will contribute to the maturing of the STRA industry sector into a legitimate and respected accommodation provider with standards and compliance requirements.

- The SEPP gives recognition to STRA premises as a legitimate permissible use in a residential dwelling and provides for a state-wide decision making process for the planners that is code based and thus uniform and predictable.
  - The SEPP will preempt local councils seeking to impose their own regulations or acting against those properties they incorrectly deem to be non-compliant.
  - The Code will set the behavioral standards of the industry participants, assure properties are compliant, and STRA guests are protected by insurance.
  - The Code will assure better outcomes by addressing unwanted impacts.
  - ASTRA believes these benefits outweigh the reasons for any delay.
- *Q35 Do you support the proposed scope of the review? What additional considerations might be necessary?*
    - ASTRA is very satisfied with the Government's commitment for a review after 12 months.
  - *Q36 What data sources could the NSW Government use to inform the review?*
    - Booking information from online platforms (OTAs) like Airbnb, Stayz, Booking.com etc.
    - Councils' data
    - Fair Trading data relating to the issues or complaints received
      - The nature of the issue or impact
      - Type of property,
      - Location,
      - Strata
      - Issues addressed by pro forma process,
      - Issues which escalate to Tribunal and outcomes
      - Effectiveness of the Code in addressing unwanted impacts
    - Data from the register
      - Properties,
      - Property types,
      - Guest numbers,
      - Facilitator /Operator type

ASTRA has collaborated with a diverse group of stakeholders in developing this response.

The views in this submission are endorsed by HLO Byron and authorised by CEO John Gudgeon.

As a sub-contractor to and participant in the Short-Term Rental Accommodation (STRA) Industry I wanted to provide my feedback on the Government's proposed regulations.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home and support my local community. I understand that the Government has made commitments to support "fair short-term rental accommodation (STRA) regulation" and that the review of the Industry is in responses to the negative impact on community's amenity, namely party houses.

Short-Term Rental Accommodation is an important Australian holiday tradition embedded into the fabric of the Australian culture and is at risk because of the abuse of a few who negatively impact neighbourhood and community amenity such as Guests holding anti-social events like 'Party Houses' and as a result of platforms that promote features like 'Instant Book' which assists bookings for 'Party Houses'.

I ask that the Government be mindful that Platforms have created features like 'Instant Book' with no consequence, Guest's have used 'Instant book' for anti-social behaviour such as hosting a party, hens or buck event suffers no consequence (as they change email address or other identify obfuscation to avoid identify detection) however this burden becomes the property owner and letting agent's responsibility. There must be fair and equitable responsibility and consequences suffered by all parties including Platform and Guest.

The STRA Industry is a significant contributor to the NSW economy and helps home-owners to pay the mortgage and bills, to share their spaces with guests so that they can enjoy and participate with other communities and importantly is a recognised financial driver of regional areas where Tourism dollars are spread throughout the local community such as the local butcher, local café, local tourist attraction and the fishmonger. Over regulation and mis-appropriating responsibility and limiting consequences on Guests and Platforms puts this economic driver at risk at a time when an economic Recession is but mere months away. The draft Code and STRA Regulation unfairly places considerable burden on the letting manager and property owner.

Generally, I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

### **1) STRA Planning Policy Instruments**

a) I strongly oppose the exemption of properties where a host is present.

i. Firstly there is no way to monitor and manage this process and confirm that there is a host present which will result in the creation of a loophole.

ii. By expressly exempting these properties the government is not addressing the scope that the STRA Review sought to review and address namely concerns about the housing affordability, availability and the impact on amenity. If there is to be credibility and fairness then all elements with potential to impact the housing affordability, availability and the impact on amenity by the STRA Industry needs to be included.

b) I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. This is a significant barrier to home sharing who share their home for a few months (cumulative) a year and will make hosting uneconomical which will end up making holidays across NSW more expensive.

c) We are opposed to the potential of day limits in regional areas as determined by local council. Day caps for holiday rentals not only put the economic uplift associated with the tourism sector at risk, but also fails to address the the most consistently cited concern about the industry, namely the impact on amenity.

d) The proposed 21-day cap is limiting and not reflective of the mobile workforce. It is only in rare cases where an employer can afford a consecutive 21 day booking for accommodation to carry out work. Typically, it is Monday to Friday (5 days) and occurring in several blocks. We recommended that accumulative bookings from the same company is the best measure and is managed by Company name and or Guest name.

There are very few guests who have the means to rent STRA for a period of five days several times a year. Typically this represents a corporate/work booking.

e) We do not support limiting the number of guests allowed in a bedroom in its current form. This proposal is particularly problematic for people with close supervision needs, for example babies who sleep in cots, very young children who still sleep with their parents and people with special needs.

We argue for the current short-term rental code, which has worked well for eight years, to prevail on this matter. The current rules allow for two adults per bedroom, plus two for the household i.e. a two-bedroom property is allowed six people.

For properties that are specifically designed to cater for larger groups than what the above rule would allow, we believe that owners should have the power to apply to their local council for development approval to use their property as a short-term rental and cater a higher number of guests.

f) Options need to be provided to the Host/Letting agent to enforce code and/or terminate the occupation of a guest where a code violation is occurring. An example is where community amenity is being negatively impacted such as a party event is occurring the Letting agent needs authority to protect the amenity and terminate violation in the form of a legal and immediate eviction where the financial loss is borne by the Guest in the form of loss of occupation and associated rent paid and the cost of carrying out such a termination.

g) We support a regulatory approach that provides the best balance for consumer safety, community amenity and the contribution of the sector to the economy. For the NSW approach to work properly, it must treat all properties equally - whether hosted or un-hosted, primary or secondary.

h) We believe that 'Terms of Use' and associated agreements used by all participant, including but not limited to; Terms and Conditions, License to occupy, STRA Agreement etc should specifically discourage party houses including the use for bucks, hens events. The strict prohibition of the use of the premise by a Guest for the purpose of holding a party, hens or bucks events should be codified.

It is our recommendation that platforms (as primary booking agent) should be mandated to ensure this is communicated to each guest and that each guest is required to agree and accept this prior to making a booking and when creating an account.

When a guest is found to have contravened this an automatic strike is recorded.

i) Concerning Jurisdiction. Consumer complaints are currently dealt with under the NSW Civil and Administrative Tribunal (NCAT) along with any residential tenancy issues. The establishment of the STRA complaint process sits outside existing established processes meaning that a complaint (matter) could potential be lodge both with NCAT and the STRA Commissioner regarding the same matter and although within the purview of the same responsible office (Commissioner of Fair Trading) different processes and approaches can be applied. It is our recommendation that 'double jeopardy' can occur and can be avoided where the STRA Complaints process is recognised as sole avenue.

j) Whilst there is a definition of Guest given, it needs to include all guests staying at the property despite not being listed as the guest who made the booking and all guests details should be captured during the booking process to avoid violation avoidance.

## **2) Environmental Planning and Assessment (STRA) Regulation 2019**

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests.

However I recognise the importance of consumer safety and I support the NSW Government streamlining safety regulations which:

- i. Respect the ancillary use of my home for home sharing
- ii. Mandate smoke alarms – either battery operated or hard-wired

## **3) STRA Property Register**

**Registration of all holiday rentals** – We are supportive of compulsory and simple registration for all properties listed on a short-term rental accommodation platform. When implemented correctly in other parts of the world, the registration of holiday rentals has proven to be a low-cost and effective way of informing the development of sensible rules for our growing sector.

In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. We would agree to a no cost registration and licensing system.

**Code of Conduct** – the core elements that the regulations and code is seeking to address is; housing affordability, availability and the impact on amenity. With specific regards to impact on amenity it is the abuse of the STRA Industry by guests who hold parties, hens and bucks events that negatively impact on communities.

It is our view that booking platforms that provide features such as true 'Instant Book' enables a culture of guest abuse as these features are for the direct financial benefit of the Platform but remove all interaction with the guest from the host and Industry participant as the booking is completed within the booking Platform and the Host/letting agent/industry participant has no recourse to qualify or vet the guest as all Guest details and communication with Guest is controlled by the Booking platform in a 'Closed Loop Communication' process.

These features are in-fact mandated by Platforms and Letting Agents are penalised by the Platform if they a) do not accept this booking type b) do not accept this type of booking by negatively weighted listing results. A host/ Industry participant that offers and accepts true 'Instant Booking' is given a higher favourable weighting listing result by Platforms in how the booking platform algorithmically represents its search engine results.

True Instant booking occurs via both Airbnb and Booking.com, they are the offending platforms. Stayz/Homeaway offer "Instant Booking" which is in-fact an instant reservation where the host/letting agent/industry participant still has full access to Guest information, ability to communicate with guest to vet and qualify and is not penalised (yet) for not offering or accepting "Instant Booking" requests.

On this basis we believe true 'Instant Book' features should not be available within any Platform and should be mandated by the STRA Code and Regulation.

**Industry participants Obligations** - I support the Code of Conduct which overall is reasonable and representative of the home sharing community and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to require all letting activities to be conducted only by Licensed Real estate agents and that the use of independently audited Trust Accounts be mandatory to ensure protections for guests, host's and landlords is preserved. This provides consumer protections that are already well established and accepted and extends safe guards such as financial management through the use of Trust Accounts, professional insurance such as Professional Indemnity for Real Estate and a well established and robust regulatory framework.

**Guest Definition** – A guest booking is typically made in one name only, yet a premise may sleep more than one person. The overwhelming majority of STRA premises sleep greater than one person though only one person, the primary Guest details are captured.

It is our belief and recommendation that all persons staying at the property are required to provide adequate identification at time of booking & managed by the Platform to satisfy the Registry to avoid:

- Identity Obfuscation and
- Rorting of the strike/exclusion registry.

When a member of a group booking e.g Primary Guest is found to have violated the Code they can simple either obfuscate their name OR ask another member of the group booking to make a different booking in their name to avoid detection. This way all members of the group booking who participated in the violation are not being held accountable for their actions

**Code Definition** – The Government via the STRA Code of Conduct and Regulation seeks to address the community and neighbourhood amenity however definitions of community and neighbourhood amenity need to be established. What is considered and defined as reduced community amenity, is it a Party, hence of bucks event?

We strongly believe that a events such as party, hence of bucks need to be defined as inappropriate and included as prohibited events within the Code and that all parties that participate, arrange, hold and or market such events should be held accountable

**Complaint registration** – We believe that the cost of lodging a complaint by all parties to be set at \$150 or half the maximum actual fee of providing the service as determined by the Commissioner or whatever is the lessor. This financial hurdle is to discourage frivolous and vexatious complaints.

**Strikes** – The proposed ‘two strikes within two years’ for both Guest and host/letting agent/industry participant is unfair and burdensome and clearly weighted in the favour of the Guest. A guest typically books short term holiday accommodation only once per annum however a host/letting agent/industry participant facilitates a multiplier of 700X. That is, a typical host/letting agent/industry participant facilitates approx. 700 – 1100 guest bookings per annum and therefore the applied percentage exposure to one (1) strike pa is greater than that of a Guest.

Therefore, it our recommendation that the limit should be:

- Guest - two strikes within two years.
- Host/letting agent/industry participant - five strikes within two years.

When a complaint is upheld and the source of the guest booking is found to be a certain platform in five (5) or more occasions within a one year period the platform is penalised by \$100,000 each instance commencing five and more. Up until ten instances within a one year period and then the platform is added to the exclusion register for five year period.

**Strikes, nature of complaint** – The proposal for a complaint to be valid because of ‘misrepresentation of the state of the STRA premise’ is vague and open to abuse. Within the current Real estate regulation there exist definition and example of how this is treated for residential properties and we believe these should be adopted as they are already industry wide accepted with an established regulatory framework.

Additionally we believe that a complaint should be found valid and a strike recorded when the published, communicated and accepted Terms and Conditions of the letting have been accepted by a Guest and not followed. With special attention to where and when instances of parties, hens and bucks events have been expressly banned by the host/letting agent/industry participant are found to occur as the host has contravened the accepted Terms and Conditions.

**Complaints** – The current proposal of registering a complaint is open to abuse by serial complainants as there is no recourse of consequence for a person who acts vexatiously or mischievous intent to frustrate the normal operations of a small business.

We propose that when two complaints within a two-year period are found not to be upheld by the commissioner then the complainant should be treated and recorded as vexatious and not to be relied upon.

**Supporting Evidence** – to avoid vexatious and unsubstantiated complaints it is our submission that each complaint:

a) Must be accompanied by supporting evidence including but not limited to:

- Was the defendant informed of the code violation,
- Was the defendant given opportunity to resolve the matter,

- Documentary evidence, photos, videos, Statutory Declaration, security company report, police and or council ranger report

*In the instance where a community amenity is being negatively impacted on such as a party event is occurring (existing draft code unfairly and solely holds letting agent/property owner responsible)*

b) The Burden of Proof needs to be on the complainant

**Exclusion Register** – The burden of being registered on the exclusion registry exempts Platforms from consequence and unfairly lays responsibility directly at the feet of those with lack of resources to argue their case. Currently there exists no provision for Platforms to be subject to complaint, review and added to the Exclusion Register, there needs to be.

There must be consequences for Platforms and we propose that if complaints are upheld and are to be found to have occurred via the use of a certain platform then that platform needs to be held accountable.

We suggest that in the instance of ten (10) complaints are valid and upheld by the commissioner within a one year period then the Platform shall be equally listed on the registry and equally not permitted to participate within the STRA industry for five years.

**Exclusion Register** – Fees and cost recovery should be recovered by all participants including guests and should be self-funded by way of penalties and fines incurred by Industry participants. This avoids any revenue raised via penalties not being rolled up into general consolidated revenue by Government but go directly to the area of industry (Tourism) that needs support.

Additionally, the mechanisms for costs recovery by appropriation according to; number of premises, number of days, STRA revenue and upheld complaints does not apply a provision for Platforms.

Platforms generate hundreds of Millions of dollars each year within NSW STRA Industry and should a) pay proportionately and b) should face consequences and penalties proportionate to their revenue and market dominance.

**Penalties** - When guests are found to be in violation of Code and penalties are applied they need to be applied to all parties who were present during the occupation. The current

proposed amount should apply to each Guest equally. Penalties need to be applied to all guests who stayed at the property during the instance of violation and not solely borne by the guest who made the booking.

This financial deterrent will assist in meeting the aims of the Regulation and Code namely reducing the negative community impact on neighbour amenity.

***Register Data Collection and Management*** - How will data be recoded and stored? What type of data will be captured and used to identify participants?

### **Property & Complaint Register**

It is our view that Platforms need to automatically check each guest before taking a booking against the register.

To avoid guest identity obfuscation a minimum:

- Full name
- Driver license details
- Full address
- Email address
- Mobile phone number and
- Date of Birth

is provided as mandatory.

The reason for all of these details is it is very easy to change an email address, insert a middle name or initial to avoid identity matching. Additionally, this will also removed the risk of incorrectly identifying the wrong Sarah Jane or Robert Smith.

**STRA Regulatory and Code Commencement** – The changes proposed are significant and costly, they represent complex adjustment just as the national economy is poised for a recession.

Typically the height of business activity for the STRA Industry commences from the October long weekend through mid-March we recommend that any commencement begin after that period. The ideal period is after the Financial year has concluded so therefore beginning of September.

Both the Government and STRA industry need considerable time to design and implement education and awareness initiatives with several audiences:

- General Publish – Guests
- Letting Agents
- Hosts
- Property Owners
- Industry participants, and
- Platforms

Regarding the changes. Furthermore, those carrying the burden of the proposed changes, the Property Owners and Letting Agents need time to finance and organise the complex compliance.

Furthermore micro and small businesses, the backbone to the NSW economy that act as Letting Agents need to finance and support the training of staff, update websites, legal agreements, systems and processes need to be reviewed and updated to reflect the changes and new obligations of parties. This is not insignificant and for micro and small businesses represents a significant financial hardship.

Given these factors and that we are faced with the very real prospect of a recession we believe a staged approach that provides time for necessary changes to occur and for the phasing in of different components being:

- 1) Stage 1 September 2021 Register Commences
- 2) Stage 2 September 2022 Code of Conduct Commences
- 3) Stage 3 September 2023 Review of Regulation and Code commences
- 4) Stage 4 May 2024 Review of Regulation and Code complete
- 5) Stage 5 July 2024 Review of Regulation and Code findings released
- 6) Stage 6 September 2024 Review of Regulation and Code findings adopted

This phased in approach also neatly address how to apply changes to future accommodation that is booked prior to commencement. Typically accommodation is booked up to 18 months in advance, there can not be two systems/two processes and or two different legal treatment applied to bookings based on Commencement date. A timely staged approach ensures that there is the right approach for all boeing situations.

**Scope and Administration of Review-** how will the social and environment impact be measured? Will the economic benefits/impact be equally measured to quantitate disruption to the NSW economy and regional economies?

Who, where and how will the review take place? How will public comment be sought and how long will the review process take place? How will the success be measured?

As the NSW Government considers how people travel and use their homes today we respectfully submit that we don't need severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems. With the downturn in the economy we need stimulus not curtailment of the NSW economy.

It is the technology that the Platforms provides like 'Instant Book' that is abused by guest's to avoid vetting and qualification by letting agents and it is the Guests wilful anti-social behaviour that goes with limited scope of consequence. These two behaviours by the Platform and Guest is unfairly carried by the letting agent and property owner. We submit that it is these two participants (Platforms and Guests) where greater scrutiny and control should be applied.

Our communities rarely had these issues before Airbnb and Booking.com came to our shores.

Thank you for considering my submission.

Kind Regards,

## SHORT TERM RENTAL ACCOMMODATION

A new regulatory framework – Discussion Paper, August 2019

City of Sydney – Response to questions

---

### Planning Instruments:

#### *1. What is your view on the form of and provisions in the STRA SEPP, Regulation and Safety Standard?*

In addition to the concerns raised in our covering submission we have a number concerns which are outlined in the responses to the questions below.

The City is concerned that the proposed framework will facilitate illegal backpackers or boarding houses by characterising the use as STRA which will create further barriers to obtaining sufficient evidence adding further compliance costs to councils. Under existing legislation the City has successfully prosecuted overcrowded and unsafe residential premises for operating an unauthorised boarding house or tourist and visitor accommodation.

**Recommendation:** Include a provision that excludes STRA offered on a per bed basis, that is, a bedroom or premises may be offered for rent but not a bed.

*Part 1 Clause 4 – Definitions.* The definition of ‘short term rental accommodation’ does not require accommodation used for STRA to be the primary residence of the host. It is open to STRA operators to have multiple properties let on a commercial basis without it being used as a dwelling at all. In the high demand tourist market in inner Sydney this gives rise to a real risk of a significant amount of residential accommodation being transformed to tourist and visitor style accommodation with significant impacts to the affordability of the housing market. For example, there are about 10,000 Airbnb listings in the City of Sydney LGA. Of these, 62.5% are for entire homes. 34% are characterised as highly available meaning they are likely to be ‘investment’ properties where the host is not present. 36.1% of hosts have more than one property listed. (<http://insideairbnb.com>)

**Recommendation:** That STRA is limited to where the host is the permanent resident of a dwelling. This would address concern about loss of residential stock available for longer term rental, make compliance more cost effective, yet still support homeowners and residents who wish to participate in the share economy. It would significantly reduce adverse amenity impacts as permanent will address the issues in a more timely manner as they are more active participants in their local communities.

*Part 1, Section 3, describes the ‘Aims of Policy’* to include the support of STRA as ‘a home sharing activity’. Home sharing is only one element of STRA. There is also a commercial element, where STRA is engaged in by commercial operators who may have no connection to the premises or the neighbourhood. These investors often have multiple properties and results in residential apartments being turned into tourist and visitor accommodation.

**Recommendation:** The policy should be drafted to reflect its stated aim including requiring a ‘host’ to be a permanent resident of the dwelling and deleting the dispensation for un-hosted stays over 21 days.

*Part 2 Clause 9 sub clause (2) (c) (ii)* needs clarification as all Class 2-9 buildings would have fire safety measures.

*Part 2 Clause 10 (2) (d)* would be in direct conflict with some of City of Sydney Development approvals that state that short term stays are not permissible. Also the wording should be amended to relate to all relevant operative consents applying to the building, not just the most recent.

*Part 3, Division 1* needs additional criteria to integrate the regulatory framework including a criteria requiring registration and a criteria excluding STRA in strata buildings that have opted out from STRA.

## **Fire Safety Standard**

The City's main concern is that it is not appropriate to address detailed fire safety measures as proposed within an exempt development framework as there is a lack of certainty that the measures will be installed correctly and maintained appropriately. We also have concerns about the following aspects of the Fire Safety Standard:

- The reference to evacuation lighting in Section 4.2.1 needs further qualification to ensure that the actual form of lighting does assist occupants in the event of fire as STRA occupants would not be as familiar with the premises as longer term residents.
- Section 5.4.1 needs to clarify that self-closing doors are to be certified when installed and performance requirements to an appropriate standard.
- The fire safety standard should be supported with a guide and diagrams not dissimilar to the National Construction Code, Volume two, as detailed within Part 3.7.5.

### ***2. Are there any elements of the draft instrument that are open to misinterpretation or require further clarification?***

The City's response has been detailed in response to other questions throughout this submission.

### ***3. What are your views on new policy elements relating to days, flood control lots and bushfire prone land?***

The proposed 180 day maximum for non-hosted STRA is considered excessive as exempt or complying development. This is further exacerbated with the introduction of the 21 consecutive day exemption, where any 21 consecutive day booking is not counted within the 180 day maximum. It increases the potential for property being entirely rented on a commercial basis and being withdrawn from the housing market. It makes it questionable that it could be reasonably considered an ancillary use of the dwelling. The 21 day inclusion currently has no limit on the maximum length of stay or any other restriction on its application, and could be utilised for longer-term visitors 365 days a year, in direct conflict with the Residential Tenancy Act 2010.

## **Code: Industry participants' obligations:**

### ***4. Are the general obligations for industry participants adequate? If not, what other general obligations should be considered? Why?***

General obligations are not adequate and a mandatory registration system administered by government is required to ensure effective oversight of the industry and to support existing powers to regulate.

The proposed regulatory framework obligations are too fragmented. For example, the framework does not provide a clear nexus between the planning controls and the code of conduct. As proposed that STRA be exempt development provided certain provisions have been met however the framework could be strengthened to require certification of compliance with the fire safety measures be submitted to Fair Trading prior to engaging in STRA. The proposed framework will not provide adequate measure to manage the risk that that STRA providers will not register stays, and not provide suitable fire safety upgrades. There is no facility for authorities to assess compliance and given that these are residential properties, access can only be obtained with the occupiers consent or a search warrant. This make investigation more time consuming difficult and resource intensive than investigations for unauthorised uses under the Environmental Planning and Assessment Act.

**Recommendation:** That the exempt development criteria in the SEPP require registration to support a comprehensive planning and compliance framework.

*5. What types of STRA information will be useful for the Secretary to collect to inform the further improvement of the Code and the STRA regulatory framework? Why?*

Records of stays should be collected so that a complete record of how premises are being used and use this data to evaluate impacts and inform further policy development. In addition, participants should be required to produce a certification of upgrade of fire services and records of appropriate insurances prior to engaging in hosting STRA.

*6. Are the specific obligations on booking platforms, letting agents, hosts, guests and facilitators in the Code adequate? If not, what other obligations should be considered for each of these industry participants? Why?*

No. The current obligations are not adequate.

There is too much opportunity for providers to operate outside the Code by not using booking platforms or agents, and in the absence of a requirement to register. To encourage compliance it is critical that the Exempt and Complying Development Standards of the STRA SEPP require registration of STRA premises prior to commencement of the use, and that the STRA participant is bound by the Code of Conduct subject to a limit of the criteria to register to enable simple test of compliance. The Code should also include the requirement that no bookings can occur by booking platforms, letting agents or any other means unless properties are registered.

## **Code - Complaints:**

*7. Is the complaints process detailed in part 6 of the Code sufficient? If not, what other matters should be considered or set out in the process? Why?*

Part 6.2.4 of the Code of conduct stipulates that the Commissioner can only accept a complaint based on a contravention of planning law if accompanied by evidence of completed enforcement action taken by council. Further clarification of the meaning of enforcement action is needed. It appears that Council will be the first port of call for complaints and this will have significant resourcing problems for councils. Many breaches of the standards will be very difficult for councils to investigate and achieve the requisite level of proof that could be considered completed enforcement action.

## **Code - Compliance & Enforcement:**

*8. Are the grounds for recording a strike fair and reasonable? What other matters (if any) should the Commissioner consider when deciding whether to record a strike? Why?*

Our concerns regarding the complaint process are outlined in question 7 and we have no additional comments.

*9. What are potential ways to facilitate industry participants' access to the exclusion register while limiting potential privacy impacts? What factors should be considered?*

Given that the current proposal is for the register to be industry run, there are questions about how Council would access the information on the register for compliance. For the Code of Conduct to be effectively administered, and complaints appropriately investigated the register should be accessible to the public.

It should be recognised that STRA industry participants are operating a commercial business, and it is likely that *Privacy and Personal Information Protection Act* does not apply. There may be privacy considerations in relation to the personal information of complainants and guests.

**Recommendation:** That persons undertaking STRA should be shown on the register and any action against them (pending or other) needs to be shown to allow for transparency and to enable other authorities to act as required.

*10. Is the review process clear and sufficient? What other matters (if any) should be considered? Why?*

The City does not suggest any additional matters for consideration.

## **Code- Penalty Notices & Civil Penalties:**

*11. Are the proposed penalty notice offence and civil penalty provisions appropriate? What provisions should or should not be identified as penalty notice offence and/or civil penalty provisions? Why?*

There needs to be more flexibility in the amount and type of fines, for example, minor breaches may attract a smaller penalty than currently available.

## **Amendment Regulation – Prescribed classes of STRA industry participants:**

*12. Does clause 22B(1) appropriately capture end to end property management services that specifically service STRA properties? Why or why not?*

The City has no additional suggestions in response to this question.

*13. What other organisations or persons should be prescribed classes of STRA industry participants (if any)? Why?*

The City has no additional suggestions in response to this question.

## **Amendment Regulation- STRA industry participants excluded from the code of conduct:**

*14. Is it appropriate to exclude the STRA industry participants set out in clause 22C? Why or why not?*

Yes, they are regulated by other pieces of legislation or do not need to be regulated by the code.

*15. What other STRA operators (if any) should be excluded from being covered by the Code? Why?*

The City has no additional suggestions in response to this question.

## **Amended Regulation- Appeals:**

*16. Is the appeals process clear and sufficient? What other matters (if any) should be considered? Why?*

The City has no additional suggestions in response to this question.

## **Amended Regulation - Fees and Cost Recovery:**

*17. Which industry participants should contribute to the cost of administering and enforcing the Code? Why?*

Consideration could be given to a registration fee on any STRA accommodation to cover the additional costs of administration and enforcement.

*18. How should costs be apportioned across different STRA industry participants? Why?*

The City has no additional suggestions in response to this question.

## **Amended Regulation - Penalties:**

*19. Is the proposed penalty notice offence amount appropriate? Why or why not?*

A penalty notice of \$550 is at the lower end of the penalty scale and as such is not considered a significant enough deterrent to non-compliance when considered in respect to the potential cost of compliance.

## **Proposed Industry led property register:**

*20. How can industry be organised to develop and manage the registration system?*

Registration should be a government responsibility as outlined below.

*21. What would be the costs to industry in establishing and maintaining the register? How would industry propose to meet these costs?*

This question is for industry and therefore the City has no additional suggestions in response to this question.

*22. What role should the Government play in developing or overseeing the register, if any?*

Registration should be mandatory and administered by government. It should include:

- confirmed Development consent where available
- recognition of allowable number of bedrooms,

- confirm the use, class,
- inclusion of an annual fire safety statement.

Failure to register should be a separate offence and also means the property cannot be exempt or complying development under the propose SEPP. It can be dealt with by Council as development without consent.

Any registration should be via a Government website with either a certification mechanism (or at least some voluntary check list) that compels the STRA industry participant to acknowledge their agreement to, and that they are bound by the Code of Conduct.

When registering, the STRA industry participant should also state that Fire services are installed to a Standard and by a recognised person, that there is a Development Consent for the property to be used as residential, that the building has an Occupation certificate, and to confirm the number of consented bedrooms. A penalty should be created for false reporting.

***23. Are there other outcomes a register should deliver?***

The City has made suggestions in relation to the register in question 22 and has no additional suggestions in response to this question.

***24. How can the approach ensure registration applies to all STRA operators, regardless of how the property is advertised for rent?***

By requiring all STRA hosts to be licenced and by imposing a yearly registration fee for STRA use.

The Exempt and Complying Development Standards of the STRA SEPP requiring registration of STRA premises prior to commencement of the use.

The Code requiring hosts and properties to be registered and that no bookings can occur by booking platforms, letting agents or any other means unless properties are registered.

Offence provisions for hosts undertaking STRA and for booking platforms, letting agents or any other means undertaking bookings, without the premises being registered.

Working with the STRA industry to be on board with the new regulatory framework and to communication the requirement to register and incorporate this into systems prior to being able to book.

Clear communication by the government to the public of the introduction of regulatory framework and penalty provisions, to promote compliance. Communication also with major social media platforms or other media which may also be used to advertise bookings, requesting they inform the users regarding the introduction of regulatory framework and responsibility to be registered.

***25. What audit and verification processes would be needed to ensure accuracy of data?***

Powers need to be given to the Department of Fair Trading to require yearly mandatory inspections to monitor compliance. This mandatory inspection regime would need to form part of the registration process.

This should not be referred to council to administer unless appropriate resourcing is provided to each Council from the State to cover the increased cost burden that such a scheme would require.

***26. Should there be separate or additional penalties for failure to register? If so, which industry participants should they be imposed on?***

Yes. The penalty would need to be sufficiently high to deter noncompliance. In deciding the appropriate penalty, consideration should be given to the fixed penalties prescribed through the Boarding Houses Act for failing to notify particulars about a registrable boarding house, being \$8,250 for a corporation and \$4,125 for an individual.

There should also be a penalty for providing false information in a registration application.

***27. What information should the register collect? Why?***

To address amenity and safety impacts as well as facilitating compliance the register should collect at a minimum the following information:

- Development Approval, Occupation Certificate where available
- Number of bedrooms
- Class of building under the National Construction Code
- Annual Fire Safety Statement
- Certification of additional fire safety provisions
- Proof of insurance
- Confirmation from the Strata show that confirms the strata building has not opted out of STRA

***28. What role should different industry participants (e.g. hosts and booking platforms) play in the registration process?***

Booking platforms should register days of use. Hosts should be responsible for registration. Booking platforms also need to be satisfied that the host is compliant.

Booking platform or letting agent must require the host to be registered before being able to use the booking platform. Significant penalties should apply if they don't.

***29. What role should Government play in the registration process or providing information for the register?***

See response to questions 20 and 22.

The Department of Fair Trading should be responsible for the checking of other aspects such as applicable insurance, fire up grade certification, 'Strata opt in' etc. prior to registration. The registration should be via a Government portal.

***30. Should any information on the register be made publicly available? If so, what information could be made available and why?***

Yes, in order for the Code of Conduct, register and complaints process to be effective, the information should be accessible to the public.

If the information is not made publically available it should be available for the information and use of council officers undertaking investigations in relation to alleged breaches of the legislation in this area.

**31. Should industry be required to report registration information, including number of stays (days), to Government and/or local councils? If so, how frequently? Why?**

Yes, in order for consistency and effectiveness of regulation, the Register should be enabled to function as a single source of data for investigation purposes. This information should be reported to Council monthly.

It is noted that there are difficulties in regulating the number of days and occupants due to the transient nature of guests.

**32. Should any information on the register be made publicly available? Why?**

As previously stated, all information re STRA needs to be freely available to the general public if confidence in the process is to be maintained.

## **Commencement of Regulatory Framework:**

**33. How much lead time would industry need to develop and establish the proposed STRA property register?**

This question is for industry and therefore the City has no additional suggestions in response to this question.

**34. When should the STRA regulatory framework start? Please provide reasons.**

It should start at the same time as the register. Registration of participants is essential for effective regulation of STRA.

## **Review of regulatory framework at 12 months:**

**35. Do you support the proposed scope of the review? What additional considerations might be necessary?**

Yes.

**36. What data sources could the NSW government use to inform the review? How can industry and councils assist with data collection for the review?**

Council case managements/customer service data including;

- Number of complaints received by council
- Number of enforcement actions taken
- Reasons for not taking enforcement action

Number of instances that booking platforms provided data when requested by regulatory authorities.

Statistics from booking platforms on STRA listings.

Ms Sandy Chappel  
Director, Housing Policy  
NSW Department of Planning, Industry and Environment  
GPO Box 39, Sydney NSW 2001  
By email: [STHL@planning.nsw.gov.au](mailto:STHL@planning.nsw.gov.au)

Dear Ms Chappel

### **Submission on new regulatory framework for short-term rental accommodation**

The City of Sydney (City) supports the introduction of a new well-conceived regulatory framework for short-term rental accommodation (STRA), which promotes the benefits of the sharing economy, while minimising impact on housing affordability, safety and amenity in high density and high housing demand communities.

While the new regulatory framework addresses some of the issues raised in the City's previous November 2018 submission, many of the fundamental concerns remain, and the introduction of new aspects raises further concerns.

The City's primary concern is that the proposed regulatory framework fails to address the impact it will have on housing affordability, particularly on the rental market. The City's draft Local Housing Strategy recognises that in the last decade, Sydney's liveability has been challenged by the decreasing affordability of its housing. This problem has become particularly acute in the inner city. Responding to the affordability crisis is a critical issue for all levels of government. The decline in housing affordability, and the inability of everyday people to access housing that is affordable close to their community and their work, is having an increasingly detrimental impact on people's ability to make a positive contribution to the City's socio-economic diversity, which underpins the city's rich social fabric. The ongoing loss of key workers is also a concern. It is increasingly difficult for essential employment sectors to fill employment vacancies and staff shifts. This hampers business productivity and by extension the wider economic growth of Sydney.

To address this critical issue the City has included the following actions in our draft Local Housing Strategy:

- *Action 3.6 Advocate to the Australian and NSW governments for action to reduce upward pressure on housing prices and rents and improve housing affordability.*
- *Action 3.8 Advocate to the NSW Government to mitigate the displacement of private rental housing from the market by short-term rental accommodation, such as Airbnb.*

To address Sydney's worsening affordability crisis, the City has set a target of achieving 7.5% of all housing in the city as affordable housing for lower income households. Since 1998 the City has in part or whole facilitated the provision of about 1,300 affordable rental housing units (built and in the development pipeline). Council and the Central

Sydney Planning Committee has also adopted the Planning Proposal: Affordable Housing Review to further increase provision. The Planning Proposal was referred to the Department of Planning, Industry and Environment in September last year and the City is yet to receive a response.

The planning policy proposed allows the use of dwellings on a commercial basis as a 'tourist and visitor accommodation' investment option, including in areas where these uses are currently prohibited by Sydney LEP 2012. It create will create the opportunity for property owners to choose to remove existing long-term rental dwellings or other types of residential to be converted into commercial based STRA, reducing the supply of rental housing and driving up rental prices. As cited in the City's previous submission, research undertaken by the University of NSW demonstrates that a significant proportion of properties being listed on booking platforms in high demand tourist destination areas, such in the Sydney City area, were short-term letting businesses, rather than examples of the sharing economy. The increased competition by investors acquiring dwellings for commercial STRA use is likely to place upward pressure on property values affecting owner-occupier housing affordability.

The new regulatory framework should be amended to clearly differentiate between a home owner/occupier who rents their home or a room for several weeks a year and an investor who may potentially rent multiple properties on a short-term basis for a better economic return. The latter should only occur with development consent as a tourist and visitor accommodation in zones where permissible. In this regard, the new regulatory framework also conflicts with the objectives of the R1 General Residential and R2 Low Density Residential zones of the *Standard Instrument – Principal Local Environmental Plan*, where residential zones are *to provide for the housing needs of the community*.

The City previously recommended that STRA must remain compatible with a dwelling's primary use as residential accommodation and to ensure this, the host must be clearly defined as the long-term primary resident. The STRA definition as proposed allows the host to be the owner of a dwelling but does not require them to be a permanent resident, allowing an owner to lease property as commercial STRA. Such use is defined as tourist and visitor accommodation rather than an ancillary use of a dwelling. To minimise impact of STRA, the City continues to be of the strong view that the definition of STRA must restrict a host to being the permanent resident of the dwelling.

The SEPP needs to be amended to make clear that the proposed planning mechanisms restrict the permissibility of STRA, so that development consent cannot be granted beyond the exempt and complying development criteria. The City supports the proposal to have no development application pathways beyond the exempt and complying criteria but remains concerned that the STRA SEPP may inadvertently permit STRA where it is currently prohibited.

The proposed 180 day maximum for non-hosted STRA is considered excessive as exempt or complying development. This is further exacerbated with the introduction of the 21 consecutive day exemption, where any 21 consecutive day booking is not counted within the 180 day maximum. It increases the potential for property being entirely rented on a commercial basis and being withdrawn from the housing market. It makes it questionable that it could be reasonably considered an ancillary use of the dwelling. The 21 day inclusion currently has no limit on the maximum length of stay or any other restriction on its application, and could be utilised for longer-term visitors 365 days a year, in direct conflict with the Residential Tenancy Act 2010.

To minimise impact of STRA, the City reiterates the exempt and complying development standards for non-hosted STRA should be restricted to at most 90 days a year with councils being able to decide the appropriate the number of days for their area up to that

maximum. The Local Planning Direction 3.6, currently only applying to Byron Shire Council, should be opened to all councils to make the case for a reduction in the number of days of non-hosted short-term rental, or at least this also apply to the City.

Registration and implementation of the code of conduct is essential to ensure full transparency, promote trust and confidence in the community as well as supporting a timely and resource efficient compliance investigation.

Where STRA is permitted it must be required that it be registered and comply with the STRA Code of Conduct. As proposed, the framework relies upon the industry to self-register and self-regulate. This is improbable, unworkable and will shift the compliance and cost burden for councils and their local communities. The City reiterates that establishing a government administered functional registration system is critical, and this should be supported through the planning policy criteria, requiring registration of STRA premises prior to commencement of the use, and that the STRA participant is bound by the Code of Conduct.

The registration system should be administered by NSW Fair Trading. The Code of Conduct needs to include the requirement that no STRA bookings can occur by booking platforms, letting agents or any other means unless properties are registered. It must also publicly record the number of days, management of complaints, compliance and enforcement and required fire and safety measures. The new regulatory framework introduces some fire safety regulations and standards for STRA, however some aspects are ambiguous, need clarification or qualification, and it needs to be supported with a user friendly guide. A requirement needs to be added for an annual inspection by a suitably qualified person to attest that the fire safety standard requirements are compliant.

Attached are responses to the questions in the Discussion Paper raising some of these and other potential issues with the new regulatory framework in more detail.

Should you wish to speak with a Council officer about the above, please contact Andrew Thomas, Executive Manager Development, on 9265 9333 or at [athomas@cityofsydney.nsw.gov.au](mailto:athomas@cityofsydney.nsw.gov.au)

Yours sincerely,

Att: Director, Housing and Infrastructure Policy  
NSW Department of Planning, Industry and Environment  
GPO Box 39  
SYDNEY NSW 2000

Dear Sir/Madam

Thank you for the opportunity for Clarence Valley Council to make a submission on the Short-term Rental Accommodation (STRA) reforms.

In summary, the main issue that Council is concerned about is the cost to Council to enforce the on-ground compliance and thinks all participants should have compulsory registration and fees collected. This fee collection should be administered through the Department of Fair Trading (not industry) and pass on at least \$200 of this fee to Council per STRA for compliance. Council believes in urban areas of the Clarence Valley the flood lot compliance certificate can be waived and is concerned about how regulation of the fire controls will be done and how pool compliance is ignored. Over four bedrooms or more Council thinks up to three off-street carparks need to be provided for an STRA to operate.

Council made the following resolution at its August Council meeting:

*That:*

1. *Council note the release of 'A new regulatory framework' for Short-term Rental Accommodation and acknowledges this is inline with Council's resolution 14.131/18 and that the Government has adopted the 180 night threshold requested by Council for the coastal villages.*
2. *Council provide feedback to the public exhibition period of the Short-term Rental Accommodation Reform that includes the following points:*
  - i. *Council is provided with income from fees through cost recovery as outlined on page 14 of the Discussion Paper to undertake compliance activity for STRA's. These fees should be enough to at least fund a full-time officer to undertake this activity (\$100,000 equating to approximately \$200 per STRA currently in the Council area, if STRA grows the fees should allow for extra compliance officers).*
  - ii. *To ensure that STRA can contribute to cost recovery, there should be compulsory registration with the Department of Fair Trading of business' undertaking STRA and it should be compulsory for not only industry booking platforms and real estate agents, but also individual owners, to provide the components suggested for a successful register on page 16 of the Discussion Paper. These records need to be made available to Council for its compliance role.*
  - iii. *The Code calls for complying development certificates to certify that flood lots (the areas mapped for Yamba and part of Iluka) are low risk. Council should request that the urban zones are exempted for our Council area as there is a low flood risk and suitable warning of any likely major flood event.*

- This will reduce Council's workload requests by existing and potential STRA operators to provide complying development certificates.*
- iv. The operation of STRA's bring an extra risk from non-compliant pools, the Code has not considered this issue and it needs to be clear. This could potentially be included with fire compliance inspections; again it is unclear whether these will be required.*
  - v. The draft SEPP provisions are silent on provision of car parking for STRA. Council should request that a provision be included in the exempt and complying provisions for no host present requiring on-site parking to be provided for STRA of no less than three (3) car spaces where the dwelling contains four (4) bedrooms or more.*

As outlined in the summary above, the package effectively meets the requirements outlined by Council except under point 3 it appears it is the intention that local councils will undertake the on-ground compliance activities for the Code and inspections regarding the Fire Safety Standard, although the Department of Fair Trading will administer the Code and registration through a possible fee arrangement. Council needs to be resourced through an appropriate compliance fee from those undertaking STRA to fund compliance officers. At present there are at least 350; more likely over 500 STRA's in the Clarence Valley, hence, a fee of around \$200 would generate about \$100,000 enough for a full-time compliance officer and with a car.

These fees can only be collected if a registration system is put in place and this should be required for all STRA's (not only hosting organisations) and the fees paid to the Department of Fair Trading and Council's compliance component made available to Council.

In addition, Council may need to implement a new fee for STRA fire inspections by the building surveyors. The Code is silent on whether an inspection is necessary and it does not mention pool compliance.

Where the host is not present, the draft SEPP provides that exempt development is only applicable where the lot is not a flood control lot. A flood control lot being a lot to which flood related development controls apply. This would result in the majority of dwellings within the Council area being let for STRA requiring a complying development certificate prior to operating. There have been numerous flood studies completed by Council with the majority of the urban zones considered to be of low flood risk. Most recently constructed dwellings are required to comply with Council's flood related development controls and there is suitable warning of any likely major flood event. As the SEPP will apply to the whole of the Council area, it is considered that the rural zones are at higher risk than the urban zones.

Council would appreciate consideration of the above issues.

Yours faithfully

**Ashley Lindsay**

Att: Director, Housing and Infrastructure Policy  
NSW Department of Planning, Industry and Environment  
GPO Box 39  
SYDNEY NSW 2000

Dear Sir/Madam

### **Short-term Rental Accommodation Submission**

We would like to thank the Department of Planning, Industry and Environment (DPIE) for the opportunity to provide comment on the short-term rental accommodation (STRA) draft code, draft amendment regulations and STRA property register. Eurobodalla Shire Council (Council) recognizes the complexity regarding the policy review and welcomes clarity for STRA in New South Wales (NSW).

Council has considered all aspects of the proposed framework and would like to focus its submission on the following key points:

- Council supports the government approach to providing a framework for STRA, however, the framework and regulations should support local planning and regulatory responses which reflect the specific contexts of each community. The one size fits all approach strips away our ability to determine the appropriateness or otherwise of STRA in specific zones or areas should Council wish to do so in the future.
- Most of the residential land in Eurobodalla is mapped bushfire prone land and a minor amount is on flood control lots. The implications of this being the requirement for development consent for most non-hosted STRA pursuant to the State Environmental Planning Policy (Short Term Rental Accommodation) 2019.
- Eurobodalla supports the proposed industry led, funded and managed property registration system and the administration and enforcement of the code of conduct. This is consistent with the Eurobodalla Destination Action Plan 2018-2023, which identified the need for some sort of framework to encourage responsible holiday-letting practices to minimise potential visitor impacts.

## **Background**

Eurobodalla is located on the South Coast of NSW, approximately 280 km south of Sydney and 140 km east of Canberra. Our Shire covers an area of 3,422 sq. km, much of which is covered by National Parks and State Forests. Eurobodalla has a population of 38,117, which is predominantly concentrated along the coast and population growth is forecast to reach 44,000 by 2036. Our tourism industry is valued at over \$370 million each year with the accommodation and food services sector contributing the highest of any sector to the Eurobodalla economy.

Eurobodalla has a large volume of second homes, 31% of homes in our Shire are not permanently occupied, and 38% of property owners in our Shire have their main address outside of the Local Government Area.

Council participated in the 2018 research project led by Professor Nicole Gurran, Chair of Urban and Regional Planning and Policy on the 'Planning response to short term holiday rentals platforms'. The research project was commissioned by the Australian Coastal Councils Association and identified that State governments need to help councils by setting baseline standards for short term rentals in residential areas and clarify the definition and use of short-term rental accommodation.

The report recommends that the NSW Government supports local planning and regulatory responses which reflect the specific contexts of each community and ensure that online platforms share data and help ensure local requirements are met. For Eurobodalla this would enable balancing the local neighbourhood impacts with the emerging STRA sector. The report identifies Eurobodalla Airbnb listings to be 2% of our total housing stock as of 2018 but these numbers are expected to grow as the interest to invest in holiday homes grows for investors who have been priced out of capital city markets.

Anecdotally and in limited localities, Eurobodalla is experiencing some local neighbourhood impacts from short-term rental accommodation in the form of properties used as holiday homes and operated by absent owners.

### **1. Need to consider local context**

Council is very supportive of the proposed framework and the issue of STRA is currently not causing any major problems for our Shire compared to other coastal holiday destinations. This is not expected to continue as the predicted growth in this form of accommodation eventuates. Council recognises the importance of this growing accommodation sector, as more and more travellers choose this over traditional forms of accommodation. Research indicates that only 1 in 5 regional visitors now spend a night in a motel.

In this regard, Eurobodalla will not be nominating to lower the threshold for days stayed and will review this in 12 months' time in-line with the NSW Government's review of the STRA framework and regulations.

To maximise the opportunities that STRA may offer and to minimise risks, councils need the ability to carefully consider the characteristics of their local communities and existing/potential tourism demand. The proposed framework and the proposed SEPP in its current form, limits the ability for Council to carefully consider the circumstances in which holiday accommodation requires consent. Council recommends that amendments be made so that the framework provides a baseline only for regulating STRA within residential housing. It is proposed the provisions be amended so that they can be adopted or adjusted depending on specific circumstances. The opportunity for councils to restrict the activity to certain localities or zones beyond which planning consent may be required, preserving residential amenity and neighbourhoods, needs to be enabled.

## **2. Limitations of the framework**

The introduction of the STRA planning framework raises several concerns for Council's Development Services area, as the majority of our coastal villages are set on bushfire prone land and approval will be required under the proposed State Environmental Planning Policy (SEPP) and regulations.

The number of Air BnB listed properties as of June 2018 was 475. This does not account for properties potentially listed on other STRA platforms as well as those managed by local property management companies.

Under the proposed SEPP, approvals will be required in the form of a Complying Development Certificate (CDC) up to Bushfire Attack Level (BAL) 29 and or a Development Application (DA) that will be considered as a 100B application under the NSW Rural Fire Services Act.

Major concerns with this include the following:

- Significant upgrading of dwellings will be required to comply under the Planning for Bushfire Protection and Australian Standard AS3959
- The lack of clear process for considering and establishing existing use rights
- Lack of clarity around notification processes
- The likely compliance attention required by Council to ensure length of stay, number of beds/guests, etc., are not exceeded, will stretch current resourcing levels
- Compliance around neighbourhood amenity issues and the interface between Council's role and the exclusion register process
- Dwellings that are at an age that have not considered under the Planning for Bushfire Protection or AS3959, could trigger other requirements such as the Biodiversity Conservation Act 2018.

Eurobodalla Local Environmental Plan 2013 (ELEP) contains Clause 6.15 – see below:

#### **6.15 Short-term rental accommodation**

- (1) The objective of this clause is to enable the temporary use of dwellings as short-term rental accommodation for tourists and visitors without requiring development consent.
- (2) Despite any other provision of this Plan, development consent is not required for the temporary use of a dwelling as short-term tourist and visitor accommodation (except bed and breakfast accommodation).
- (3) In this clause, ***short-term tourist and visitor accommodation*** is tourist and visitor accommodation that is used as such for a maximum period of 45 consecutive days in any 12-month period.

This clause currently removes the requirement for consent for short-term tourist accommodation. The proposed SEPP will create a potential conflict with this clause and remove the flexibility required to facilitate this land use.

The time frame given for the ‘staged approach’ of implementation is not appropriate and will lead to industry and participant confusion and apply extra pressure on local councils to offer guidance and direction. The ‘staged approach’ of implementation coincides with the peak tourist season and Christmas school holidays.

Subject to consideration of the matters raised in this submission Eurobodalla supports the ‘whole of approach’ to implementation.

### **3. Code of Conduct**

Eurobodalla supports the Code of Conduct and believes the general obligations are adequate and the complaints process important. However, as previously stated, the matter of compliance and enforcement in relation to complaints needs further consideration.

Eurobodalla strongly supports an industry led, funded and managed registration system and the administration and enforcement of the Code of Conduct. Local councils should not be responsible for the cost, development or responsibility of this initiative. Access to the registration system should be granted to Council to help manage safety and amenity issues and to help monitor and strategically plan for this accommodation sector.

STRA is often undertaken in residential properties which pay a residential rate. This is despite these properties being operated on a full commercial basis. This creates an unfair advantage over other forms of tourist accommodation and doesn’t enable Council to levy appropriate charges to compensate for the demand on Council services.

There is a need to provide the opportunity to councils to address the impacts (such as waste, roads, public amenities as well as visitor information services) of visitors in local areas, by setting a charge on STRA properties. We see the proposed registration system as an

opportunity impose a levy on STRA to enable some contribution to services impacted by visitors to our Shire.

In summary, Council supports the key recommendations of the framework subject to further consideration given to the matters raised above. Of most importance is our request that the staged approach not be adopted to enable time for better consideration of the impact of the SEPP on the requirements for STRA on bushfire prone land.

We trust the Department will seriously consider Council's concerns and ensure that the outcomes of our submission are communicated back to us.

Please do not hesitate to contact Liz Rankin, Divisional Manager Strategic and Sustainable Growth on (02) 4474 1326 or by email [Elizabeth.rankin@esc.nsw.gov.au](mailto:Elizabeth.rankin@esc.nsw.gov.au), if you would like to discuss any matter contained in this submission.

We look forward to your response.

Yours sincerely

Dear Sir / Madam

**Re: Short Term Rental Accommodation – A new regulatory framework**

Fire and Rescue NSW (FRNSW) thanks the Department for the opportunity to provide a submission to the inquiry into Short Term Rental Accommodation (STRA) in NSW. FRNSW submission seeks to support the proposed regulatory framework, particularly in the provision of building fire safety as it relates to STRA. Answers to the discussion paper's specific questions can be found in **TAB A**.

STRA has traditionally been provided by hotels, motels, serviced apartments and bed and breakfast establishments. These have been mainly categorised as Class 3 buildings under the National Construction Code (NCC), with smaller hostels and boarding houses in Class 1b). In more recent times, however, short stay accommodation has expanded through online booking systems into residential building Classes 1a (houses) and 2 (apartments) under the NCC i.e. serviced rooms, apartments and houses.

It is acknowledged that there has always been an informal economy of STRA through the rental of shacks and caravans. However, as tourist numbers to NSW have increased over time, so too has the participation in the STRA market on both the supply and demand sides.

Despite this growth, STRA within the burgeoning sharing economy remains largely unregulated for what are considered essential fire safety features for this use class. Further, as visitor nights increase, so too does the exposure to unregulated and unmitigated risk. A policy gap in regulation is laying the foundation for an unacceptable risk to public safety. As will be discussed below, the primary concern for FRNSW is that residential classes of buildings with lower fire safety standards are being used for

Page 1 of 12

STRA purposes, generating similar risk profiles to hotels, motels and serviced apartments. FRNSW recommends that the residential fire safety standards are raised and brought closer to established standards for Class 3 and Class 1b buildings.

### **Tourism trends and the changing market**

International visitor numbers to Australia have increased over recent years, with most visitors coming from China, Japan, USA, and South Korea. For various reasons, this additional demand for STRA has translated into an increase in the supply of short-term accommodation.

### **Fire safety context**

A fundamental issue for the built environment is fire safety, which provides for the safety of people within a building, occupants of adjacent structures, and emergency service personnel. However, the vulnerability of building occupants to fire risk is highly contextual and is influenced by occupant characteristics, building characteristics and location.

There is therefore a clear distinction between the vulnerability of patrons of STRA facilities compared to residents of domestic dwellings, and therefore a significant policy gap when the former is occupying residential buildings with fire safety standards designed for the latter. Compared to long term residents of apartment buildings, for instance, STRA patrons suffer from a lack of local knowledge, are unfamiliar with the building, the means of egress, and potential fire sources, as well as assembly points and other emergency procedures, and have no existing relationships with neighbours or the owners' corporations on whom they might be able to call if needed. It is for this reason that the regulatory system, by reference to the National Construction Code, rightly requires greater fire safety measures for buildings that are used for short stay accommodation when compared to buildings used for residential purposes.

Accordingly, fire safety requirements within the National Construction Code for short stay accommodation facilities (class 1b and 3 buildings) are more stringent than those required for residential buildings (class 1a and 2 respectively). These more stringent requirements should be recognised in the STRA regulatory framework.

STRA within the sharing economy is effectively the same use class as conventional short stay accommodation (visitor accommodation) because it has an identical fire safety risk profile. For this reason, FRNSW believes comparable regulatory requirements and fire safety measures should apply as for conventional visitor accommodation.

In terms of the set of fire safety standards proposed, FRNSW makes the following comments (referencing the matrix set out in the October 2018 Explanation of Intended Effect document, rather than the Discussion Paper):

Dwelling type	Recommended standard	FRNSW response
All dwellings	No more than 2 persons/bedroom or 12 persons, whichever is the lesser	Supported
	Installation of smoke alarms in each bedroom, and the smoke alarms are interconnected where there is more than one alarm	Supported
	Installation of a lighting system in hallways that is activated by the smoke alarm system	Supported, noting that the market may develop a lighting system attached directly to alarms
Dwellings in multi-unit buildings only (Dwellings in Class 2 and 4 buildings)	Entry doors should be openable from inside the dwelling without a key •	Supported
	Installation of a self-closing device and smoke seals to all edges of the door, if the door opens onto a shared corridor and entrance doorway	Supported
	Installation of a fire extinguisher and fire blanket in the kitchen	Supported
	Making an Evacuation Plan, displaying 'evacuation signage' and familiarising guests with exit system	Supported
Standalone dwellings only (Class 1a buildings)	Installation of heat alarms in single dwellings which are located above a garage. This would be required only where the garage is not accessible to the guest/s.	Supported

### Regulation

The National Construction Code sets out the minimum technical requirements in Australia (including fire safety) for new buildings and alterations/additions to existing buildings. The Code classifies buildings by their function and use: "the classification of a building or part of a building is determined by the purpose for which it is designed, constructed or adapted to be used". The fire safety measures prescribed for these building classes relate to the vulnerability of building occupants.

Residential dwellings are classified as Class 1a buildings. STRA facilities have traditionally been classified as either Class 1b or Class 3 buildings (depending on scale)

## **Overcrowding**

There is clear evidence in NSW overcrowding in residential buildings, including STRA, is a fire risk and has a negative impact on other resident's amenity in shared accommodation. The number of occupants is difficult to regulate, although a comprehensive analysis of the risks and proposed mitigations are available in the final report by the NSW Government's 'Interagency Committee on 'Overcrowding in Residential Accommodation' (October 2015). This current discussion paper is silent on how this identified risk will be enforced and who will enforce it. FRNSW therefore requires clarification as to whether its existing entry powers apply to Class 1a buildings that are occasionally rented out i.e. does the rental mean they become a shared accommodation, and therefore covered by existing legislation?

FRNSW experience on this matter is unique as there are instances where its Officers have discovered landlords' creative ways to cram people into limited space. Enforcement is even more difficult, although the Overcrowding Interagency Committee's report offers agreed and approved solutions.

## **Registration**

The proposed industry-led short-term rental accommodation property register appears to be like Private Certification in the building industry, a system which has come under increased criticism for its failure to ensure community safety and the consumer. The details of self-regulation with regards to the register relies heavily on whether the industry will closely monitor its own actions; there is also the question of disciplinary action should breaches be proven to have occurred. Historically speaking, and in the current climate regarding Private Certification, FRNSW considers self-regulation questionable.

## **Fire safety standards**

Providers of home sharing platforms such as Airbnb, Stayz, HomeAway, Flipkey, Travelling Frogs, Aura and Tripping may provide some guidance and/or rules to hosts for building fire safety and emergency response. For example, Stayz, TakeABreak and Rentahome have developed a set of guidelines for property owners and managers, 'Holiday and Short-Term Rentals Guidelines' that include requirements for:

- The fitting of smoke detectors
- Provision of fire safety information appropriate for the property and in accordance with legislation, and
- Provision of after-hours and emergency telephone numbers to guests.

Similarly, Airbnb have a set of Standards and Expectations that apply to all hosts and guests. The Airbnb website states that Airbnb have an enforcement team that responds to violations of the Standards. Safety is one these Standards which encourage all hosts to provide a:

- Working smoke and carbon monoxide detector
- Fire extinguisher

- First aid kit, and
- Completed safety card with advice on emergency contact details, including the closest hospital

For all STRA, it should be mandatory that information is available to occupants on Australia's national emergency number, Triple Zero (000).

It is acknowledged that in most instances the various providers of home sharing platforms are attempting to ensure a degree of occupant safety is provided by means of rules and guidelines. However, the fire safety measures required in STRA should match those applying to traditional short stay accommodation. FRNSW is therefore fully supportive of the specific provisions proposed in the draft Fire Safety Standard.

FRNSW research findings (see <https://www.fire.nsw.gov.au/page.php?id=9270>) recommend the installation of interconnected smoke alarms in each bedroom, living space and hallway. While the proposed Fire Safety Standard requires hard-wired devices, the current position of FRNSW and Australasian Fire and Emergency Services Authority Council (AFAC), allows long-life, sealed battery-powered smoke alarms as a means of ensuring this improvement in safety is cost-effective. This is based on manufacturers' specifications that require the entire device to be replaced every 8-10 years. Please refer to

<https://www.afac.com.au/insight/doctrine/article/current/smoke-alarms-in-residential-accommodation>

Heat alarms installed in garages and interconnected to the main dwelling are also warranted, based on FRNSW experience with household storage of flammable liquids, solvents, chemicals and the resultant potential for an increased fire fuel load. Garages may not be used as often as other parts of the dwelling, so notifying occupants of a garage fire through interconnected alarms is supported as a prudent safety measure.

As detailed in the table above, other provisions proposed in the draft Fire Safety Standard (such as: evacuation diagrams; self-closing mechanisms and fire resistance for egress doors; and portable fire extinguishers and fire blankets) are also supported by FRNSW as necessary components to improve occupant safety. Keyless locks and evacuation lighting incorporated in interconnected smoke alarms are also preferred; however, FRNSW acknowledges the cost of installation may in some cases be cost-prohibitive.

## Conclusion

NSW is experiencing growth in the number of tourists visiting the State and the supply of accommodation options for these visitors is expanding to include online home sharing platforms, recognised as part of the sharing economy. This economic growth is important for NSW and its economy.

NSW has legitimate and credible commitments through several strategic arrangements for the improvement of the regulatory environment for residential accommodation. For FRNSW, community fire safety is a priority for consideration in the regulatory environment.

Home sharing platforms have a role to play in improving the safety of guests and hosts

through the provision and enforcement of guidelines and policies that align to existing National Construction Code provisions.

The consequences of absent or inadequate fire safety systems have proven to be catastrophic. Historically, the most appropriate way to provide for fire safety outcomes has been through a regulatory approach. Indeed, where fire safety is concerned, a sound building control regime is one that does not leave things to chance and does not function on the basis that the market will self-regulate to deliver appropriate fire safety outcomes. Hence, the planning and building system is purposefully designed to avoid unnecessary regulation, whilst ensuring a level of fire safety is provided which is commensurate to the vulnerability of the site or building use.

One important part of the STRA framework must be to close the policy gap and lift fire safety standards for residential buildings used for STRA purposes. A set of appropriate standards already exists in the framework of the NCC, and this paper has outlined ways in which that structure can be used to achieve this end.

### ***Typos***

Within the draft Code of Conduct, there are two typos:

1. Page 12 S6.1.9, **section 6.3.8** should be replaced with **section 6.1.6**, and
2. Page 14, S7.1.4(d), **section 7.1.4(d)** should be replaced with **section 7.1.3(d)**.

### ***Acknowledgement***

FRNSW wishes to acknowledge the Tasmania Fire Service and the National Council for fire and emergency services, AFAC, for material used in the preparation of this submission.

I invite you to please contact Mark Whybro, FRNSW Assistant Commissioner Community Safety, on 0438 602 869 or at [Mark.Whybro@fire.nsw.gov.au](mailto:Mark.Whybro@fire.nsw.gov.au) should further information be required.

Your sincerely

**TAB A: FRNSW Response to the 'Short Term Rental Accommodation' Inquiry – Discussion Paper Questions**

Topic	Question	Page number	FRNSW Comments
Planning instruments	1. What is your view on the form of and provisions in the STRA SEPP, Regulation and Safety Standard?	8	FRNSW supports the form and provisions in the SEPP, Regulation and Safety Standard
	2. Are there any elements of the draft instrument that are open to misinterpretation or require further clarification?	8	Nil comment
	3. What are your views on new policy elements relating to days, flood control lots and bushfire prone land?	8	FRNSW supports the provisions being proposed for these policy elements
Code: Industry participants' obligations	4. Are the general obligations for industry participants adequate? If not, what other general obligations should be considered? Why?	10	FRNSW believes the general obligations for industry participants are adequate
	5. What types of STRA information will be useful for the Secretary to collect to inform the further improvement of the Code and the STRA regulatory framework? Why?	10	Address, class of building, owner/manager contact details, maximum occupancy limit, adequacy of fire safety provisions. FRNSW would seek access to these details., to be provided to fire crews should an emergency be recorded at this address.
	6. Are the specific obligations on booking platforms, letting agents, hosts, guests and facilitators in the Code adequate? If not, what other obligations should be considered for each of these industry participants? Why?	10	FRNSW believes the obligations are adequate, with the addition of provision of safety information to include Australia's national emergency number, Triple Zero (000).
Code: Complaints	7. Is the complaints process detailed in part 6 of the Code sufficient? If not, what other matters should be considered or set out in the process? Why?	11	FRNSW believes the complaints process outlined in the Code is sufficient.

**TAB A: FRNSW Response to the ‘Short Term Rental Accommodation’ Inquiry – Discussion Paper Questions**

Topic	Question	Page number	FRNSW Comments
Code: Compliance and Enforcement	8. Are the grounds for recording a strike fair and reasonable? What other matters (if any) should the Commissioner consider when deciding whether to record a strike? Why?	11	FRNSW believes the grounds for recording a strike outlined in the Code are sufficient.
	9. What are potential ways to facilitate industry participants’ access to the exclusion register while limiting potential privacy impacts? What factors should be considered?	12	Nil comment
	10. Is the review process clear and sufficient? What other matters (if any) should be considered? Why?	12	FRNSW believes the review process outlined in the Code are sufficient.
Code: Penalty notice offences and civil penalties	11. Are the proposed penalty notice offence and civil penalty provisions appropriate? What provisions should or should not be identified as penalty notice offence and/or civil penalty provisions? Why?	13	Nil comment, noting FRNSW also has existing penalty notice provisions in the EP&A legislation
Amendment Regulation: Prescribed classes of STRA industry participant	12. Does clause 22B (1) appropriately capture end to end property management services that specifically service STRA properties? Why or why not?	13	Nil comment
	13. What other organisations or persons should be prescribed classes of STRA industry participants (if any)? Why?	13	Nil comment
Amendment Regulation: STRA industry participants	14. Is it appropriate to exclude the STRA industry participants set out in clause 22C? Why or why not?	13	FRNSW notes that the exempt industry participants are regulated by other regulation, policies and instruments

**TAB A: FRNSW Response to the 'Short Term Rental Accommodation' Inquiry – Discussion Paper Questions**

Topic	Question	Page number	FRNSW Comments
excluded from Code of Conduct	15. What other STRA operators (if any) should be excluded from being covered by the Code? Why?	13	Nil comment
Amendment Regulation: Appeals against listing on exclusion register	16. Is the appeals process clear and sufficient? What other matters (if any) should be considered? Why?	14	FRNSW believes the appeals process is clear and sufficient
Amendment Regulation: Fees and cost recovery	17. Which industry participants should contribute to the cost of administering and enforcing the Code? Why?	14	Nil comment
Amendment Regulation: Penalties	18. How should costs be apportioned across different STRA industry participants? Why?	14	Nil comment
	19. Is the proposed penalty notice offence amount appropriate? Why or why not?	14	FRNSW has the ability under the EP&A legislation to issue penalty infringement notices of \$3,000 for an individual and \$6,00 for a corporation. Consideration should be given to aligning the quantum of similar charges.
	20. How can industry be organised to develop and manage the registration system?	15	Based on its experience with building industry, FRNSW is concerned at the implications of industry self-regulation.
	21. What would be the costs to industry in establishing and maintaining the register? How would industry propose to meet these costs?	16	Nil comment
	22. What role should the Government play in developing or overseeing the register, if any?	16	The Government should play a role in overseeing regulatory compliance in the STRA industry.

**TAB A: FRNSW Response to the 'Short Term Rental Accommodation' Inquiry – Discussion Paper Questions**

Topic	Question	Page number	FRNSW Comments
	23. Are there other outcomes a register should deliver?	16	Provision of relevant, specific information to FRNSW and other emergency services to improve public safety through prevention and education activities, and situational awareness in the event of an emergency.
	24. How can the approach ensure registration applies to all STRA operators, regardless of how the property is advertised for rent?	16	Nil comment
	25. What audit and verification processes would be needed to ensure accuracy of data?	16	Appropriate powers of entry, inspection and enforcement are available to specific officers to audit and report industry compliance.
	26. Should there be separate or additional penalties for failure to register? If so, which industry participants should they be imposed on?	16	Nil comment
	27. What information should the register collect? Why?	16	Address, class of building, owner/manager contact details, maximum occupancy limit, adequacy of fire safety provisions. FRNSW would seek access to these details., to be provided to fire crews should an emergency be recorded at this address.
	28. What role should different industry participants (e.g. hosts and booking platforms) play in the registration process?	16	Nil comment
	29. What role should Government play in the registration process or providing information for the register?	16	The Government should play a role in overseeing regulatory compliance in the STRA industry.

**TAB A: FRNSW Response to the 'Short Term Rental Accommodation' Inquiry – Discussion Paper Questions**

Topic	Question	Page number	FRNSW Comments
	30. Should any information on the register be made publicly available? If so, what information could be made available and why?	17	Nil comment, noting FRNSW earlier comments; that it intends to seek approval to use STRA information to help fulfil its statutory regulatory, prevention and response obligations.
	31. Should industry be required to report registration information, including number of stays (days), to Government and/or local councils? If so, how frequently? Why?	17	Yes, with FRNSW reasons as detailed above. Frequency of reporting should be once every year.
Commencement of regulatory framework	33. How much lead time would industry need to develop and establish the proposed STRA property register? Please provide reasons.	18	Nil comment
	34. When should the STRA regulatory framework start? Please provide reasons.	18	As soon as practicable. This is an opportunity to reduce community risk through improved regulation of this industry. FRNSW can advise that fire safety issues have been identified in buildings confirmed as having been used for STRA. For example, the cladding fire at the Neo200 building, Spencer Street Melbourne in February 2019 highlighted issues with overcrowding and the adequacy of fire safety systems.
12-month review of regulatory framework	35. Do you support the proposed scope of the review? What additional considerations might be necessary?	19	Yes
	36. What data sources could the NSW Government use to inform the review? How can industry and councils assist with data collection for the review?	19	FRNSW has a number of databases containing information on the built environment and our operations within it that can be made available to regulators.

**TAB A: FRNSW Response to the 'Short Term Rental Accommodation' Inquiry – Discussion Paper Questions**

## **Observations on the new holiday letting regulations**

**By Jimmy Thomson of the Flat Chat website and newspaper column**

Both the proposed Code of Conduct and the Registry of STRA (holiday letting) premises are essential steps in allowing apartment owners and renters to regain some control over their homes.

The cavalier way in which the concept of genuine shared ownership (through such mechanisms as strata schemes) has been allowed to be undermined and damaged by entirely fake “sharing” in the commercial exploitation of empty homes, will some day be seen as the betrayal of whole communities that it is.

All the more shameful is the fact that this was perpetrated to allow a minority of individuals and one or two multinational corporations to make (literally) untold profits at the expense of people who believed they were buying and renting homes, not rooms in de facto hotels.

Meanwhile, the proven, fundamental dishonesty at the heart of the “home sharing” business is the only justification that the government needs for making the new regulations as tight and enforceable as required to restore some sanity to the sector.

Dishonesty? We are dealing with companies and individuals who use the flag of convenience of personal privacy to mask their true nature.

The great fiction that some online agencies are all about individuals letting rooms in their homes to impoverished visitors has been exploded time and again, yet it goes unchallenged by our lawmakers.

In short, we are dealing with entities that have shown themselves to be neither entirely honest nor transparent in their activities. They ignore proof that their hosts flout planning laws and strata by-laws, refusing to de-list them, despite claiming they require hosts to obey local laws.

These same agencies now expect us to believe that they should police themselves.

Based on their misleading publicity campaigns, their misrepresentation of statistics, their selective reporting and their failure to reveal the true extent and nature of their businesses, they cannot and should not be trusted.

The same applies to many of their hosts, many of whom for the past few years have knowingly flouted local council zoning and strata by-laws for their own profits. And perhaps both the agencies and their clients can start paying tax on those profits.

The proposed code of conduct and register should be allowed restore a level of honesty and decency to the holiday letting scene, especially in regard to apartment blocks. But that will only happen provided they are given teeth.

This is not about punishing genuine home-sharers. It's about deterring those who would break the rules in pursuit of profits, and that will require meaningful penalties and simple mechanisms by which the culprits can be exposed.

The registry should be a simple system, paid for via a fee to an independent, possibly commercial agency, which would provide two unique serial numbers – one for the host and one for the property.

Agencies that listed properties without having both serial numbers would be in breach. Proven breaches of the Code of Conduct would result in fines (as outlined) while the serial numbers would be blacklisted.

Further finessing of the rules could include:

1. Any breach of the Code of Conduct or failure to register should result in immediate, if temporary, suspension by the apartment and the host from all online agencies until the matter is resolved by an independent tribunal such as NCAT.
2. Owners Corporations should be allowed to charge illegal or unregistered holiday let "hosts" the full costs of investigations and tribunal actions, should it be proved they were operating illegally.
3. Illegal or unregistered holiday let hosts should be required to compensate owners' corporations by the amount they earned while they were operating illegally.
4. NCAT should be able to issue enforceable orders allowing officers and agents of the owners corporation, as well as fire safety officers, to enter apartments that they have good reason to believe are being used for illegal or unregistered short-term holiday lets, to check and gather evidence.
5. Owners and tenants of apartment who have been proved to be in breach of the code of conduct or the rules of the register, should have to inform any other strata scheme where they own or rent homes, that they have a history of ignoring or flouting the law.
6. All holiday let strata apartments should carry a 10 per cent additional fee on their levies to compensate for additional wear and tear of common property, use of facilities, additional administration costs and disruption.
7. From Day 1 of the new legislation, apartment blocks that have been given planning approval on the basis that they were not for holiday letting, should have, by default, a new by-law that reflects that status. This would protect owners who bought in on that basis. The owners corporation can remove or change the by-law by normal processes later, if they wish.

As a final observation, it's all very well for people to be excited and enthused by "disruptive" entrepreneurs. But this is an opportunity to assess who and what is being disrupted.

This is not just about noisy parties – far from it. One of the main reasons people choose to live in apartment blocks is for personal security. That is severely diminished when you don't know who your neighbours will be from one weekend to the next.

The whole strata system is based on all owners paying a fair share for the use of common property. That is disrupted by unfair “sharing” with paying guests.

And long-term tenants are having to compete with tourists if they want to stay in areas that they may have called home for decades.

It's time we stopped encouraging disruption for its own sake. This is an opportunity to apply logic and fairness to the situation before we end up worse off than the cities around the world that have already been gutted by holiday lets.

**Draft Code of Conduct for the  
Short-term Rental Accommodation Industry**

**Table of Contents**

- 1. Introduction**
- 2. Objectives**
- 3. Definitions**
- 4. Code Administration**
- 5. Rights and obligations of industry participants**
- 6. Complaints**
- 7. Compliance and Enforcement**

## 1 INTRODUCTION

Short-term rental accommodation is a long-standing practice throughout New South Wales, most commonly associated with holiday letting. Many NSW families spend part of their summers in coastal and regional communities and those communities may depend on seasonal tourism to provide a regular boost to the local economy.

Short-term rental accommodation does not involve purely commercial accommodation providers such as hotels, motels and bed and breakfast establishments. ~~It generally involves residential dwellings that may also be used by the owners for their own accommodation at times.~~

The advent of online accommodation booking services (booking platforms) has seen a significant increase in short-term rental accommodation. Booking platforms have made it much easier for letting agents and hosts to advertise and promote properties and for guests to find suitable short-term accommodation. In addition, short-term rental accommodation in residential premises is now not only used for holidays but also for business travel, emergency accommodation and special events, across a range of premises including free-standing dwellings and ~~apartment buildings~~ in urban and regional centres.

Despite the economic benefits that can flow to local economies and home owners using their property for short-term rental accommodation, there can be amenity impacts on residential neighbours resulting from inconsiderate or anti-social behaviour by some short-term rental occupants. It is important to ensure that our laws continue to support local economies while ensuring residential neighbours can enjoy the amenity of their homes without unreasonable disturbance. This code of conduct responds to this need by establishing behavioural obligations for short-term rental accommodation participants.

In recent years, there has been an increasing focus on the regulation of the short-term rental industry around the world. In June 2018, the NSW Government announced a new regulatory framework to manage short-term rental accommodation. The key elements of the framework are:

- a state-wide planning framework to achieve consistency and certainty across local planning controls
- a code of conduct to apply to online accommodation platforms, lettings agents, facilitators, hosts and guests
- changes to strata laws to allow owners corporations to adopt by-laws that prohibit non-resident lot owners from offering short term rentals.

This code of conduct applies to short-term rental accommodation industry participants.

Compliance with this code is mandatory for all short-term rental accommodation industry participants.

## 2 OBJECTIVES

The principal objectives of this code are to:

- (a) set out the rights and obligations of short-term rental accommodation industry participants
- (b) provide for resolution of disputes and complaints concerning the conduct of short-term rental accommodation industry participants
- (c) outline the compliance and enforcement approach that applies for contraventions of the code by short-term rental accommodation industry participants
- (d) facilitate the oversight of the short-term rental accommodation industry.

### 3 DEFINITIONS

**Act** means the *Fair Trading Act 1987*.

**association** and **association property** have the same meaning as in the *Community Land Management Act 1989*.

**booking platform** means a person who, in trade or commerce, provides an online booking service that enables persons to enter into short-term rental accommodation arrangements.

**by-law** means any by-law in force for a strata scheme or any by-law contained in a management statement (as defined in the *Community Land Management Act 1989*).

**Commissioner** means the Commissioner for Fair Trading in the NSW Department of Customer Service.

~~**common property**~~ has the same meaning as in the *Strata Schemes Management Act 2015*.

**community scheme** has the same meaning as in the *Community Land Development Act 1989*.

**facilitator** means the prescribed classes of short-term rental accommodation industry participants in clause 22B of the Regulations.

**guest** means a person who, pursuant to a short-term rental accommodation arrangement, is given the right to occupy the residential premises to which the arrangement relates.

**host** means a person who, pursuant to a short-term rental accommodation arrangement, gives another person the right to occupy the residential premises to which the arrangement relates.

**letting agent** means a person who carries on business as an agent to enable persons to enter into short-term rental accommodation arrangements.

**Minister** means the Minister responsible for the administration of the *Fair Trading Act 1987*.

**occupancy period** means the period for which a guest may occupy residential premises under a short-term rental accommodation arrangement.

**ordinary hours** mean 8.00am to 5.00pm every day of the week.

**planning laws** means the *Environmental Planning and Assessment Act 1979*, Environmental Planning and Assessment Regulation 2000, and any environmental planning instrument made under those laws, but excluding any development consent imposed under the *Environmental Planning and Assessment Act 1979*.

**Regulations** means the *Fair Trading Regulation 2012*.

**Secretary** means the Secretary of the Department of Customer Service.

**short-term rental accommodation** has the same meaning as in the *State Environmental Planning Policy (Short-term Rental Accommodation) 2018*.

**short-term rental accommodation arrangement** has the same meaning as in section 54A of the Act.

**short-term rental accommodation industry participant**, or ~~**industry participant**~~, has the same meaning as in section 54A of the Act.

**short-term rental accommodation premises**, or **premises**, means any residential premises located in New South Wales that are subject to a short-term rental accommodation arrangement. Where the premises are located in a strata or community scheme, the premises include the ~~common property~~ or association property in that scheme.

**strata scheme** has the same meaning as in the *Strata Schemes Development Act 2015*.

**strike** means a record of a contravention of this code made against a host, guest, or premises with respect to a host and identified as a strike.

**Tribunal** means the New South Wales Civil and Administrative Tribunal.

**visitor** means any person who, with the guest's consent, is present at the premises at any time during the occupancy period of a short-term rental accommodation arrangement.

## **4 CODE ADMINISTRATION**

### **4.1 General**

4.1.1 The Commissioner is to administer this code.

4.1.2 The Commissioner may delegate any of the functions conferred on the Commissioner by this code to a suitably qualified person, including to a suitably qualified arbitrator.

4.1.3 The Commissioner or Secretary are not subject to any action, liability, claim or demand for acts, or omissions, taken in good faith for the purpose of executing their functions under this code.

### **4.2 Funding for the code's administration**

4.2.1 Funding to administer this code is to be provided in the way prescribed in the regulations.

## **5 RIGHTS AND OBLIGATIONS OF INDUSTRY PARTICIPANTS**

### **5.1 General**

#### *Nature of obligations*

- 5.1.1 Nothing in this code affects the rights of an industry participant to also seek legal redress for any matters related to short-term rental accommodation.

#### *Obligations*

- 5.1.2 An industry participant must act honestly and in good faith in relation to:
- (a) a short-term rental accommodation arrangement
  - (b) any dealing, complaint or dispute relating to a short-term rental accommodation arrangement.
- 5.1.3 An industry participant must comply with a request made by the Commissioner to produce information relating to the operation of the short-term rental accommodation industry or this code. The Commissioner will use this information to monitor, evaluate and inform the further development of the regulatory framework for short-term rental accommodation.

This section is an offence provision under section 54C of the Act.

- 5.1.4 An industry participant must comply with any direction issued by the Commissioner under part 7.

This section is an offence provision under section 54C of the Act and a civil penalty provision under section 54D of the Act.

- 5.1.5 An industry participant must not knowingly misrepresent the identity of a person seeking to enter into, or entering into, a short-term rental accommodation arrangement, or the premises subject to a short-term rental accommodation arrangement, if the purpose of the misrepresentation is to avoid a provision of this code that applies because the person or the premises is recorded on the exclusion register.

This section is an offence provision under section 54C of the Act and a civil penalty provision under section 54D of the Act.

### **5.2 Booking platforms**

#### *Information about this code*

- 5.2.1 A booking platform must inform an industry participant using the booking platform's online booking service for short-term rental accommodation of the following matters before the participant enters into a short-term rental accommodation arrangement:
- (a) this code
  - (b) the booking platform's obligation to comply with this code.

- 5.2.2 A booking platform must ensure that a copy of this code is readily available on its website.

#### *Dispute resolution*

- 5.2.3 If a booking platform is made aware of a complaint or dispute concerning a host, guest, or premises subject to a short-term rental accommodation arrangement, the booking platform must notify the host or guest of the dispute or complaint as soon as practicable.

- 5.2.4 A booking platform must take reasonable steps to ensure that a host or guest is aware of how to lodge a complaint with the Commissioner about a guest, host or premises.

*Exclusion register*

- 5.2.5 A booking platform must ensure that:
- (a) premises are not advertised on the booking platform's online booking service for short-term rental accommodation if:
    - (i) the details of the host for the premises match the details of a person recorded on the exclusion register as an excluded host, or
    - (ii) the premises are recorded on the exclusion register as excluded premises
  - (b) a guest does not use the booking platform's online booking service to enter into a short-term rental accommodation arrangement if the guest's details match those of a person recorded on the exclusion register as an excluded guest.

This section is a civil penalty provision under section 54D of the Act.

- 5.2.6 If a booking platform is made aware that a host, guest or premises has been recorded on the exclusion register because of a contravention of this code in connection with short term rental accommodation arrangements made using the booking platform's online booking service, the booking platform must notify the relevant host or guest as soon as possible.

*Record-keeping requirements*

- 5.2.7 A booking platform must keep a record of the full particulars of each transaction involving a short-term rental accommodation arrangement that is entered into using its online booking service. The record must be:
- (a) kept for 5 years after the end of the occupancy period
  - (b) in a readily producible form.

This section is an offence provision under section 54C of the Act.

### **5.3 Letting agents**

*Information about this code*

- 5.3.1 A letting agent must inform an industry participant using the letting agent's services for short-term rental accommodation of the following matters before the participant enters into a short-term rental accommodation arrangement:
- (a) this code
  - (b) the letting agent's obligation to comply with this code.

- 5.3.2 A letting agent must ensure that a copy of this code is readily available to industry participants using the letting agent's services.

*Dispute resolution*

- 5.3.3 If a letting agent is made aware of a complaint or dispute concerning a host, guest, or premises subject to a short-term rental accommodation arrangement, the letting agent must notify the host or guest of the dispute or complaint as soon as practicable.

A letting agent must take reasonable steps to ensure that a host or guest is aware of how to lodge a complaint with the Commissioner about a guest, host or premises.

*Exclusion register*

- 5.3.4 A letting agent must not:
- (a) advertise or offer premises for short-term rental accommodation if:
    - (i) the details of the host for the premises match the details of a person recorded on the exclusion register as an excluded host, or
    - (ii) the premises are recorded on the exclusion register as excluded premises
  - (b) otherwise facilitate the host for the premises entering into a short-term rental accommodation arrangement for the premises if:
    - (i) the details of the host match the details of a person recorded on the exclusion register as an excluded host, or
    - (ii) the premises are recorded on the exclusion register as excluded premises.

This section is a civil penalty provision under section 54D of the Act.

- 5.3.5 A letting agent must not facilitate a guest entering into a short-term rental accommodation arrangement, using the letting agent's services as a letting agent, if the guest is recorded on the exclusion register as an excluded guest.
- 5.3.6 If a letting agent is made aware that a host, guest or premises has been recorded on the exclusion register as a result of a contravention of this code in connection with short term rental accommodation arrangements made using the letting agent's services, the letting agent must notify the relevant host or guest as soon as possible.

*Record-keeping requirements*

- 5.3.7 A letting agent must keep a record of the full particulars of each transaction involving a short-term rental accommodation arrangement that is entered into using the letting agent's services. The record must be kept:
- (a) for at least 5 years after the end of the occupancy period
  - (b) in a readily producible form.

This section is an offence provision under section 54C of the Act.

**5.4 Hosts**

*Hosts to act lawfully*

- 5.4.1 A host must not engage in conduct relevant to their capacity as a host that ~~contravenes~~
- (a) the criminal law
  - (b) the planning law or by-laws (if the premises are in a strata or community scheme) that apply to the premises.

*Obligations to guests and others*

- 5.4.2 A host must provide the short-term rental accommodation premises in a state that is consistent with any representations made when advertising or listing the premises for rent, or otherwise in communications made to guests.
- 5.4.3 ~~A host must hold public liability insurance~~ that is valid for the occupancy period. This insurance must cover:
- (a) the death or injury of a guest or visitor on the premises

(b) damage to or loss of a guest's or visitor's property at the premises.

5.4.4 A host, or the host's authorised representative, must be contactable within ordinary hours to manage guests, the premises, neighbourhood complaints and other issues related to use of the premises for short-term rental accommodation.

5.4.5 A host, or the host's authorised representative, must be contactable outside ordinary hours to deal with emergencies.

*Information for guests*

5.4.6 A host must give guests the contact ~~details of:~~

- (a) the host or the host's authorised representative
- (b) an emergency electrical service provider
- (c) an emergency plumbing service provider.

5.4.7 ~~A host must ensure guests have ready access to this code and any by-laws that apply to the guests.~~

*Obligations to neighbours*

5.4.8 A host must give the owners corporation for the premises (if applicable), the community association for the premises (if applicable), and the occupants of the residential premises directly neighbouring the premises subject to the short-term rental accommodation arrangement the following information:

- (a) ~~that the host is operating short-term rental accommodation on the premises~~
- (b) the contact details of the host or an authorised representative.

*Exclusion register*

5.4.9 A host who is recorded on the exclusion register is either entirely prohibited from participation in the short-term rental accommodation industry, or prohibited only in relation to specific premises as listed on the exclusion register.

This section is an offence provision under section 54C of the Act.

5.4.10 A host must not offer premises for short-term rental accommodation if the premises is recorded on the exclusion register as an excluded premises with respect to the host.

This section is an offence provision under section 54C of the Act.

5.4.11 A host must not enter into a short-term rental accommodation arrangement with a guest if the guest is recorded on the exclusion register as an excluded guest.

This section is an offence provision under section 54C of the Act.

## **5.5 Guests**

*Guests to act lawfully*

5.5.1 A guest must not engage in conduct relevant to their capacity as a guest that contravenes:

- (a) the criminal law
- (b) the planning laws or by-laws (if the premises are in a strata or community scheme) that apply to the premises
- (c) the terms of a short-term rental accommodation arrangement for the premises.

*Obligations to neighbours*

- 5.5.2 A guest must not at any time during the occupancy period:
- (a) create noise that because of its level, nature, character, or quality, or the time it is made, is likely to harm, offend, or unreasonably disrupt or interfere with the peace and comfort of neighbours and other occupants of the premises or any immediately adjoining premises
  - (b) act in a violent or threatening manner towards neighbours or other occupants of the premises or any immediately adjoining premises
  - (c) act in a manner that could reasonably be expected to cause alarm or distress to neighbours and other occupants of the premises or any immediately adjoining premises
  - (d) use or enjoy the premises in a manner, or for a purpose, that interferes unreasonably with the use or enjoyment of common property by neighbours and other occupants of the premises in a strata or community scheme
  - (e) intentionally, recklessly or negligently cause damage to premises, any common property or any other communal facilities within the immediate vicinity of the premises, or any public property in the vicinity of the premises
  - (f) intentionally, recklessly or negligently damage the personal property of neighbours or other occupants of a strata community scheme.

This section is an offence provision under section 54C of the Act.

- 5.5.3 The Commissioner may issue guidelines about what may or may not be appropriate conduct in accordance with section 5.5.2 of this code.

- 5.5.4 A guest must not copy, or knowingly retain, any ~~keys, security passes~~ or other instrument that facilitates access to the premises, after the end of the occupancy period.

This is an offence provision under section 54C of the Act.

*Responsibilities to hosts*

- 5.5.5 A guest must take reasonable care of the ~~host's premises~~ and the host's property at the premises.
- 5.5.6 A guest must notify the host or the host's representative of any dispute or complaint about a guest's or visitor's behaviour as soon as possible after the event or incident has occurred.

This section is an offence provision under section 54C of the Act.

*Exclusion register*

- 5.5.7 A guest who is recorded on the exclusion register as an excluded guest must not participate in the short-term rental accommodation industry as a guest.

This section is an offence provision under section 54C of the Act.

*Guests responsible for conduct of visitors*

- 5.5.8 A guest is responsible for the actions of visitors they invite onto the premises during the occupancy period and must ensure visitors to the premises comply with section ~~5.5.2~~ of this code as if they were a guest on the premises.

## **5.6 Facilitators**

- 5.6.1 A facilitator who acts as an authorised representative of a host, to the extent that the facilitator carries out the responsibilities of the host, is subject to sections 5.1 and 5.4 of this code as if the facilitator is the host of the short-term rental accommodation arrangement.
- 5.6.2 A facilitator who acts as an authorised representative of a letting agent, to the extent that the facilitator carries out the responsibilities of a letting agent, is subject to sections 5.1 and 5.3 of this code as if the facilitator is the letting agent for the short-term rental accommodation arrangement.
- 5.6.3 A facilitator, acting on behalf of a host must keep a record of the full particulars of each transaction involving a short-term rental accommodation arrangement the facilitator enters into on behalf of the host. The record must be kept:
- (a) for at least 5 years after the end of the occupancy period
  - (b) in a readily producible form.

This section is an offence provision under section 54C of the Act.

- 5.6.4 A host's or letting agent's use of a facilitator does not alter their obligations as set out in this code.

## 6 COMPLAINTS

### 6.1 Complaints process for alleged contraventions of this code

- 6.1.1 ~~A person~~ may lodge a complaint with the Commissioner about an alleged failure by a ~~person~~ to comply with an obligation under this code.
- 6.1.2 The Commissioner may determine the form in which a complaint must be made and the supporting information that must be submitted.
- 6.1.3 The Commissioner may obtain information relevant to a complaint from an industry participant who the Commissioner considers is likely to have access to that information.

#### *Notification of complaints*

- 6.1.4 On receiving a complaint about an industry participant, the Commissioner must give the industry participant a notice about the complaint. The notice must include:
- (a) details about the alleged code contravention as provided by the complainant
  - (b) the potential consequences if a code contravention is found
  - (c) instructions on how to provide evidence and submissions to the Commissioner
  - (d) the next steps in the process, including opportunities to appeal the outcome.
- 6.1.5 A complainant can raise a complaint with an industry participant before lodging a complaint with the Commissioner.
- 6.1.6 The Commissioner is not liable for the costs parties to the complaint may incur when dealing with the complaint.
- 6.1.7 The Commissioner must deal with a complaint fairly and as quickly as reasonably possible.

#### *Dismissing complaints*

- 6.1.8 The Commissioner may dismiss a complaint if satisfied:
- (a) the complaint is frivolous, vexatious, trivial, misconceived or without substance,
  - (b) the complaint has been previously determined under this code.
- 6.1.9 If the Commissioner is satisfied that a complaint should be dismissed under section ~~6.3.8~~, the Commissioner must issue a written notice to the complainant. The notice must include the reasons for the Commissioner's decision.

#### *Evidence*

- 6.1.10 The Commissioner is to consider any submissions and/or evidence provided by the complainant and the participant who is the subject of the complaint before making a decision on the complaint.
- 6.1.11 The Commissioner must allow all parties to a complaint a period of at least 14 days to submit any relevant information for the Commissioner's consideration before making a decision on the complaint.
- 6.1.12 In making a decision, the Commissioner may take into account other representations made by any person or government agencies about the complaint.

#### *Decisions*

- 6.1.13 The Commissioner must decide, on the balance of probabilities, whether the industry participant that is the subject of the complaint contravened this code in the manner detailed in the complaint.
- 6.1.14 The Commissioner must give all parties to the complaint notice of the Commissioner's decision about the complaint. The notice must include a statement of the reasons for the Commissioner's decision.

## **6.2 Complaints involving a contravention of other laws**

### *Contraventions of the criminal law or civil penalty provisions*

- 6.2.1 If a complaint alleges a contravention of a criminal law, the Commissioner may ask the complainant to take the matter to the Police and decline to accept the complaint.
- 6.2.2 If a complaint is based on a contravention of a criminal law or a civil penalty provision that is not administered by the Minister, the Commissioner may only accept the complaint if the complaint is accompanied by a finding of a court that there has been a contravention of the criminal law or civil penalty provision. Such a finding is, for the purposes of dealing with the complaint, conclusive evidence of the contravention.

### *Contraventions of planning laws*

- 6.2.3 If a complaint includes an allegation of a contravention of planning law, the Commissioner may ask the complainant to take the matter to the relevant local council and decline to accept the complaint.
- 6.2.4 If a complaint is based on a contravention of planning law, the Commissioner may only accept the complaint if it is accompanied by evidence of completed enforcement action by a council under the *Environmental Planning and Assessment Act 1979*, *Local Government Act 1993* or *Protection of the Environment Operations Act 1997*. Such a finding is, for the purposes of dealing with the complaint, conclusive evidence of the contravention.

### *Contraventions of by-laws*

- 6.2.5 If a complaint is based on a contravention of a by-law of a strata scheme or community scheme, the Commissioner may only accept the complaint if the Tribunal has already made orders for a financial penalty for the contravention of the by-law. Such a finding is, for the purposes of dealing with the complaint, conclusive evidence of the contravention.

## 7 COMPLIANCE AND ENFORCEMENT

### 7.1 Disciplinary action

- 7.1.1 Where the Commissioner finds that an industry participant has contravened this code, the Commissioner may:
- (a) issue a **warning notice** informing the participant that the participant has been found to have contravened this code and must, in the future, comply with the code or face disciplinary action,
  - (b) issue a **direction** to the participant requiring the participant to act or stop acting in a manner relevant to their participation in the short-term rental accommodation industry. Without limitation, the direction may:
    - i. specify a minimum or maximum occupancy period for any short-term rental accommodation arrangement involving the participant
    - ii. specify a maximum number of visitors that can enter the short-term rental accommodation premises or common areas at any one time
    - iii. restrict the participant's use of common property or association property
    - iv. prohibit the participant engaging in certain behaviour
    - v. impose other conditions on the participant when they participate in short-term rental accommodation.
  - (c) record a **strike** against a host, a host with reference to specific premises, or guest, or
  - (d) record a host, a host in relation to specific premises, or a guest on the **exclusion register** as an excluded host or guest under section 7.2.
- 7.1.2 Any direction the Commissioner issues will be void to the extent it is inconsistent with any planning laws or by-laws.
- 7.1.3 If the Commissioner is satisfied that a host or guest has contravened this code, the Commissioner can record a strike for the following reasons:
- (a) failure to comply with an ~~obligation to a neighbour~~, and the failure is not minor
  - (b) failure to comply with obligations under section 5.4.2
  - (c) failure to comply with host insurance obligations and the failure is not minor,
  - (d) where there has been a serious contravention of this code,
  - (e) where the Commissioner is otherwise satisfied that it is appropriate to do so.
- 7.1.4 For the purposes of section 7.1.4(d), the Commissioner may decide that a series of minor failures by an industry participant to comply with the code constitutes a serious contravention for which a strike may be recorded.
- 7.1.5 The Commissioner may take any other disciplinary action the Commissioner considers appropriate in all the circumstances.
- 7.1.6 The Commissioner may only take disciplinary action against an industry participant after affording the industry participant procedural fairness in relation to a complaint.
- 7.1.7 If the Commissioner decides to take disciplinary action against an industry participant, the Commissioner must provide a brief statement of reasons to the participant which informs the participant that they may apply for a Secretary review of the decision.
- 7.1.8 Where an industry participant has been subject to other regulatory action for a breach of criminal laws, by-laws, or planning laws that is also a contravention of this code, the

Commissioner may only take disciplinary action against that participant for that contravention if it is necessary to protect the public or this code's integrity.

## **7.2 Exclusion register**

- 7.2.1 The Commissioner must keep and administer an exclusion register.
- 7.2.2 The Commissioner is to make the ability to search the exclusion register publicly available on the internet and ensure it is updated in real time to the extent possible.
- 7.2.3 The Commissioner may record on the exclusion register either a host, a host in relation to particular premises, or a guest.
- 7.2.4 The Commissioner must record on the exclusion register for five years:
- (a) the guest as an excluded guest where the guest has had two strikes recorded against them in a two-year period
  - (b) the premises as excluded premises where a host in relation to those premises has had two strikes recorded against them in a two-year period
  - (c) the host as an excluded host where a host has had two strikes recorded against them, not with respect to specified premises, in a two-year period.
- 7.2.5 The Commissioner must also record a host or a guest on the exclusion register if the Commissioner is satisfied:
- (a) the person has been charged with a criminal offence and it is in the public interest to record the person on the exclusion register as an excluded host or guest until the criminal proceedings are determined, or
  - (b) the person has been convicted of an offence and it is in the public interest to record the person on the exclusion register for a specified period or indefinitely.
- 7.2.6 The exclusion register must record:
- (a) for an excluded host or guest—their name and any other of their details that the Commissioner considers necessary to identify them
  - (b) for excluded premises—the address of the premises and the name of the host who incurred the strikes with respect to the premises
  - (c) any other details about an excluded host, guest or premises the Commissioner considers appropriate.
- 7.2.7 Before the Commissioner records a host, guest or premises on the exclusion register, the Commissioner must take reasonable steps to notify the relevant host, guest or premises' host of:
- (a) the Commissioner's intention to record the host, guest or premises on the exclusion register
  - (b) the period for which the record will remain on the exclusion register.
- 7.2.8 The Commissioner must promptly remove any false, erroneous or misleading information about a host, a guest or premises, from the exclusion register.
- 7.2.9 A premises owner may apply to the Commissioner for the removal of a premises from the exclusion register. The Commissioner is to remove the premises from the exclusion register if the Commissioner is satisfied:
- (a) the owner is not the host against whom the strikes with respect to the premises were incurred and the host against whom the strikes with respect to the

premises were incurred no longer has any direct or indirect interest in the premises, or

- (b) where the premises were excluded for a breach of planning laws, that breach has been rectified or otherwise resolved.

7.2.10 Despite any other clause of this code, a booking platform, letting agent or host is not required to cancel any short-term rental accommodation arrangement involving a host or premises recorded on the exclusion register where:

- a) the arrangement was made before the date (the record date) on which the host or premises was recorded on the exclusion register, and
- b) the occupancy period starts within one month of the record date.

### **7.3 Secretary review of disciplinary action**

- 7.3.1 Appeals against the Commissioner's decision to record a guest, host or host's premises on the exclusion register are covered in the Regulations.
- 7.3.2 An industry participant who has received a warning notice, direction, or strike against their name or in relation to premises may apply to the Secretary for a review of the Commissioner's decision.
- 7.3.3 An industry participant may apply for a review within 21 days of receiving notice of the disciplinary action from the Commissioner.
- 7.3.4 The Secretary may determine the form in which a review application must be made.
- 7.3.5 A review application may include submissions to the Secretary about why the Commissioner's decision should be changed or overturned.
- 7.3.6 The Secretary must decide a review application within 28 days.
- 7.3.7 The Secretary is to notify the applicant of the Secretary's decision and the reasons for the decision.
- 7.3.8 The Secretary may decide to impose alternative or additional disciplinary action on the applicant as a result of the review.

As a landlord and participant in the Short-Term Rental Accommodation (STRA) Industry I wanted to provide my feedback on the Government's proposed regulations.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home and support my local community. I understand that the Government has made commitments to support "fair short-term rental accommodation (STRA) regulation" and that the review of the Industry is in responses to the negative impact on community's amenity, namely party houses.

Short-Term Rental Accommodation is an important Australian holiday tradition embedded into the fabric of the Australian culture and is at risk because of the abuse of a few who negatively impact neighbourhood and community amenity such as Guests holding anti-social events like 'Party Houses' and as a result of platforms that promote features like 'Instant Book' which assists bookings for 'Party Houses'.

I ask that the Government be mindful that Platforms have created features like 'Instant Book' with no consequence, Guest's have used 'Instant book' for anti-social behaviour such as hosting a party, hens or buck event suffers no consequence (as they change email address or other identify obfuscation to avoid identify detection) however this burden becomes the property owner and letting agent's responsibility. There must be fair and equitable responsibility and consequences suffered by all parties including Platform and Guest.

The STRA Industry is a significant contributor to the NSW economy and helps home-owners to pay the mortgage and bills, to share their spaces with guests so that they can enjoy and participate with other communities and importantly is a recognised financial driver of regional areas where Tourism dollars are spread throughout the local community such as the local butcher, local café, local tourist attraction and the fishmonger. Over regulation and mis-appropriating responsibility and limiting consequences on Guests and Platforms puts this economic driver at risk. The draft Code and STRA Regulation unfairly places considerable burden on the letting manager and property owner.

Generally, I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

### **1) STRA Planning Policy Instruments**

a) I strongly oppose the exemption of properties where a host is present.

i. Firstly there is no way to monitor and manage this process and confirm that there is a host present which will result in the creation of a loop hole.

ii. By expressly exempting these properties the government is not addressing the scope that the STRA Review sought to review and address namely concerns about the housing affordability, availability and the impact on amenity. If there is to be credibility and fairness then all elements with potential to impact the housing affordability, availability and the impact on amenity by the STRA Industry needs to be included.

b) I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. This is a significant barrier to home sharing who share their home for a few months (cumulative) a year and will make hosting uneconomical which will end up making holidays across NSW more expensive.

c) We are opposed to the potential of day limits in regional areas as determined by local council. Day caps for holiday rentals not only put the economic uplift associated with the tourism sector at risk, but also fails to address the the most consistently cited concern about the industry, namely the impact on amenity.

d) The proposed 21-day cap is limiting and not reflective of the mobile workforce. It is only in rare cases where an employer can afford a consecutive 21 day booking for accommodation to carry out work. Typically, it is Monday to Friday (5 days) and occurring in several blocks. We recommended that accumulative bookings from the same company is the best measure and is managed by Company name and or Guest name.

There are very few guests who have the means to rent STRA for a period of five days several times a year. Typically this represents a corporate/work booking.

e) We do not support limiting the number of guests allowed in a bedroom in its current form. This proposal is particularly problematic for people with close supervision needs, for example babies who sleep in cots, very young children who still sleep with their parents and people with special needs.

We argue for the current short-term rental code, which has worked well for eight years, to prevail on this matter. The current rules allow for two adults per bedroom, plus two for the household i.e. a two-bedroom property is allowed six people.

For properties that are specifically designed to cater for larger groups than what the above rule would allow, we believe that owners should have the power to apply to their local council for development approval to use their property as a short-term rental and cater a higher number of guests.

f) Options need to be provided to the Host/Letting agent to enforce code and/or terminate the occupation of a guest where a code violation is occurring. An example is where community amenity is being negatively impacted such as a party event is occurring the Letting agent needs authority to protect the amenity and terminate violation in the form of a legal and immediate eviction where the financial loss is borne by the Guest in the form of loss of occupation and associated rent paid and the cost of carrying out such a termination.

g) We support a regulatory approach that provides the best balance for consumer safety, community amenity and the contribution of the sector to the economy. For the NSW approach to work properly, it must treat all properties equally - whether hosted or un-hosted, primary or secondary.

h) We believe that 'Terms of Use' and associated agreements used by all participant, including but not limited to; Terms and Conditions, License to occupy, STRA Agreement etc should specifically discourage party houses including the use for bucks, hens events. The strict prohibition of the use of the premise by a Guest for the purpose of holding a party, hens or bucks events should be codified.

Its is our recommendation that platforms (as primary booking agent) should be mandated to ensure this is communicated to each guest and that each guest is required to agree and accept this prior to making a booking and when creating an account.

When a guest is found to have contravened this an automatic strike is recorded.

i) Concerning Jurisdiction. Consumer complaints are currently dealt with under the NSW Civil and Administrative Tribunal (NCAT) along with any residential tenancy issues. The establishment of the STRA complaint process sits outside existing established processes

meaning that a complaint (matter) could potential be lodge both with NCAT and the STRA Commissioner regarding the same matter and although within the purview of the same responsible office (Commissioner of Fair Trading) different processes and approaches can be applied. It is our recommendation that 'double jeopardy' can occur and can be avoided where the STRA Complaints process is recognised as sole avenue.

j) Whilst there is a definition of Guest given, it needs to include all guests staying at the property despite not being listed as the guest who made the booking and all guests details should be captured during the booking process to avoid violation avoidance.

## **2) Environmental Planning and Assessment (STRA) Regulation 2019**

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests.

However I recognise the importance of consumer safety and I support the NSW Government streamlining safety regulations which:

- i. Respect the ancillary use of my home for home sharing
- ii. Mandate smoke alarms – either battery operated or hard-wired

## **3) STRA Property Register**

**Registration of all holiday rentals** – We are supportive of compulsory and simple registration for all properties listed on a short-term rental accommodation platform. When implemented correctly in other parts of the world, the registration of holiday rentals has proven to be a low-cost and effective way of informing the development of sensible rules for our growing sector.

In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. We would agree to a no cost registration and licensing system.

**Code of Conduct** – the core elements that the regulations and code is seeking to address is; housing affordability, availability and the impact on amenity. With specific regards to impact

on amenity it is the abuse of the STRA Industry by guests who hold parties, hens and bucks events that negatively impact on communities.

It is our view that booking platforms that provide features such as true 'Instant Book' enables a culture of guest abuse as these features are for the direct financial benefit of the Platform but remove all interaction with the guest from the host and Industry participant as the booking is completed within the booking Platform and the Host/letting agent/industry participant has no recourse to qualify or vet the guest as all Guest details and communication with Guest is controlled by the Booking platform in a 'Closed Loop Communication' process.

These features are in-fact mandated by Platforms and Letting Agents are penalised by the Platform if they a) do not accept this booking type b) do not accept this type of booking by negatively weighted listing results. A host/ Industry participant that offers and accepts true 'Instant Booking' is given a higher favourable weighting listing result by Platforms in how the booking platform algorithmically represents its search engine results.

True Instant booking occurs via both Airbnb and Booking.com, they are the offending platforms. Stayz/Homeaway offer "Instant Booking" which is in-fact an instant reservation where the host/letting agent/industry participant still has full access to Guest information, ability to communicate with guest to vet and qualify and is not penalised (yet) for not offering or accepting "Instant Booking" requests.

On this basis we believe true 'Instant Book' features should not be available within any Platform and should be mandated by the STRA Code and Regulation.

**Industry participants Obligations** - I support the Code of Conduct which overall is reasonable and representative of the home sharing community and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to require all letting activities to be conducted only by Licensed Real estate agents and that the use of independently audited Trust Accounts be mandatory to ensure protections for guests, host's and landlords is preserved. This provides consumer protections that are already well established and accepted and extends safe guards such as financial management through the use of Trust Accounts, professional insurance such as Professional Indemnity for Real Estate and a well established and robust regulatory framework.

**Guest Definition** – A guest booking is typically made in one name only, yet a premise may sleep more than one person. The overwhelming majority of STRA premises sleep greater than one person though only one person, the primary Guest details are captured.

It is our belief and recommendation that all persons staying at the property are required to provide adequate identification at time of booking & managed by the Platform to satisfy the Registry to avoid:

- Identity Obfuscation and
- Rorting of the strike/exclusion registry.

When a member of a group booking e.g Primary Guest is found to have violated the Code they can simple either obfuscate their name OR ask another member of the group booking to make a different booking in their name to avoid detection. This way all members of the group booking who participated in the violation are not being held accountable for their actions

**Code Definition** – The Government via the STRA Code of Conduct and Regulation seeks to address the community and neighbourhood amenity however definitions of community and neighbourhood amenity need to be established. What is considered and defined as reduced community amenity, is it a Party, hence of bucks event?

We strongly believe that a events such as party, hence of bucks need to be defined as inappropriate and included as prohibited events within the Code and that all parties that participate, arrange, hold and or market such events should be held accountable

**Complaint registration** – We believe that the cost of lodging a complaint by all parties to be set at \$150 or half the maximum actual fee of providing the service as determined by the Commissioner or whatever is the lessor. This financial hurdle is to discourage frivolous and vexatious complaints.

**Strikes** – The proposed ‘two strikes within two years’ for both Guest and host/letting agent/industry participant is unfair and burdensome and clearly weighted in the favour of the Guest. A guest typically books short term holiday accommodation only once per annum however a host/letting agent/industry participant facilitates a multiplier of 700X. That is, a typical host/letting agent/industry participant facilitates approx. 700 – 1100 guest bookings per annum and therefore the applied percentage exposure to one (1) strike pa is greater than that of a Guest.

Therefore, it our recommendation that the limit should be:

- Guest - two strikes within two years.
- Host/letting agent/industry participant - five strikes within two years.

When a complaint is upheld and the source of the guest booking is found to be a certain platform in five (5) or more occasions within a one year period the platform is penalised by \$100,000 each instance commencing five and more. Up until ten instances within a one year period and then the platform is added to the exclusion register for five year period.

**Strikes, nature of complaint** – The proposal for a complaint to be valid because of ‘misrepresentation of the state of the STRA premise’ is vague and open to abuse. Within the current Real estate regulation there exist definition and example of how this is treated for residential properties and we believe these should be adopted as they are already industry wide accepted with an established regulatory framework.

Additionally we believe that a complaint should be found valid and a strike recorded when the published, communicated and accepted Terms and Conditions of the letting have been accepted by a Guest and not followed. With special attention to where and when instances of parties, hens and bucks events have been expressly banned by the host/letting agent/industry participant are found to occur as the host has contravened the accepted Terms and Conditions.

**Complaints** – The current proposal of registering a complaint is open to abuse by serial complainants as there is no recourse of consequence for a person who acts vexatiously or mischievous intent to frustrate the normal operations of a small business.

We propose that when two complaints within a two-year period are found not to be upheld by the commissioner then the complainant should be treated and recorded as vexatious and not to be relied upon.

**Supporting Evidence** – to avoid vexatious and unsubstantiated complaints it is our submission that each complaint:

a) Must be accompanied by supporting evidence including but not limited to:

- Was the defendant informed of the code violation,
- Was the defendant given opportunity to resolve the matter,
- Documentary evidence, photos, videos, Statutory Declaratio, security company report, police and or council ranger report

*In the instance where a community amenity is being negatively impacted on such as a party event is occurring (existing draft code unfairly and solely holds letting agent/property owner responsible)*

b) The Burden of Proof needs to be on the complainant

**Exclusion Register** – The burden of being registered on the exclusion registry exempts Platforms from consequence and unfairly lays responsibility directly at the feet of those with lack of resources to argue their case. Currently there exists no provision for Platforms to be subject to complaint, review and added to the Exclusion Register, there needs to be.

There must be consequences for Platforms and we propose that if complaints are upheld and are to be found to have occurred via the use of a certain platform then that platform needs to be held accountable.

We suggest that in the instance of ten (10) complaints are valid and upheld by the commissioner within a one year period then the Platform shall be equally listed on the registry and equally not permitted to participate within the STRA industry for five years.

**Exclusion Register** – Fees and cost recovery should be recovered by all participants including guests and should be self-funded by way of penalties and fines incurred by Industry participants. This avoids any revenue raised via penalties not being rolled up into general consolidated revenue by Government but go directly to the area of industry (Tourism) that needs support.

Additionally, the mechanisms for costs recovery by appropriation according to; number of premises, number of days, STRA revenue and upheld complaints does not apply a provision for Platforms.

Platforms generate hundreds of Millions of dollars each year within NSW STRA Industry and should a) pay proportionately and b) should face consequences and penalties proportionate to their revenue and market dominance.

**Penalties** - When guests are found to be in violation of Code and penalties are applied they need to be applied to all parties who were present during the occupation. The current proposed amount should apply to each Guest equally. Penalties need to be applied to all guests who stayed at the property during the instance of violation and not solely borne by the guest who made the booking.

This financial deterrent will assist in meeting the aims of the Regulation and Code namely reducing the negative community impact on neighbour amenity.

**Register Data Collection and Management** - How will data be recoded and stored? What type of data will be captured and used to identify participants?

### **Classes of Industry Participant –**

Please include ChaMello Pty Ltd operating as Emerald + Aqua (ABN: 47602 114 643). Emerald + Aqua operates similarly to organisations listed in the code such as MadeComfy, Hey Tom and AirSorted.

### **Property & Complaint Register**

It is our view that Platforms need to automatically check each guest before taking a booking against the register.

To avoid guest identity obfuscation a minimum:

- Full name
- Driver license details
- Full address
- Email address
- Mobile phone number and
- Date of Birth

is provided as mandatory.

The reason for all of these details is it is very easy to change an email address, insert a middle name or initial to avoid identity matching. Additionally, this will also removed the risk of incorrectly identifying the wrong Sarah Jane or Robert Smith.

**STRA Regulatory and Code Commencement** – The changes proposed are significant and costly, they represent complex adjustment just as the national economy is poised for a recession.

Typically the height of business activity for the STRA Industry commences from the October long weekend through mid-March we recommend that any commencement begin after that

period. The ideal period is after the Financial year has concluded so therefore beginning of September.

Both the Government and STRA industry need considerable time to design and implement education and awareness initiatives with several audiences:

- General Publish – Guests
- Letting Agents
- Hosts
- Property Owners
- Industry participants, and
- Platforms

Regarding the changes. Furthermore, those carrying the burden of the proposed changes, the Property Owners and Letting Agents need time to finance and organise the complex compliance.

Furthermore micro and small businesses, the backbone to the NSW economy that act as Letting Agents need to finance and support the training of staff, update websites, legal agreements, systems and processes need to be reviewed and updated to reflect the changes and new obligations of parties. This is not insignificant and for micro and small businesses represents a significant financial hardship.

Given these factors we believe a staged approach that provides time for necessary changes to occur and for the phasing in of different components being:

- 1) Stage 1 September 2021 Register Commences
- 2) Stage 2 September 2022 Code of Conduct Commences
- 3) Stage 3 September 2023 Review of Regulation and Code commences
- 4) Stage 4 May 2024 Review of Regulation and Code complete
- 5) Stage 5 July 2024 Review of Regulation and Code findings released
- 6) Stage 6 September 2024 Review of Regulation and Code findings adopted

This phased in approach also neatly address how to apply changes to future accommodation that is booked prior to commencement. Typically accommodation is booked up to 18 months in advance, there can not be two systems/two processes and or two different legal treatment applied to bookings based on Commencement date. A timely staged approach ensures that there is the right approach for all boeing situations.

**Scope and Administration of Review-** how will the social and environment impact be measured? Will the economic benefits/impact be equally measured to quantitate disruption to the NSW economy and regional economies?

Who, where and how will the review take place? How will public comment be sought and how long will the review process take place? How will the success be measured?

As the NSW Government considers how people travel and use their homes today we respectfully submit that we don't need severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

It is the technology that the Platforms provides like 'Instant Book' that is abused by guest's to avoid vetting and qualification by letting agents and it is the Guests wilful anti-social behaviour that goes with limited scope of consequence. These two behaviours by the Platform and Guest is unfairly carried by the letting agent and property owner. We submit that it is these two participants (Platforms and Guests) where greater scrutiny and control should be applied.

Our communities rarely had these issues before Airbnb and Booking.com came to our shores.

Thank you for considering my submission.

Kind Regards,

## Anthony Tavella

## **INTRODUCTION**

1. This is the submission to the Department of Planning and Environment and the Department of Better Regulation and Innovation on the Short-Term Rental Accommodation Framework by the the Owners Corporation Network of Australia Pty Ltd (OCN). This submission supplements the preliminary submission lodged on 10 September 2019. The OCN is an independent association of apartment owners and represents the interests of residential and community title strata schemes in NSW.
2. The OCN welcomes the release of the Draft Short-term Rental Accommodation Framework.<sup>ii</sup> We also appreciate the opportunity to make a fuller submission on a topic that is of the utmost importance to our members and to all strata owners and residents.
3. The OCN has made previous submissions and gave evidence to the 2016 Parliamentary Inquiry.<sup>iii</sup> We provided a submission to the Short-Term Holiday Letting Options Paper; a submission to the Department of Planning and Environment (DPE) on the Explanation of Intended Effect in 2018 (EIE) and OCN was the community representative on the Code of Conduct Advisory Committee. Entire Owners Corporations and individual apartment owners representing thousands of people have made comments and submissions.<sup>iv</sup> In the meantime, there has also been a growing resource of independent academic research on the impacts of the online rental platforms internationally and in Australia.
4. The STRA Framework de-segregates the housing and tourist accommodation markets and has serious implications for residential strata communities across NSW. It removes planning controls and does not differentiate between different markets, locations, types of residential dwellings or demographics. The state-wide “solution” contains no meaningful controls over the scale or intensity of short term letting for the protection of housing or to mitigate impacts on close residential environments. Local Councils will have no basis on which to deny approval to a large short-term letting development or limit short term letting where a neighbourhood has reached capacity. The policy proposed for NSW stands in stark contrast to WA that will deliver a state-wide register with conditions set Local Council level.
5. In addition, the EIE clearly stated that dwellings approved under the Affordable Rental Housing SEPP 2009 (SEPP No 70 Affordable Housing (Revised Schemes)) would not be permitted to be

used for STRA. This has not been carried through to the Draft STRA SEPP and undermines the core objectives of this State policy for affordable housing.

6. The majority of residential strata owners are still unaware that such a significant change to the planning system and residential strata model has been proposed and is being prepared for implementation. In November 2018 and April 2019, OCN recommended that DPE conduct information sessions or workshops to explain the proposed new regulatory STRA Framework.

## Planning Issues

7. NSW is implementing Visitor Economy Taskforce's recommendation to double overnight visitor expenditure in NSW by 2020.<sup>v</sup> The forecast is for visitors to spend more than 146 million nights in Sydney by 2024-25 (alone).
8. On September 2019, the Government said that: "...one of the factors that we are considering is just the size of the economy. It is about \$31 billion, I think, in terms of value in 2016. The other side, which you would obviously be across, is just the impact it is having in terms of creating jobs, actually supporting tourism, amongst others. You have got to think about the wide spectrum rather than just noise with the next-door neighbour. (Mr King, Hansard Budget Estimates 9 September 2019).
9. According to Austrade the "sharing economy" helps to: "... address gaps in supply during periods of high demand and the competitive pricing and diversity of options opens up travel to more Australians and overseas visitors".<sup>vi</sup>
10. The intention of the STRA SEPP is to declare the use of residential dwellings for short term letting by tourists and visitors to be "exempt development", even in the close confines of a residential strata community in residential flat buildings designed, approved and occupied by resident owners and long-term tenants. It is our submission that STRA is not a "minor impact" and an exercise of executive power declaring it to be so may well be *ultra vires* the principal Act. It is self-evident that in the residential strata environment, STRA is not a "minor impact". Tourism is not an objective of the *Strata Schemes Management Act 2015* (NSW).
11. The only protection that any residential strata scheme will have is a by-law to prohibit a non-resident owner from converting a residential apartment to the tourist market and visitor market.<sup>vii</sup> As 25% of the organised vote of absent landlords can defeat the adoption of such a by law, many of the most vulnerable residents will be forced to live with transient occupants accessing their building and using their common property assets. In a small scheme this means that just one or two investors can control the direction of the entire apartment building.

12. The residential strata model is based on residential living, shared property and democratic governance. In its present form the STRA SEPP will generate more conflict and extra costs borne by the entire Owners Corporation.<sup>viii</sup>
13. In April 2019, the OCN wrote to the Minister for Planning to raise concerns that:
- i. there will be no limit to the number of apartments in a single building or scheme that can be converted to STRA by a single or multiple “Hosts”;
  - ii. STRA businesses will be permitted to operate dispersed among resident owners and tenants;
  - iii. there will be no threshold that would trigger a “change of use”;
  - iv. there will be nothing to stop an entire scheme being taken over by stealth; and
  - v. the clear legal authority to adopt a by law passed by the Parliament in August 2018 is necessary and important. It will be necessary to protect residents from investors for whom the dwelling is not their principal place of residence. But it will not be available to some of the most vulnerable residents because an organised minority of 25% can prevent such a by-law being adopted.

### Removing residential protections

14. Our concern has been elevated further with the release of the Draft SEPP.
15. The proposal to declare STRA to be “exempt development” removes all planning controls that protect residential neighbourhoods. Thousands of apartment dwellers living in mixed use and commercial zones, like the CBD and Pyrmont, rely on their development consent condition that explicitly prohibits short term letting to stop their homes turning into quasi-hotels.
16. In residential zones the STRA SEPP means there will be no control over the scale, intensity, or spatial distribution of short term letting among residents. The conversion of housing to tourist accommodation hollows out residential neighbourhoods and in the strata environment the impacts are acute. The Local Council will have no mechanism to moderate the scale, intensity, or spatial distribution of STRA.
- **Un-hosted STRA should not be classified as “exempt development”.**

### Development application for full time STRA

17. In 2018 the Explanation of Intended Effect (EIE) expressed the clear commitment that 180 days would be the maximum permitted Un-Hosted STRA in the Greater Sydney Metropolitan Area (GSMA). This is clearly not now the case. The 180 days applies only to the “exempt (or complying) development” pathway. A person will be able to apply for consent to conduct Un-Hosted STRA for 365 days a year. The DPE also confirmed to a Local Council workshop held on 5 November 2018 that there was no intention of making provision for a DA. However, the effect of the Draft SEPP is to make STRA a defined use, permissible and therefore a DA can be lodged and Local Council will be obliged to consider it. This change of position is not explained or justified in the Discussion Paper.

18. It enables a commercial operator to overcome the STRA Framework. In the strata context a DA requires the consent of the Owners Corporation.<sup>ix</sup> In reality, the competing interests of investors, commercial operators and residents within a single scheme is intense, unrelenting, distressing and expensive. The possibility of a DA for full time STRA for one or more apartments in a residential building is totally unacceptable.<sup>x</sup>

- **There must be an absolute cap on STRA and no possibility of DA for full time Un-Hosted STRA in a residential flat building.**

### Twenty - one day loophole

19. The Discussion Paper now also reveals that, in addition to the 180 days, Un-hosted lets for 21 consecutive days or more will not be subject to the cap at all. This is an entirely new category of STRA. It effectively removes the cap, which is the clear goal of the “industry”. The 21 day + loophole has been put forward on the dubious grounds that longer STRA causes less noise and nuisance to neighbours but there are far wider and more sinister implications. The 21 day + loophole:

- i. encourages landlords to abandon residential tenancies in favour of STRA;
- ii. makes monitoring impossible and strata management more difficult;
- iii. undermines data analysis or any meaningful profile of the industry;
- iv. gives the “corporate letting” industry free access to all residential apartment buildings in all zones (including residential zones). This will enable them to evade the existing NSW, “serviced apartments” rules. Illegal short term letting in residential schemes is already being advertised as “corporate” but is, in fact, occurring on a short-term letting basis for 2 – 4 days.

- v. increases the overall volume of STRA occurring among residents because it adds unlimited 21 day + lets to the “maximum” of 180 days in effect removing the cap;
  - vi. complicates the implementation of the by law, which turns on the concept of “principal place of residence”.
20. This new 21 day + loophole has not been credibly justified or explained.
21. The definition of short-term rental accommodation in the draft STRA SEPP means an existing dwelling— (a) that is lawfully used by the owner, tenant or permanent resident of the dwelling (the host) to provide accommodation on a commercial basis for a **temporary or short-term period**, with or without the host residing on the premises during that period. This new language introduces a new concept into the STRA Framework. The definition of short-term rental accommodation arrangement in the Fair-Trading Act means a commercial arrangement for giving a person the right to occupy residential premises for **a period of not more than 3 months at any one time**.
22. This retro-fitting of a new unreportable and uncapped 21 day + period illustrates demonstrates gaps in the policy development process that resulted in a decision that the state-wide policy is appropriate. If there are grounds for creating a new category, there is a public policy imperative to consider all the implications and what, if any, the appropriate response should be. This new category undermines the entire Framework. It should be withdrawn.
- **The OCN position is that the 21-day loophole must be removed.**

### 180 days excessive

23. The Government is already well aware that the 180-day cap is excessive by world standards. Day caps are intended to be an economic lever to drive apartments back to the residential market. Throughout the entire policy process, the OCN, the Tenants Union, the City of Sydney, and other metropolitan Local Councils like Inner West, and regional Local Councils like Tweed Heads, have all said the cap must be lowered to 90 or 60 days.
- **To function as a “home sharing” instrument there should be a lower cap, at least 90 day, and preferably 60 and restricted to the principal home in Sydney.**
  - **In areas out of Sydney, Local Councils should have flexibility to set lower caps and apply precinct-based development controls to manage competing housing and tourist requirements.**

24. The pressure from industry to remove caps is unrelenting and will continue because the policy is state-wide – it cannot differentiate between different markets, types of dwellings, location, demographics or local conditions and residential as opposed to tourism objectives. It makes no distinction between a rural property in a regional area, a coastal town house complex, or apartments in a single high-rise apartment building in Kings Cross.
25. Declaring of STRA to an “exempt” development under the current settings would be a serious mistake and a mistake that will be almost impossible to rectify. The State Government needs to give very serious consideration to all the consequences of the policy before it ‘legislates’ to convert residential homes into holiday flats and houses and apartments into a quasi-boarding houses and hostels. There are numerous unintended consequences but these are foreseeable.

### Un-related Parties

26. The EIE stated that the intention of the STRA SEPP was that a residential dwelling could not be used for STRA for un-related parties. This has not been followed through into the draft SEPP. So, if this is correct, it is entirely possible for a person in either a free-standing home or strata townhouse to conduct commercial STRA with 2 persons per bedroom in multiple bedrooms – hosted or un-hosted. Indeed, this could be conducted even from an apartment or multiple apartments. As there is no DA required there is no opportunity for any neighbour or local residents or affected businesses to express a view or objection to this commercial activity.
27. If it proceeds it will undermine the existing controls on boarding houses and hostels and is being permitted regardless of the local conditions or the attributes of the house or apartment itself. It is extraordinary that this would be permitted without development consent in any zone. It is completely unacceptable that this would be permitted in a residential strata community, with nothing more than notice to the Owners Corporation. The Owners Corporation is bound together in shared ownership of common property and collective legal and mutual social obligations.

### Summary of Recommendations

- Where the host is not present, short term letting must never be classed as exempt development.
- The OCN position is that the 21-day loophole must be removed.
- To function as a “home sharing” instrument there should be a lower cap to no more than 90 days, and preferably 60 and restricted to the principal home in Sydney.
- In areas out of Sydney, Local Councils should have flexibility to set lower caps and apply precinct-based development controls to manage competing housing and tourist requirements.

- Residential strata schemes in mixed use and commercial zones with express prohibitions on short term letting must have their development consent conditions preserved.

## SCALE OF SHORT TERM LETTING

28. The number of apartments available for short term letting has been growing dramatically but remains underestimated in most public debate. The fragmentation of the “market” and the growth of the self-styled entrepreneur “Host” plus the illegal sub-letting of apartments is not well understood and difficult to track. In this hyper-competitive environment, Sydney is an important market globally. This is just one the many reasons why a comprehensive, cost effective, Register is needed. That is why companies, like Airbnb, invest so much money on promotion, internet saturation and lobbying for less or no regulation and oppose sensible standards in the public interest.<sup>xi</sup>

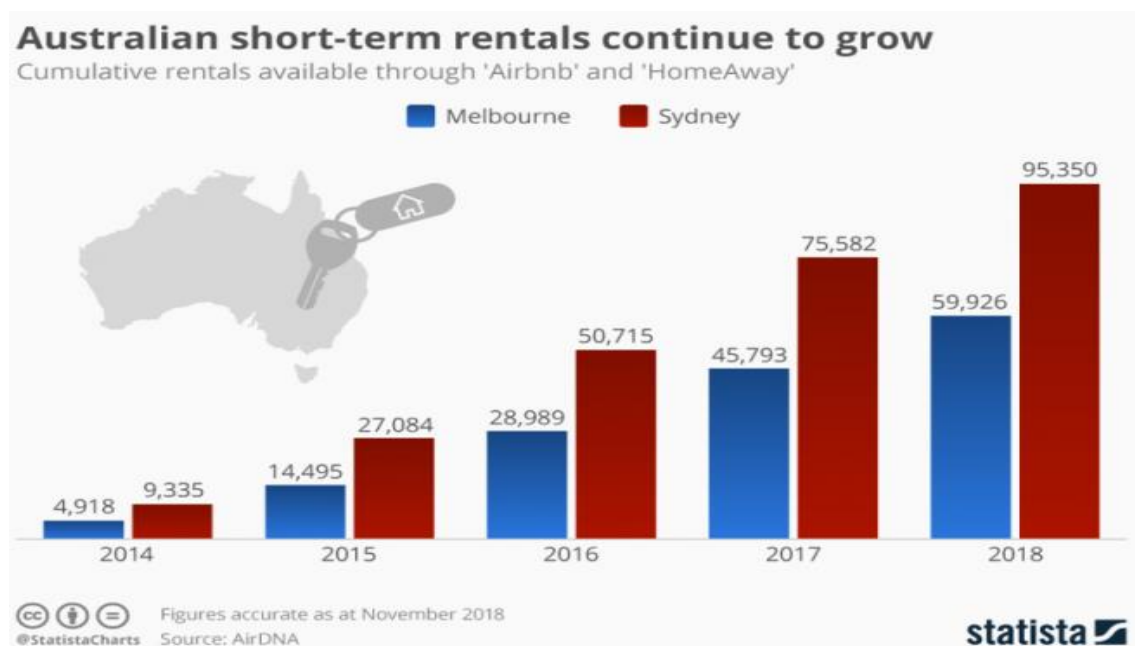

29. In 2018, the Australian Housing Urban Research Institute published the chart below showing that there were just over 20,000 Airbnb listings in Sydney and just under 20,000 listings in Melbourne.

**Figure 1: Airbnb listings for Sydney and Melbourne (Aug 2015–Feb 2018)**

Source: authors, based on analysis of AirDNA.co data

30. The Statista analysis below estimates that in fact short-term letting is more than four times as large in Sydney and more than three times as large in Melbourne.

31. This simple graph illustrates the extent to which the focus on Airbnb distorts the understanding of the public, bureaucrats and politicians about the impacts of online rental brokers. There are dozens of platforms operating in Australia and overseas and innumerable licensed and unlicensed “agents” turning apartments into short term rentals. This fragmenting market includes a cadre of get rich quick ‘professional tenants’ who illegally sublet multiple apartments or now co-host with landlords’ using multiple residential tenancies for multiple apartments across multiple buildings. The figures belie the impacts for the people who live in the localities and in the residential schemes in which this conversion is taking place. “The biggest losers are the people who live in apartments and younger and vulnerable residents who are unable to afford a home and are stuck in an increasingly insecure housing market.”

32. In 2017, Professor Nicole Gurrán, University of Sydney, published an initial and conservative estimate of potential loss of 6000 apartments to Airbnb (alone).<sup>xii</sup> This is equivalent to removing about 9 apartment buildings the size of Sydney’s World Tower from the residential market. In some locations the number of listings for STRA is five times that of residential rental vacancies.<sup>xiii</sup>

33. In 2018, the Australian Housing Urban Research Institute (AHRUI) found that over 10% of housing in some suburbs is listed on the Airbnb platform and more than 40 per cent of listings are for Hosts who have more than one listing. Some ‘hosts’ identified across both Sydney and Melbourne had over 120 properties suggesting the high presence of property management companies and commercialised activity. The report also debunked Airbnb’s long held claim that the majority of its

hosts use the platform as an economic lifeline to cover basic costs such as rent and groceries, rather than purely for profit.<sup>xiv</sup> That claim is a fallacy.

34. The economic analysis from the University of Sydney and the University of NSW shows that the short term rental market is already distorting the rental market.<sup>xv</sup> In March 2019, new modelling from the Reserve Bank of Australia (RBA) also showed that Airbnb is having a definite effect on rental prices despite the company's assertions its business model doesn't affect Australia's housing market. The University of Sydney Professor Peter Phibbs said "... the "sharp link" between rents and vacancies rates – highlighted by Monday's RBA report – demonstrated that home-share services like Airbnb are influencing the housing market". The RBA report found that vacancy rates are the "strongest predictor" of rents. Professor Phibbs said, that "...while that in itself seems "pretty obvious", it also shows the conversion of long-term rental stock into Airbnb-style tourist accommodation is reducing rental stock, and subsequently reducing vacancy rates".<sup>xvi</sup>
35. In the Sydney Greater Metropolitan Area (SGMA) over 62% of residential properties are listed for entire houses and apartments. That figure is considerably higher in key locations attractive to tourists and visitors. For brevity we mention just two:
- (i) In the Eastern Suburbs local government areas of Woollahra, Randwick and Waverley, at the end of 2018, there were a total of more than 10,300<sup>xvii</sup> homes or 9 per cent<sup>xviii</sup> of all dwellings listed on Airbnb alone. Of these, 65 per cent<sup>xix</sup> are for un-hosted properties – that is, where entire homes or apartments are rented. The average un-hosted Airbnb property in the Eastern Suburbs is rented for a staggering number of days each year, 118 in Randwick, 146 in Woollahra and 241 in Waverley.<sup>xx</sup>
  - (ii) In the Northern Beaches there are now 4786<sup>xxi</sup> homes or 5 per cent<sup>xxii</sup> of all dwellings listed on Airbnb, of which approximately 80 per cent<sup>xxiii</sup> are un-hosted properties – that is, where entire homes or apartments are rented. The average un-hosted Airbnb property on the Northern Beaches is rented for a staggering 245 days each year.<sup>xxiv</sup>
36. In September 2018, Professor Nicole Gurr et al said that: "Without a basis for regulating short term holiday rental accommodation within residential properties, there is a strong risk that well designed and located apartments and townhouses will become holiday rental rather than permanent residences. This will exacerbate rental affordability pressures and also increase the risk of conflict in relation to residential and tourism uses in certain housing markets".<sup>xxv</sup>
37. As noted above, there are thousands of apartment dwellers living in mixed use and commercial zones like the CBD, Darling Harbour, North Sydney, St Leonards, Pyrmont and locations like Sydney Olympic Park (to name a few). These apartment communities often rely on a development

consent condition that explicitly prohibits short term letting to stop their homes being turned into quasi-hotels. Such conditions are not uniformly applied across LGAs, however, because “serviced apartment” rules make it clear that short term letting is an impermissible use and these illegal uses can be shut down. In popular locations like Manly, Coogee and Bondi, Local Councils have managed these incompatible land uses through the Local Environment Plan and approving a mix of accommodation providers to service those locations while protecting residential objectives. The STRA SEPP removes strategic planning capacity from all Local Councils in every part of the NSW.

38. The New York City Council recently uncovered a \$20M(US) business that had been operating 133 apartments via the Airbnb platform who had profited from 76,000 illegal lets. If the proposed STRA SEPP is implemented in NSW such rapacious operations will be entirely legal unless the Owners Corporation can pass a by-law preventing it.
39. In another example, in Portland, where Airbnb has a ‘one host one property’ policy, the short-term rental ordinance does not apply to landlords in commercial-zoned areas, if they file for a relatively routine change in occupancy to allow hotel-style uses in their buildings. This is how one Airbnb Host, can list over 500 apartments in different US cities.
40. In NSW there will be no limits and it will be the most vulnerable residents in the most affected areas and buildings who will be least able to get a by law adopted because an organised vote of 25% of owners can prevent such a by-law being passed. In many buildings a single landlord will control the vote.
41. The stated aim of the STRA SEPP is to support “home sharing” activity (cl.3). It is the OCN’s submission that, in its current form, the STRA SEPP is not about “home sharing”. It will facilitate more commercial STRA and enable it to spread because under the proposal STRA:
  - (i) is not restricted to the principal home that would have created natural limits;
  - (ii) will encourage investors to divest from permanent tenancies for more lucrative STRA;
  - (iii) provides no protection for residents if 25 % or more of absent investors vote against adopting a by law to prevent short term letting by absent landlords; and
  - (iv) lacks control over the intensity, turnover or spatial distribution of the land use in any zones, including residential zones and residential strata schemes for very dubious results.
42. The economic benefits of Airbnb and other platforms businesses are overstated and do not take into account the externalised cost to the community. Much of the favourable research is commissioned by Airbnb: “In regard to zoning regulations, there is no empirical evidence that the net benefits of Airbnb introduction and expansion are so large that policymakers should reverse long-standing regulatory decisions simply to accommodate the rise of a single company” Josh Bevans, Economic Policy Institute, January 30, 2019.<sup>xxvi</sup>

## IMPACT ON RESIDENTIAL STRATA COMMUNITIES

### Development Consent Conditions and Existing Apartment Buildings

43. The proposed STRA SEPP does not contain any express override of existing conditions of development consent that prohibit short term letting.<sup>xxvii</sup> However, the rules of interpretation mean that the specified exempt activity (STRA) will render such conditions null and void.<sup>xxviii</sup> The Discussion Paper makes no mention of this. The Draft SEPP does contain a note that states that specifying the development as “exempt development” does not authorise the contravention or any condition of development consent (cl 9 note 2). However, the content of that note is not given effect by any provision in the Draft SEPP. To protect residential buildings in high density locations with such conditions there must be an express clause to the effect of Note 2, not just a note. Unless the STRA SEPP is amended it will take the lid off all these residential apartment buildings and allow un-Hosted STRA to expand.

- **Amend the SEPP to preserve the existing development consent conditions.**

### New Apartment Buildings in Key Locations

44. Local and foreign developers (who may have approval to sell up to 100% overseas) are unlikely to include a “no short term letting by law” in the original by laws, so it should not be surprising that new apartments in key areas, are going straight to the “Airbnb market”.<sup>xxix</sup> Foreign investors, in particular, are concentrated in high density dwellings located in inner city areas of Sydney and Melbourne.<sup>xxx</sup> The off the plan purchaser has no way of knowing the ownership profile of the building or the business intention of investor owners. At the micro level this imposes a distressing burden on innocent purchasers who find they have bought into a quasi-hotel. It will be hard for them to ever establish a residential culture or community environment. The fact is that ordinary people rarely want to move into an apartment building with “Airbnb” in it, especially un-hosted STRA.

45. This lack of transparency violates the right of consumers to know and to exercise consumer power in the market. In the future, it will be those buildings with a “no short term letting” by law that will retain their value. This is the experience in the USA. There is already a silent displacement of both tenants and apartment owners moving to escape this nuisance and this will increase.

### Mixed Use Schemes

46. In developments that are approved for mixed use (e.g. retail, residential and serviced apartments) the conversion to STRA has the potential to disrupt the entire economic model. For example, the development consent conditions for the Opera Residences in Sydney building, includes approval

for residential apartments on specific floors segregated from the serviced apartment segment of the scheme. The residential floors are for permanent residents and the conditions include a prohibition on short term letting.<sup>xxxii</sup> The protection will be removed by the STRA SEPP. Similarly, a development on the Central Coast consists of residential dwellings, a golf course, and a hotel. It has extensive sporting facilities managed by the community association. The scheme of 260 lots estimates it has 60 international investors with potential for short term letting. The interdependency between the hotel business, the golf course and property values within the estate are important. There has been no consideration as to how to make adjustments to compensate commercial operators or other resident owners within the same development.

## Residential Schemes

47. The introduction of STRA into residential strata communities brings extra costs of concierge services, security, wear and tear on lifts, gyms, other utility areas, and administration. Extra management costs will be borne by owner/occupiers and investors with residential tenants who will be subsidising the business models of those running STRA businesses significantly.
48. The vast majority of residents do not have any concierge, building manager or security services. The design of residential complexes is such that there may be multiple entrances, private homes face onto lobby areas and there can be multiple car park entrances. It is common for lift access from a secure residents' car park to take people directly to residents' floors. There is no separate lobby and no way of controlling access as people pass keys and security fobs. The Code of Conduct cannot effectively address what is one of the major issues – security.
49. It is the residents who are left to manage the building with fewer people willing and able to volunteer for the Executive Committee, cope with people they don't know in their car parks, their corridors and their pools and pick up the mess. It is these people who are living with the parties on balconies, family holidays in their pool, weekend visitors dominating the gymnasium, and increasing the wear and tear and damage on the common property. The majority of schemes are less than 20 lots. There is no strata agent or services are limited and periodic. In mid-size schemes of 50 lots building manager are usually part-time. These apartment buildings are not hotels.

## Community Tiered Developments

50. In community tiered developments, where a single estate community contains several strata schemes, residents are now faced with the prospect that one scheme may adopt a by-law but not all them. Each of the schemes pays levies based on unit entitlement to the community association, which is responsible for managing the common property facilities. It would be unconscionable for

property owners to be forced to subsidise another scheme and wear the social and economic imposts, especially when they have clearly voted against STRA. This has already happened on one such estate adjacent to the harbour and with high value facilities in North Sydney.

### Not a minor impact in residential strata communities

51. OCN maintains that STRA is not a “minor impact” and un-hosted STRA should never be an “exempt development”. The cumulative impact of multiple STRA operating 180 days (more with the proposed 21 day + loophole) is not a “minor impact” on that community. If STRA is on average a 4-night stay, there will be 45 changeovers in a single apartment (based on 180 days). In a residential scheme of 300 apartments where 10% convert to STRA, that is 1350 (30 x 45) changeovers. In a small block of 4 units, 2 lots produce on average 90 (2 x 45) change overs. As a “changeover” means one party leaves and another arrives, this results in 180 (2 x 90) movements of families, and luggage. That is a significant increase in internal traffic, wear and tear and costs to the entire Owners Corporation. It is added traffic moving in and out of car parks and it is a considerable increase in complete strangers in facilities, like the resident’s pool.
52. These “Guests” also bring their own Visitors to the property and frequently arrive with more people than the property was booked for. This is not uncommon in traditional tourist accommodation properties, but they have onsite management and Guest check in. They can also manage Guest behaviour. The use of apartments for “Airbnb style letting” frequently relies on “self-check in” and there is no control over who or how many people actually arrive. In one instance, a scheme reported 10 people entering their “secure” building in Coogee. In one CBD scheme several apartments were booked and the “Guest” conducted her wedding reception in the residents’ function room.
53. The lack of limits on the number of apartments that can be used for STRA in a single residential building is a significant flaw in the policy. There are buildings in central Melbourne where 80% of the apartments are on the “Airbnb market”. In smaller buildings in Sydney, there is 50% conversion and more. This is no different from the experience of cities like London.
54. The relaxation of housing laws in London has led to a STRA boom causing housing distress. In a residential apartment block near Marble Arch, one in five of its 530 apartments is now being used for short-term rentals.<sup>xxxii</sup> The 90-day limit has failed because there was no registration system and the Council has been forced to rely on Airbnb, which is becoming increasingly irrelevant as the market fragments. This is not “residential use” of the apartment building. It is disaggregated commercial use of a residential flat building by multiple absent investors and agents with no regard for the residents.

55. In contrast, for example, in the North Sydney LGA, residents are currently protected from STRA by the LEP. The North Sydney Council has actively defended residents' interests in dealing with short term letting in residential apartment buildings. If STRA is declared "exempt" there will be no Local Council oversight. It is the very existence of the LEP that has enabled residential strata schemes to keep the lid on STRA because they are able to rely on the fact that STRA is illegal. It is often sufficient to promote the LEP and this avoids personal conflict. This protection is being removed and, in some cases, the entire building will soon be converted to STRA.

56. In NSW, "serviced apartments" are prohibited in most residential zones in which apartment buildings are permissible. In mixed use zones "serviced apartments" may be permitted subject to conditions that require segregation onto a different floor, an on-site manager and medium-to-high rise building must have two lifts. Even the Complying Development Standards for a 'Bed and Breakfast' in zones where B & B is permitted require that if the "dwelling house" is subject to the *Strata Schemes Management Act 2015* (NSW) or the *Community Land Management Act 1989* (NSW), it must have the prior approval of the owners corporation, or the community, precinct or neighbourhood association.<sup>xxxiii</sup>

57. None of these considerations apply to STRA. The townhouse entrepreneur can open a B&B with no planning permission with 2 "Guests" per bedroom at a time. A single "Host" with multiple lots or multiple Hosts can operate STRA businesses among residents. The Code of Conduct requires nothing more than that the "Host" inform the Owners Corporation. No conditions apply.

### Status of the "STRA Guest"

58. The status of the "Guest" has been raised by the industry and by OCN. This matter remains unresolved. In a hotel, motel or licensed B&B there is onsite management and it is clear the person is a licensee and their contract can be cancelled and they can be asked to leave. In the residential environment, if the Guest has "exclusive possession", they are a common law tenant. It would require an order from the Supreme Court to evict them. The police will not evict without a court order. This leaves Hosts and owners corporations in an untenable situation.

- **The status of the "STRA Guest" should be legislated as a licensee.**
- **The Owners Corporation must have the authority to fine the Host/Guest directly.**

## Strata Fees and Charges

59. If the STRA SEPP proceeds there must also be a clear legal authority granted to Owners Corporations to levy fees and charges to ensure that costs incurred are paid for by the Host and not the Owners Corporation. This has been accepted by the courts in the USA, and should apply here.

- **Owners Corporations must have clear legal authority to levy fees and charges to ensure that the costs of STRA are paid for by the Host and not the Owners Corporation.**

## Local Council Rates

60. Finally, competitive neutrality requires businesses competing with each other to be treated in a similar way. If residential rates are applied to residential land that is competing with licensed approved private accommodation providers who are incurring higher costs, they may withdraw from the market. If private providers reduce or withdraw their services that would be detrimental to the LGAs and it would also undermine the tourism objectives of Government. It is counter-productive to the Government objectives to ignore this issue. If a residential apartment (s) (or other dwelling) is used exclusively for tourist and visitor accommodation, it would seem reasonable to rate those properties as a business.

- **Local Councils should be able to rate a dwelling used exclusively for STRA as a type of business.**

## Summary of Recommendations

- The legal status of the STRA Guest must be legislated to be a licensee, and put on the same basis as hotel Guest.
- The Owners Corporation should have the legal authority to fine the Host and the Guest directly.
- The Owners Corporations should have clear legal authority to levy additional fees and charges and ensure costs are allocated back to the owners and permanent tenants conducting STRA.
- OCN recommends that Local Councils should be able to rate a dwelling used exclusively for short term letting as a business sub-category.

## **FIRE SAFETY**

61. To be an exempt development clause 9 (2)(c) of the Policy relevantly provides that if the dwelling is classified under the Building Code of Australia as class 1b or class 2 – 9:

- (i) the dwelling must have a current fire safety certificate or fire safety statement, or
- (ii) no fire safety measures are currently implemented, required or proposed for the dwelling.

62. In addition to these thresholds, there are proposed Fire Safety Standards specific to short term rental accommodation. The object of the FSS Regulation is to prohibit a dwelling from being used for the purpose of short-term rental accommodation unless the dwelling complies with certain fire safety and evacuation controls.

63. The controls apply in addition to any other requirements that apply to the dwelling under Part 9 (Fire safety and matters concerning the Building Code of Australia) of the Environmental Planning and Assessment Regulation 2000. The prohibition is prescribed both as an offence against the Regulation (attracting a maximum penalty of \$110,000) and a penalty notice offence (with a penalty amount of \$1,500 for an individual and \$3,000 for a corporation).

64. If a dwelling is within a residential scheme located on bush fire prone land it will require a complying certificate. This will mean that residential strata schemes in bush fire prone areas will have the benefit of a compliance inspection.

### Complying Development STRA Class 2 Buildings

65. The OCN supports the additional mandatory Fire Safety Standards (FSS). No un-hosted STRA should be “exempt development”. If the STRA Framework is to be implemented without development consent, then for a dwelling within a residential strata scheme to be used for STRA purposes should be a “complying” not an “exempt development”. This will be the only way that the Local Council is able to check that a specific dwelling complies with the mandatory FSS. The fire safety standards are mandatory and important to the entire resident population in a Class 2 building.

- **If the use of a dwelling within a Class 2 building for STRA is to proceed it must at the very least be a “complying development” with inspection by Local Council or a private certifier.**

66. The Owners Corporation has limited powers to inspect. It may-be unable to establish whether:

- (i) the mandatory FSS are met;
- (ii) upgrade work has damaged the common property;

- (iii) any work interferes with the building's fire safety system;
- (iv) the work has been carried out by a qualified person; or
- (v) any assessment of the work has been performed by a qualified certifier.<sup>xxxiv</sup>

67. The mandatory FSS help serve an important public safety objective. It is not voluntary and it should not be left to self-regulation by a fragmented "industry" of amateur "Hosts", unlicensed agents, property or a tick box on an online platform.

68. The mandatory FSS also have serious implications for the Owners Corporations. If Government policy engages the rights and legal obligations of all the proprietors, it must be clear that:

- (i) The cost of any work falls on the Owner or "Host" and not the Owners Corporation.
- (ii) The work must be carried out by a qualified person.
- (iii) If work involves the common property, the Owner must have the permission of the Owners Corporation to perform that work;
- (iv) If the Owners Corporation does not give permission for that work to be carried out, then an individual who conducts STRA will be committing an offence.

69. It should be made clear that:

- **The "Host" must not carry out or cause to be carried out any work on the common property without the consent of the Owners' Corporation; and**
- **The Host must not carry out or cause to be carried out any work that interferes with part of the fire safety system of the building.**
- **The work must be carried out by a qualified person.**

70. It will need to be spelt out who bears the cost and how the FSS obligation inter-act with the Owners Corporation's obligations under the EPA Regulations and SSM Act. For example, smoke and heat alarms are a statutory fire safety measure and may be part of the common property fire safety schedule of the building or be required as a result of a fires safety order. In this case, it is the responsibility of the Owners Corporation to maintain them. Fire doors are also common property and the responsibility of the Owners' Corporation.

71. There are instances where the (annual) fire safety schedule may include EPA requirements for smoke detectors in apartments, which are the owner's responsibility and not common property. In this case STRA upgrades will be the host/ owner's responsibility.

72. It is also the responsibility of the Owners Corporation to arrange for the buildings annual fire safety inspection. Section 123 requires the owners corporation to ensure access is provided, within a period or at a time specified, to the common property and, if so specified, in the notice to some or all of the lots in the strata scheme. Maximum penalty: 20 penalty units. It is a defence if the owners corporation can prove the owner of the lot refused to grant access. In schemes without the benefit of professional services, this is a significant burden on ordinary residents and, where, short term letting is occurring it is necessary for the annual fire inspection to include those dwellings.

- **There must be an obligation on the owner of the lot or, if the Host is a tenant, that access is granted.**

73. Further, elsewhere EPA Regulations specify that the responsibility falls on the 'owner of a dwelling within a class 2 building' or 'owner of a building' in relation to particular fire safety requirements. The proposed new 186W provides that (1) A dwelling must not be used for the purpose of short-term rental accommodation unless it complies with the requirements of Short-term Rental Accommodation Fire Safety Standard approved by the Secretary and published on the Department's website, as in force from time to time.

74. The penalties for use of a Lot in breach of the STRA FSS apply to an individual or a 'corporation'. There should be no possibility that an Owners Corporation could be held liable for the use of a Lot that does not meet the FSS. This should be clarified because without this clarification Owners Corporations (i.e. other owners) will be exposed to liability. The Owners Corporation should be expressly excluded from the definition of "corporation" for the purpose of the STRA FSS. It also necessary to prevent vulnerable resident owners from being taken advantage of and misled into funding fire safety upgrades under a spurious risk of prosecution.

- **The Owners Corporation should be expressly excluded from the definition of "corporation" for the purpose of the STRA FSS regulation.**
- **There must be clear legal authority that, if the Owners Corporation incurs costs, those costs are to be recovered from the Lot Owner or Permanent Tenant.**
- **The inspection of dwellings used for STRA should be mandated as part of the annual fire inspection.**

75. The Owners Corporation must be notified of the intention to conduct short term letting and it would assist if a note to that effect were inserted into the regulation. It should also be made clear by use of a note that the "Host" must not:

- (i) carry out or cause to be carried out any work on the common property without the consent of the Owners' Corporation;

- (ii) carry out or cause to be carried out any work that interferes with part of the fire safety system of the building.

76. The only way to prevent thousands of non-compliant and illegal apartments in Class 2 Buildings being used for STRA is to make it mandatory that there is compliance with fire safety standards.

- **It must be an offence for a corporation or individual to list, book or facilitate the use of the dwelling for STRA that does not comply with the fire safety regulations and standards**

### Fire Orders and Fires Safety System Upgrades

77. As STRA increases the risk to all residents, it is also more likely that a Local Council will issue a fire order that the building be upgraded in terms of fire safety and that will be a cost to the entire owners' corporation. This is not a "minor impact" on the building or the other owners, especially those on fixed or lower incomes. The cost of fires safety upgrades can be considerable. For example, in an 8 storey, 4 per floor, 32 lot apartment building in Neutral Bay overlooking the harbour the Owners Corporation had to spend almost \$1m upgrading the fire safety system to meet Class 2 standards. The upgrade took several years.

78. This will be the fate of many Owners Corporations if they are forced to upgrade the entire building because of the increased risks created by the presence of STRA. The widespread problem of defects in fire safety systems in new buildings and the many older buildings mean that thousands of apartment buildings in NSW are likely to be unsuitable for use for STRA purposes.

### Summary of Recommendations

- The use of a dwelling within a Class 2 building should, at the very least, be a "complying development" with inspection by Local Council or a private certifier before a dwelling is registered on the NSW STRA Register.
- It should be made clear that the "Host" must not carry out or cause to be carried out any work on the common property without the consent of the Owners' Corporation; and that the Host must not carry out or cause to be carried out any work that interferes with part of the fire safety system of the building.
- The work must be carried out by a qualified person.

- The Owners Corporation should be expressly excluded from the definition of “corporation” for the purpose of the STRA FSS regulation.
- There must be clear legal authority that, if the Owners Corporation incurs costs, those costs are to be recovered from the lot owner or permanent tenant Host.
- The inspection of dwellings used for STRA should be mandated as part of the annual fire inspection. To be effective the obligation to grant access must be imposed directly on the owner of the lot or the tenant who is the Host.
- It must be an offence for a corporation or individual to be involved with the listing, booking or facilitating the use of the dwelling for STRA that does not comply with the fire safety regulations and standards

## **THE NSW STRA REGISTER**

### Data, Planning and Demographics

79. The Government’s commitment to a STRA Register is welcomed. However, for several reasons, OCN will not support an ‘industry led’ register. Firstly, the State has significant data integrity requirements and the value and importance of this data set(s) must not be underestimated. Secondly, across the world, agreements and systems that rely on one or two major global platform companies have failed because of the fragmented nature of the market and behaviour of industry participants. This is a serious consideration. The STRA SEPP is intended to legalise a disaggregated informal sector but it will also enable the new market to expand and to fragment and diversify even more. The state-wide registration system must have credibility and should not institutionalise the disproportionate power of global online business into the regulatory framework.

80. The DPE and ABS hold detailed housing, demographic, community and economic data relied on for private sector investment decisions by public authorities for strategic planning. In order to tax and regularise this market, government, demographers, planners and regulatory authorities will need to know: the location, spatial distribution, volume and intensity of STRA. The regulatory authorities all need to capture and store the identity of the “Host” and address of the dwelling. More granular information is needed if the industry is to be properly controlled and profiled.

81. If the STRA Register is incomplete or unreliable it weakens the reliability of other data sets. For example, unlicensed “professional tenants” are currently invisible but take thousands of dwellings off the market in the guise of residential tenancies. This “get rich quick strategy” is being taught on a significant scale and does not appear in Rental Bond Board data. The issue is not one of “privacy”

or “private property rights” - identification and registration is routine in virtually all aspects of life: property title, taxation, liquor licensing, driving licences, development consents and so forth.

82. This issue is a global one. There is serious international concern that internet platform businesses are facilitating a black-market in goods and services.<sup>xxxv</sup> The Register will support efforts by Australian Federal and State agencies to assess income tax, and apply land tax and capital gains tax more accurately. This includes identifying dwellings owned by foreign non-residents who become liable for an annual vacancy fee if their investment property is let for less periods of less than 30 days.

### Failed Systems

83. Poor systems and lack of enforcement in places like New York and London have led to thousands of illegal apartments remaining listed on online platform giants like Booking.com, Expedia, and Airbnb. In Paris, licensing and fining the platforms, like Airbnb, for listing unlicensed properties has been more successful. In London, like Venice and Barcelona, the failure to track the growth of STRA has resulted in significant pressure on the housing market.<sup>xxxvi</sup> The cooperation of Airbnb to block bookings above 90 days in London, has failed. In fact, that cooperation has been a dysfunctional response as Hosts change platforms to avoid limits or delist and re-list under a different name. In the UK the announcement of 23 September 2019 that Airbnb will now start sharing identity information with council authorities to help with enforcement is simply irrelevant to the overall task.<sup>xxxvii</sup> It is unlikely to be accepted by London or elsewhere because it has been shown to fail in other jurisdictions. It keeps the platform companies in control of the data.

84. International experience is that once one platform cooperates, others are slow to follow because they benefit commercially from the illegal activity. With more and more platforms coming into the market and the rise of aggregators, cooperation with platforms is becoming less useful and less likely. The Report of the WA Inquiry *Levelling the Playing Field; Managing the impact of the rapid increase of Short-Term Rentals in Western Australia* published on 26 September 2019. It recommended that Government examine how best to design a registration system to meet all data, compliance and enforcement requirements, this includes cross portfolio consideration and Local Councils. The Report of the Inquiry contains useful discussion.<sup>xxxviii</sup>

### Focus on Hosts not Platforms

85. The focus on companies like Airbnb and Expedia and the fragmentation of the market means that dozens of platforms and agents go unnoticed. For example, the platform Misterb&b has over 300,000 hosts globally and, apparently, in some parts of Sydney rivals Airbnb.<sup>xxxix</sup> The focus must be on the Hosts, and this is why Berlin has been more successful in managing STRA.

86. The effectiveness of the NSW STRA Register will depend on whether:

- (i) the Register is friendly public facing and easy to use;
- (ii) it is supported by clear mandatory obligation on Hosts to register;
- (iii) there are penalties for listing or using an unregistered dwelling for STRA purposes;
- (iv) the administrator has the technical skill and capacity to identify unregistered premises; and
- (v) an obligation on industry participants to (i) clearly display the unique ID; and: not to list, book or facilitate an unregistered dwelling.

### Public Agency or Digital Economy Solution

87. If the NSW STRA Register is outsourced it must not be administered by an industry stakeholder with a commercial interest in the short-term letting industry. In the USA, the company Host Compliance based in San Francisco provides online registration, monitoring, compliance and complaints hotline services for US councils and governments. This market solution is the digital economy evolving and responding to the regulatory challenges of the digital environment. This appears to be a better “fit for purpose”: <https://hostcompliance.com/features/#platform-overview>.

88. In Australia, a similar business <https://www.bnbguard.com.au/> has been operating in this space. It is data rich and uses sophisticated technology to monitor dozens of platforms. It already provides monitoring and compliance services and a register to clients in NSW, Victoria and Queensland.<sup>xi</sup>

### Host Obligation to Register as a Planning Requirement

89. It should be mandatory for Hosts to be registered before a dwelling is used for STRA purposes. To make this compliance tool effective the obligation to register should be part of the general planning requirement (Part 2 SEPP STRA) or a specific development control (Part 3). This would make it absolutely clear to everyone that conducting STRA in unregistered premises is illegal and penalties apply.

90. This would remove the waste of public money spent chasing unregistered properties to prove whether or not it in fact being used for short term letting. The requirement to register the premises AND not to list an unregistered-premises means that the listing of an unregistered dwelling would itself is evidence *per se* of non-compliance. This is a far cheaper and easier approach for everyone - including the Hosts. The Register should be self-sufficient and this approach would also make this easier to achieve and be at a low cost for everyone if it is “all in” – that is - every Host and premises must be on the Register. The NSW Government has advanced spatial data information and e-planning systems and the approach proposed in this instance appears to be significantly out of step with registers and data collection standards in NSW.

## Types of Information

91. Information the Host should identify includes: Tax file number, Address of premises, Name and Address of Host; Type of dwelling, Strata Scheme Number, type of hosting; number of rooms; swimming pool; public liability insurance; platforms on which the property is listed; days of availability; nights of occupation under STRA (at the time of annual renewal). It is common to upload documents such as proof of identity and ownership or consent, and, if the property is used for Un-Hosted STRA, to identify whether it self-managed, the agent or facilitator and the 24-hour emergency number.
92. It is essential that Local Councils and the NSW Fire and Rescue can log-in to the system and that the Australian Tax office and NSW State Revenue can data match. This data is an important addition to the housing, tourism and demographic data utilised by various NSW agencies. The ability to generate disaggregated data report is invaluable to government, owners' corporations, local council and the industry.

## Platform obligation not to list unregistered dwelling

93. Platforms and agents (licensed or unlicensed) must not list an unregistered residential dwelling for STRA and significant penalty that accumulates based on days listed. The international experience shows that without such an obligation Platforms will continue to list thousands of illegal apartments. Apart from the violation of planning and strata law, the travelling public is entitled to rely on a listing as a representation that the dwelling is safe and the STRA is lawful. In a country like Australia, international travellers expect a base line level of regulatory compliance and safety. Residential strata schemes are also entitled to expect that no apartment will be listed in violation of a by law. The register must prompt the Host to ensure they have notified the Owners Corporation and their neighbour. This will avoid unnecessary conflict between residents and tourists or other visitors.
94. The STRA customer is entitled to know and to rely on the fact that for premises and hosts to be compliant with the law they must comply with fire safety standards and be on the STRA Register.

## Summary of Recommendations

- It should be mandatory for Hosts to be registered before a dwelling is used for STRA purposes. To make this compliance tool effective the obligation to register should be part of the general planning requirement (Part 2 SEPP STRA) or a specific development control (Part 3).

- There must be a clear obligation not to use an unregistered residential dwelling for STRA and this should be backed up with a penalty that accumulates based on days listed.
- Platforms and agents (licensed or unlicensed) must not list an unregistered residential dwelling for STRA and this should be backed up with a significant penalty that accumulates based on days listed.

## CODE OF CONDUCT

95. OCN has participated in all Code of Conduct advisory committee meetings and it has provided the Government with extensive substantive comments, proposals and advice. The Code of Conduct does not regulate the rights and obligations between the parties. It is limited primarily to “party houses”. The platform companies have no obligations and the Hosts are not responsible for the conduct of their Guests. The Commissioner for Fair Trading has no powers to investigate a matter and no additional powers of inspection in relation to matters under complaint. The Code of Conduct should have been developed in closer consultation with Local Council to ensure that these regulatory framework mesh properly.

96. The requirement to have an NCAT order if the basis of a complaint is breach of a by-law will create confusion for strata managers, strata lawyers, and residential strata communities. There will need to be considerable resources put into education. In any event, the Code of Conduct is not designed to address the systemic pattern of violations of privacy and security or provide a means to ameliorate the social and economic impacts on a residential environment. The following comments are necessarily brief.

### Promoting compliance with the “no short term letting” by law

97. The commercial motive to ignore or dispute by laws is high and without a stronger legal framework to reinforce the protection for residential strata schemes, the entire burden of policing compliance with fall heavily on owners corporations. There needs to be a mechanism that reduces the risk of violations of the “no short term letting” by law. It should not be possible to register a strata property that is part of the scheme that has a “no short term letting” by law.

98. The Code includes a general exhortation to comply with planning, criminal and by laws but this is not sufficient to address the issue. There needs to be obligation that applies to industry participants not to register, offer, list, advertise or use a residential dwelling within a residential strata scheme for the purposes of STRA in breach of a ‘no short term letting’ by law.

- **Industry participants must have an obligation not to register, offer, list, advertise residential dwelling for the purposes of STRA in breach of a ‘no short term letting’ by law.**

### Responsibility of the Host for their STRA business

99. Hosts must have responsibility for the impact of their STRA business on owners and residents within the scheme on a day to day basis and not only in the most extreme cases. In particular, Host must be capable of being held responsible for the theft, loss, or damage to the common property; and theft, loss or damage to the property of residents, caused by the Host’s Guest.

100. It is common for Guests, who are unfamiliar with the strata environment, to cause damage to common property often resulting in damage to another residents’ property. This can range from negligent events (towels left in basins that flood floors) to deliberate acts of wilful damage (breaking locks or doors) or reckless damage to lift panels with bikes, and blocking sewer systems with disposable wipe and so forth. The Owners Corporation that has the strict legal duty to repair and maintain the common property, and this becomes increasingly urgent when it impacts on others.

- **The Host must bare the cost of repair of damage to common property and to compensate a resident or Owners Corporation who has suffered theft, loss or damage to their personal property as a result of the actions of their Guest.**

### Public liability insurance

101. Section 5.4.3 requires the Host to have public liability insurance (PLI). The failure to have PLI could attract a strike. To record a strike the breach must not be “minor”. Theoretically, the lack of PLI could ultimately result in a person being excluded from the industry but this highly unlikely. If there are sound public policy reasons for requiring a host to hold PLI, the system needs to be designed to promote and ensure compliance up front. The obligation needs to be backed up with a penalty. The proof of PLI should be part of the Register.

- **There should be a penalty for failing to have public liability insurance.**

### Power to order production of information in specific cases

102. The Commissioner has the power to “request” an industry participant to produce information “relating to the STRA industry” or “this code” and OCN has been informed that it is not the intention of the Commissioner to investigate individual cases as such. The Commissioner should have a clear power to order production of information in relation to a specific dwelling or specific Guest and

a specific transaction. This is necessary to support the complaint function of the Commissioner and is a common feature of analogous bodies, such as the Ombudsman. In many instances, a complainant will not have and will not be able to discover the precise details of, for example, the identity of the Guest. The ability of an aggrieved person or strata scheme to lodge a comprehensible complaint that satisfies the threshold set by the Commissioner, must not be frustrated by lack of information.

- **There should be a clear power to order production of information in relation to a specific dwelling or specific Guest and a specific transaction.**

## Directions

103. The OCN has consistently said that the by-laws of a strata scheme prevail over the Code of Conduct. The Code expressly states that the directions of the Commissioner are not to be inconsistent with by laws. However, the Commissioner needs to be able to impose conditions that are more restrictive than by laws that apply to all residents.

- **The Commissioner must be able to impose conditions that are more restrictive than by laws that apply to all residents.**

## Extraterritorial reach of the code – “guest’

104. The application of the Code to an international Guest is fraught with evidential, procedural and enforcement problems. To date, OCN has seen no evidence that Australia is a party to any international or bilateral treaty on mutual assistance in civil matters; the enforcement of money judgements; or consumer affairs agreement(s) that would enable this code to be effectively applied to an international guest who has left the Australian territory and resident in a foreign jurisdiction. This aspect of the code needs further public explanation for people to have confidence in the Code.

## Public Safety

105. There is a serious question as to whether any person who is on the Sex Offender Register or has criminal record for domestic violence, drug use, or assault should be able to participate in the industry at all. It requires more than mere reliance on Platforms to ‘verify’ the Host’s identity or ad hoc reviews by consumers to address this issue. There should be some threshold entry requirements or an administrative process for checking police records. There is also a case for data matching listings with police records and consumer reviews and obtaining the ‘red flag’ data from platforms like Airbnb.<sup>xii</sup>

## Racial and Other Forms of Discrimination

106. The anti-discrimination laws need to be assessed and plain English information made available on how these laws apply to this industry. Section 20 of the *Anti-Discrimination Act 1977 (NSW)* makes it unlawful to deny a person accommodation on the grounds race. This prohibition does not apply when the accommodation is in a private home if the principal or a near relative intends to continue residing in the premises. It should be clarified whether the prohibition applies when the Host is not Present.

## Conclusion

107. In its current form, the proposed STRA Framework for NSW will remove residential protections and override significant housing policy objectives. It is not sufficiently flexible to take account of the social and economic impacts in specific localities and this is especially acute in the residential strata environment. The NSW STRA Framework takes no account of the cumulative impacts of multiple dwellings within a single apartment building being used for STRA dispersed among residents. There is no mechanism to stop an apartment building being taken over by stealth and no threshold that would trigger a “change of use”. The only protection that residential strata communities have is the possibility of a by law to protect them from absentee landlords turning their home into a tourist accommodation facility. As an organised 25 % of the vote can defeat the by law, thousands of the most vulnerable residents will be forced to live with transient holidaymakers and visitors who provide a lucrative income stream for the people who do not live there.

108. There should be no un-hosted STRA classified as an “exempt development”. There must be a clear legal authority for an Owners Corporation to allocate costs to the Host and Hosts must be responsible for the conduct of their Guest(s). The STRA Framework must not commence until there is a STRA Register. That Register must not be led or controlled by the STRA industry as suggested. It is crucial that the Register is administered by an independent entity and is part of the compliance and enforcement system of NSW.

## APPENDIX 1 INTERNATIONAL EXPERIENCE

The Australian research is consistent with international research on this topic. In 2017 researchers at the University of California, Los Angeles, looked at rents and home prices in the 100 largest metro areas in the U.S. between 2012 and 2016. They found that a 10% increase in Airbnb listings leads to a 0.39% increase in rents and a 0.64% increase in house prices. “That may sound minuscule, but between 2012 and 2016, rents rose by about 2.2% annually [on average in the 100 areas], so a 0.39% increase in that context isn’t very small at all,” The same is true for home prices, which rose by an average of about 4.8% annually in the 100 areas in the study. The authors found a correlation of higher house prices and rental rates in neighbourhoods with fewer owner-occupiers.<sup>xliii</sup>

More recently, in April 2019, the Harvard Business Review reported that independent economic analysis shows that a 1% increase in Airbnb listings is causally associated with a 0.018% increase in rental rates and a 0.026% increase in house prices. “While these effects may seem very small, consider that Airbnb’s year-over-year average growth is about 44%”. The researchers concluded that in aggregate, the growth in “home-sharing” through Airbnb contributes to about one-fifth of the average annual increase in U.S. rents and about one-seventh of the average annual increase in U.S. housing prices.<sup>xliiii</sup> These studies tend to focus on Airbnb and, as mentioned above, is not a comprehensive survey of the short term rental market operating from residential dwellings. It tends to distort the public debate.

Leading planner and academic Professor Gurran has said that: “Voluntary and market regulation ... misses many of the traditional concerns that land use planners have about tourism accommodations, such as the opportunities to spatially cluster tourist facilities and services; the management of traffic, parking, and waste; building and urban design requirements to attenuate noise and privacy impacts; appropriate fire, safety, emergency, and disability access requirements; and likely levels of occupancy and potential overcrowding (Palombo, 2015 ).”<sup>xliiv</sup>

The international experience is that jurisdictions that try to accommodate companies like Airbnb, soon tighten regulations because liberalising their planning laws simply allows rampant STRA. In the vast majority of countries, the STRA regulations are designed and implemented at a more local level.

In Canada, Vancouver, has a similar housing culture, demography and housing issues as Sydney, has a more pro-housing approach to STRA. In Vancouver all STRAs require a license; the license number must be displayed on any listing; investor STRAs are banned; Owners corporations can ban or restrict STRAs, and can fine wrongdoers up to \$1000 a day; the city can fine up to \$1000 per offence per platform per day for not having a license or breaking the rules, with fines up to \$10,000 for repeat

offences; requires hosts to submit evidence that their property complies with local rules, including fire safety regulations.

In Los Angeles, which is one of the few cities in the world that permits 180 days, STRA is restricted to the primary home. In December 2018, LA City reduced that cap to 120 days. In Paris, the day cap is 120 days but Paris also restricts short term letting to primary home only and fines Airbnb for every illegal listing on its site.<sup>xlv</sup> The day caps in comparable European cities, in the US and Canada are all significantly lower than the 180 days proposed in NSW.

In Toronto, STL is restricted to the primary home and the Municipal Council will not grant an exemption to investors even where the Condominium Council has permitted STL.<sup>xlvi</sup> The objective of the Toronto regulation is to stabilise vertical communities and protect housing supply. Similar arrangements apply in Vancouver and Montreal.

In Chicago, the “declaratory” documents of an apartment community explicitly exclude STL and, if not, the Condominium Association can amend it themselves.<sup>xlvii</sup> In 2017, Chicago City Council established a Prohibited Buildings Register. It started with 900 buildings and 12 months later has just under 2000 apartment buildings and townhouse complexes on it.<sup>xlviii</sup> There are over 91,000 units protected as a result of the Prohibited Building Register. The Chicago regulation also puts a limit on the number of apartments in a single building that can be used for STL (where it is not prohibited).

In Boston, the Council has banned investors and tenants from using residential dwellings for STL and is instituting a registration system to protect housing supply.<sup>xlix</sup> In West Hollywood, the Council has banned STL in apartments altogether.<sup>l</sup> In San Francisco, the municipal ordinance permits STL in primary homes subject to other state or federal laws. It also expressly states that it does not confer a right to lease or sublease an apartment for short term rent where short-term use is not otherwise allowed by the homeowner association agreement or requirement, covenant, condition or restriction(s 41A.5(5)).<sup>li</sup> Typically, these bodies prohibit transient occupancy and use of residential apartment buildings. For example, “*Rule s 7.1 No Condominium shall be occupied and used except for non-transient residential purpose by the Owner, their tenants, and social guest...*” (*Portside Homeowners Association*).<sup>lii</sup>

In most comparable cities STL is restricted to primary homes in order to prevent the loss of housing to the tourist market. In North America, for example, as mentioned above, Vancouver, and Toronto, Denver, Los Angeles, New York, Washington DC, Philadelphia, Portland and San Francisco all restrict STL to the primary home.<sup>liii</sup>

Many of these cities also include a day cap as well as a primary home restriction. For example, New Orleans, Washington DC, Portland and LA also have a cap on the number of nights Un-Hosted STL can be offered. In 2015, Santa Monica banned Un-Hosted Airbnb entirely, a Host must live in the

premises during their stay, apply for a business licence and collect 14% occupancy tax that is payable to the city. The city's regulation was challenged by Airbnb, which has lost its appeal. Like Coogee and Bondi, Santa Monica is a popular beachside community.<sup>liv</sup>

In jurisdictions such as Austin<sup>lv</sup> Chicago, New Orleans, and Toronto STL there are areas/zones where short-term rentals can take place and hosts are required to obtain a licence to operate.

Most of the jurisdictions mentioned include requirements for registration and permits. Austin Texas charges all accommodation providers a \$500 licence fee and \$300 per annual renewal. New Orleans has announced a moratorium on new permits.<sup>lvi</sup>

In Europe mature cities are trying to get Airbnb back under control. Amsterdam reduced the cap from 90, to 60 and reduced its day cap to 30 from January 2019.<sup>lvii</sup> Regional cities such as Liverpool in the UK have called for 90-day caps like London as a first step in addressing a growing problem. In London Airbnb agreed to block bookings in excess of 90 days, but it is not the only platform so the measure is somewhat irrelevant. The Mayor Sadiq Kahn has declared that the failure to track the growth of STL has put significant pressure on housing market and registration and further restrictions will follow.<sup>lviii</sup> The City of Westminster identified a single building with over 100 apartments listed and has advocated a 30-day limit and a registration system.<sup>lix</sup>

In Spain, Mallorca banned Airbnb from apartments in April 2018.<sup>lx</sup> Madrid has banned the use of apartments for short term letting unless there is a separate entrance, which has taken thousands of apartments off the market. In Budapest, the uncontrolled investment in new apartments and impact on communities is now leading to restrictions.<sup>lxi</sup>

## APPENDIX 2 FIRE SAFETY RESEARCH AND EXPERIENCE

On 20 August 2019, Mr Wayne Smith, CEO National Fire Industry Association testified to the Parliamentary Inquiry on Building Regulation that in modern buildings:

... egress time for a person in a modern apartment fire with modern furniture today is about six times less than what it was in the nineties. So instead of having 17 minutes to get out of the building, you have like three minutes to get out of the building—to get out of the apartment, not the building.<sup>lxii</sup>

The latest independent research conducted by Nicole Johnston (Deakin) and Sacha Reid (Monash) also shows that in NSW over 90% of residential buildings have defects in at least one construction system affecting multiple floors, apartment and parts of the building. This research identifies water and fire safety systems as comprising the bulk of the defects, which pose potentially serious health impacts (toxic mould) and threat to life and are costly repair.<sup>lxiii</sup>

In August 2019, the NSW Parliamentary Inquiry took evidence about “alternate fire safety solutions” being certified for multi-storey residential buildings in relation to egress, fire separation and fire services. The City of Wollongong submitted that: “... these alternate solutions provided economic benefits to the Developer/Builder the maintenance costs are transferred to the end user being the strata /owners.” It is common for councils to “...issue Fire Orders on a building 12 months after the Occupation Certificate has been issued, as a result of an essential fire safety measure either not being installed or not installed correctly. This particular issue is of concern as the safety of the occupants maybe compromised as the intended Fire Safety Measures may not provide detection in the event of a fire.”

This scenario was realised in the recent fire at the "Neo 200" apartment building in Melbourne. That building is comprised of 371 apartments. The forensic review of the buildings fire safety systems after the combustible cladding fire: “... revealed that over 40% of apartments had alarms that could not be activated from either being removed or were inoperable. Over 1000 smoke/detection alarms had to be replaced. ... This example is by no means isolated to a Victorian issue; NSW has the same type of buildings with external combustible cladding.”<sup>lxiv</sup>

There has been more than one fire at the Neo2000 Spencer Street building in Melbourne. In the last cladding fire occupants were reported to have taken plastic and wrapped it around the smoke alarm to stop it activating in the case of cooking or other products of combustion in an apartment. The previous fire was caused by a towel left on an air conditioning unit.<sup>lxv</sup> OCN is informed of situations in Sydney where “Guests” have cut the wires of a smoke alarm or taken out the battery to stop it from making a noise..

The risk of fire and threat to life to all residents (not just the guest) in a Class 2 Building is significantly increased with the presence of short stay tourists and visitors. In the case of the 2014 Lacrosse cladding fire, the Melbourne Fire Brigade investigation highlighted the problem of increasing the occupancy and presence of short-term stayers: “Some individuals or companies rent apartments on long leases, furnishing them, then renting them out either short term or on a bed by bed basis. This is facilitated via the use of sites as Airbnb, Wotif and other internet sites on which owners or small operators can advertise and facilitate bookings.” Giuseppe Genco, Municipal Building Surveyor, City of Melbourne, April 2015.<sup>lxvi</sup>

The latest apartment block fire reported in a modern high rise building in the centre of Canberra City is attributed to a ‘smouldering cigarette setting fire to ‘combustible’ balcony furniture’. The fire spread to the 100 per cent polyethylene-core panels on the building and burned on both sides of a balcony partition separating two apartments.<sup>lxvii</sup> In that case, the fire broke out on the second floor, and residents were able to reach it with hoses from the ground.

- <sup>xl</sup> The company is familiar with trends in the online STRA market and understands the techniques used to avoid regulatory compliance. It is familiar with overseas development and can contribute to the policy process. It also understands, for example, how the asset renting market is diversifying (car spaces, swimming pools etc) so has potential to future proof the system and, if necessary, adapt as these types of regulatory challenges continue to evolve.
- <sup>xli</sup> In the case of Airbnb, the online review system creates data about the premises and both the host and the guest, which can work as a disincentive to honest appraisals. Online reviews are untested and there is little academic literature on the efficacy of these models to promote regulatory compliance and good practice.

The Director  
Housing and Infrastructure Policy  
NSW Department of Planning, Industry and  
Environment

10 September 2019

Ref No: D03653185

Dear Sir/Madam

**Re: Short-term Rental Accommodation Reforms**

Randwick City Council thanks the NSW Department of Planning, Industry and Environment, and the NSW Department of Customer Service for the opportunity to make this submission in regard to the suite of proposed reforms to bring about the legislative framework for the use of residential premises for the purpose of providing short-term rental accommodation (STRA).

The following information is provided having regard to the matters outlined in the Discussion Paper titled "*Short-Term Rental Accommodation – A new regulatory framework*" dated August 2019, the suite of draft documents that make up the total reform package and Council's previous submissions made to Government as these reforms have developed.

**DRAFT - State Environmental Planning Policy (Short-term Rental Accommodation) 2019 (Proposed SEPP)**

Council supports the Proposed SEPP being a 'standalone' instrument as opposed to amending the Exempt and Complying Development Codes SEPP. Given that this type of *development* will be carried out, in the main, by 'mum and dad' property owners, simplified access to the particular planning controls contained in a single subject EPI is preferable. The following comments are provided in respect to the Proposed SEPP. This could include a short easy to understand explanatory guide including step-by-step instructions and where to get help.

The following specific comments are provided in respect to the Proposed SEPP:

Clause 9(2)(c)(i) should make it explicit that the 'building' in which *the dwelling* is situated in is the subject of a current *fire safety certificate* (FSC) or an *annual fire safety statement* (AFSS). For example, it is unlikely that an individual *dwelling* within a Class 2 residential flat building would or could be capable of being the subject a FSC or AFSS. The entire *essential fire safety measure* certification regime contained at Part 9 of the *Environmental Planning and Assessment Regulation 2000*, relates to the "whole building" and not elements of the building (such as a *dwelling* within the building) viewed in isolation. For this purpose the Proposed SEPP should replicate clause 1.16(2) of the General requirements for exempt development consent contained in the Exempt and Complying Development Codes SEPP.

The provisions of the Proposed SEPP in respect to the use of premises for STRA on a *flood control lot* seems overly restrictive and onerous. It is Council officers' view that guests in STRA are at no greater in an area subject to periodic flooding than occupants of other types of residential accommodation such as *boarding houses* and various classes of *tourist and visitor accommodation*. These provisions should be simplified or removed.

The proposal to exclude any bookings that are for a period of 21 consecutive days or more for non-hosted STRA (clauses 12(2) and 13(2) of the Proposed SEPP) is not supported. Council officers are of the view that there is no correlation between the period of short-term accommodation and a reduction in amenity impacts. It has been Council's experience that guest behaviour has the dominant impact on "amenity". This is influenced more by the number, type and make-up of "guest" and their activities rather than the length of stay. Council is not aware of any evidence, empirical, anecdotal or otherwise, that supports the proposition that there is some nexus between amenity impacts and duration of stay. It is suggested that the 21 consecutive day period should be removed and reconsidered if necessary after the first 12 month review of the new policy framework when data and outcomes are available.

### **Affordable housing supply**

The proposed policy framework has not addressed or referenced the impacts of short-term lettings on the supply of long term rental accommodation and specifically affordable accommodation. This is a key matter raised in Council's previous submission. In inner coastal areas such as Randwick City, there has been a significant increase in the number of short-term holiday rentals in recent years (facilitated by on line platforms) and it is necessary that reliable data be readily accessible to assist in monitoring the long term housing market and affordable housing impacts. The continuing decline in housing affordability and the need for more affordable rental housing are critical housing challenges for the LGA. Randwick City's high land values, coupled with significant numbers of students, key workers and an aging population makes the delivery of affordable rental housing a priority for the area. To assist in mitigating the impacts on affordable housing (as previously suggested in Council's submission), a local levy on on-line short-term rentals collected at the time of booking should be introduced and applied to council's affordable housing schemes. Council will also be seeking a reduction in the maximum number of days that non-hosted residential premises can be used for short-term rental accommodation to 90 days instead of the proposed 180 days per annum. This mitigates the housing losses whilst providing a more balanced approach recognising the local economic, tourism and social benefits of short-term rental accommodation.

### **DRAFT - Code of Conduct for the Short-term Rental Accommodation Industry (Draft Code)**

Council supports the Draft Code for the purpose of setting out participant responsibilities and enforcement of the new framework.

To ensure the effective of the Code, it is important that it recognises the enforcement role of Local Government. The Draft Code should contain a provision, similar to that contained in clause 5.1.3, which compels an industry participant to provide, upon request, information in respect to a residential premises to which a *short-term rental accommodation arrangement* applies to the council of the area in which the premises is situated. This information may include (but not limited to) the following details:

- a) property details (e.g. registered proprietors, address, etc)
- b) copies/details of any short-term rental accommodation arrangement
- c) the number of days that the premises has been used to provide STRA in any given period
- d) contact details of the *host* as defined by the Draft Code

Failure to provide a council with this information should be an offence for the purpose of s. 54C of the *Fair Trading Act 1987*.

### **DRAFT - Fair Trading Amendment (Code of Conduct for Short-term Rental Accommodation Industry) Regulation 2019 (Draft Fair Trading Reg)**

Council supports the Draft Fair Trading Reg as drafted. Consideration should be given to create a specific provision which would permit a council authorised officer to issue a penalty notice in

respect to an offence against s. 54C of the *Fair trading Act 1987* in circumstance where the offence is committed for not providing information requested by a council (see above). It is noted that for the purpose of issuing penalty notices s. 67(7) of the *Fair Trading Act 1987* permits the Secretary (the Commissioner for Fair Trading) to appoint authorised officers. The Secretary, upon request from a council, may considered appointing certain council officers as *authorised officers* for the purpose of issuing penalty notices for specific offences against s. 54C of the *Fair Trading Act 1987*.

In addition to defining a *short-term rental accommodation arrangement* as provided for in s. 54A of the *Fair Trading Act 1987*, it is the view of Council officers' that a prescribed standard form should be developed and included in a Schedule to the *Regulation* (e.g. the Standard form residential tenancy agreement is prescribed in Schedule 1 of the *Residential Tenancies Regulation 2010*). This would bring uniformity to the agreement at the same time better protecting each party's rights, assist in resolving disputes and eliminate ambiguity.

#### **DRAFT - Environmental Planning and Assessment Amendment (Short-term Rental Accommodation) Regulation 2019 (Draft EP&A Reg)**

The DRAFT EP&A Reg is supported, including the creation of an offence against the Regulation for conducting STRA absent of complying with the *short-term accommodation fire safety standard*. However, it is Council officers' view that the Draft Short-term Rental Accommodation Fire Safety Standard requires amendments to its current drafting (see below).

#### **DRAFT - Short-term Rental Accommodation Fire Safety Standard (Draft Standard)**

It is Council's view that there are aspects of the Draft Standard that are confusing and poorly drafted.

It is Council officers' opinion that the starting point for the provision of STRA in Class 2 – 9 buildings is that these buildings must be the subject of a current FSS or an AFSS. In respect to the Section 5 – Dwellings in a Class 2 building and Class 4 part of building of the Draft Standard, these provisions are confusing and do not distinguish between what measures are required within the sole occupancy unit (the *dwelling*) and the rest of the building. For example, when one reads 5.1.1(a) (iv) does this mean that in a Class 2 building that has one or more levels of basement parking that the parking areas require smoke alarms to be installed?

Similarly, for the purpose of 5.2.1 is the evacuation lighting required in the corridors and hallways of the whole building or just the corridors or hallways in the sole occupancy unit? As such, it is necessary that the Draft Standard be redrafting to clearly distinguish what fire safety measures are required to be installed within the sole occupancy unit being used for STRA and what fire safety measures are required for the rest of the building.

In summary, the STRA fire safety provisions to be provided in a dwelling/sole occupancy unit that is providing STRA must stand alone from the existing fire safety measures in the remainder of the building which are the responsibility of the owners of the building (e.g. owners corporation).

Council generally agrees with the requirements contained within Section 4 – Class 1a Dwellings of the Draft Standard. However, in certain Class 1a building configurations such as a *semi-detached dwelling*, 4.1.2 of the Draft standard could potentially effect a garage on a separate allotment. This provision of the Draft Standard should be amended to replicate the National Construction Code in that the provision only relates to a garage below a dwelling that it is not associated with.

#### **Proposed Register**

It is Council's position that a Register, with statutory registration requirements, is imperative to the effective operation of the entire STRA regulatory framework. Council agrees with the

proposition contained in the *Discussion Paper* that an industry-led STRA register would be the most effective method to develop and maintain the Register. This is particularly the case as an essential operational requirement that the information be kept on the Register be in “real-time”. The Registered should be made readily accessible to Local Government in real time.

Council also agrees with *Discussion Paper* as to the type of information/data that is to be contained in the Register. In this regard, it is essential that the Register reflects, in real-time, the number of days used and number of guests accommodated at a premises otherwise enforcement of the Proposed SEPP requirements will be virtually impossible. The register should also indicate whether the premises is *hosted* or *non-hosted*.

A further considerations should be the introduction of an offence for failure of a *host* or *letting agent* to register a premises prior to using the premises for STRA. A separate offence should also be created for carrying out STRA absent of a STRA arrangement.

### **Commencement**

Council supports the staged implementation option for the reasons outlined in the *Discussion Paper*. This will allow for stakeholders to develop and implement the various processes in place required by the new STRA framework. It is important the industry participants are supported by Government through this process. It is particularly important that the development of the STRA Proper Registered is developed in close consultation with Local Government.

Given that the centrepiece to the effectiveness of the whole STRA framework will be a well-designed property Register, Council suggests that a “STRA Register Development Group”, including representatives from Local Government, be established which brings together all relevant stakeholders. This will ensure that the design and implementation of the Register caters for all the prospective ‘users’ of the Register. This group could also serve to determine the parameters for what information contained on the Register should be accessible to the public and set any necessary reporting requirements.

### **Review**

Council supports the proposed Government review of the STRA regulatory framework 12 months after all the policy elements have commence, including the scope of the review as proposed by the *Discussion Paper*. It is envisaged that conducting the review 12 months after commencement will have given sufficient time to assess whether or not the policy elements of the regulatory framework are meeting their objectives. As the *Discussion Paper* also points out, the review should be a ‘whole of industry’ review and should include including the Strata Community Association. This will provide the relevant information from government, local and state, and all industry participants and relevant industry peak bodies.

In addition to the proposed review, a further longer term review should be undertaken to assess the social impacts of the STRA policy framework, particularly the impacts on housing affordability, long-term renter displacement and neighbourhood character change.

I trust that due consideration will be given to this submission.

Should you require further information in respect to any aspect of this submission, please do not hesitate to contact me on 9093 6947, Monday to Friday during business hours.

Yours faithfully

**Roman Wesezczynski**

Dear Sir/Madam

**SUBMISSION**  
**Short Term Rental Accommodation (STRA)**  
**Proposed New Regulatory Framework**

Council appreciates the opportunity to provide further detailed comment on this important matter. The matter was reported to Council on XXXX and it was resolved that:

XXXX

Council has consistently held the view that any regulatory framework in this regard should essentially have a 'light touch', be clear and workable and not place an excessive additional administrative or compliance burden on Council, if possible.

The need for certainty in this regard is also acknowledged and the NSW Government is encouraged to bring this matter to a timely conclusion to remove the current uncertainty regarding the permissibility or otherwise of STRA.

**Opening Comments**

As stressed in our November 2018 submission (copy attached), holiday homes/STRA have been and continue to be an important feature of tourism in Shoalhaven for a long time. They are a critical element of regional tourism.

Given this important role, Council was the first to clarify the legal status of this form of accommodation through an LEP amendment that was gazetted thirteen years ago in 2006. Through this the short term rental of a residential dwelling does not need development consent/approval. Council has also continued to play an active and ongoing role in research, advocacy and regulatory changes related to this form of accommodation.

It is noted that a number of the points raised in our previous submission have been addressed in the revised package and this is greatly appreciated. The opportunity to review and comment on the overall package is also welcomed and appreciated.

The revised package contains five pieces of interrelated legislation/policy/guidance to review and is more extensive than the previous version. Given this a longer timeframe to review and comment would have been appreciated. If Councils really are one of the NSW Government's key planning partners, we need to be given comment periods that enable matters to be considered and reported to the elected Council. As such, in the future please consider minimum comment periods of six to eight weeks for planning reforms of this nature.

### **Tourism Role/Importance**

The short-term holiday letting industry is extremely important to Shoalhaven. With limited larger-scale hotels to service the accommodation needs, the success of the tourism industry relies on the availability of holiday rental accommodation throughout the City.

Shoalhaven is currently the most visited Local Government Area in NSW, outside Sydney CBD. The industry supports over 6,000 jobs and generates \$853 million annually in visitor spend. Recent research shows that visitor nights have increased by 7% for year ending December 2018, showing a trend in people staying longer in the region. Approximately 60% of domestic overnight visitors to the City stay in what could be termed to be short term rental accommodation or holiday homes.

### **Overall Package**

The release of the overall package for review and comment is beneficial and provides an opportunity to see how it all fits together.

There is still however an overriding concern that the components of the package may not work well together and may be difficult to follow/understand. It is essential that the regulatory framework works and is 'user friendly'. Thus, the indication in the material that there will be a 12 month review period once the package comes in is strongly supported. This will provide a critical opportunity to adjust anything that is not working as intended or respond to any unforeseen outcomes.

How the package interrelates and works with other pieces of NSW and Commonwealth legislation is also important, for example the Building Code of Australia. It is hoped that this has been given due consideration and there will not be unintended or unexpected consequences.

### **Proposed SEPP – General Comments**

The proposal for another standalone SEPP is a potential concern. This can be avoided by including the proposed provisions in the Codes SEPP. This would avoid a standalone SEPP and thus help manage the number of planning documents and potential for complex interactions between documents. The Standard LEP Instrument

should also be used, as it was originally intended to be, to also achieve relevant outcomes

The proposal to remove the relevant STRA clauses for relevant Environmental Planning Instruments, including Shoalhaven's, was something that we requested should the reforms eventuate and as such this aspect of the SEPP is supported.

It now appears that there is the ability to opt to map areas where you want to specifically enable STRA (verses where you do not). If this is the case, this is a welcome addition as it may assist Council manage emerging 'hot spots' in the future. Confirmation of this interpretation would be appreciated. If this is the case it provides an avenue for local exemptions where evidence demonstrates unacceptable social or environmental impacts (e.g. sewage capacity) and there is a need to control sensitive locations and limit or even possibly prohibit STRA.

*Link with Part 9 of EP&A Regulation* – There is a concern that this link will get lost in the detail as it is only included as a 'note' (Refer Part 3 - notes under the heading on page 7). It is suggested that it really needs to be part of Clauses 11 and 13. There is also a need for these services to be installed by a competent person and for a final fire safety certificate to be submitted to Council and NSW Fire and Rescue prior to the use operating. This could be included in the EP&A Regulation amendments.

The requirements for ongoing annual certification also need to be included as a 'note' to this requirement in the draft SEPP. This will result in a change in the Fire Safety standards under the EP&A Regulation.

### **STRA Definition**

The establishment of a consistent definition for 'short-term rental accommodation' is welcomed.

Removing *rural workers' dwellings* and *secondary dwellings* from the STRA definition should be considered to protect the original intent of permitting these types of dwellings, e.g. supporting a rural workforce and providing accommodation options for an older population. These original intents could be undermined, and this may not be considered appropriate.

Detached rooms should also not be allowed to be used for STRA.

There is also a need to refine the STRA definition to remove any potential ambiguity around a host residing **on** or **in premises** or **property**. Is the intent to describe a dwelling in which the host resides or a property containing two dwellings in one of which the host resides?

### **Existing Use Rights**

Given the current circumstance in Shoalhaven, it is assumed that Clause 15(2) of the draft SEPP covers potential 'existing use rights' as raised in our November 2018 submission.

Council welcomes the clarification that this clause provides. It will also potentially assist with a transition period for existing STRA for the components that do require attention, this will help facilitate a smooth transition for existing operators and reduce any sharp downturn in accommodation availability.

Irrespective, there are still some issues that need to be clearly considered and addressed. Specifically, are 'existing use' premises still added to the register and is there a need for them to install the essential fire safety measures. This needs clarity.

In this regard it may be appropriate to consider adding similar wording to Section 16 of the Boarding Houses Act to provide a time period whereby relevant matters are sorted. Perhaps the wording of 15(2) could be adjusted to read as follows (or similar):

*(2) Development that was commenced before the commencement of this Policy and that was, immediately before that commencement, exempt development in accordance with an environmental planning instrument that was amended by this Policy may continue provided the following is completed within a period of **XX** months from the commencement of this Policy:*

- (a) The premises are to be included on the State STRA register; and*
- (b) Compliance with the fire safety standards identified in Division 7X of the Environmental Planning and Assessment Regulation 2000.*

**Note:-** *Compliance with 2(b) above will require the submission of a fire safety certificate from a competent person to the Local Council and the NSW Fire and Rescue once the services have been installed. There will also be requirements for ongoing annual certification of these essential fire safety measures.*

## **Development Application Pathway**

There needs to be a development application pathway for existing dwellings that cannot be considered as either 'exempt' or 'complying' development.

For example, given the potential extent and affectation within Shoalhaven, a development application pathway may be appropriate or necessary for situations when a location is considered to be above BAL40 or is a 'flood control lot' that cannot be considered under the complying development pathway. This has the potential to affect large parts of our City, including a range of existing urban areas.

Consideration should be given to adding the STRA definition to the Dictionary in the Standard LEP Instrument and then allowing Councils to consider where they may wish to separately make the use permissible with development consent through their LEP's.

Where a development application is required then the Department should consider a Model DCP as part of the Standard DCP process to assist in this circumstance.

## **Exempt and Complying Provisions**

Whilst the proposed capping of the number of guests is generally accepted and understood, what happens in a situation where a dwelling (as approved) is capable of accommodating more than 12 guests? Perhaps it would be reasonable to also allow a dwelling to be occupied up to approved bed capacity in the original development approval for the building?

## **Number of Days**

As outlined in our submission dated 19<sup>th</sup> November 2018, Council has resolved to initially accept the general permissibility under the reforms of 365 days per year.

Any reduction of allowable days would push accommodation into the peak season and leave the off-peak and shoulder season short on accommodation. This would impact negatively on the growth of a year-round industry in Shoalhaven. The traditional winter and shoulder seasons now make up around 70% of the total annual visitors to Shoalhaven, evening out seasonality and helping provide year-round jobs and income for local businesses.

It is still assumed that even though a Council does not opt now to set/select a number of days between 180 and 365 that it will still potentially be possible to amend the number of days in the SEPP at a later point via their LEP. This will provide the option of starting with the State-wide maximum of 365, but possibly reduce the number of days later should issues emerge. Confirmation in this regard would be appreciated.

There still does not seem to be anything in the package when a Council wants to consider reducing the number of days to between 365 and 180 re justification and why a particular number is selected – this could lead to unintended economic consequences for example if it is not soundly based.

## **Bushfire Provisions**

It is acknowledged that the bushfire prone land aspect of the proposed reforms has been strengthened when compared with the November 2018 version.

The need for this is acknowledged, however given the extent of the Shoalhaven that is mapped as 'bushfire prone' the proposed provisions and their requirements could affect a considerable part of the City, including within some established urban areas. There is also a concern that whilst people will readily be able to work out whether a property is mapped a 'bushfire prone', it will not be as easy to identify whether a property is identified as BAL40 without an individual assessment. This has the potential to create problems and concerns moving forward, particularly for people making decisions to buy into the area.

There does not currently appear to be a pathway to approve the use on land >BAL40. This may impact significantly on the ability to use the proposed provisions in Shoalhaven. Consideration should be given to a development application pathway for properties >BAL40.

Clauses 13 (e), (f), (g) and (h) of the draft SEPP relate to 'bushfire prone land'. The format of these clauses should be reworded to improve their function/use. Alternatively, they could be treated the same as the proposed provisions for 'flood control lots' and be given a separate clause number altogether:

**x. Requirements for complying development on bushfire prone land.**

- (a) Does not apply to dwellings assessed as BAL-40 and BAL-FZ; and
- (b) same as 13(f)
- (c) same as 13(g)
- (d) same as 13(h)

If this approach is accepted, the requirements of current draft Clauses 13(d) and 13(i) would also need to change to refer people to these new Clauses.

If the bushfire wording is not reformatted as suggested above, then consideration still needs to be given to the wording of draft Clause 13(e) which currently indicates that "no part of the lot on which the dwelling is situated..." This wording is not consistent with other legislation which refers to "bushfire prone land" and could have a significant impact on a range of properties/situations in our City, for example large rural lots that are only partially 'bushfire prone'. The 'bushfire prone land' definition actually relates to where the dwelling is located on a lot and therefore should be used in preference and to ensure consistency. The wording should also be changed to exclude dwellings assessed as BAL-40 and BAL-FZ (see above).

### **Flood prone Land Provisions**

This is a significant change and inclusion from the November 2018 version of the proposed framework. Given the nature of Shoalhaven proposing 'complying' development when land is flood prone could have a significant impact locally. Further consideration should be given to this aspect, specifically is it really a major risk or not, noting that at least most new dwellings, particularly in urban areas, would have been approved with flood risk in mind? The usability of the currently proposed Clause 14 is also questioned.

The terminology in the draft SEPP needs to be consistent with the Standard LEP Instrument and the NSW Floodplain Development Manual otherwise there will be confusion in the development industry and the community as to the meaning of this clause. For example, is the use of the term 'flood control lots' consistent?

Our interpretation of Clause 14 of this draft SEPP is that STRA would not be allowed in areas affected by the 1% AEP flood event, regardless of the hydraulic hazard category. This is more restrictive than Chapter G9 Development on Flood Prone Land of the existing Shoalhaven DCP2014 that allows development in these areas provided appropriate development controls are implemented.

It is understood that the provisions in the draft SEPP would not apply to existing properties in Shoalhaven that are used for STRA now (due to existing use rights) but would only apply to new developments (intended for this use) or existing developments (to be converted to STRA) after the policy is implemented. From a flood risk management point of view, there is logic behind this approach as tourists/visitors will not always be aware of the flood risk at a rental property and this makes it easier for the SES during flood events.

The practical implication of this for Shoalhaven is that new developments (or existing development converted to STRA) within a 1% AEP flood extent that are intended to be used as short-term accommodation would not be permitted. There are a lot of flood prone areas within Shoalhaven and high demand for STRA, so any new developments intended to be used for short-term accommodation would need to be outside these areas. Council would need to make applicants aware of this for developments in flood prone areas so they would know that their property could not be converted to short-term accommodation in the future. This could be covered off on flood certificates for that Council issues.

Alternatively, development consent could be required in appropriate circumstances for STRA on flood control lots where 'complying' development cannot be pursued to:

- a. recognises concerns with certifiers/engineer's ability to access and use available flood risk information, and
- b. avoids defining "refuge" as appropriate refuges differ with flood behaviour e.g. refuge in place v's evacuation centre.

Strongly suggest that this aspect of the proposed reforms is given further detailed consideration in consultation with relevant bodies, including Councils, to ensure that it is workable.

### **Code of Conduct**

The proposal for a Code of Conduct is generally supported as it is in everyone's interest for STRA to be a 'good neighbour'. Give the contribution that STRA makes to our local area and its tourism economy, this is something that Council has consistently promoted and encouraged in our area through our provisions and material related to STRA.

The key to the strength of the proposed code will however be the proposed registration system and how problematic premises or owners/operators are managed and handled. Further detailed comments on these aspects are provided below. There is also a need to ensure that tenants are aware of the Code and commit to it as part of the lease.

### **Proposed Registration System**

The proposal for all STRA's (irrespective of platform) to be on a single register is generally supported. This could run much the same as the requirements under the

Swimming Pools Act. However there needs to be some link or tie to this in the proposed SEPP. There could also be nominal registration fee for properties and operating a penalty for operating a premise without first registering it on the State-wide register (this is similar to the Swimming Pool Act requirements).

The general register will provide certainty/information to the community. However, the suggestion of an industry led register or self-registration is not supported. The register needs to be led by the NSW Government, possibly through NSW Fair Trading. Again, this could be undertaken similar to the current Swimming Pool Act requirements.

The proposed STRA register should include the following detail for each property:

- (a) The address of the STRA
- (b) Local Government area where the STRA is located
- (c) Name of the STRA
- (d) Name of the owner
- (e) 24 hour contact details of the owner and any agent.
- (f) The number of bedrooms and the maximum number of people
- (g) Number of days occupied in any calendar year
- (h) How to lodge a complaint
- (i) Installed essential fire safety measures.

The issue of 'insurance' should also be considered as part of the register.

It is essential that both the registration scheme and exclusion register are tied together, and information is shared (open access) and jointly utilised.

### **Exclusion Register**

Generally individual problematic properties have been an issue in our area. The proposed exclusion register is a good approach and will potentially play a key role in managing these properties in association with the Code of Conduct in the future. There are however significant questions about the realities of this functioning successfully. For example:

- How will the exclusion register carry over platforms (it should)? If a property is excluded from one platform can it operate on another (should not be an option)? How does the register link platforms?
- If the property sells, does this create a clean slate or does the exclusion continue for the new owners? How would this be managed / disclosed at the time of sale?
- The nature of the online booking industry is all about instant booking and payment. Is the check done for blacklisted guests through the platform at the time of booking? If not, refunds will be required if the guest turns out to be blacklisted. How are different email addresses / names at the time of booking dealt with in the system?

- How will possible vexatious neighbours actually be handled? Some neighbours can be very persistent and vary considerably in what they consider a breach to be. This could create a significant amount of work (possibly for Council) in the investigation period.

It is noted that planning complaints can trigger action under the Code of Conduct and inclusion on this register. Depending on the nature and veracity of a complaint this approach is logical and is supported. It should also be clarified whether a valid planning complaint amounts to a 'strike'?

Also question whether breaches of other existing Acts, such as the POEO Act, should also be considered as a 'strike' depending on their nature? This would also possibly be the expected and logical outcome.

## **Compliance**

The compliance pathways and obligations related to the overall framework still need some clarity as it is likely that Councils will be expected to play a role, either directly or by default. This could be a significant additional compliance burden for Council given the extent of STRA in Shoalhaven.

## **Fire Safety Standards**

The inclusion of general first safety standards for STRA is supported as no one wants to see a fire in a STRA resulting in injury or death. This would have a huge impact on the industry generally and this form of tourist accommodation is important to Shoalhaven as outlined earlier.

The current proposed standards need to be amended to require the installation of fire and smoke alarms by a competent person and that a final fire safety certificate is submitted to Council and NSW Fire and Rescue. This needs to be included even though the building will remain as a dwelling (Class 1a). The requirements that came in during 2005 for dwellings to be upgraded with a hard wired appliance or 10 year batteries once the existing smoke alarm batteries fail has not really worked. As such there should not be a reliance on a similar system for STRA's given that it relates to with the safety of unrelated or unfamiliar people to the building.

The Environmental Planning and Assessment Regulation should also be amendment to include STRA's as requiring annual certification and this should be relatively easy to accommodate given that there will now be a definition for STRA's. Most Councils have fire safety programmes that deal with the annual certification of essential fire safety measures and STRA's could be incorporated with the ability for a nominal fee (possibly also linked to the registration system).

## **DCP Provisions**

Council currently has a DCP Chapter that supports and is linked to our current LEP Clause on STRA. This DCP Chapter can be viewed on the internet at:

<http://dcp2014.shoalhaven.nsw.gov.au/sites/dcp2014.shoalhaven.nsw.gov.au/files/Chapter%20G16.pdf>

Some clarity is required in this regard, specifically what happens to our DCP if the reforms come in and does it still play a role? Related to this, it is suggested that where a development application is required in the future for STRA that the Department should consider Model DCP provisions for Councils to possibly be utilised or adjusted as part of the proposed Standard DCP process.

## **Concluding Comments**

The opportunity again to comment on the proposed reforms is welcomed. It is stressed that there needs to be a continued dialogue with Local Government to ensure the final provisions are workable and do not raise any unexpected issues.

It is requested that this matter be drawn to a conclusion in a timely manner given the uncertainty it has created around STRA and that clear advisory material be issued regarding the final controls to ensure there is broader community awareness of the new system. This also needed to recognise situations like Shoalhaven where 'existing use rights' and the provisions of Clause 15(2) of the draft SEPP comes into play.

Should you require further information about this matter, please contact Gordon Clark, Section Manager – Strategic Planning on (02) 4429 3355.

Regards

**Gordon Clark**

**RE: Short Term Rental Accommodation: Submission from Singleton Council**

I refer to the current suite of documents on exhibition for the introduction of a policy framework around the regulation of short term rental accommodation. The Department is currently seeking feedback on the suite of documents until the 11<sup>th</sup> September 2019. Singleton Council appreciates the opportunity to review and provide feedback to the Department on a significant, currently unregulated, land use type.

Short Term Rental Accommodation is an important aspect of tourist and visitor accommodation in the Singleton Local Government Area. Whilst it is difficult to ascertain the value added to the local economy by STRA, tourism within the Singleton LGA, and by association, visitor accommodation, contributes around \$147 million dollars to the NSW economy and accounts for approximately 738 jobs in the LGA. As such, the development of a robust and transparent planning and regulatory framework that supports the tourism industry and incorporates STRA is critical.

**Feedback on the STRA SEPP, Regulation and Safety Standard**

To that end, Singleton Council provides in principle support for the suite of documents, in particular:

- The proposed adoption of a stand alone State Environmental Planning Policy that enables STRA providers, who are often not conversant in the technical aspects of the development assessment process, to have line of sight to the requirements and obligations for compliance.
- Clarity regarding the standards required for STRA in flood zones.
- Clarity regarding the standards for STRA on bushfire prone land, and in particular, prevention of development of STRA on bushfire prone land with a >BAL40 risk rating.
- Amendment to the Regulations to include clarity around visitor safety requirements, and in particular, fire safety standards.

Whilst Council has not to date nominated different permissibility, and particularly days thresholds, across the LGA, the implementation of the suite of STRA

documents is likely to have an impact on STRA development in the LGA, potentially positively and negatively. As such, Council would seek opportunity to review the implications following an implementation period, and propose adjustments to days thresholds in the future, should this be required.

I would like to thank the Department for the opportunity to provide comment on the suite of documents supporting regulation of the STRA industry. Should you have any questions or comments, please contact Mary-Anne Crawford, Manager Development and Environmental Services on 02 6578 7290.

Yours faithfully

A handwritten signature in black ink, appearing to be 'Mary-Anne Crawford', with a long, sweeping underline.

## 1. Introduction

Tourism Accommodation Australia (NSW) welcomes the opportunity to make a submission to the *Department of Planning and Environment, responding to the Explanation of Intended Effect: Short-term Rental Accommodation (STRA) Planning Framework (EIE)*. This submission will address the proposed amendments by the Department to introduce the state-wide planning framework for STRA.

TAA (NSW) is the peak industry association representing hotels, motels and serviced apartments in New South Wales' \$8.0 billion accommodation sector (\$2.7 billion direct GVA; \$5.3 billion flow-on). TAA (NSW) is focused on, and committed to, the future development and growth of the accommodation sector within NSW's vibrant tourism and hospitality industries.

### 1.1 Contribution of Accommodation Sector to the NSW Economy

NSW's accommodation sector supported 57,329 full-time equivalent jobs in 2016-17, (26,300 through direct employment and a further 31,029 through flow-on impacts). This accounts for 21.9% of jobs supported by NSW's tourism industry and 1.8% of employment throughout NSW. Employment in the accommodation sector contributed \$3.5 billion to household incomes throughout NSW, and the sector contributed \$416.8 million in taxation revenue during 2015-16.<sup>1</sup>

## 2. Land use definition of Short Term Rental Accommodation (STRA)

In previous submissions we have pointed to the fact that there is no single definition for STRA. The growth of digital platforms (ie. Airbnb; HomeAway; Stayz etcetera) has increased the permissibility, lowered the cost and improved the accessibility of residential accommodation for short term letting to the visitor market.

Under current planning controls tourist and visitor accommodation is not allowed in residential zones and residential and tourist accommodation in the same building must be on separate floors accessed by separate lifts.

We support a new definition for short-term rentals and a consistent approach across NSW. We agree with the approach outlined in the EIE, of premises being classified as 'exempt' development where they meet certain requirements, such as limiting the number of days they can be let in a year and ensuring that they have in place the insurances and fire and safety provisions. If STRA does not meet the requirements it would not be permitted in residential buildings.

In our previous submissions we pointed to the need to distinguish between the different types of uses. We supported STRA in primary residences, where its purpose is to offset costs, not engage in the visitor economy, take housing off the long term market and compete with regulated 'tourist and visitor accommodation'.

---

<sup>1</sup> AEC Group, 2017, *Economic Contribution of the Tourism Accommodation Sector in New South Wales*

Hosted Accommodation:	All hosted stays in primary residences, typically involving the private or shared short-term letting of a spare room.
Shared Accommodation:	Primary residences let un-hosted for a maximum total of ninety nights per year, typically while the residents are temporarily absent.

The use of investment residential properties (where the host is not present), as commercial STRA, falls outside the above uses.

In the Standard Instrument Order 2006 all forms of ‘tourist and visitor accommodation’ are regarded as a “development” and therefore require planning permission. If ‘tourist and visitor accommodation’ is to occur within an existing dwelling, hosts must seek a “change of use” permission. Therefore the proposed definition of STRA as ‘the commercial use of an existing residential dwelling’ together with that commercial use being for 180 days, leaves ‘short term rental accommodation’ being a permitted use with little regulatory controls other than the proposed ‘Code of Conduct’. This is largely self- regulation with no commitment to state or local government registration or oversight.

We support the definition of STRA with some modifications, only if it pertains to primary residences in metropolitan areas. This is to ensure, that if it sits outside the controls that apply to ‘tourist and visitor accommodation’, there is clear recognition that the commercial short-term rental accommodation usage is secondary.

We therefore propose the following amendment:

“the commercial use of an existing residential dwelling, either wholly or partially, for the purposes of short-term rental accommodation, but does not include tourist and visitor accommodation. In metropolitan areas the ‘existing residential dwelling’ to be a primary residence only.”

We support the proposed definition on the condition that “tourist and visitor accommodation” is also defined within the Standard Instrument Order 2006, as a building or place that provides temporary or short-term accommodation on a commercial basis, and includes any of the following: (a) backpackers accommodation, (b) bed and breakfast accommodation, (c) hotel or motel accommodation and (d) serviced apartments.

### **Serviced Apartments**

Within the ‘Serviced Apartment’ category TAA together with other industry associations (AAoA, AFTA and TTF) include “**apartment-hotels and/or strata-titled hotels**”. These are a *residential property* where the *short term rental accommodation industry participant* has entered into an agreement with the Owners Corporation to operate the business of letting lots in the building from the common property of the building (management rights) and has a form of onsite presence by way of a resident manager and reception located within the relevant building.

- “**management contract**” means a letting/management appointment or lease between a building/lot owner and the short term rental accommodation industry participant with the purpose of undertaking short term accommodation operations within the relevant building/lot allowing the short term rental accommodation industry participant to effect control over the guest(s) in that building/lot.

- **“residential property”** means a residential property compliant with the following criteria:
  - i. Acceptable fire safety measures consistent with the operation of short term rental accommodation for commercial purposes;
  - ii. Minimum insurance coverage of \$20 million for public liability;
  - iii. Employment arrangements that comply with Fair Work legislation, applicable awards and/or enterprise agreements/individual agreements etcetera.
  - iv. Clearly articulated emergency contacts and procedures

Management Rights operators are required to be licensed and must abide by greater controls and regulations.

**Recommendation 1**

*That the definition is amended to ensure that it recognises that if STRA sits outside the planning controls for ‘tourist and visitor accommodation’ it recognises the need to limit STRA to primary residence only in metropolitan areas.*

*“the commercial use of an existing residential dwelling, either wholly or partially, for the purposes of short-term rental accommodation, but does not include tourist and visitor accommodation. In metropolitan areas the ‘existing residential dwelling’ to be a primary residence only.”*

**Recommendation 2**

*That “apartment-hotels and/or strata-titled hotels” are included in the Serviced Apartment category and are therefore included in ‘tourist and visitor accommodation’ and not the subject of the EIE.*

**3.0 Proposed amendments to the State Environmental Planning Policy (Exempt and Complying Development Codes) 2008**

**3.1 Development Approval Pathways**

As outlined in 2.0 above, in our submission to the Options paper, TAA supported the following as Exempt development:

- a. Hosted accommodation. The short-term letting of rooms in any property where the host is present;
- b. Shared accommodation, where a property used for short-term letting retains its function as a primary residence. The most objective way of ensuring a property retains its function as a primary residence is through a threshold on the number of days per year it can be short-term let.

As outlined in our previous submissions our preference would be to limit STRA to primary residences only in metropolitan areas – Sydney, Newcastle and Wollongong.

This is in keeping with the trend overseas where New York, San Francisco, Washington, New Orleans, Miami, Boston, Charleston, Ireland, Vancouver, San Diego and Maine are among the jurisdictions which specify registration and primary residence only in cities (Please refer Appendix 1).

We do not support the limit of 180 days per year for properties in metropolitan areas whether it applies to a primary or secondary residence. At that point our modelling<sup>2</sup> shows that it becomes more attractive to put a property on the short term rental market, thus taking residential property off the long term rental market and competing directly with ‘tourist and visitor accommodation’ without the controls.

In the recently released Australian Housing and Urban Research Institute paper (AHURI), the authors noted ‘that while the new NSW regulatory regime adopts a limit of 180 days, we have chosen 90 days as the threshold. This is consistent with approaches taken in other parts of the world and represents a period of time that is considered to be the maximum period that long-term occupants could vacate their property without having to seek alternative long-term accommodation themselves.’.

Consistent with our modelling, their research shows that in Sydney - Darlinghurst, Manly and the eastern beach suburbs of Bondi, Tamarama, Bronte, Coogee - are areas of high concentration of commercial Airbnb listings<sup>3</sup>. Areas including and immediately surrounding the Sydney CBD form a second cluster.

The *Short-term Holiday Letting in NSW Options Paper* (the Options Paper) agrees that short-term letting ‘is acceptable in a residence up to a point that it becomes a more intensive commercial type of use.’<sup>4</sup>

Although TAA would support a lower threshold than 90 days, the New South Wales *Residential Tenancies Act 2010* provides an existing distinction of 3 months.

As Gurran and Phibbs point out in their 2016 report, ‘change of use’ permission is currently required for tourist and visitor accommodation. Recognising this, a considerable number of submissions to the Options Paper, were received from planners pointing to the fact that ‘Occasionally renting a home while the occupants are away would not constitute a change of use from residential to tourism accommodation (Richardson, 2015) and should not usually require special permission. Nor

<sup>2</sup> AirDNA, May 2018 scrape data

<sup>3</sup> AHURI Final Report No. 305, p 25, October 2018

<sup>4</sup> NSW Government, 2017, *Short-term Holiday Letting in NSW: Options Paper*, p 18

would occasional periods of home sharing with paying tourists who occupy rooms or beds during certain times of the year. However, repeated listings (more than 90 days per year was a commonly cited threshold) could mean that the property is no longer being used for residential purposes (Thomas, 2015; Mather, 2015) thus violating zoning rules.'

**Recommendation 3**

*That a limited of 90 days replaces the current 180 days. At that point our modelling shows that it becomes more attractive to put a property on the short term rental market, thus taking residential property off the long term rental market and competing directly with 'tourist and visitor accommodation' without the controls.*

**3.2 The Regulatory Impact of Commercial Short-term Rental Accommodation**

The regulatory and legislative requirements imposed by Commonwealth, State and local governments upon 'tourist and visitor accommodation' but not imposed upon STRA (outlined in Appendix 2) demonstrate the unevenness of the short-term accommodation playing field. This jeopardises ongoing investment in new accommodation supply in metropolitan areas necessary to capitalise on New South Wales' strategic tourism advantages.

Regulations add costs for operators. A 2015 report commissioned by the ACCC determined that 'regulatory neutrality' is a significant issue affecting competition between traditional operators and commercial operators in the "sharing" economy, who have "fewer regulations applied to and/or enforced against them" which "affects traditional businesses' ability to compete."<sup>5</sup> Because of this, the conversion of residential property into 'commercial short-term rental accommodation' is a much more attractive investment proposition than investment in regulated accommodation product.

Equally developers preference commercial and residential development in Sydney as these uses have a much higher value than tourist and visitor accommodation on a built per metre basis on average. As a result, a potential hotel often loses out to an office or residential development which delivers a better risk adjusted financial return (capitalisation rate) to the developer. The higher realisation value for office and residential translates into a higher price that can be paid for land for these alternate uses.

---

<sup>5</sup> Deloitte Access Economics, 2015, *The Sharing Economy and the Competition and Consumer Act*

The current regulation threatens to further exacerbate the above, supporting the growing use of apartments zoned for residential, as short term visitor accommodation. This has multiple impacts:

1. **Impacts NSW's competitiveness in bidding for high-yielding conventions and exhibitions**, and its ability to capitalise on the new International Convention Centre and other infrastructure investments. These large scale conferences are seeking room allotments, high quality service and access to hotel facilities.
2. **Impacts employment and training investment.** The sector directly and indirectly supported 57,329 full-time equivalent jobs in 2016-17. The sector provides extensive training for employees which contributes to the growth in service quality across the hospitality industry.
3. **Impacts taxation revenue.** The sector contributed \$416.8 million in taxation revenue and New South Wales Government payroll tax during 2015-16, equating to 17 cents/dollar of GSP directly produced by the sector.
4. **Impacts access to services in the city.** Tourist and visitor accommodation contributes extensively to the amenity of cities, investing in bars, restaurants, spas, gyms, meeting rooms and other facilities. In a city that otherwise goes to sleep at night, they provide essential services for both residents and visitors.
5. **Impacts investor confidence in the market.** NSW must be able to attract foreign and domestic capital for investment to support asset prices of existing hotel stock, fund ongoing maintenance and refurbishment and innovatively meet changing consumer demands. This will become more difficult as lower-cost commercial-residential accommodation increasingly competes against regulated hotels for investment.

To overcome the primary causes of the supply blockages, there is a need to improve the development feasibility equation for genuine 'tourist and visitor accommodation' and its ability to compete with alternate uses, through government intervention. This requires not only improved regulation of 'STRA' but measures that improve investment in 'tourist and visitor accommodation'.

TAA believes that government has a role in addressing both these challenges.

### **3.3 Exempt and Complying Development Standards**

TAA supports the intent of the 'Exempt and Complying Development Standards' as outlined in 4.2.3 of the EIE. In particular we welcome the reinforcement of safety requirements in 4.2.4, which we expect to be further reinforced within the Code of Conduct. We note the effort to protect against 'party houses' with the statement 'it is also proposed that dwellings will not be able to be let for STRA to unrelated parties at one time. Related parties would include families, partners, friends and/or colleagues'.

We would point to the fact that the inclusion of friends and/or colleagues is so broad as to negate any effort to control behaviours through this measure.

However currently neither, the EIE or other proposed measures, have any mechanism in place to control the above. There is nothing in place that identifies properties used for STRA purposes; ensures that the regulatory standards and are being met; ensures that fire safety measures have been implemented; ensures that a property is not used for un-hosted STRA in Greater Sydney or in excess of the 180-day cap or in any LGA with a day cap less than 365; or ensures that the requirements of the strata scheme are met.

#### **4.0 Additional Elements of the Government Policy**

##### **4.1 Mandatory Code of Conduct**

TAA understands work is proceeding on the Mandatory Code of Conduct. We also note that the current Code of Conduct committee largely consists of those organisations with a financial interest in ensuring that there is light touch regulation of STRA.

In previous submissions TAA has outlined that in addition to controls on fire and safety, insurances and behavioural issues, a mandatory Code of Conduct needs to include the following enforcement measures:

- Agreement to only list properties that comply with the Code of Conduct;
- Agreement to only list properties that have registered with the NSW Government, and include the registration number in any listing;
- Agreement to remove listings that have not complied with the Code of Conduct;
- Via a registration system, agreement to provide to the NSW Government property information, owner information and booking information for the purposes of data-transparency and monitoring.

Short-term letting platforms and offline property agents that do not comply with the Code of Conduct should no longer be allowed to list properties in NSW for short-term let.

Combined, these elements of a new, mandatory Code of Conduct will stop irresponsible property owners from short-term letting and provide a strategic competitive advantage to those short-term letting platforms and offline property agents that are prepared to protect the social licence of NSW's tourism industry. These measures also address some of the questions around the policing of the EIE proposed regulatory standards.

These measures take much of the administrative burden away from Government, and ensure that those companies and individuals profiting from short-term rental accommodation are committed to the industry's sustainability.

TAA maintains that a mandatory Code of Conduct is a tool that underpins enforcement of distinctions within the planning system. That a host is present during the duration of a short-term let, or that property is not short-term let in excess of the prescribed number of days per year, can be ensured through short-term letting platforms and offline property agents providing the booking information of individual properties to the NSW Government.

For effective enforcement, the Code of Conduct needs to mandate the provision of this information to the New South Wales Government. Airbnb, for example, has agreed to this in overseas jurisdictions such as San Francisco, New York and New Orleans.

Numerous jurisdictions around the world now require the registration of properties used for short-term letting (Appendix 1). Foremost among these jurisdictions are San Francisco, New Orleans, Paris, Berlin, Ireland, Miami, Barcelona, Madrid, Montreal, Portugal and Vancouver. The key learning from these cities is that the registration process should be simple, straightforward and online and that the online platforms provide listing data to government that can be checked against registration.

Compliance with registration can be ensured through a requirement that any online or offline advertisement of a property for short-term let must include that property's registration number.

The registration system should work in concert with the Code of Conduct to store the booking activity of properties used for short-term rental. This will ensure that properties are not rented out for short-term accommodation in excess of the prescribed number of nights a year unless they have received a development application consent recognising their change in use from residential to commercial.

In addition to this there needs to be a regular audit conducted around the actual growth of short-term letting and impact on housing availability and costs, with third party sites that scrape data.

One thing that has been clear from enforcement measures worldwide is that platforms resist any real oversight of short term rentals. The Code of Conduct therefore needs to include penalties both for 'hosts' and for online platforms. After years of dealing with this issue, New York has passed a bill where 'disclosure requirements' for online platforms has been increased considerably with fines of US\$1,500 per listing for non-disclosure. This is in addition to the fee of USD7500 for hosts in violation of restrictions.

#### **Recommendation 4**

*That a simple online State administered online registration system be implemented to work in concert with the Code of Conduct to store the booking activity of properties used for short-term rental. That short-term letting online platforms and offline property agents providing the booking information of individual properties to the NSW Government to be checked against host registration and that a regular audit is conducted with third party sites that scrape data.*

#### **Recommendation 5**

*TAA recommends that a mandatory, enforced Code of Conduct requires short-term letting platforms and offline property agents to only list properties that comply with the Code of Conduct; only list properties registered with the NSW Government and include the registration number in the listing and remove properties that have not complied with the Code of Conduct.*

### **Recommendation 6**

*TAA recommends based on overseas experience, that fines apply for both short term letting hosts that do not comply with the Code of Conduct or conditions of the EIE and for online platforms that do not comply with the requirement to share listings of STRA.*

## **5. Conclusion**

As outlined in this submission, TAA continues to support hosted and shared accommodation when in a primary residence.

Both the recent *AHURI* research and the *Gurran and Phibbs* research in NSW shows that STRA in metropolitan New South Wales considerably impacts on amenity and housing affordability. Our submission also briefly outlines the considerable impact on hotel investment, which has long term consequences for employment, training and tax revenue for New South Wales. Our modelling clearly shows that at the proposed 180 days in metropolitan areas, it becomes more attractive to put a property on the short term rental market, thus taking residential property off the long term rental market and competing directly with 'tourist and visitor accommodation' without the controls. We therefore support a cap of 90 days and limiting STRA to primary residences only in metropolitan areas.

A mandatory, enforced short-term letting Code of Conduct coupled with a mandatory short-term letting registration system are essential tools in monitoring the amenity impact of tourism and ensuring compliance with the planning system. It is important that short-term letting platforms and offline property agents commit to the sustainability of New South Wales' visitor economy by sharing with Government the property information, owner information and booking information of properties they advertise for short-term let.

We look forward to working with the NSW Government on a long term solution to STRA in the visitor economy.

Appendix 1	Overseas Regulations on STRA
Jurisdiction	Regulations
<p>New York <b>BANNED</b> (spare rooms are not banned) <b>PRIMARY-RESIDENCE ONLY</b></p>	<p>Short-term letting for stays less than thirty days is illegal. Advertising properties for stays of less than thirty days is also illegal. Officials <a href="#">approved</a> on August 6 2018 disclosure requirements for Airbnb to beef up its enforcement of a state law that bans rentals of less than 30 days, spurring the site to sue the city. Landlords in violation of these restrictions are liable for a USD7500 fine. Short-term letting is estimated to have reduced the affordable housing stock by 10%, accelerated gentrification to the detriment of working-class communities and increased rents. New York City’s council passed a bill requiring home-sharing companies – read: Airbnb – to hand over the names and addresses of their hosts or face fines of USD1,500 per listing. Airbnb has fought the measure, claiming it violates hosts’ privacy. The law will take effect in early 2019.</p>
<p>San Francisco <b>REGISTRATION (publicly available register)</b> <b>90 DAYS</b> <b>PRIMARY-RESIDENCE ONLY</b></p>	<p>Hosts are required to register with the City before letting their property and the register is <a href="#">publicly</a> available. Airbnb has crafted a mandatory registration system to provide the city with hosts’ names, addresses and guests’ length of stays. This system can block booking beyond the 90 day threshold, and quantify the conversion of long-term rentals into short-term rentals. Registration requirements introduced in San Francisco this year (2018) <a href="#">have reportedly dropped</a> the number of listings by close to half. Short-term letting platforms must inform hosts of their legal responsibilities to collect &amp; remit hotel taxes, only list primary residences, have insurance coverage of a minimum USD500,000, and a maximum un-hosted letting of 90 days per year. Airbnb states to have been applying a “One Host, One Home” policy in San Francisco since April 2016 to limit un-hosted short-term letting to primary residences only.</p>
<p>Washington <b>LICENCE</b> <b>90 DAYS</b> <b>PRIMARY-RESIDENCE ONLY</b></p>	<p><a href="#">Laws passed</a> in late 2018 that block property owners from using Airbnb and similar companies to rent second homes on a short-term basis. Licences are required and an agency is being established to enforce them. It limits homeowners to renting out their primary residence to 90 days in a calendar year when the host is absent. There would be no limit on short-term rentals of space in one's residence - such as a spare bedroom or basement - when the host is present.</p>

<p>New Orleans <b>LICENCE</b> <b>90 DAYS</b> <b>PRIMARY RESIDENCE ONLY</b></p>	<p>There is <a href="#">currently a moratorium</a> on issuing licenses for short-term rentals of whole houses which will be revised soon (late 2018). There is an outright ban short-term letting in the French Quarter. Listing a property in New Orleans automatically triggers the city's registration process. Airbnb calls this "Pass-Through-Registration." Un-hosted short-term letting is limited to <a href="#">90 days</a> per year. The owner-occupant shall occupy the dwelling and be present during any Short Term Rental occupancy. Short-term letting platforms collect taxes on behalf of the city, which fund an enforcement bureau. Short-term letting platforms provide the city with data on short-term rental hosts, the locations of the listings and host contact information.</p>
<p>Miami <b>PRIMARY RESIDENCE</b> <b>90 DAYS</b> <b>REGISTRATION</b></p>	<p>Short-term letting has been banned in a substantial portion of Miami. In neighbourhoods where short-term letting is legal, strict conditions have been introduced. Hosts who register can only rent out their homes for 90 days and they must live at the listed property for at least 275 days per year. Rentals for less than six months and one day are prohibited in the city unless the property is in a legally permissible zone, such as most of tourist-dense South Beach. Short-term rentals are largely <a href="#">illegal</a> in the residential areas of the city. In legal areas, hosts are required to apply for a certificate of compliance at a cost of \$250. The application form for short-term letting requires copies of the property's deed, proof of a business tax receipt from the city and Miami-Dade County, a Florida Department of Revenue Certificate of Registration for taxation purposes and a Transient Lodging License with the Florida Department of Business. Operating a vacation rental without a Certificate of Use is a violation of the County Code: 1st Offense = \$100; 2nd Offense within 24 months of 1st offense = \$1,000; 3rd Offense within 24 months of most recent of the preceding offenses as well as subsequent offenses = \$2,500. Short-term rental listings would be required to display a city-issued business tax receipt number and the resort tax certificate number. Stiff fines for illegal short-term rentals start at \$20,000 for the first violation.</p>
<p>Boston <b>PARTIAL BAN -</b> <b>PRIMARY RESIDENCE ONLY</b> <b>120 DAYS</b></p>	<p>Boston's City Council passed regulations in June 2018. <a href="#">Hosts must own and live on the property</a>. Rentals are broken down into three categories: "Limited Share Unit": a spare room or space in a residence. \$25 annual fee. "Home Share Unit": an entire primary residence. \$200 annual fee. "Owner-Adjacent Unit": a unit in a two or three-family building. Can be rented up to 120 nights a year. \$200 annual fee. Property owners who want to do short-term rentals outside the scope of the proposed ordinance can apply to get their property categorized for commercial use instead of residential use.</p>

<p>Charleston <b>LICENCE/ REGISTRATION BAN ON WHOLE HOME RENTALS PRIMARY RESIDENCE ONLY</b></p>	<p>In <a href="#">April 2018</a> Charleston City Council finalised a new set of rules that bans whole-home rentals and requires property owners to stay home whenever they host guests. Operators must obtain a special licence and list the registration number on all online advertisements and will have to present site plans to identify where guests would stay and park their cars. Operators must also own and live on the property full time. They must pay licence fees and accommodations taxes. Fines have been issued for hosts breaking the rules, usually approximately US\$1087. They also have a <a href="#">Short-Term Rental Task Force</a>. There <a href="#">continues</a> to be debate on the rules.</p>
<p>London <b>REGISTRATION 90 DAYS</b></p>	<p>London has an annual threshold of 90 days for which a property can provide un-hosted short-term letting. Beyond this threshold, planning permission is required. Airbnb enforces a day-counter in London, which blocks booking functionality on listings that have reached the 90 day limit. There is concern that Airbnb is not enforcing the day-counter.</p>
<p>Paris <b>REGISTRATION 120 DAYS</b></p>	<p>Properties can be short-term let for 120 days per year and require the written consent of landlords. Above this threshold a special licence is required. Fines of €25,000 apply to landlords who short-term let properties above this threshold without a licence. Registration is required of properties used for short-term letting. Airbnb has agreed to implement an automated day-counter to block booking functionality once the 120 day annual threshold has been reached. Airbnb is likely to face tougher measures due to the so-called ELAN (Evolution of Housing, Development and the Internet) bill, already passed by the French Senate. <a href="#">Currently</a> under examination by a House-Senate committee, the bill would introduce fines for platforms that fail to remove unregistered listings from their site.</p>
<p>Amsterdam <b>REGISTRATION 30 DAYS (IN 2019, CURRENTLY AT 60 DAYS)</b></p>	<p>Airbnb agreed to a short-term letting annual limit of 60 days. It also agreed to enforce this limit through its own automated day-counter. From October 2017, Amsterdam has begun requiring hosts to report booked dates of their guests ahead of time. This is in response to concerns that Airbnb was not enforcing the automated day-counter, and that hosts were moving across multiple short-term letting platforms to circumvent the day-limit. Fines for non-compliance are up to €20,500. Amsterdam will reduce the limit to <a href="#">30 days</a> per year from 2019.</p>

<p>Ireland LAW PASSED 90 DAYS REGISTRATION PRIMARY RESIDENCE ONLY – change of permitted use required for second properties</p>	<p>New laws will come into effect June 2019. Owners of second properties in 'high housing demand areas' (i.e. Dublin) – buy-to-lets or holiday homes - will have to apply for <a href="#">consent</a> and owner occupiers will face no further restrictions in letting individual rooms. However, owner-occupiers will have to abide by a 90-day maximum number of bookings in a year if they let their entire home.</p> <p>Where a person owns a second property and intends to rent it out in a short-term capacity, they will no longer be allowed to do so unless the property is already permitted to be used for tourism or short-term letting purposes and they complete registration. They are eligible to apply for a change of permitted use, but where demand for long-term lettings is high they are unlikely to get permission.</p>
<p>Vancouver REGISTRATION LICENCE 90 DAYS PRIMARY RESIDENCE ONLY</p>	<p>Short-term letting is banned apart from primary residences. <a href="#">Renters</a> must have approval from a landlord while homeowners that are part of a strata must ensure that short-term rentals are allowed under the strata bylaws. All hosts are required to register with the City, and have business licences displayed on their accommodation listing (which cost CAD49 a year) – the penalty for violating the law is up to CAD1,000.</p> <p>The primary residence qualification means that properties cannot be short-term let for more than 90 days per year. An official licence is required for renters who are operating on Airbnb and a business licence number must be included in listings on websites.</p>
<p>Montreal REGISTRATION 90 DAYS</p>	<p>Quebec law requires owners who frequently short-term let their properties (more than 90 days annually) to obtain the same certifications as hotels and bed &amp; breakfast operators. Fines are up to CAD100,000.</p>
<p>Toronto *POSTPONED* REGISTRATION 90 DAYS LICENCING PRIMARY RESIDENCE ONLY</p>	<p>Toronto is finalising its response to short-term letting. An appeal of new rules has been <a href="#">postponed</a> to August 26 2019, meaning home-sharing companies are continuing to operate without regulation.</p> <p>The proposed rules included requiring all short-term letting hosts to register with the City and post their registration number in all advertisements. Short-term letting platforms are required to be licenced and only list registered properties. Short-term letting is only allowed in primary residences (based around a 90 day annual threshold). Short-term letting platforms must share booking, owner and property data with the city to enable enforcement.</p>
<p>Los Angeles Drafting 120 DAYS</p>	<p>Proposed limit to number of days a host can short-term let their residence to 120 days per year.</p>

<p>Madrid <b>90 DAYS LICENCE REGISTRATION</b></p>	<p>New regulations prohibit flats being rented out for more than 90 days per year. To get a <a href="#">holiday rental licence</a> homeowners will have to prove their property has a separate entrance from the rest of the building—a condition that is in most cases impossible to fulfil. Madrid city hall in January 2018 stopped issuing new licences for tourist apartments, and only plans to resume licensing once the new system is in place. Registration has been required since 2014.</p>
<p>Portugal <b>LICENCING &amp; REGISTRATION FINES</b></p>	<p>Rules came into effect <a href="#">1 July 2017</a> that make it mandatory to show the official rental licence number of any property when advertised online. <a href="#">Further laws</a> have been proposed in the Portuguese Parliament which add restrictions to private rentals. Complainers must demonstrate how the movement of tourists ‘disturbs’ normal property users and if half of the home owners in an apartment are against an apartment being letted for holiday guests it will not be allowed.</p> <p>Town Halls are able to create ‘areas of containment’ by limiting the number of licences issued in a neighbourhood and a single owner cannot hold more than 7 licences. Any new licence must be filed with the local mayor and an inspection will occur within 30 days to verify that the property conforms to existing requirements. Fines for non-compliance with laws and regulations have also been increased to 4,000 euros for private individuals and 40,000 euros for companies.</p>
<p>Hong Kong <b>28 DAYS LICENCING</b></p>	<p>Under Hong Kong law, letting property as short-term lodgings for a period less than 28 days without a licence is illegal.</p> <p>The government bill proposes maximum fines be increased from HK\$200,000 to HK\$500,000 and prison terms lengthened from two to three years.</p> <p>The city’s Hotel and Guesthouse Accommodation Authority would also be empowered to apply for search warrants to break into and raid flats suspected of being unlicensed holiday rentals.</p>
<p>Barcelona <b>LICENCED/REGISTERED TAXATION HEAVY ENFORCEMENT &amp; FINES</b></p>	<p>A city-approved license is required, or face a court case potentially leading to a substantial fine. Short term rental in high tourist areas is not permitted under this licence. The city has stopped issuing licences and many existing licences in the most heavily toured areas will not be renewed when they expire. In <a href="#">Barcelona</a>, it used to cost €250 (£221) for a short-term rental permit. Now that such permits are no longer being issued, they change hands for up to €80,000.</p> <p>On June 1, Airbnb and the city launched a new agreement that gives Barcelona officials access to data about what’s being listed around town. Barcelona has also built a 100-man enforcement squad to track down unregistered Airbnb hosts, and fined Airbnb €600,000 last year.</p> <p>Last year, the city’s new tourism plan stipulated that vacation apartments must pay the highest rate of property tax. And since last summer, investigations by the city have already led to 1,500 unlicensed apartments being de-listed.</p>

<p>Berlin 90 DAYS LICENCING/ REGISTRATION</p>	<p>Berlin, which all but banned the service in 2016, <a href="#">reopened its market</a> in March with a 90-day annual cap on short-term rentals. Landlords will be able to apply for permits to rent a primary residence for unlimited periods and second homes for 90 days. Landlords seeking to rent out their home will only be allowed to do so if they get a general permit from their borough, even if they intend only to rent their property out for occasional short stays. Maximum penalty for breaking the rules has been multiplied by five, to a potential fine of €500,000 (\$617,000).</p>
<p>Greece REGISTRATION TAXATION</p>	<p>Greece has launched an Independent Authority for Public Revenue (AADE), an electronic registry for property owners leasing their homes for short-term accommodation purposes via online sharing platforms (<a href="http://www.aade.gr">www.aade.gr</a>). Properties/separate rooms must be listed and declared individually. By law, operators must enrol on the registry. A new law passed by Parliament in late December requires that property owners who use digital platforms to lease accommodation to tourists for short periods pay up to 45 percent in tax on their income, with the purpose of boosting state funds</p>
<p>Japan 180 DAYS REGISTRATION LICENCING</p>	<p>A law regulating the industry was introduced in June 2018, meaning owners (housing accommodation business operators), managers and brokerage site operators can rent out rooms up to 180-days, and are required to confirm the identities of their guests and register their rental properties with national and local governments. Licensing is administered at a local level. The penalty for breaking the law is one million yen and the government is authorised to inspect properties for illegal public housing. Some municipalities impose further restrictions, such as only allowing home-sharing on the weekends or during seasons.</p>
<p>San Diego *REPEALED, UNDER DEBATE* 30 DAYS LICENCING</p>	<p>The City Council brought in short-term rental regulations which would restrict short-term rentals to a primary residence only (up to 6 months a year, and requiring an annual permit costing \$949) and outlaw the rental of second homes for stays under 30 days. Three-night minimum stays were also introduced for saturated coastal areas and downtown. However, these restrictions were repealed in October and the Council continues to debate who can rent out homes for periods of less than 30 days.</p>
<p>Columbus LICENCING</p>	<p><a href="#">Council</a> passed an ordinance requiring short-term property hosts to: complete licensing and background checks; list emergency contacts for neighbours; have proper insurance, smoke detectors, fire extinguishers and an exit escape plan; purchase a business licence which must be renewed annually; and pay additional taxes and fees for administration of licences, background checks, as well as gross receipts tax. Violation of any codes results in a \$500 fine in the first instance, \$750 for a second, and \$1000 for a third violation within the preceding months 12 months.</p>

<p>South Portland, Maine  <b>BANNED (spare rooms are not banned, &amp; up to 14 days while on vacation is allowed)</b>  <b>PRIMARY RESIDENCE ONLY LICENCING</b></p>	<p>New rules require that all short-term rentals are inspected, insured and <a href="#">licensed</a> by the city.          There is a ban on un-hosted or non-owner-occupied rentals. There is a requirement that owners live in the homes that they rent to short-term visitors. However, single-family homeowners are limited to renting their homes for up to 14 days a year while they are on vacation.          These regulations were approved by a public referendum of South Portland residents. The vote was 6,375 to 5,378.</p>
<p>Norway  <b>*PROPOSED*</b>  <b>90 DAYS</b></p>	<p>Norway wants to limit owners to renting out their apartments through services like Airbnb for <a href="#">90 days</a>.</p>

## Appendix 2: Regulations on Hotels not applied to Commercial-Residential Accommodation

Development Applications	These are undertaken at considerable expense. In Sydney, it takes 51 weeks to obtain a one-stage approval and 87 weeks to get a two-stage approval. A stage two approval has direct regulatory costs of \$450,000, total regulatory costs of \$2 million and site holding costs of \$2.5 million.																
Building Code of Australia (fire safety)	Hotels are subject to extensive fire safety requirements prescribed by the Code.																
<i>Environment Planning and Assessment Act 1979 and Regulation (NSW) (fire safety)</i>	<p>Class 3 buildings (hotels) are subject to regular council fire safety inspections.</p> <p>Submit fire safety certificates, annual statements and comply with a safety schedule. Requirements can include emergency lighting, exit signs, fire doors, fire hydrant systems, sprinklers, and display orders showing exits and fire safety equipment.</p> <p>Hotels have stringent requirements for smoke alarms.</p>																
<i>Disability (Access to Premises - Buildings) Standards 2010 (Cth) (room ratio requirements)</i>	<p>In addition to making common areas accessible, the Premises Standards impose a number of access requirements on hotels, including the requirement that a proportion of rooms and facilities cater to disabled guests. The requirements are as follows:</p> <table data-bbox="724 1218 1331 1823"> <tr> <td>1 to 10 rooms</td> <td>1 accessible room</td> </tr> <tr> <td>11 to 40 rooms</td> <td>2 accessible rooms</td> </tr> <tr> <td>41 to 60 rooms</td> <td>3 accessible rooms</td> </tr> <tr> <td>61 to 80 rooms</td> <td>4 accessible rooms</td> </tr> <tr> <td>81 to 100 rooms</td> <td>5 accessible rooms</td> </tr> <tr> <td>101 to 200 rooms</td> <td>5 accessible rooms plus 1 for every 25 rooms or part thereof in excess of 100</td> </tr> <tr> <td>201 to 500 rooms</td> <td>9 accessible rooms plus 1 for every 30 rooms or part thereof in excess of 200</td> </tr> <tr> <td>More than 500 rooms</td> <td>19 accessible rooms plus 1 for every 50 rooms or part thereof in excess of 500</td> </tr> </table>	1 to 10 rooms	1 accessible room	11 to 40 rooms	2 accessible rooms	41 to 60 rooms	3 accessible rooms	61 to 80 rooms	4 accessible rooms	81 to 100 rooms	5 accessible rooms	101 to 200 rooms	5 accessible rooms plus 1 for every 25 rooms or part thereof in excess of 100	201 to 500 rooms	9 accessible rooms plus 1 for every 30 rooms or part thereof in excess of 200	More than 500 rooms	19 accessible rooms plus 1 for every 50 rooms or part thereof in excess of 500
1 to 10 rooms	1 accessible room																
11 to 40 rooms	2 accessible rooms																
41 to 60 rooms	3 accessible rooms																
61 to 80 rooms	4 accessible rooms																
81 to 100 rooms	5 accessible rooms																
101 to 200 rooms	5 accessible rooms plus 1 for every 25 rooms or part thereof in excess of 100																
201 to 500 rooms	9 accessible rooms plus 1 for every 30 rooms or part thereof in excess of 200																
More than 500 rooms	19 accessible rooms plus 1 for every 50 rooms or part thereof in excess of 500																
<i>Liquor Act 2007 &amp; Liquor Act Regulation (NSW)</i>	<p>In order to serve alcohol, hotels are required to obtain a hotel or on-premises licence. Requirements include:</p> <ul style="list-style-type: none"> <li>- Rigorous 'community impact statement' process undertaken</li> <li>- Signage and record keeping requirements</li> </ul>																

	<ul style="list-style-type: none"> <li>- Trading hour restrictions</li> <li>- Staff must be trained in RSA</li> <li>- Compliance with licence conditions</li> <li>- Payment of an annual risk-based licence fee + trading hour loading (up to \$5550)</li> </ul>
<i>Smoke Free Environment Act 2000 and Regulation (NSW)</i>	<p>Restrictions include:</p> <ul style="list-style-type: none"> <li>- Indoor smoking ban (guests cannot smoke in rooms)</li> <li>- Smoking not permitted in 'commercial outdoor dining areas'</li> <li>- Smoking not permitted within 4 metres of 'pedestrian access points'</li> </ul>
<i>Food Act 2003 (NSW); Australian New Zealand Food Standards Code</i>	<p>Hotels operating restaurants and cafes need to:</p> <ul style="list-style-type: none"> <li>- Register with council</li> <li>- Appoint a trained food safety supervisor</li> <li>- Comply with the Food Standards Code</li> <li>- Are subject to regular council inspections.</li> </ul>
<i>Innkeepers Act 1968 (NSW)</i>	Sets out signage requirements and the liabilities of 'innkeepers'.
<i>Privacy Act 1988 (Cth)</i>	Requirement to adopt a privacy policy and abide by the Australian Privacy Principles. As employers, hotels are also subject to the <i>Workplace Surveillance Act 2005 (NSW)</i> which provides privacy protections.
Employment Laws	Mandatory.
<i>Work Health and Safety Act and Regulation (NSW)</i>	Mandatory.
Compulsory Contributions to Employee's Superannuation	Mandatory.
Workers Compensation Insurance	Under NSW workers compensation legislation, every employer is required to have workers compensation insurance.
Public Liability Insurance	Contractual arrangements often specify a required minimum amount. Most hotels take out insurance to the value of \$20 million.
Payroll tax	Mandatory
Company tax	Mandatory.
GST	GST is payable on all bookings and services.
Council (business) rates	Hotels in Sydney's CBD have reported council fees of \$140,000 per year.
Other commercial fees and charges	For example, these include trade waste charges.

Dear Sir/Madam

### **Tweed Shire Council submission to the State Government Short term Rental Accommodation Planning Framework (Policy, Regulation, Code of Conduct)**

Tweed Shire Council (TSC) has played an active role in the State Government's development and consultation on a short term rental accommodation (STRA) policy framework for NSW, having made submissions previously and been engaged through the STRA council and industry workshop sessions.

TSC welcomes the opportunity to make a submission on the draft policy framework. Our submission is focussed on the exhibited material as well as providing some local Tweed Shire STRA context.

It is noted that our submission will be lodged by the closing date of 11 September, however, in accordance with the extension granted by email of 28 August 2019, a formal submission endorsed by Council will follow after their meeting of 19 September 2019. It is noted the submission may vary following Council's review.

Exhibited material includes:

1. Short-term Rental Accommodation: A new regulatory framework Discussion paper
2. Draft Code of Conduct for the Short-term Rental Accommodation Industry
3. Draft Fair Trading Amendment (Code of Conduct for Short-term Rental Accommodation Industry) Regulation 2019
4. Draft State Environmental Planning Policy (Short-term Rental Accommodation) 2019
5. Draft Environmental Planning and Assessment (Short-term Rental Accommodation) Regulation 2019 and accompanying 'Short-term Rental Fire Safety Standard'.

### **Tweed Shire Council STRA context**

Council has been providing a degree of flexibility and considering applications, which appear to be STRA, as a *serviced apartment* under the Tweed Local Environmental Plans (LEPs).

Notwithstanding a limited number of applications, the number of STRA listings has increased significantly. Whilst the following figures relate specifically to the short term rental platform AirBnB, it is noted that this is only one provider of many on the STRA market. AirBnB is referred to as there is a tracking website which provides basic numerical data. As such the figures are not provided to be a complete picture, rather to provide an indication of trends.

	October 2017	October 2018 (at the time of our previous submission)	02/09/19
Total listings Tweed Shire	369	1,091	1,202
5 being for entire home/apartment	70%	80.1%	82.2%
% being multiple listings	N/A	44.4%	48.1%
Total listings Northern Rivers	2,350	5,114	5,388

Source: <http://insideairbnb.com/>

Multiple listings are growing, indicating a trend of STRA as a business, rather than home sharing activity as it is described.

Over two years these figures represent an increase of 225% in listings within Tweed Shire. Currently 22% of the Air BnB listings are within Tweed Shire (15% in 2017), second only to Byron Shire.

As a percentage of the Northern Rivers, Tweed Shire listings are growing, a trend which is likely to continue as neighbouring Byron Shire moves to restrict short term rental accommodation.

Compliance with legislative requirements, basic amenity requirements and unauthorised STRA is having a significantly increasing impact on TSC resources. Compliance is one of our key concerns and a key focus of the TSC submission.

### **Draft State Environmental Planning Policy (Short-term Rental Accommodation) 2019**

#### Rural Workers Dwellings and Clause 9 General requirements for exempt development

Under the policy framework, STRA will be exempt development within a range of residential dwelling types, including a lawful rural workers dwelling, under the definition of *short term rental accommodation*.

Dwellings approved for rural worker's purposes are approved for a specific use and the occupants of such a dwelling are also a specific category, being a rural worker.

It is not considered appropriate that the provisions of the SEPP (STRA) 2019 override this specific dwelling type and its use as originally intended, ie. to allow accommodation provision for rural workers. How is it proposed to maintain the use as a workers dwelling if the owner can use it for short term rental accommodation?

Clause 9(2) (b) of the draft SEPP excludes certain categories of land uses from the exempt provisions it would seem logical that *rural workers dwellings* would be included in this excluded list.

### **Recommendation**

*Rural Workers dwelling be added to the list in Clause 9(2)(b) along with the other specific use dwelling types.*

### Clause 14 Requirements for complying development on flood control lots

The intent of the clause appears to be to consider risk from events exceeding design flood level through consideration of evacuation, isolation and refuge, which is to be commended and is supported. However, the wording of the clause is confusing and is considered to require clarification, as follows:

*Clause 14(2)(a) the lot must have pedestrian and vehicular access to a readily accessible refuge at a level equal to or higher than the lowest habitable floor level of the dwelling house,*

1. What defines a "refuge" and what flood immunity must it have?
2. What has to have a "level equal to or higher than the lowest habitable floor level of the dwelling house"? Does this apply to the access route or the refuge?
3. Why is "lowest habitable floor level" used? What if the house has an old, "deemed approved", habitable level (or basement) with very low flood immunity? This would set the bar very low and is of concern.

*Clause 14 (2)(b) vehicular access to the dwelling house will not be inundated by water to a level of more than 0.3m during a 1:100 ARI (average recurrent interval) flood event.*

1. How far does the "vehicular access to the dwelling house" go? To the end of the driveway, to the "refuge" area, or other?
2. The selection of "a level of more than 0.3m during a 1:100 ARI flood event" is unusual and would make assessment ambiguous due to the finely detailed investigation required.
3. "a level of more than 0.3m during a 1:100 ARI flood event" could also be considered by some as contrary to the NSW SES position of "if its flooded, forget it (don't drive through flooded roads) as it seems to suggest driving through 300mm of flood water is acceptable.
4. "a level of more than 0.3m during a 1:100 ARI flood event" is an over simplistic threshold. For example what if that 300mm of flood water is high flow hazard, such as flowing a 1 metre per second? This is then not considered safe.

Whilst Council supports the inclusion of a clause that considers evacuation, isolation and risk from events greater than 1% AEP, we suggest that the wording of the current clause 14(2) be revisited in consultation with DPIE flooding specialists.

### **Recommendation**

*The wording of Clause 14 (2) be clarified to address the above concern in consultation with DPIE flooding specialists.*

### **BCA accessibility requirements**

The SEPP is silent on accessibility requirements. The BCA requires accessibility to be provided to certain Class 1b, 2 and 3 buildings and to be considered at the time of construction. It is recommended the draft SEPP address the accessibility requirements.

### **Recommendation**

*It is recommended the draft SEPP also address the BCA accessibility requirements.*

## **Draft Environmental Planning and Assessment (Short-term Rental Accommodation) Regulation 2019 Division 7D and accompanying 'Short-term Rental Fire Safety Standard'**

### **Bush Fire**

The intent of the fire safety provisions is to be commended and is supported. However, the wording of the provisions is confusing and is considered to require clarification, as follows:

A building is to comply with *Planning for Bushfire Protection (PFBP)* and is restricted from applying to BAL 40 and the flame zone (FZ), as follows:

Under Division 3 Clause 13 (d) a dwelling cannot be complying development and non-hosted STRA where:

- (d) *the dwelling is situated on bushfire prone land, and*
- (e) *no part of the lot on which the dwelling is situated is bushfire attack level -40 (BAL-40) or in the flame zone (BAL\_FZ), and*
- (f) *the dwelling complies with the requirement of Planning for Bush Fire Protection (ISBN 0 9751033 2 6) published by the NSW Rural Fire Service in December 20061, and...*

	Hosted	Non Hosted
New dwellings constructed after PFBP	NA	To comply
Existing dwelling constructed prior to PFBP		Unsure if building is to be retro fitted to comply with determined BAL / amber protection upgraded / Exempt from requirement if constructed prior to PFBP

1. How is it determined if a part of a lot the dwelling is located on is BAL – 40 or BAL - FZ, when a BAL is assessed in relation to the location of a dwelling on the lot? Currently under the SEPP Exempt and Complying Development Code this would relate to the dwelling rather than lot.
2. Who determines the BAL where not already applied at Development Approval stage of the Dwelling and at what stage, as a prerequisite or as part of the CDC application? Currently a Pre Requisite BAL Certificate is required before lodging a CDC to support the dwelling design.
3. Where a house is constructed prior to Planning for Bushfire Protection 2006, it is unclear if it is required to be retrospectively upgraded to comply with today's requirements / ember protection or exempt?

### **Recommendation**

*The wording of Clause 13 be clarified to address the above concern in consultation with bush fire specialists.*

### Fire Safety provisions

The Standard sets out different requirements for different classes of buildings consistent with the BCA. These are realistic, however, the fire standards should be included in the SEPP STRA as development standards.

### Swimming pool safety

Where STRA is proposed (either exempt or complying) at a property that has a pool, it should be made clear that the owner would be required to re-register the pool on the NSW Government's swimming pool Register as Short Stay Tourist Accommodation.

It is recommended that this be included as a development standard, and require a copy of the Swimming Pool Certificate of Registration and a copy of current Swimming Pool Safety Certificate or Occupation Certificate for the pool (where obtained within 3 years) be provided with the STRA registration.

### **Recommendation**

*The Draft State Environmental Planning Policy (Short-term Rental Accommodation) 2019 include development standards requiring the registration and certification of any pool in association with STRA.*

### Where STRA is neither exempt or complying development

The SEPP makes provision for most STRA as exempt development. STRA can also be complying development where the conditions for bushfire or flooding can be met. However when these conditions cannot be met there is no clarity regarding whether a development application can be lodged. If a DA can be lodged, currently this only be under the definition of *serviced apartment*, and in zones where this use is permitted as the definition resides in the SEPP and not the local environmental plan (LEP).

Clarity is sought as to whether this is the intent of the STRA legislative framework.

### **Recommendation**

*Clarity be provided regrading development which does not meet either the exempt or complying conditions.*

## **Draft Fair Trading Amendment (Code of Conduct for Short-term Rental Accommodation Industry) Regulation 2019**

### Clarification of compliance responsibilities

Councils should be briefed on what resources the Department of Fair Trading will be allocated to carry out the regulation and administration of the *Code of Conduct* and the process for the community and councils for referring those complaint.

Given that the draft Code deals with noise and other amenity complaints, which generate a high level of complaints requiring a swift response, how does the Department intend to deal with such complaints? For example will there be an “on ground” response and a local presence for complaints handling and investigation?

## **Draft Code of Conduct for the Short-term Rental Accommodation Industry**

### Draft Code of Conduct

Minor drafting error to Clause 6.1.9 which refers to Clause 6.3.8, which does not exist. Suggest this reference should be to Clause 6.1.8.

### Inconsistencies within the Draft Code of Conduct regarding compliance matters

The *Draft Code of Conduct* defines *planning laws* yet in section 6.2.4 it refers to two other Acts that are not part of the *planning laws* definition.

Our understanding of this structure is that a complaint has to be based on planning law which is confined to the Act and Regulations and LEP, ie that a dwelling is lawful, permissible and compliant with these policies.

The *Protection of the Environment Operations Act* and the *Protection of the Environment Operations (Noise Control) Regulation* are the primary pieces of legislation in NSW to manage noise pollution. This legislation and the Draft SEPP do not currently identify the appropriate regulatory authority (ARA) for STRA. Specific regulatory tools under the legislation do not currently exist.

A registration system through State Government is proposed to help manage noise and anti-social behaviour associated with STRA, with a ‘two strikes and you’re out’ arrangement for guests. Such a regulatory framework is supported by Council.

However, given that “planning laws” do not deal with noise, parking or other amenity complaints, it is unclear how these will be dealt with. The Code at Section 5.5.2 deals with noise, however, the following should be clarified:

It is not clear at Clause 5.4.8 and Clause 5.5.2 *Obligation to Neighbours* what is meant by *neighbour, other occupants of the premises and any immediately adjoining premises*. Is neighbour confined to the adjoining unit in a building?

The Code should explain who the Code is recognising in terms of the *Obligation to Neighbours*. For example, does the Obligation extend to someone two or three doors away, who may also be affected? This is critical to understanding compliance because the Code only recognises *contravention of the Code*.

Why reference immediately adjoining premises when neighbour is also used? It seems to read there are two groups that are covered by the Code: 1. neighbours and other occupants of the premises; and 2. any adjoining premises.

Notwithstanding, this does not address a neighbour across the road, someone two doors up, or where there is a park or reserve in between. These neighbours may also be subject to noise and amenity Impacts.

Similarly, anti-social behaviour in the community is generally investigated and responded to by the local police. The Code should clearly identify responsibilities regarding anti-social behaviour associated with STRA, and clarify this for all stakeholders.

### ***Recommendations***

*The draft Code of Conduct be amended to clarify the terms neighbour, other occupants of the premises and any immediately adjoining premises and how compliance is to be managed for these people.*

*The Code should articulate the appropriate regulatory authority roles and responsibilities for noise impacts.*

*The Code should articulate the appropriate regulatory authority roles and responsibilities with respect of anti-social behaviour.*

### **Additional comments**

1. The Code should provide discussion about how breaches of the planning framework (councils) lead to disciplinary action under the Code of Conduct.
2. The Code should clarify what disciplinary action, if any, can be taken against an internationally registered booking platform or letting agent.
3. There does not appear to be any discussion about how will the industry-managed register validates compliance with day limits (where they apply) and how the register information will be available for councils. Without this information managing compliance by councils is virtually impossible.
4. While an Exclusion Register will provide details of a premise or host, and discusses disciplinary action, there does not appear to be any discussion about how use of the property outside the STRA market (registered 'booking platforms'

and 'letting agents') will be enforced? For example a property owner entering into privately arranged letting.

5. There are a diverse range of booking platforms and letting agents; how will the listing of a property be made available to all platforms and agencies and kept-up-to date and to ensure compliance with day limits (where they apply)?
6. A procedure needs to be established in Council which could ensure that all complaints received by Council regarding STRA are automatically forwarded to NSW Fair Trading.
7. There is no advice about how complaints referred to Fair Trading will be responded to and what if any feedback will be provided to councils.
8. Making information relating to the Exclusion Register publicly searchable online may breach privacy rights of landowners; however, if all booking platforms and agents have access, then a property should not come up as being available for rental purposes if listed on the Exclusion Register, thereby avoiding the need for publicly searchable information.
9. A mandatory STRA registration system will provide the necessary transparency, but does not appear to provide the framework under which the 'industry' will fund, develop and administer it. Is it proposes to establish a whole-of-industry representative organisation?

### **Discussion Paper**

1. There appears to be no firm commitment from the government at this time to whether a register will be developed (p 18 of Discussion Paper).
2. While the Discussion Paper asks if a separate penalty should be applied for not registering, it would have been assumed that all properties listed on platforms and through agents would automatically be registered so the need for penalties for not registering would only apply to those platforms and agents, and those individuals who choose to let property privately.
3. It should be an obligation of the host to ensure that the property is on the register.
4. Any property which reaches its day limit (where they apply) should automatically be listed as not available until commencement of the next 12 month cycle.
5. There is no discussion about how the 12 month cycle will be established, but it is assumed to apply from the first day of listing, or should this be from first rental? This needs to be confirmed in legislation.

### **Monitoring and associated impacts**

Government policy, the Low Rise Medium Density Housing Code (LRMDHC) is seeking to increase residential density and diversity across all residential zones, which will have a significant long-term impact on the very structure and function of residential land.

The STRA framework provides an attractive incentive to the commercialisation of dwellings, especially in strong tourism areas such as the Tweed Shire. Concern is raised that the increase of low rise medium density housing is attractive to the STRA market by its nature of smaller, lower maintenance properties. Council is concerned that a significant percentage of the dwellings arising from the LRMDHC, intended to provide greater housing diversity and affordability will likely be used for STRA thereby reducing the intended diversity of housing from the permanent rental market and potentially increasing rental prices.

While the SEPP provides for a review as soon as possible after the first anniversary of commencement of the Policy, and the Discussion Paper identifies points for consideration in any review, it will be essential for the impact of the Policy to be assessed against impacts on long-stay rental availability and affordability.

### **Recommendations**

*The SEPP review of the STRA should consider the take up rates and impacts of STRA on the permanent rental market availability and affordability over the longer term.*

*That councils be consulted during the review of the STRA to provide local knowledge and feedback on its effectiveness, compliance matters, and impacts on our local communities.*

*That the review findings be available to councils and publicly.*

Yours faithfully

Re: SHORT-TERM RENTAL ACCOMMODATION A new regulatory  
framework – Call for feedback

Thank you for the opportunity to comment on the proposed new regulatory framework for Short-Term rental accommodation in NSW. As urban planning and housing researchers, we have been examining the rise of online platforms for short-term rental accommodation and the implications for housing markets, cities and local communities over a number of years.

A recent summary of these issues as they have arisen in Australia and internationally, including links to international research, was presented by Prof. Gurrán at a forum organised by the UK Collaborative Centre for Housing Evidence (CACHE) in July 2019, attended by the Scottish Government and Dublin City Council and can be accessed here:

<https://housingevidence.ac.uk/global-home-sharing-local-housing-markets-and-neighbourhoods/> .

We focus our remarks in this submission on what we see as the main areas of concern with the proposed regulatory framework.

**Impacts of short-term rental accommodation on housing supply and rental affordability**

Overall, we are surprised that the proposed framework neither acknowledges or addresses the fundamental housing market risks arising from the conversion of residential units to short-term rental accommodation.

A growing number of [studies](#) throughout the world are [demonstrating](#) that [removing housing](#) units exacerbates problems with [rental supply](#). The research evidence on this point has grown significantly since the first round of consultation around the regulation of short-term rental accommodation in NSW.

Whilst vacancy rates in Sydney currently are high enough to lose additional rental supply without putting upward pressure on rents (over 3%) during most of the period between 2010 and 2018 vacancy rates were [less than 2 percent](#). This means that losses of housing supply to short term rentals would be placing upward pressure on Sydney rents. Given the high costs of renting in Sydney, this can have a significant impact on the rental stress levels of moderate and lower income households.

Further, encouraging new housing supply has been one of the government's major policy platforms for addressing Sydney's affordability pressures. Yet for this strategy to work, landlords need to begin discounting rents, in response to increased supply. The short-term rental market provides an alternative to discounting, potentially undermining the supply strategy. For instance, in the City of Sydney there were around 1,900 new dwellings completed between 2016/17, but a total of 5,675 listings on Airbnb. Of these, 1,552 were whole units which appeared to be permanently offered as short-term rental accommodation (equivalent to 81% of the City's new housing units in that year).

Further, we note the irony that secondary dwellings are permitted as code assessable development under the *State Environmental Planning Policy (SEPP) Affordable Rental Housing 2009*, but under the proposed short-term rental regulatory framework, will be able to be used as a form of tourist accommodation – a use neither anticipated or assessed when the *Affordable Rental Housing SEPP* was enacted.

Notably, concern to protect permanent housing stock underpins many of the attempts made by cities throughout the world to regulate or prevent the listing of residential homes on platforms such as Airbnb. Typically, hosted accommodation, and short term sharing of **a principle place of residence** is permitted up to a

threshold number of days and guests – for instance 90 days and a single group of up to 6 guests<sup>1</sup>.

In contrast to this international practice, the proposed regulatory package for NSW stands out as unusual in its latitude.

We see a very high risk that permanent housing units in high demand locations will be converted to short term accommodation – serving visitor needs but exacerbating housing affordability pressures and rental shortages. Further, we are concerned that the precarious private rental sector will be further eroded by the introduction of a quasi three week lease, due to the proposed exception granted for stays of 21 days or more.

### **Impacts on residential buildings and neighbourhoods**

We note that the discussion paper and some of the proposed reforms recognise and attempt to address the concerns of neighbours. Tourist accommodation within residential settings presents a significant risk of land use conflict, which is why it has traditionally been regulated via land use zoning or other controls – such as the short-term rental controls contained in the 15 Local Environmental Plans (LEPs) which will be deleted by the proposed SEPP. Even though holiday rentals and second homes have long been an important part of the fabric of coastal and high amenity inland communities in NSW, these local authorities have seen the need for a regulatory framework to manage potential impacts on permanent residents. We are of the view that it would be more prudent to preserve these controls pending the trial period for the STRA SEPP.

Our research shows that the main impacts for neighbouring residents arise from large groups of friends or extended families (who typically seek out large properties to hold parties and significant events). Similar problems are associated with poorly managed homes where the ‘host’ does not have a local presence or

---

manager, and when the character of a building or neighbourhood changes from primarily residential in character to one characterised by transient visitors.

In the latter case, the sense of alienation and anxiety associated with a continual churn of newcomers and the lost opportunities to know one's neighbours, are recognised in the international research literature on 'touristification' – a phenomenon that is now known to arise very rapidly with the introduction of online platforms for short-term rentals.<sup>2</sup>

We are of the view that the maximum numbers of occupants anticipated by the draft SEPP – up to 12 'hosted' guests – will enable de facto backpacker accommodation to enter the residential sector; while 12 guests in an un-hosted property presents a very high risk of neighbour disturbances.

### **Comments in response to discussion paper prompts**

In the sections below, we structure our specific comments in response to the relevant consultation prompts outlined in the discussion paper.

1. What is your view on the form of and provisions in the STRA SEPP, Regulation and Safety Standard?

The provisions of the STRA SEPP do not, in our view, provide a sufficient basis for managing risks presented by residential style tourism accommodation within high demand markets such as Sydney.

The proposed threshold of 180 days for un-hosted properties in Sydney and in nominated non metropolitan local government areas, is not sufficient to preserve permanent housing units. Within the 180 day period, a home could be rented for every weekend as well as during peak Christmas and Easter periods, for all intents and purposes changing from a permanent residence to tourist accommodation.

---

<sup>2</sup> See, for instance, Sequera, J., & Nofre, J. (2018). Shaken, not stirred. *City*, 22(5-6), 843-855, for a recent account – we are happy to supply a copy.

Further, the proposed exception for stays of 21 days or more, while intended to support the ‘mobile workforce’ has the perverse effect of further eroding the precarious private rental sector.

As noted above, the proposed maximum number of occupants – up to 12 guests in hosted or un-hosted accommodation, while subject to a cap of 2 occupants per bedroom, introduces a real risk that backpacker style accommodation and/or ‘party houses’ will continue to emerge in residential areas and buildings. This is particularly so in locations likely to be attractive to tourists – such as beach side suburbs, inner city areas, and rural fringe locations, where neighbours may be subject to persistent disturbance and anxiety associated with an ongoing churn of short-term visitors.

It is difficult to introduce a statewide regulation for managing these risks, which emerge differently in different housing and tourism markets. For this reason, we suggest trialling certain measures of the proposed SEPP (such as those relating to whole home rentals and hosted accommodation of more than 4 guests) only in localities that do not already have existing LEP provisions for short-term rentals in place. A further strengthening of the SEPP could limit the exemption to primary residences only. This would enable genuine home sharing; while protecting residential homes and neighbourhoods. Further, this approach would help prevent the loss of permanent housing units and guard against the problems arising from absent / anonymous ‘hosts’.

2. Are there any elements of the draft instrument that are open to misinterpretation or require further clarification?

It is not clear to us whether the SEPP would have the effect of introducing existing use rights in areas where short-term rental accommodation is currently subject to a regulatory framework, and whether this will have implications for possible revisions to the regulation following the review period.

We were unable to find a reference to a register of short-term rental accommodation, or an exclusion register, in the draft SEPP. We suggest making inclusion in any such register a mandatory requirement for exempt and complying short-term rental accommodation.

3. What are your views on new policy elements relating to days, flood control lots and bushfire prone land?

We have outlined our views about the number of days above. In short, if the intention of a 180 day restriction is to preserve residential housing from conversion to tourist accommodation, the threshold is insufficient.

We are supportive of the basic provisions in relation to flood and fire risk.

31. Should industry be required to report registration information, including number of stays (days), to Government and/or local councils? If so, how frequently? Why?

Mandatory reporting via a shared, openly accessible platform/ register is essential for local compliance officers and or police, who are most often the front line when issues arise. This data is also necessary to monitor impacts on housing supply and affordability over the long term.

32. Should any information on the register be made publicly available? If so, what information could be made available and why?

Aggregate data at sub-LGA level should be made publicly available for monitoring and planning purposes. Real time data would be helpful for local government to monitor seasonal trends in visitor populations and to inform tourism planning and management.

36. What data sources could the NSW Government use to inform the review? How can industry and councils assist with data collection for the review?

The review should include an assessment of housing market impacts – tracking rental vacancies and ‘churn’ as well as rental trends by postcode and LGA. The Rental Bond Board should supply this data.

A twelve month period is insufficient to determine housing and neighbourhood impacts – following the establishment of the register by industry, to establish baseline data on the stock of short-term rentals, ongoing monitoring is required to observe growth and change in the sector, and any associated impacts.

Please feel free to contact us with any questions and or to supply any of the references in our own or others' research.

Yours sincerely,

Professor Nicole Gurran

# Support.... REGIONAL NSW

SCRAP the CAP of 12 guests  
in the DRAFT Short-Term Rental Accommodation Bill

# SHORT-TERM RENTAL CAP OF 12 GUESTS

= **ECONOMIC LOSS over**  
**\$565,200,000.00 pA**

- For us:
  - Unsustainable to keep our small farm
  - We may need to Sell our farm
  - A Loss of direct local jobs x 4
  - Loss of indirect jobs in community
  - Hundreds of thousands of \$ in the community lost
  - Average guest size 30 with no where to stay as hotels are not an option for family reunions, schools, etc
- For REGIONAL NSW
- \$565,200,000.00 lost in the economy pA If 20 guests is an average for these >12 guest homes
- \$367,380,000.00 per year lost that's if 1000 homes affected x 13 guests (reality is many rural homes have 20-40 guests) x \$157 spend per person x 180 days of rental.
- = Loss of thousands of direct and indirect jobs affected in NSW
- =- Devastation for farmers relying on tourism

# We should REMOVE cap on guests No's for Regional NSW

## TRUE or FALSE?

DRAFT: State Environment Planning Policy (Short-term Rental Accommodation) 2019

Part 3, Division 1, 11 Exempt Development (b) the number of persons residing in the dwelling at any one time does not exceed ---

(i) 2 person for each bedroom in the dwelling, or

(ii) 12 persons in total for the dwelling,

Whichever is the lesser

## SCRAP the CAP

*How many Regional families/homes will a cap of 12 guests affect?*

1. 1-50 homes, or
2. 50-100 families, or
3. 100-200 homes, or
4. 500 – 2000 affected?

**SCRAP the CAP**

families, farmers, pensioners, regional homes may  
cease to exist

How many in Regional NSW will be affected by a cap of guests for short term rentals?

**500 – 2000 families, pensioner, farmers**

A very quick search of rental sites found 500-2000 homes available for rent for >12 guests.....

**Does NSW Gov't intentionally & WILLINGLY want to WIPE OUT**

**Hundreds or thousands of families, their income, their homes ?**

**FARMERS need backup income in drought for tourism  
1<sup>st</sup> the drought hits Regional NSW BUT**

**2<sup>nd</sup> the NSW Gov't wipes out Regional NSW ?**

# Why a cap at 12 guests?

- A. Maybe to protect public? But SCRAP the CAP and enforce Fire Certificate requirements and/or set min safeguards in a regulation
- B. Maybe to protect the neighbours? SCRAP the CAP and keep enforcement for breaches by guests or hosts as drafted irrespective of cap all guests and all hosts should do the right thing
- C. Maybe to protect hotels/motels? SCRAP the CAP as this NSW Gov't should protect Regional NSW and families. Allow >12 guests to the regions in groups, as families, as corporates, as schools, etc to support Regional NSW
- D. Maybe to allow Councils to oversee? Except State Gov't supports Regional NSW and it cannot defer to the zoning limits or instability of Councils when NSW leads development and Regional support and Councils may /may not assist. Why take the risk with NSW jobs and tourism?
- E. All of the above, NSW Gov't leads the way in Regional NSW except in the current draft with a cap of guests. Lead the way and remove the cap to support NSW Regions
