**Submission**

I believe STRA should be restricted and not allowed in r2 zoning. It should only apply if the property owner lives in the property.

An absentee landlord situation often results in a STRA property causing an undesirable living environment for neighbours.

R2 zoning should be residential only.

There should be at least one residential zoning which is free from STRA problems.

**I agree to the above statement**

Yes

**Submission**

My submission is in relation to the proposed restrictions on the number of days when a property in the "Greater Sydney Area" can be let for short stays. The restriction to 180 days per year is, in my opinion, unfair and unreasonable - as is the definition of the "Greater Sydney Area".

Property prices in and around Sydney are the highest in the country. For those who go to the time and expense to set up a property for either long term or short term rentals, the prospect of only being able to recover 50% of the available opportunities to recover those expenses and to obtain any form of income are virtually wiped out. Apart from the initial costs of setting up a property after a long period of residence by the owners, the ongoing expenses

of Land Tax, utilities and maintenance cannot be realistically recovered in only 6 months of the year. It appears to me that the said restriction is a means of keeping the powerful Hotels lobby in line by reducing the amount of competition for large and long standing hotel operators in the Sydney CBD. This type of market manipulation is unfair and unreasonable. Hotels and related accommodation providers should be subject to market demands just like everyone else. If they provide quality products at reasonable prices they will thrive. They should not be openly advantaged in relation to the short stay market because of Government regulation.

In my situation, I had a very large house in which I raised a large family. At the age of 66 I could no longer maintain that property living there on my own. It was essential that I downsize to the security of a home unit. However, as we all know, the housing sale market in Sydney has been dramatically falling for the past 3 years. As a result, I could not sell my property at the time I needed to downsize without taking a drop in price to a figure that would have been acceptable nearly six years ago. I could not afford to do that, and I could not get a permanent rental return to cover my expenses. I had no option but to convert the property to a short stay property. But if I can only recover six months worth of bookings, it makes it an almost impossible proposition to actually make any income from the business - not because of any failing on my part, but only because of an inexplicable Government interference that does not affect the vast majority of the rest of the State. So, the very properties that need the most income to survive are being strangled by the Government's own policies and deterred from surviving.

If the short stay market did not provide a service that the people wanted, it would collapse. That is not the case. The short stay market is growing rapidly only because of market demand.

I could understand the proposed number of day restrictions if applied to the Sydney CBD, but to extend that out to residential suburbs where there are very few other accommodation options is absurd and damaging to the whole of the short stay enterprise and the individuals in those outer Sydney areas like mine, some 8 ks from the CBD but miles from the nearest practicable hotel accommodation.

I urge the government to reconsider this proposed restriction. It is unfair, unreasonable and damaging to the individual owners who, for a variety of reasons particular to the Sydney market and cost of living, want to or NEED to go into the short stay market in order to either earn an income or, like me, preserve a property for the short to mid term. I say that, in principle, it is inherently unjust to apply commercial restrictions to individual portions of the community based on geographic considerations as is the case in this instance. The affect of the limits for owners from Newcastle to Wollongong is to pretty much make is non viable to either begin or continue providing short stay facilities. This may be great news for the major hotel chains, but it does not reflect what the owners and their many many thousands of prospective guest travellers are looking for or wanting as has been proved by the statistics available for the past few years. Government has no business interfering in and distorting the market in this way.

Christine Davitt

**Submission**

1.

The general form and provisions of both the STRA SEPP and the Regulation are much easier to follow than the previous draft and reduce the grey areas. They also allow for more specific control of un-hosted and hosted accommodation.

2.

The new draft clears up a lot of the potential misinterpretation from the old draft. The way the policy is written is

plain English and relatively easy to follow.

3.

One issue I have is how compliance would work with the 21 day bookings not counting toward total days? Will there be a requirement to report the number of days booked etc.? I cannot see an easy way to ensure compliance with the total days, especially when 21 day bookings are likely to make it a more complex equation.

4.

The general obligations for industry participants are fine.

5.

Occupancy days and numbers of occupants are the two obvious choices for reporting. Perhaps general opportunities for feedback from operators on how the code is impacting on their occupancy (eg. do they need to turn away large groups due to restrictions in place by the codes in areas where large groups wouldn't impact on amenity etc.?).

6.

From what I can see obligations for these parties are all reasonable and adequate.

7.

The complaints process is deemed adequate.

8.

Placing a guest on an exclusion register is unlikely to solve any issues as most likely they would be staying within a larger party in which another name could be used for future bookings. I think the strikes policy is likely to make hosts hold guests to a higher standard, making them potentially monitor their guests more closely which is a positive.

9.

Ideally the booking agency would remove or not allow accounts which are related to a person on the exclusion list. With proper identification checks it should not be hard to compare an name on the exclusion list and any account.

10.

The review process is clear and sufficient.

11.

Penalties seem to be reasonable.

12.

Clause 22B(1) captures the end to end property management services.

13.

None

14.

It is appropriate to exclude some uses.

15.

None.

16.

The appeal process is acceptable.

17.

The fee recovery is reasonable.

18.

The amount of properties and their occupancy rates is the appropriate way to proportion costs. This would allow the participants to easily pass on some or all of these costs to hosts etc. at a per property, per night flat rate fee.

19.

The amount is appropriate. Any less and penalties will not be worthwhile.

20-35.

No Answer.

## Exhibition of proposed amendments for short-term rental accommodation

The NSW Department of Planning and Environment is calling for feedback on proposed amendments to planning rules in order to provide for short-term rental accommodation (STRA) in NSW. STRA was formerly known as short-term holiday letting.

Following growth in STRA, the NSW Government investigated policy options to regulate the industry in NSW in consultation with communities, councils and industry. As a result of these investigations, the Minister for Planning and the Minister for Better Regulation and Innovation announced a whole-of-government framework which includes:

- state-wide planning rules
- an industry-wide mandatory Code of Conduct
- changes to strata legislation.

More information on the framework can be found [here](#) or on the Department's [website](#).

An [Explanation of Intended Effect](#) has been prepared outlining the proposed amendments to planning rules and is on exhibition until 16 November 2018. To make a submission, please visit our [website](#).

For more information, please contact us:

- Email: [STHL@planning.nsw.gov.au](mailto:STHL@planning.nsw.gov.au)
- Phone: 1300 305 695

Please find attached Council's submission to the recent exhibition of the short term rental accommodation policy framework.

At its Ordinary Meeting of Council of 25 September 2019 Council resolved as follows:

**MN 458/19**

***MOTION*** moved by Deputy Mayor G M Turland and seconded by Cllr P W Nelson

- 1. *THAT* Council endorse a submission (Attachment 1) to be sent to the Department of Planning, Industry and Environment in relation to the proposed Short Term Rental Accommodation regulatory framework; and**
- 2. *THAT* Council not seek to limit the amount of days an un-hosted Short Term Rental Accommodation activity can occur in the Wingecarribee Shire.**
- 3. *THAT* signage indicating the relevant authority of compliance issues or complaints be placed on the front of the property viewable by the general public.**

***PASSED***

The attached submission included the resolution at 3 above.

**Subject:** RE; Proposed Regulation and Code of Conduct for Airbnb / Highgate, 127 Kent St Millers Point.

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

September 23 2019  
To whom it may concern,

Primarily this is my objection to the proposal that any organization or STRA could by way of a new regulation control or influence the way I live.

I have the right to object as an 81 year old semi-retired Architect, having worked hard all my life and at the age of 73, sold my house and invested in a new way of life, to live in Highgate, 127 Kent St Millers point rather than fill the ranks of people dependent on handouts and or live in a retirement village.

I have extensive experience in the housing industry, including, seeing what happens quite frequently, to property let short term and not under the direct control of the owners or a body corporate. I am happy to furnish details relating to private and government built and controlled properties in NSW and WA.

Now, regarding my home in a well-controlled building, containing approximately 200 apartments, where I have lived during the past five and a half years, I have noticed how difficult it is to mix with ones' neighbours. This is not due to the physical separation but due to the number of new faces encountered and turnover of tenants already accruing under the present strata rules. I live with this and accept this.

I cannot accept however, the proposed dilution of self-control and reduction to the standard of living of my home.

I keep emphasizing that this IS my home. So far I have not complained about the turnover of new residents and rubbing shoulders with their frequent visitors but I do and will resist any additional influx of short term residents that would not be easily controlled and would further dilute the quality of life in this building.

Apart from my personal issues and emotional reaction above, there are a large number practical and financial matters that would be adversely affected by having to accommodate short term residents and their guests. - In my opinion, should this be allowed, this building in its present configuration could not function. Again, I can submit a list of fact-based matters relating to this, not available from other sources.

Apart from the fact that one size does NOT fit all, I do believe that every stratum must have the ability to control its own destiny according to individual needs of each building, and as determined by the majority of the owners and occupants, and local government - of course.

This is as basic as our other hard-won rights in this society and country.

I am sorry, I reject the concept of intrusion and regulation by STRA, and thus, the inevitable, subsequent disruption to our existing carefully crafted and managed individual strata bodies, democratically elected.

Sincerely  
Michael Bures

Dear Sir,

My wife and I have lived in a city high rise strata apartment at 127 Kent St., Millers Point for many years. The vast majority in this building are owner/occupiers and we have enjoyed a warm, cooperative and friendly atmosphere. We are terrified that this building should be opened to short stay rentals and the changes which will result. This would have enormous impact on the staff, amenities and any feeling of some moderating control on behaviour.

When we purchased our apartment there was no indication that this change in the character of the building might occur.

We cannot understand why there is any need to legislate to change the character of a strata building when the great majority of owners oppose the move. We strongly object to this suggestion.

Sincerely,

Vincent and Helen Acton

To whom it may concern.

Dear sir/madam

My home is an apartment in the Highgate building at 127 Kent Street, Millers Point 2000

I have no problem with 3 month rentals but i think that using the building as an hotel as would happen with Air BNB

would spoil the life style of everyone that lives permanently in the City of Sydney.

I think that a building should be able to make it's own decision with a majority democratic vote on whether to opt in or opt out of short term lettings

Your faithfully

K J Moon

2602/127 Kent Street

Millers Point

Dear Sir/madam

As an owner of a unit in the Highgate building, 127 Kent St, Millers Point, NSW 2000 I wish to give my opinion on the proposed regulation on short term letting in this area. AS most of the owners in the Highgate building are owners or 'permanent' tenants a large influx of short term tenants, as would happen with unrestricted Airbnb occupancy, would have an undesirable effect on the quality of their residency as well as adding to the overall cost of living.

I hope issues are considered when legislation is proposed.

yours

Robert Sillar

Dear Sir/Madam,

I am owner of an apartment in Highgate apartments in Kent Street and it has been my home for 22 years and it is where I intended to reside into my retirement. This, and many other, vertical villages provide amenity and security, in large part due to us knowing all residents, on our floor particularly, and being

Also we have grown as a family in Highgate, bringing up our children, just as many others are doing now. Infants and children need a quiet environment and to know other children in the building.

Also, with an aging component as well as young families we enjoy (and pay dearly for) use of swimming pool and gymnasium. This is important for a healthy lifestyle.

I wish to express my alarm at any possibility of the lifestyle is seriously compromised as is being proposed. If our home were to be turned into a hotel building, for the profit of non-residents who lease their apartments for short stay holiday makers it would be a complete travesty.

Michael Hackman  
2410/127 Kent Street  
Miller' Point NSW 2000

**Subject:** STRA Discussion Paper

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Sir/Madam,

I am writing to voice my concern about the possible outcomes of the STRA discussion paper.

As an owner and resident of a unit in a stable and peaceful strata title building, I am concerned that the outcomes may have a large negative effect on quality of life in our residence.

Strata buildings need to be able to determine their own position. The imposition of short term rentals will have a big impact on costs and the peace and serenity of life within the building. The permanent residents need to have a say and vote as to whether short term stays are allowed within a particular building. We have a very good relationship with all tenants in our building. The inclusion of short term rentals will change the dynamic considerably and reduce the harmony that is currently present.

I strongly urge you to consider the wishes of residents to determine their own rules within each strata building.

Yours sincerely,  
Richard Lowder  
Unit 1709/127 Kent St  
Millers Point, NSW 2000

**Subject:** Short Term Letting - Discussion Paper Response

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Sir / Madam,

I am responding to the NSW Government's Discussion Paper and Consultation process in respect of Short Term leasing of properties within NSW.

I am a resident of an apartment building in the Sydney CBD area and have some major concerns with the suggested Government policy in respect of this issue.

In overview I do not regard the Government's intended policy as appropriate for the hundreds of thousands of residents of strata based apartment buildings in NSW who should be recognised as living in very different circumstances to those residing in stand-alone houses.

Strata building residents are, for good reasons, used to living in a highly regulated and democratically determined co-existence with their fellow residents for the common good and 'quiet enjoyment' of our homes.

Due to our close proximity with our fellow neighbours it is critically important that our shared co-existence of the property is well ordered and protected by legislatively backed strata laws that guarantee that noise and short term stays by guests are closely managed or restricted.

The Government's latest policy proposals re. short term letting will fundamentally undermine these traditional objectives and protections, especially in cases where the building's resident owners do not want to have their communal living preferences (and hence in-house strata laws) overruled by legislation.

My view is that each Strata building should be afforded the right to determine by democratic means whether short term letting is at all appropriate or desired for that particular building.

As such a vote of owners to an appropriate clear majority democratic level (I would suggest 75% as reasonable) should be the determining factor as to whether the building should be available for owners to engage in short term letting beyond the previously regulated minimum period levels.

I trust that my views as a strata owner / resident will be put forward and strongly considered in your current review process.

Yours Sincerely,

**Peter Fletcher**  
**1207/127 Kent Street,**

**Subject:** Regulations and code of conduct for Air Bnb. STRA Discussion paper

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Sir/Madam,

I write as an owner of a unit in 127 Kent St., Millers Point. I am very concerned regarding the introduction of Air Bnb into Strata buildings.

By its nature, residents in a strata building, live very close to their neighbours, often sharing common walls. Their day to day activities impact on one another and in particular the "noise" level. Over time they build up a friendship and understanding of each other's activities and privacy.

The introduction of Air Bnb will change these dynamics, converting a residential building to one akin to a boarding house. There will be new people coming and going every few days or few weeks, who may or may not take as much care as owners or long term tenants. There is likely to be more usage of the facilities such as the swimming pool and gymnasium and hence increased wear and tear, leading to more costs for the owners.

I propose that the unit owners in each strata building decide on whether AirBnb may be introduced into their building by a vote requiring at least 75% of the owners agreeing to it.

I for one am very much against the introduction of Air Bnb into 127 Kent St, Millers Point.

With kind regards  
Tet Choong.

**To:** DPE PS STHL Mailbox  
**Subject:** A New Regulatory Framework Discussion Paper

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

I am an owner resident in a large strata apartment complex in Darlinghurst. I am writing in relation to the New Regulatory Framework Discussion Paper in order to draw attention to the particularities of strata living, and the need for these to be taken into account in the design of the new Regulations. The current draft regulations enable stays of over 21 days to be an exception to the agreed 180 day yearly cap. A potential effect of this, is that apartments in the building would be allowed to have year round short term lettings, even though the zoning for the building is residential. Moreover, owners in a residential area would not wish to have the area creep towards hotel-like accommodation (as a defacto alternative zoning).

There are approximately 100 apartments in the complex and while these apartments are spread over a number of buildings, all apartments are in close proximity to each other. My apartment has neighbours directly above and below, and it has common walls with two sets of adjacent apartments. While noise will always be a feature of dense inner city living, the short term rental market population significantly increases the chances of noisy short term occupants. This is in contrast to the noise factor in apartments that are occupied places of residence.

In order to give residents of apartment buildings choices, it is my view that each Body Corporate should have to right to make decisions on its own STRA position. Decisions could be based on special resolutions that are backed by 75% of the members of the Body Corporate.

**Subject:** AirBnb Code of Conduct and Regulations

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Sir/Madam,

I am extremely concerned about the proposed new regulations and code of conduct for AirBnb. There appears to be very little in these regulations etc which protects the rights and quality of life of strata dwellers.

Strata dwellers live in very close proximity to their neighbours and the quality of life of strata dwellers is very much dependent on the atmosphere, style and culture that is generated by other strata dwellers. This quality of life is very much disrupted by the impact of constantly changing short term residents.

All strata facilities are finely tuned to the needs of permanent residents and the addition of short term visitors adds to the cost of running and maintaining a state building and increases the cost of living to all residents.

We, the owners who have elected to purchase and live in a strata residence because of the particular style and culture of that strata residence must be allowed to protect our interests and we must have the right to decide our own STRA position. This can be fairly managed by requiring a 75% vote.

The concept of self regulation by the STRA industry is not viable and the STRA must be administered by an independent body.

Yours Sincerely,

Peter Coates. AO

**To:** DPE PS STHL Mailbox  
**Subject:** STRA New Regulatory Framework Discussion Paper - comments

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

I am writing to express my opposition to the proposed STRA Regulatory Framework as currently drafted in the Discussion Paper

As the owner of a Strata unit, I am firmly of the view that each Strata must have the right to decide its own position on short term rentals. Stratas are capable of managing their own by-laws, and this should be via a 75% vote on an appropriate Special Resolution.

The "21 day exemption" in the draft Framework creates a loophole which clearly undermines the rights of strata owners to manage their property according to the individual circumstances of what is a very wide range of strata sizes, configurations and locations.

Strata owners ultimately bear the costs of common facilities and maintenance of buildings. These include, but are not limited to, security, gardens, car parking, rubbish collection and cleaning. Strata fees and levies are carefully aligned to the running costs of buildings based on the assumption of long term residency.

Experience with the short term rental market shows clearly that, in addition to adding cost to the running and maintenance of strata dwellings, there is additional inconvenience to owners and long term residents from increased noise from short term renters with no vested interest in the wellbeing of neighbours.

This is not an industry that can be relied on to self-regulate, as can be seen with the recent failures of the property development and inspection regime which is placing an enormous financial and safety burden on some owners, and ultimately on the insurance industry as well.

Short term rentals should be regulated by an independent government body.

Thank you for your attention

Neil Thompson

Owner : 62/299 Forbes Street, Darlinghurst NSW 2010

**From:** Jenny Abraham <jabraham@ords.com.au>  
**Sent:** Thursday, 19 September 2019 4:35 PM  
**To:** DPE PS STHL Mailbox  
**Subject:** STRA Discussion Paper

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

In response to the Government's call for new regulations and a code of conduct for AIRBNB and the like, I wish to register the following comments:

1. My overwhelming consideration is that the owners in strata units have the right to determine the rules under which they live. If those rules are to be changed they must be subject to a 75% vote.
2. The above arises from the concern over the disruption that short term rentals would have on the well-being of resident owners and long term rentals.
3. I find it hard to believe that the present proposals for STRA are put forward by people who have any knowledge of the day to day running of a large strata complex with all the facilities therein, namely swimming pool, gymnasium, sauna and common areas.

All I'm pleading for is a fair go to allow the democratic process to prevail.

Thank you,  
Ms Jenifer Abraham

**Subject:** STRA Regulatory Framework - LGNSW Preliminary Comments

Hi Sandy

Thank you for providing us with an extended timeframe for submitting feedback on the STRA Regulatory Framework. This is welcome as we are concerned that the period provided for comment has not been adequate given the scope of the package and council reporting timeframes.

Our submission will expand on the following themes:

### **Integrated Approach**

LGNSW welcomes the consultation of the entire STRA package, ie both the draft planning instruments and code of conduct, as it is important that councils have the opportunity to comprehensively view these documents together

LGNSW supports an integrated approach to STRA but considers that the planning instrument, compliance and regulation components proposed are not sufficiently linked and will present regulation issues for councils and confusion within the industry.

### **Planning Instruments**

While there is some flexibility for regional councils to nominate different day limits to no lower than 180 days, the inability to specify a number of days below 180 days does not provide sufficient flexibility to manage the impact of STRA for the different circumstances across NSW. LGNSW considers that the SEPP should allow all councils to determine the number of days properties can be used for STRA, and that this should not be capped at 180 days, so they can balance local economic, tourism and long term housing needs.

The provision that un hosted bookings of STRA for 21 or more consecutive days not contribute to applicable day thresholds is seen as problematic. Issues include difficulties in measuring and compliance, and its potential use by landlords to avoid requirements under the Residential Tenancies Act for properties rented to longer term tenants.

Risks associated with bushfires and flooding are important considerations. In terms of practical implementation, some issues identified by our members include how the provisions will apply to properties already being used for STRA that would not comply with the proposed provisions and that in some regional areas the provisions will apply to large areas and may be too restrictive.

The SEPP excludes certain forms of dwellings from its operation, but does not exclude dwellings, such as those approved for affordable housing under the Affordable Rental Housing SEPP (2009) and SEPP No. 70 - Affordable Housing (Revised Schemes). Use of these dwellings for STRA could undermine the objectives of these policies.

STRA provisions may be used by developers of high-rise buildings to withhold dwellings from the market (but allow their use as STRA) until the warranty period for major building defects has passed.

Fire Safety Regulation - Councils are concerned about the ability to measure compliance with the provisions, particularly for dwellings currently being used for STRA and for exempt development.

## **Compliance**

The Code of Conduct and establishment of a register are supported, however there is a strong view that the register must be administered by the Department of Customer Service rather than an industry-led register as proposed.

Councils are concerned that while the framework seeks to address amenity impacts through the Code of Conduct and regulation under the *Fair Trading Act 1987*, councils will still receive and be expected to deal with complaints. Adequate resources such as websites and public information programs for participants and local communities are required. This would assist to minimise the impacts of the anticipated additional compliance load on some councils.

There is significant concern about how councils will be able to effectively manage compliance of the proposed framework and the resourcing and cost impacts. Councils consider that a state government register must include up-to-date, accurate information on bookings, property compliance, owner and host details. This should be available in real-time to councils.

A further issue of concern is the need for greater clarity about the relationship between breaches of the Code of Conduct and compliance with the SEPP.

## **Implementation, Monitoring and Review**

The property register and the Code of Conduct must be in place before the SEPP takes effect.

LGNSW considers that further work on the proposed framework is required to address the issues raised. This should be informed by further consultation with councils. When all components of the framework are in place, a review after 12 months operation is supported.

Please contact me or Linda or Vanessa if you have any questions.

Regards

Jane

Comments from Susan Jessee  
127 Kent Street Unit 810  
Millers Point 2000

I am concerned that AirBnB rentals in my Strata building will change the whole atmosphere of the environment I bought into last year.

I have felt very comfortable knowing the concierges and other residents know who should be here. Previously I had 30 years of living with a household security system and I don't feel exposed here without one as I feel that the environment is known and safe. I'm 72 now and the stability of my environment is an increasing concern.

I've experienced one building evacuation due to a fire alarm. Being on the 8th floor with a cracked kneecap it wasn't fun getting down to the first floor. My supposition is that more transient residents increases the likelihood this will happen again: someone makes the unit smoky and opens the door to the common area and all hell breaks loose.

On a much more petty level the current residents have a hard enough time figuring out the recycling rules. Temporary residents would more likely misfile or just dump everything into the garbage chute.

The residents here are not transient. Most have lived here a number of years, even if they are renting. There are a number of established clubs and organizations. I do not look forward to sharing the gym and swim facilities with people who are expecting a hotel. There are enough hotels in Sydney.

Please allow us to continue to manage our own living arrangements.

Sincerely,  
Susan Jessee

**From:** Josie Simpson <umtalahouse@gmail.com>  
**Sent:** Tuesday, 17 September 2019 1:27 PM  
**To:** DPE PS STHL Mailbox  
**Subject:** Holiday rental regulations for NSW - Bushfire risk properties

**Categories:** Tessa Submissions

Dear Minister,

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct.

In particular I am very concerned about the specification for Complying Development - non-hosted short term rental accomodation and clause e "No part of the lot on which the dwelling is situated is bush fire attack level-40 (BAL-40) or in the flame zone (BAL-FZ)". My concern is around the use of the lot as the definition of the boundary as a lot can vary hugely in both shape and size. It would be more consistent to specify a radius around the dwelling or the current measure using the exposure of the building footprint in the PBP "the building will not be exposed to radiant heat leaves exceeding 29Kw/m2 (1090K)."

I trust you will take this feedback into account to provide clarity and consistency in the application of measuring a fire risk to a property.

Kind regards  
Josie

**Subject:** Fwd: Airbnb- a choice not an imposition

**Categories:** Tessa Submissions

>>>> To whom it may concern.

>>>

>>>> Strata owners must have the right to determine if their building was to allow Airbnb lettings-a vote of the 4/5ths of the owners association in favour would be required to allow the apartment block to permit Airbnb or similar lettings.

>>>> We have nothing against short term rentals in principle but recognise from direct experience that when permitted,they fundamentally change the character and amenity of an apartment complex.

>>>> An hotel environment is markedly different to that of an apartment block that is open only to owner occupiers and long term residents.

>>>> Even the most exemplary short term renters inevitably lead to greatly increased traffic in lifts ,public facilities ( pool,gym etc) subsequent accelerated wear and tear and a need to increase staffing levels with the inevitable rise in strata fees.

>>>> In short only an overwhelming majority of owners should have the power to allow ,what would be profound change to their "home" environment,short term rentals such as Airbnb.

>>>> Yours faithfully.

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

**Categories:** Tessa Submissions

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations including an expensive permitting system.

I use the income as a self funded retiree to support myself and wife.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Regards,  
Peter Kristensen

**Subject:** STRA Discussion Paper

**Categories:** Tessa Submissions

We are a retired couple owning an apartment at 127 Kent Street, Miller's Point.

We really love living here and enjoying the lifestyle, the amenities, the social groups and just mixing with the many like-minded people living in our apartment block.

We therefore strongly object to any proposal that will affect the ambience of our home, which is often referred to as a 'vertical village'. Some disruptions would include;

- Our shared facilities e.g. our pool, gym, sauna, lounge area, library etc. could just become noisy public areas if allowed to be used by anyone. They are currently there for the needs of permanent residents and would have trouble coping with the added load of constantly changing short term visitors
- The addition of short term visitors would add to the cost of running and maintaining a strata building due to need for extra concierge, cleaning and building management assistance and support. This would increase the cost of living by raising levies for all residents. Not only is this unfair, there are many retired couples like us living in the building who are of necessity careful with expenditure
- Every strata building is different and should have the right to decide its own policy re STRA by special resolution requiring a majority vote
- The extra and excessive noise generated by short term visitors with constant moving in and out, parties etc. as they do not have the same feeling of responsibility and commitment to the building as do long term residents

Yours sincerely  
J and J Mellis

**Categories:** Tessa Submissions

Dear Sir/Madam

I am very distressed that our Strata Bye-Laws may not be able to stop Airbnb. I lost my husband several years ago and as I am elderly I sold the family home to move into an apartment. I feel very confident living here with our fantastic security and 24hour staff.

i

In an apartment block, as you can imagine, we live in close proximity but knowing the residents on my floor is a great help and we share all facilities, pool spa and gym and of course expenses with our Strata Levies. We are very proud of our building and our hard working Body Corporate oversee and maintain it constantly.

I cannot understand that Apartment Blocks cannot make their own rules, it is our home and we should be able to decide.

Yours faithfully

Judith Tuck  
2205/127 Kent Street  
Millers Point 2000

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

I live in Coffs Harbour and Coffs needs as many tourists/beds it can get to maintain and grow our tourism offer. Often even with hundreds of short term rental properties there are times when it is difficult to find accommodation. Short term holiday rentals are often very affordable enabling more people to travel.

Coffs is also a retirement destination and renting out a room or part of a house gives these people in most cases a much needed boost to their income and providing them with a better living standard. Taxes are of course paid on the earning which is good for the government.

Let people get ahead in these tough economic times.

Sincerely

Loran Able

**Subject:** FW: NSW Health submission on short-term rental accommodation reform

Good afternoon

Please find below NSW Health's submission to the short term rental accommodation reform:

Short-term rental accommodation have obligations to comply with the *Public Health Act 2010* under the following divisions:

Division 1 Safety measures for drinking water, where the accommodation does not receive drinking water from a reticulated town supply and as such is considered a private water supply. Private water supplies are required to have and comply with a drinking water quality assurance program that complies with the requirements of the Public Health Regulation 2012. Penalties may apply if the requirements are not followed.

Division 3 Control of public swimming pools and spa pools where swimming pools and/or spas pools are provided for use by guests. Swimming pools or spas are captured by *Public Health Act 2010* requirements if they are provided at a hotel, motel or guest house or at holiday units, or similar facility, for the use of guests. Swimming pools and spas have operating and maintenance requirements prescribed by the Public Health Regulation 2012. Penalties may apply if the requirements are not followed.

**NSW Health requests that the Code of Conduct should note the separate obligations relating in Public Health Legislation, so that hosts are made aware of the requirements.**

The requirements should not be included in the Code of Conduct.

Please call me if you would like to discuss this submission.

**Categories:** Tessa Submissions, non Air BNB run

Dear Planning NSW,

My husband and I are retired and living in a large apartment building.

We cannot afford the extra expense of having Air B and B people treating our home as a short stay hotel. The cost of living here would rise considerably to employ the staff needed to supervise casual visitors.

Our building is complex and only functions properly with all residents knowing and obeying the many regulations controlling behaviour in the building. It is impossible for short stay occupants to learn all this. Chaos results!

Dear Liberal and National Members,

Regional NSW has supported you and we need your support to not devastate Regional NSW Tourism with a cap of 12 guests for Homes in Regional NSW.

Please view Presentation attached and video link of hundreds and hundreds of affected homes in Regional NSW.

1. Submission:  
<https://youtu.be/cE1pjWZ-e08>

2. Video of about 1000 homes in Regional NSW affected by can of 12 guests

<https://youtu.be/JDKq6CKlVnw>

SHORT-TERM RENTAL CAP OF 12 GUESTS = ECONOMIC LOSS OVER \$565,200,000.00 PA

SUPPORT US. Support Regional NSW  
SCRAP the CAP  
of 12 guests for Regional NSW

Protect hundreds of Regional Families and homes

- \* Protect Regional Tourism
- \* Protect Farmers
- \* Protect local jobs
- \* SCRAP the CAP for Regional NSW

\* For us:

- Unsustainable to keep our small farm
- We may need to Sell our farm
- A Loss of direct local jobs x 4
- Loss of indirect jobs in community
- Hundreds of thousands of \$ in the community lost
- Average guest size 30 with no where to stay as hotels are not an option for family reunions, schools, etc

\* For REGIONAL NSW

\* \$565,200,000.00 lost in the economy pA If 20 guests is an average for these >12 guest homes

\* \$367,380,000.00 per year lost that's if 1000 homes affected x 13 guests (reality is many rural homes have 20-40 guests) x \$157 spend per person x 180 days of rental.

\* = Loss of thousands of direct and indirect jobs affected in NSW

\* =- Devastation for farmers relying on tourism

For and on behalf of Regional NSW Homes, Families, Farmers, Pensioners and businesses that rely on Regional Tourism that WILL be devastated by a 12 guests cap for Short Term Home rentals.

Thank you for viewing the presentation and submission.

As a community member I am witness to the impact on our community holiday letting is having. When several houses in a street are owned by absentee landlords and used for short term holiday letting it destroys the neighbourhood. You don't have neighbours you have strangers. People who work in our town are forced out due to lack of permanent rental properties available. When a town loses community it loses everything from students in schools, volunteer fire service members, green and clean volunteers etc etc. But most of all it loses its soul and the energy that sustains it.

**Submission**

I am in full agreement with the Owners Corporation Network (OCN) that:

1. Complying Development: STRA in residential strata schemes must be classed as 'complying development' with inspection by Local Council or a private certifier, not 'exempt development'. This is the only way to ensure the mandatory fire safety standards are met.

2. Day Caps: Un-hosted STRA must be capped at 60 days for the Greater Sydney Region to contain STRA to 'Home

Sharing'. All STRA to count toward the cap. No exceptions.

3. Development Consent Conditions: Residential apartment buildings in mixed use and commercial zones with express prohibitions on short term letting must have their development consent conditions respected and preserved.

4. The Register: The planning law changes must not start without The Register, which must be run by Government or a neutral platform not operated or controlled by the short-term letting industry. The Register must include the days of occupation and all the platforms on which the premises is listed, Local Councils must be involved in designing the system. Local Councils and NSW Fire and Rescue must have access to the data.

5. Host Obligation: There must be an enforceable obligation for hosts to register their premises before it is listed and used for STRA purposes. This should be part of the complying development criteria, so it is clear the use of unregistered premises for STRA is illegal and penalties apply.

6. Platform Obligation: There must be a legal obligation for platforms and agents not to list any unregistered residential dwellings for STRA. International experience shows that without such an obligation, platforms will continue to list thousands of illegal apartments. Platforms must also have an obligation to share data with State and Local Government. All listings and other advertising must clearly display the host's unique ID.

7. Charges and Fees: Residential strata schemes must have clear authority to levy additional charges and fees to additional wear and tear and costs whether STRA is hosted or un-hosted.

8. Flexibility: Local Councils must have flexibility to set a lower cap and apply zoning restrictions to meet their strategic planning objectives.

I would also like to be reassured that all owners and operators of short-term-rental accommodation (STRA) are meeting their various taxation obligations.

Restricting short term holiday rentals will have the following negative impacts

Many locals who service the properties, including cleaners and tradespersons will have their incomes reduced.

Local supply businesses will also be negatively impacted.  
Families who enjoy quite and peaceful holidays may not be able to do so.

The mere suggestion of limiting the availability and affordability of accommodation in a city that has had its night time economy obliterated by the lock out laws is simply absurd. \$16B night time economy is about to be unshackled only to be restricted by short sighted approach. Greater Sydney should be make more options available not less. Pure stupidity again!

**Submission**

This submission is made on behalf of The Strata Collective. I am the Managing Director of this company and manage multiple large strata schemes that have been negatively impacted by short term letting.

Short term letting has been detrimental to our clients for the following reasons:

ISSUES

- The proposal to not count lettings of 21 days or more to count toward the 180-day cap of un-hosted STRA is unacceptable.
- The loss of Local Council control over planning control for short term lettings.
- Mixed use strata schemes with prohibitions on short term letting must retain those development consent

conditions. There are many apartment buildings in urban areas with specific development consent conditions that prohibit short term letting (< 3 months).

- Hosts in strata buildings will not be able to ensure all required fire safety measures are met because of ignorance of the requirements and the lack of authority to rectify any deficiencies.
- The implementation of a government run register or a neutral platform (not controlled by members of the short-term letting industry) is required prior to any planning law changes.
- Hosts must register their premises, before listing for STRA. Planning law must require this to ensure unregistered premises for STRA are illegal and penalties apply.
- The Strata Management Act needs modification to allow owners to vote to accept the 180 day cap for non-resident owners or modify the cap.
- No consideration has been given to taxation of STRA. GST payment and supply of TFN should be considered.
- A register of unacceptable hosts and guests is required.
- A consumer disclosure or public database stating what percentage any strata plan is short term letting needs to be established.
- Owners Corporations should be empowered to create by-laws to set additional levies on lot owners persistently undertaking STRA.
- Illegal, unapproved sub-letting by tenants needs to be stopped.

## DISCUSSION

- The risk of fire is increased by short stay tourists and visitors especially in high rise apartment buildings. Residential apartment buildings with complying development is required to ensure that the mandatory fire, BCA and safety standards are implemented.
- How will the 180-day cap be monitored across all available platforms? Cooperation between all platforms is unlikely. How will government ensure data across all platforms is captured?
- The proposal to not count lettings of 21 days or more to count toward the 180-day cap of un-hosted STRA is unacceptable.
- The loss of Local Council control over planning control for short term lettings.
- Mixed use strata schemes with prohibitions on short term letting must retain those development consent conditions. There are many apartment buildings in urban areas with specific development consent conditions that prohibit short term letting (< 3 months).
- Government must have statutory oversight of the host register and undertake regular audits.
- Platforms must have a counter to monitor and report on guest nights
- Hosts must display the unique Host ID on all listings and declare all platforms that their ads appear on, and where applicable, the strata plan number. Hosts must have adequate insurance in place, verify all required fire, BCA and safety requirements have been complied with.
- Platforms and agents need a legal obligation not to list unregistered accommodation. Platforms must share data with state and local government. All listings and other advertising must display clearly the Host's unique ID.
- Independent third parties, such as BNB Guard, are needed to scan the market for unregistered hosts.
- The Host Register must include reporting on remaining days of occupation (caps), disclose all platforms on which the premises are listed. The Register must generate a unique Host ID.
- Local Councils must be involved in designing the system and have unimpeded access to data and monitor to ensure original development consent conditions are complied with.
- First home buyers or owner occupiers purchasing strata apartments require details of the percentage of STRA in the building they are proposing to live in. Purchasers of strata lots in buildings containing 50-70% STRA lettings would have reason to believe they have been deceived. They may think twice before buying.
- STRA causes additional maintenance and cleaning costs in common property areas in strata buildings. Owners Corporations should be empowered to resolve by-laws to recover reasonable additional costs.
- Many residential tenants sub-let their residence without seeking landlord approval when they go away on holiday. There have been numerous instances of adverse outcomes occur in these situations (eg. Bed bug infestations, removal of smoke alarms by short term guests).

## RECOMMENDATIONS

- All Un-Hosted STRA is to count toward the maximum cap.
- Buildings need to be able to ban short term letting if they the owners resolve by Special Resolution to do so

- Local Councils can set a lower cap and apply zoning restrictions to meet local strategic planning objectives. A uniform state-wide approach is not workable.
- Taxation aspects of STRA must be considered.
- Compliance with all fire, BCA & safety requirements is essential.
- To protect consumers details of unacceptable hosts & guests must be available.
- Monitoring of all aspects of STRA is essential to ensure compliance
- Enabling searches by strata plan number on the register would enable prospective purchasers to determine the percentage of STRA in buildings. Apps such as “Strata Check” proposed by Minister Dominello could be utilised.
- Empower Owners Corporations to introduce cost recovery by-laws to levy STRA lots.
- Introduce landlord approval requirements as part of host listing on platforms.

**Submission**

Council is generally supportive of the proposed reforms to short-term rental accommodation (STRA) regulation as very little is changing regarding the permissibility of STRAs in the Kiama Municipality.

Council welcomes the transfer of the role of compliance to the Department of Fair Trading.

Council understands the supportive role the accommodation sector plays in growing our economy but are also aware of the community's concerns regarding the negative impacts associated with STRAs.

Council also notes that the previously proposed amendment to the Strata Schemes Management Act 2015, requiring the owners corporation of Strata complexes to vote on individual units being used for STRAs, has not been included in this round of exhibited amendments.

Council are interested in reducing the number of days a non-hosted STRA can be occupied for in the Municipality, in a similar fashion to the Greater Sydney Region, the Ballina area and the City of Lake Macquarie area. Council would welcome the opportunity to be involved in further discussions regarding this matter.

Yours faithfully

Ed Paterson  
Acting Manager Strategic Planning

Byron Bay 2481

**Submission**

My name is Johnny Abegg and have lived in the Byron Shire for over 20 years. In that time, Byron has changed dramatically, a lot of positive change, but also negatives. I've had a lot of friends I grew up with in my late teens, to early adulthood and beyond, who've had to move over the last few years, as housing availability, and affordability has sky-rocketed. I've also noticed the 'locals' I grew up seeing and sharing our community with, I don't see as much anymore. Obviously Byron has always been tourist town, and I enjoy the influx of new faces and energy, but that balance has shifted somewhat these days.

I read recently that Air BnB properties in the Byron shire have jumped from 1,172 in 2016 to 3,306 in August this year. Of those, 1,331 listings for an entire home/apt are listed by 359 landlords only - evidence of multiple landlords with multiple properties. There's not many long time residents who can list multiple houses, most of which can barely afford to rent one. None of my long time friends can find a place to live here where they gre up, when investors are driving up prices up and effecting the permanent rental market in Byron Bay.

The new proposed State Environmental Planning Policy (Short-term Rental Accommodation) will entrench Short Term Holiday Letting in our Shire and change it for good, in a negative way I believe. There are 2,572 whole homes listed on Air BnB in Byron Shire, only 725 listings are for private rooms in people's homes.

I feel NSW is somewhat out of touch with locations all over the world. Major towns and cities are placing restrictions on Air BnB, but in NSW the state government appears to have allowed the short term letting accommodation industry to write the rules. There needs to be a cap placed on holiday letting in Byron Shire, we get the second highest amount of visitors behind Sydney in NSW, and don't have the ability to let out our housing, instead giving affordable housing back to the people who want to live and reside here long term.

Thanks for your time,  
Johnny Abegg

We are owners of a rural property on the outskirts of Berry NSW. Our 5 bedroom, 3 bathroom house sits on 20 acres of land.

I wish to have my concerns noted specifically in respect of the proposal to require that each bedroom in such accommodation can only sleep 2 people or a maximum of 12 per dwelling whatever is the lesser.

Limiting each bedroom to 2 people only without any reference to the standards of accommodation, size of rooms, supporting infrastructure (e.g. living areas and bathrooms etc) is not fair or reasonable.

Our property is an example of a luxury holiday accommodation property that currently does take 12 people with a

maximum of 10 adults. We have configured the house so that it is possible for families to reunite and as such one of the bedrooms (large in size) accommodates 2 bunk beds designed for children.

As mentioned, the house is serviced by 3 bathrooms and 3 large living rooms. Each providing ample space and facilities for the guest limits provided (ie 12 people, maximum 10 adults).

I trust that you can see from this illustration that it is reasonable and acceptable to configure holiday accommodation in this way. And that the proposed changes to regulations would put undue restrictions on properties like ours.

We would request that you closely review this area of the regulations to ensure that it does not discriminate against properties like ours which are appropriately appointed to accommodate the numbers we do today.

Re: SHORT-TERM RENTAL ACCOMMODATION A new regulatory framework – Call for feedback

Thank you for the opportunity to comment on the proposed new regulatory framework for Short-Term rental accommodation in NSW. As urban planning and housing researchers, we have been examining the rise of online platforms for short-term rental accommodation and the implications for housing markets, cities and local communities over a number of years.

A recent summary of these issues as they have arisen in Australia and internationally, including links to international research, was presented by Prof. Gurrán at a forum organised by the UK Collaborative Centre for Housing Evidence (CACHE) in July 2019, attended by the Scottish Government and Dublin City Council and can be accessed here: <https://housingevidence.ac.uk/global-home-sharing-local-housing-markets-and-neighbourhoods/> .

We focus our remarks in this submission on what we see as the main areas of concern with the proposed regulatory framework.

#### Impacts of short-term rental accommodation on housing supply and rental affordability

Overall, we are surprised that the proposed framework neither acknowledges or addresses the fundamental housing market risks arising from the conversion of residential units to short-term rental accommodation.

A growing number of studies throughout the world are demonstrating that removing housing units exacerbates problems with rental supply. The research evidence on this point has grown significantly since the first round of consultation around the regulation of short-term rental accommodation in NSW.

Whilst vacancy rates in Sydney currently are high enough to lose additional rental supply without putting upward pressure on rents (over 3%) during most of the period between 2010 and 2018 vacancy rates were less than 2 percent. This means that losses of housing supply to short term rentals would be placing upward pressure on Sydney rents. Given the high costs of renting in Sydney, this can have a significant impact on the rental stress levels of moderate and lower income households.

Further, encouraging new housing supply has been one of the government's major policy platforms for addressing Sydney's affordability pressures. Yet for this strategy to work, landlords need to begin discounting rents, in response to increased supply. The short-term rental market provides an alternative to discounting, potentially undermining the supply strategy. For instance, in the City of Sydney there were around 1,900 new dwellings completed between 2016/17, but a total of 5,675 listings on Airbnb. Of these, 1,552 were whole units which appeared to be permanently offered as short-term rental accommodation (equivalent to 81% of the City's new housing units in that year).

Further, we note the irony that secondary dwellings are permitted as code assessable development under the State Environmental Planning Policy (SEPP) Affordable Rental Housing 2009, but under the proposed short-term rental regulatory framework, will be able to be used as a form of tourist accommodation – a use neither anticipated or assessed when the Affordable Rental Housing SEPP was enacted.

Notably, concern to protect permanent housing stock underpins many of the attempts made by cities throughout the world to regulate or prevent the listing of residential homes on platforms such as Airbnb. Typically, hosted accommodation, and short term sharing of a principle place of residence is permitted up to a threshold number of days and guests – for instance 90 days and a single group of up to 6 guests .

In contrast to this international practice, the proposed regulatory package for NSW stands out as unusual in its latitude.

We see a very high risk that permanent housing units in high demand locations will be converted to short term accommodation – serving visitor needs but exacerbating housing affordability pressures and rental shortages. Further, we are concerned that the precarious private rental sector will be further eroded by the introduction of a quasi three week lease, due to the proposed exception granted for stays of 21 days or more.

#### Impacts on residential buildings and neighbourhoods

We note that the discussion paper and some of the proposed reforms recognise and attempt to address the concerns of neighbours. Tourist accommodation within residential settings presents a significant risk of land use conflict, which is why it has traditionally been regulated via land use zoning or other controls – such as the short-term rental controls contained in the 15 Local Environmental Plans (LEPs) which will be deleted by the proposed SEPP. Even though holiday rentals and second homes have long been an important part of the fabric of coastal and high amenity inland communities in NSW, these local authorities have seen the need for a regulatory framework to manage potential impacts on permanent residents. We are of the view that it would be more prudent to preserve these controls pending the trial period for the STRA SEPP.

Our research shows that the main impacts for neighbouring residents arise from large groups of friends or extended families (who typically seek out large properties to hold parties and significant events). Similar problems are associated with poorly managed homes where the ‘host’ does not have a local presence or manager, and when the character of a building or neighbourhood changes from primarily residential in character to one characterised by transient visitors.

In the latter case, the sense of alienation and anxiety associated with a continual churn of newcomers and the lost opportunities to know one’s neighbours, are recognised in the international research literature on ‘touristification’ – a phenomenon that is now known to arise very rapidly with the introduction of online platforms for short-term rentals.

We are of the view that the maximum numbers of occupants anticipated by the draft SEPP – up to 12 ‘hosted’ guests – will enable de facto backpacker accommodation to enter the residential sector; while 12 guests in an un-hosted property presents a very high risk of neighbour disturbances.

#### Comments in response to discussion paper prompts

In the sections below, we structure our specific comments in response to the relevant consultation prompts outlined in the discussion paper.

##### 1. What is your view on the form of and provisions in the STRA SEPP, Regulation and Safety Standard?

The provisions of the STRA SEPP do not, in our view, provide a sufficient basis for managing risks presented by residential style tourism accommodation within high demand markets such as Sydney.

The proposed threshold of 180 days for un-hosted properties in Sydney and in nominated non metropolitan local government areas, is not sufficient to preserve permanent housing units. Within the 180 day period, a home could be rented for every weekend as well as during peak Christmas and Easter periods, for all intents and purposes changing from a permanent residence to tourist accommodation.

Further, the proposed exception for stays of 21 days or more, while intended to support the ‘mobile workforce’ has the perverse effect of further eroding the precarious private rental sector.

As noted above, the proposed maximum number of occupants – up to 12 guests in hosted or un-hosted accommodation, while subject to a cap of 2 occupants per bedroom, introduces a real risk that backpacker style accommodation and/or ‘party houses’ will continue to emerge in residential areas and buildings. This is particularly so in locations likely to be attractive to tourists – such as beach side suburbs, inner city areas, and rural fringe locations, where neighbours may be subject to persistent disturbance and anxiety associated with an ongoing churn of short-term visitors.

It is difficult to introduce a statewide regulation for managing these risks, which emerge differently in different housing and tourism markets. For this reason, we suggest trialling certain measures of the proposed SEPP (such as those relating to whole home rentals and hosted accommodation of more than 4 guests) only in localities that do not already have existing LEP provisions for short-term rentals in place. A further strengthening of the SEPP could limit the exemption to primary residences only. This would enable genuine home sharing; while protecting residential homes and neighbourhoods. Further, this approach would help prevent the loss of permanent housing units and guard against the problems arising from absent / anonymous ‘hosts’.

2. Are there any elements of the draft instrument that are open to misinterpretation or require further clarification?

It is not clear to us whether the SEPP would have the effect of introducing existing use rights in areas where short-term rental accommodation is currently subject to a regulatory framework, and whether this will have implications for possible revisions to the regulation following the review period.

We were unable to find a reference to a register of short-term rental accommodation, or an exclusion register, in the draft SEPP. We suggest making inclusion in any such register a mandatory requirement for exempt and complying short-term rental accommodation.

3. What are your views on new policy elements relating to days, flood control lots and bushfire prone land?

We have outlined our views about the number of days above. In short, if the intention of a 180 day restriction is to preserve residential housing from conversion to tourist accommodation, the threshold is insufficient.

We are supportive of the basic provisions in relation to flood and fire risk.

31. Should industry be required to report registration information, including number of stays (days), to Government and/or local councils? If so, how frequently? Why?

Mandatory reporting via a shared, openly accessible platform/ register is essential for local compliance officers and or police, who are most often the front line when issues arise. This data is also necessary to monitor impacts on housing supply and affordability over the long term.

32. Should any information on the register be made publicly available? If so, what information could be made available and why?

Aggregate data at sub-LGA level should be made publicly available for monitoring and planning purposes. Real time data would be helpful for local government to monitor seasonal trends in visitor populations and to inform tourism planning and management.

36. What data sources could the NSW Government use to inform the review? How can industry and councils assist with data collection for the review?

The review should include an assessment of housing market impacts – tracking rental vacancies and ‘churn’ as well as rental trends by postcode and LGA. The Rental Bond Board should supply this data.

A twelve month period is insufficient to determine housing and neighbourhood impacts – following the establishment of the register by industry, to establish baseline data on the stock of short-term rentals, ongoing monitoring is required to observe growth and change in the sector, and any associated impacts.

Please feel free to contact us with any questions and or to supply any of the references in our own or others’ research.

Yours sincerely,

Professor Nicole Gurr  
Professor Peter Phibbs

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides flexible way for me to live in our family property while studying in Sydney and travelling back to country areas to work in the family business it has made this effective way both use the property and be able to rent while away for work I only have respectful people stay in our apartment and never had any issues

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

I Don't agree with the 180 day ruling in Sydney areas as I don't see this fair, we are not going to un furnish our property to rent out if we go over the limit while having our property for own use and rental at the same time, we would not want to rent full time as the property has been set up nicely for us to use and the short term guest, how is this going to effect the rental market which is already in a bad state of affairs with properties staying empty for many months affecting people trying to pay high mortgages, Real estates are also stating they cant ren furnished apartments?

Thank you for reading my submission.

The proposal that rental properties in the Blue Mountains should be treated the same way as residential / suburban areas is certain to impact negatively on residents and future of the area.

The Blue Mountains - especially the towns in the upper mountains - rely heavily on tourism for the local economies. The advancements that have been made in recent times to roads and local infrastructure support the region and can only be seen as positive. The area does, however, rely heavily on short-term rental availability. To limit that will reverse any gains made.

It must be considered that most homes in the Blue Mountains are in bush fire prone surrounds. The very thing that causes the risk is what makes it an attractive destination for holiday makers - the bush. With the majority of homes

being older and not compliant to BAL29+ conditions, the pool of available accommodation will be shrunk - as will the number of visitors to our towns. The result - businesses losing trade and a town shutting down. Then, of course, there are the homes that do comply with the requirements of the bushfire code. Why limit the number of days for rental availability. Less days available on the market will make no difference to the safety or compliance of a house in the event of fire.

I hope that you will reconsider the proposal with the benefit and protection of local economies and also common sense in mind.

My partner and I are the owners of an apartment in a Class 2 (National Construction Codes of Australia) residential flat dwelling in the City Of Sydney. We have owned this apartment since 2002.

We also own a Class 1(a) (National Construction Codes of Australia) single family dwelling on the Central Coast of NSW. We have owned this dwelling since 1990.

We use both dwellings for our own residential use, only occasionally renting out one or the other on a valid lease basis of at least 3 months or more.

We undertook all due diligence in purchasing these two residential dwellings; it was our clear understanding that short-term holiday letting was a 'prohibited use' at both locations. Indeed, the City of Sydney took action in 2015 in the NSW Land and Environment Court and obtained Orders which stopped a Short Term Rental Operation in our city

apartment block.

Following the issuing of LEC Orders we experienced a period of peace and calm – for the first time since purchasing into the city property. Much to our distress, multiple Airbnb landlords are again renting out residential apartments in clear breach of our Development Consent and Court Orders, and the City of Sydney Council is now refusing all requests to take enforcement action against the illegal operators.

To alter the State Environmental Planning Policy [SEPP], as has been proposed by the Department of Planning and Environment, would amount to the retrospective rezoning of both our homes. And it would represent a clear breach of our proprietary rights without compensation. In fact the changes proposed would leave every NSW Resident without an area or building in which they could live in a residential setting.

We know too well the impacts on the home lives of residents who find themselves living amongst short-term holiday rentals and we ask that the Minister uphold our current legislation – which we deem to be 'world's best' - and mandate that all NSW Local Councils enforce residential zoning.

Considering the above proposed planning framework we make the following points :

\* So much of what we read seems to point to the fact that the 'rights' of people like us are of no consequence. Its all about the 'industry', tourism, greed etc etc.

\* We find ourselves so upset by what is happening, because of short term letting, in and to both communities in which we live that it is difficult to find the words to comment further. In that regard please refer to the submission from The Owners Corporation Network of Australia, all of which we agree with wholeheartedly.

Sincerely,  
William Gregor

Milsons Point

**Submission**

11th September 2019

The Secretary  
Port Jackson Tower  
38 Alfred Street  
Milsons Point NSW 2065  
Sydney, Australia

To whom it may concern,

I am making this submission as the Secretary of the Executive Committee of Strata Plan 49496.

We have several areas of concern with the proposed package on short-term letting that has been released by the NSW Government, with the main areas of concern covering 5 key areas, namely: -

#### Owners' Rights

Residential apartment buildings in mixed use and commercial zones with express prohibitions or limitations on short term letting should have their by-laws respected because these by-laws represent the views of the vast majority of owners.

The key area of concern is that high rise residential buildings such as Port Jackson Tower which was built some 25 years ago, are simply not set up to accommodate short term guests. We have no concierge service or 24 x 7 caretaker or building manager services, which makes dealing with short term guests almost impossible.

Many of our facilities such as our pool, small gym and sauna are surrounded by residential apartments and any increased use of these facilities would disrupt the peaceful enjoyment of these residents.

Port Jackson Tower has only two lifts which is barely adequate for permanent residents let alone short-term renters who would by their very nature put an additional burden on these lifts adversely effecting all other residents in the building.

#### Fire Safety Standards

- (a) Fire safety standards should be more onerous for short-term holiday visitors in high-rise apartment buildings as the threat to life of all residents is increased significantly.
- (b) Fire standards applicable to residential apartment buildings do not address the fire risks of cooking, BBQ's or smoking on balconies which are common problems with short stay visitors unfamiliar with by-laws or local customs.
- (c) Fire safety in residential strata schemes must not be left to self-regulating platforms or amateur hosts as it poses an unacceptable risk to all residents.

#### Security

Security arrangements in individual buildings will be compromised, a large number of extra visitors, many of whom may not be registered with the various platforms, pose significant additional risks to existing residents.

#### Collective Cost of Permitted Short-term Letting

Residential schemes must have authority to levy charges and fees on Hosts conducting short-term letting. The disproportionate cost to owners and owners' corporations from STRA operations (e.g. wear and tear of lifts, gyms, garbage and other utility areas as well as administration and management costs) means they are effectively subsidising those running STRA businesses.

#### Preservation of Local Government Oversight

Local Councils should have the ability to set and apply zoning restrictions to meet their strategic planning objectives. They should be involved in designing and be part of the compliance and enforcement function of any registration system.

Yours faithfully,

Michael Bartlett  
Secretary, Port Jackson Tower

Do not agree with STRA self regulation or registration

- hasn't worked in the past
- no hands on control -distance-
- no community input or complaint register
- no local enforcement of local bylaws or risk conditions -fire risks, flood risks, no. of occupants,noise etc.
- little contribution to local infrastructure-ambulance,hospital, roads, police etc. Usually Involves multiple families and cars.
- property rates should be based business rates not residential rates- see below.

Possible solutions :

Let Councils manage but only if fully financially compensated.

#### Compensating Councils

- all STRA accommodations should have to submit a 'Development Application' with appropriate fees.
- a yearly fee should also apply , sufficient to hire compliance officers to check for booking register, facility standards, complaints investigations, safety regulations and enforcement of occupancy standards.
- all STRA should pay 'business rates on the entire property as they are 'businesses

Conclusion:

-This would make a fairer competitive solution for existing DA compliant tourist operators and the suffering neighbours.

Keith Learn  
Chairman of Development Committee  
Kangaroo Valley Community Association Inc.

**Submission**

Feedback on STRA Discussion Paper and Draft Instruments and Regulations

1. What is your view on the form of and provisions in the STRA SEPP, Regulation and Safety Standard?

- All dwellings –  
Agree no more than 2 persons per bedroom/12 persons per property.  
Agree to smoke alarms.  
Don't agree with lighting of hallway unless it is part of the smoke alarm itself.

Multi unit –

Agree re entry doors.

Agree re fire extinguishers and fire blanket in kitchen.

Agree with evacuation signage.

Stand alone dwellings –

Agree with heat detector when a garage is not accessible by guest and is underneath the property.

2. Are there any elements of the draft instrument that are open to misinterpretation or require further clarification?

- No

3. What are your views on new policy elements relating to days, flood control lots and bushfire prone land?

- Days

Byron Shire Council (BSC) are seeking to reduce STRA in some areas to 90 days and is required to prepare “a planning proposal to identify or reduce the number of days that non-hosted short-term rental accommodation may be carried out in parts of its local government area”, as per Ministerial Direction 3.7. In addition the Byron Council, in August 2019, agreed at Council Meetings to request the NSW Government to, even prior to the Ministerial Direction No 37 being determined, to reduce all of the Shire’s STRA operation to only 180 days a year. However they have not consulted with any potentially effected parties and have only focused on issues that are experienced in the town of Byron Bay, and not on the rest of the Shire. In Brunswick Heads, where there are no significant negative social or affordable housing impacts from STRA, a reduction to either 90 or even 180 days is likely to have a devastating impact on the local economy.

Code: Industry participants obligations.

4. Are the general obligations for industry participants adequate? If not, what other general obligations should be considered? Why?

- Yes

5. What types of STRA information will be useful for the Secretary to collect to inform the further improvement of the Code and the STRA regulatory framework? Why?

- The Secretary could ask for a copy of participants’ current complaint records to determine the type and extent of complaints experienced to date.

6. Are the specific obligations on booking platforms, letting agents, hosts, guests and facilitators in the Code adequate? If not, what other obligations should be considered for each of these industry participants? Why?

- Yes in relation to guests, booking platforms & letting agents. However public liability insurance to cover the death or injury of STRA guests or visitors and the damage to their property, is only likely covered by most insurers, where death, injury or loss of property is the result of the STRA owner’s negligence, but not where such death, injury or loss of property is caused by the guests’ or visitors’ own actions.

Code: Complaints

7. Is the complaints process detailed in part 6 of the Code sufficient? If not, what other matters should be considered or set out in the process? Why?

- No

All complaints should go to the host/letting agent first, so that they are given the opportunity to rectify any concerns within a reasonable amount of time. If the issue continues to be a problem, or the complaints are considered vexatious, then the Commissioner should become involved.

8. Are the grounds for recording a strike fair and reasonable? What other matters (if any) should the Commissioner consider when deciding whether to record a strike? Why?

- In general Yes, but how will a situation where person A, who is on the exclusion register, gets person B, (who is also a guest but is not on the exclusion register) to make the booking, be dwelt with ?

9. What are potential ways to facilitate industry participants' access to the exclusion register while limiting potential privacy impacts? What factors should be considered?

- All industry participants should hold a registration number. These numbers are checkable on the register. This number will advise whether the participant is excluded without providing any personal information.

10. Is the review process clear and sufficient? What other matters (if any) should be considered should be considered? Why?

- Yes, the review process clear and sufficient.

11. Are the proposed penalty notice offence and civil penalty provisions appropriate? What provisions should or should not be identified as penalty notice offence and/or civil penalty provisions? Why?

- The penalties seem rather excessive for the nature of the activities involved. Although the penalties should be sufficient that reasonable costs incurred are recovered from the relevant STRA industry participants.

Amendment Regulation: Prescribed classes of STRA industry participant

12. Does clause 22B(1) appropriately capture end to end property management services that specifically service STRA properties? Why or why not?

- Yes

13. What other organisations or persons should be prescribed classes of STRA industry participants (if any)? Why?

- None

Amendment Regulation: STRA industry participants excluded from Code of Conduct

14. Is it appropriate to exclude the STRA industry participants set out in clause 22C? Why or why not?

- Yes

15. What other STRA operators (if any) should be excluded from being covered by the Code? Why?

- None

Amendment Regulation: Appeals against listing on exclusion register

16. Is the appeals process clear and sufficient? What other matters (if any) should be considered? Why?

- Yes

Amendment Regulation: Fees and cost recovery

17. Which industry participants should contribute to the cost of administering and enforcing the Code? Why?

- Guests and owners, as they are those who will ultimately benefit financially, however it may be necessary for other industry participants who charge fees or commissions to guests and owners to in the first instance, to contribute to the costs of administering and enforcing the Code, provided that they can then recover these costs from guests and owners.

18. How should costs be apportioned across different STRA industry participants? Why?

- Registration Fee – for guest to register
- Registration Fee – for property owners to register
- Administration Fee – per booking, per property paid for by guest

## Amendment Regulation: Penalties

19. Is the proposed penalty notice offence amount appropriate? Why or why not?

- Excessive for a first offence. Maybe it would be more appropriate to determine the penalty amount based on a certain percentage of the booking amount that it relates to.

## Proposed industry- led property register

20. How can industry be organised to develop and manage the registration system?

- Through a STRA Committee of relevant parties, and those listed in Appendix 2. The STRA Committee should not include local council representatives. The Byron Shire Council should not be permitted to maintain its own local STRA Register, as proposed in motions passed at its Council Meetings in August 2019.

Also the comment on Page 17 of the New Regulatory Framework “that Local Councils could use the information (in the Register) to enforce compliance with day thresholds” also seems inconsistent with such compliance being the responsibility of the Commissioner.

21. What would be the costs to industry in establishing and maintaining the register? How would industry propose to meet these costs?

- Through registration and administration fees imposed on guests and registrations fee for STRA properties.

22. What role should the Government play in developing or overseeing the register, if any?

- There should be a State Government representative on the STRA Committee.

23. Are there other outcomes a register should deliver?

- No

24. How can the approach ensure registration applies to all STRA operators, regardless of how the property is advertised for rent?

- This should be determined by the STRA Committee.

25. What audit and verification processes would be needed to ensure accuracy of data?

- This should be determined by the STRA Committee.

26. Should there be separate or additional penalties for failure to register? If so, which industry participants should they be imposed on?

- No, This is covered in penalties detailed above and in the Code.

27. What information should the register collect? Why?

- Agree – name & contact details of host
- Agree – address of property
- Do not agree that it should include the number of days the property is booked as bookings can be cancelled or varied, although it could include the number of days a property is actually stayed in.
- Do not agree that if it is a strata building, that the register should include whether the STRA complied with the by-laws. This is because if it does not comply with these by-laws, it should not be listed on the register in the first place.
- Records of any breaches, enforcement action or ‘strikes’ should be included in the register, but this information should not be available to the general public. However if someone is excluded they should be given right of access to the reasons why they, but not others listed on the register, have been excluded.
- Also be guests name and contact details should be included on the register.

28. What role should different industry participants (e.g. hosts and booking platforms) play in the registration process?

- None apart from placing their names on the register.

29. What role should Government play in the registration process or providing information for the register?

- Information that NSW Fair Trading has upheld complaints, enforcement actions and strikes could be on register, provided it is not available to the general public.

30. Should any information on the register be made publicly available? If so, what information could be made available and why?

- Information as to whether a participant is excluded or not, should be be publically available.

31. Should industry be required to report registration information, including number of stays (days), to Government and/or local councils? If so, how frequently? Why?

- Registration information, including number of stays (days) could be reported to the Office of Fair Trading and or the STRA Committee, but local government should not be involved in this process.

32. Should any information on the register be made publicly available? Why?

- Same question as No 30.

#### Commencement of the regulatory framework

33. How much lead time would industry need to develop and establish the proposed STRA property register? Please provide reasons.

- This should be determined by the STRA Committee in conjunction with the Office of Fair Trading

34. When should the STRA regulatory framework start? Please provide reasons.

This should also be determined by the STRA Committee in conjunction with the Office of Fair Trading. However to comply with the proposed new regulatory framework some STRA owners may need to expend considerable amounts of money. It would therefore be unreasonable for them to, after they have complied with the regulatory framework, to be informed that the Government had approved a local Council's request to reduce number of days that STRA can operate in their Shire, if such a reduction is likely to result in their STRA being no longer economically viable. Therefore for example, until such time as the Ministerial Direction No 37, which may result in parts of the Byron Shire being limited to as little as 90 days, is determined, it would be unreasonable to expect STRA's in the Shire to expend any funds to comply with the new regulatory framework.

#### 12-month review of regulatory framework

35. Do you support the proposed scope of the review? What additional considerations might be necessary?

- Yes

36. What data sources could the NSW Government use to inform the review? How can industry and councils assist with data collection for the review?

- By encouraging submissions from registered participants or conducting surveys of these participants.
- By submissions being made by relevant industry organisations and others who are concerned about impacts of the regulatory framework on local economies.
- Researchers from Southern Cross University are currently undertaking a survey of opinions about the future of "Short Term Holiday Letting" on the North Coast and they might be interested in undertaking a follow up survey as part of the 12 months review of the regulatory framework.

#### Personal Background

My wife and I have been involved in holiday letting, using local real estate agents, for about 20 years, mainly in Brunswick Heads but also in the Gold Coast, Yamba, Angourie and Coogee. I have also been actively involved in the Brunswick Heads Chamber of Commerce's Holiday Letting Committee for about 16 years and have also been an office bearer in the Byron Bay based Holiday Letting Organisation (HLO). For the last 35 years I have also taken a keen interest in affordable housing issues and was a founding director of one of the largest multiple occupancy communities on the NSW North Coast, and my wife and I have both been former members of the Byron Shire Council's Affordable Housing Committee. I am also currently a director of Social Habitat Housing Ltd.

#### About Brunswick Heads

Unlike nearby Byron Bay, there has not been any significant growth in managed STRA accommodation in Brunswick Heads recent years. The range of holiday accommodation is also much more limited than in Byron Bay. Brunswick Heads has three holiday parks managed by NSW Crown Holiday Parks, four motels, one hotel and no licenced bed and breakfast accommodation except for one on the outskirts of the town. Hotel Brunswick currently offers fourteen rooms but will cease offering this accommodation in January 2020.

Brunswick Heads' tourist demographic is very different from that of Byron Bay and unlike Byron Bay, the town has been a tourist destination for well over 100 years. The Brunswick Heads Simple Pleasures branding has been highly successful in managing tourism and the relationship between visitors and residents is generally very harmonious. Yet the Local Council has persistently ignored representations from Brunswick Heads that the town's tourism demographic is significantly different than Byron Bay's and that any marked reduction in STRA is unlikely to have any significant positive effect on affordable housing in the town, but is likely to have a major impact on the local economy, due to the town's significant dependence on tourism.

NORTH CRONULLA PRECINCT COMMITTEE

Residents' issues in North Cronulla, South Cronulla & Woollooware

9th September 2019

NSW Dept of Planning

SHORT TERM RENTAL ACCOMMODATION (STRA) NSW LEGISLATION SUBMISSION

The Precinct Committee makes the following comments on the discussion paper and attachments.

#### NO PROTECTION FOR DETACHED HOUSING – ADJOINING NEIGHBOURS

There is a lack of equity in the relative rights of strata title owners and individual single dwelling residents. Under the proposed legislation and regulatory regimes, strata title owners can, by a majority vote of the corporate body (75% of those present at the relevant meeting), prohibit the STRA Operations within the building, other than when it is a unit occupied by the owner.

The owner of residential houses have no such right of veto. The rules should be the same for all owners. This could be corrected by allowing a 75% majority of nearby neighbours to prohibit STRA operations within their street or zone. If there is any doubt about how this could be done, given that home owners do not live in one building, the right of veto could be allowed to a majority of the closest neighbours to the property - say the nearest 15 or 20 neighbourhood houses.

Neighbours of detached dwellings around a STRA would be more adversely affected by noise and other issues than home units on levels below or above the STRA property.

#### LARGE NUMBER OF DAYS OFFERED TO AIRBNB OPERATIONS IN NSW BY THIS LEGISLATION

The legislation on STRA offers AirBNB style accommodation up to 365 days a year when the host is on site during the letting or 180 days when host is not on site.

Sydney has a population of around 5 million, larger than Paris, Berlin, Vienna, Barcelona and other cities listed. It is worth noting the limits on AirBNB operations set by major international cities:

- New York (20 million) – advertising an unoccupied apartment for less than 30 days is illegal. (IE No host, no short term lettings).
- London (8.8 million) STHL (STRA) is allowed for up to a total of 90 nights in any calendar year.
- Berlin (3.7 million) it is illegal to let more than 50% of an apartment on a short-term basis without a permit from the city.
- Paris (2.5 million) - authorisation is required for STHL (STRA) longer than 120 days
- Vienna (1.9 million) and in Barcelona (1.6 million), most short term rentals are barred.
- San Francisco (900,000) - STHL (STRA) defined as a rental of all or some of the primary residential unit for less than 30 consecutive nights.
- Vancouver (650,000) - require a business license for anyone doing short-term rentals.

NSW should allow no more than 180 days under any circumstances and, as mentioned hereunder, allow up to only 90 days in certain circumstances.

A “host” can be an owner, an agent for the owner, or even a tenant. When booking a house it is highly uncommon for a host to be on site. Keys are handed over by an owner or agent and often it’s the cleaners that arrive at your designated time of departure.

The rationale for the STRA to be allowed for 365 days a year when the host is present is difficult to understand and if this is to be allowed, it should only be when the Host is the owner and lives in the property.

A host should provide contact details to all nearby home owners, not simply the adjoining ones.

#### PROVISION FOR A 90 DAY LIMIT ON STRA

It has been noted from the background notes that Byron Shire Council was offered to prepare a planning proposal that could introduce a 90 day threshold in the most impacted towns of the local Government area. It is not clear from the discussion paper what the outcome from this has been.

The reasons for the offer to Byron Council are understood but it is not considered that there are sound grounds for making such an offer to one council only. It is believed that a 90 day rule should be applied across the state for all areas/zones nominated by the relevant council.

Such an arrangement would help to reduce the adverse impacts of STHL on neighbourhood amenity, noise, and anti social behaviour, excessive people and vehicular traffic, parking issues, problems with garbage etc.

It would also help to reduce the adverse impacts of STRA on permanent housing rental availability and adverse impacts on motel/hotel accommodation industries.

**“PARTY HOUSES”**

In Qld the Sustainable Planning Act enables a local planning scheme to declare that a “Party House” may be “assessable development” requiring approval and restricting “Party houses” to particular precincts and or ban them from others. Similar protections should be provided for in NSW.

**STRIKES INITIATED BY SURROUNDING HOME OWNERS OF DETACHED HOUSING. –**

This is extremely difficult to see how it would work in practice. Apart from calling police, who are often not available for this type of call out, it is extremely hard to prove, under strong privacy laws, what is actually taking place within the STRA.

**LEGISLATION FOR BUSINESSES OPERATING AS BED AND BREAKFAST.**

It is understood that strict licensing and other rules and regulations are in place for traditional Bed and Breakfast establishments and it is not clear why similar controls have not been put in place for STRA establishments.

Yours sincerely

**Submission**

1. Complying Development: STRA in residential strata schemes must be classed as 'complying development' with inspection by Local Council or a private certifier, not 'exempt development'. This is the only way to ensure the mandatory fire safety standards are met.
2. Day Caps: Un-hosted STRA must be capped at 60 days for the Greater Sydney Region to contain STRA to 'Home Sharing'. All STRA to count toward the cap. No exceptions.
3. Development Consent Conditions: Residential apartment buildings in mixed use and commercial zones with express prohibitions on short term letting must have their development consent conditions respected and preserved.

4. The Register: The planning law changes must not start without The Register, which must be run by Government or a neutral platform not operated or controlled by the short-term letting industry. The Register must include the days of occupation and all the platforms on which the premises is listed, Local Councils must be involved in designing the system. Local Councils and NSW Fire and Rescue must have access to the data.

5. Host Obligation: There must be an enforceable obligation for hosts to register their premises before it is listed and used for STRA purposes. This should be part of the complying development criteria, so it is clear the use of unregistered premises for STRA is illegal and penalties apply.

6. Platform Obligation: There must be a legal obligation for platforms and agents not to list any unregistered residential dwellings for STRA. International experience shows that without such an obligation, platforms will continue to list thousands of illegal apartments. Platforms must also have an obligation to share data with State and Local Government. All listings and other advertising must clearly display the host's unique ID.

7. Charges and Fees: Residential strata schemes must have clear authority to levy additional charges and fees to additional wear and tear and costs whether STRA is hosted or un-hosted.

8. Flexibility: Local Councils must have flexibility to set a lower cap and apply zoning restrictions to meet their strategic planning objectives.

**Subject:** Re: Submission extension request - Stayz  
**Attachments:** Stayz submission on NSW Government STRA regulatory framework - 11.09.2019.pdf

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Director,

Further to my email below – on behalf of our client Stayz please find attached the finalised submission (including Appendix B) from Eacham Curry, Director, Government and Corporate Affairs at Stayz.

I believe we successfully uploaded this final version via the online portal earlier this evening but did not receive confirmation so are resending here.

This submission provides a background to the company and presents our perspective on four of the features of the NSW Government's draft regulatory framework that we believe require further clarification and development, in particular the:

1. Draft planning instruments
2. Draft Code of Conduct for the Short-term Rental Accommodation Industry
3. Proposed industry-led STRA property register
4. Commencement timeframe and 12-month review of regulatory framework

In Appendix A we have summarised our responses to the questions posed in the Discussion Paper. In Appendix B we present recently commissioned data showing the short-term rental accommodation sector's size and economic contribution to NSW and its tourism regions for the 2017-18 financial year.

Our aim through this submission and in our further engagement with the NSW Government is to raise the policy and regulatory issues that require detailed attention and the solutions that we think are best suited to deliver on the Government's policy aims. In doing so, we have sought to provide value to your deliberations and a starting point for our further engagement with the Department and the NSW Government.

An acknowledgement that this submission has been received and accepted would be appreciated.

If you require further information please don't hesitate to get in contact.

Kind regards,

**Lucas Pender** (on behalf of Eacham Curry, Director, Government and Corporate Affairs at Stayz)

**Subject:** Submission extension request - Stayz

Hello,

Following my call with Suzie Hatherly this afternoon I'd like to request a short extension on behalf of Stayz for their submission on the Short-Term Rental Accommodation Discussion Paper.

I have attached a draft here (not for publication).

Appendix B (to be added) will present recently commissioned data showing the STRA sector's size and economic contribution to NSW and its tourism regions for the 2017-18 financial year.

We will have the final version with you as soon as possible this evening.

Best,

**Lucas Pender**

**Submission**

Observations on the new holiday letting regulations

By Jimmy Thomson of the Flat Chat website and newspaper column

Both the proposed Code of Conduct and the Registry of STRA (holiday letting) premises are essential steps in allowing apartment owners and renters to regain some control over their homes.

The cavalier way in which the concept of genuine shared ownership (through such mechanisms as strata schemes) has been allowed to be undermined and damaged by entirely fake “sharing” in the commercial exploitation of empty homes, will some day be seen as the betrayal of whole communities that it is.

All the more shameful is the fact that this was perpetrated to allow a minority of individuals and one or two multinational corporations to make (literally) untold profits at the expense of people who believed they were buying and renting homes, not rooms in de facto hotels.

Meanwhile, the proven, fundamental dishonesty at the heart of the “home sharing” business is the only justification that the government needs for making the new regulations as tight and enforceable as required to restore some sanity to the sector.

Dishonesty? We are dealing with companies and individuals who use the flag of convenience of personal privacy to mask their true nature.

The great fiction that some online agencies are all about individuals letting rooms in their homes to impoverished visitors has been exploded time and again, yet it goes unchallenged by our lawmakers.

In short, we are dealing with entities that have shown themselves to be neither entirely honest nor transparent in their activities. They ignore proof that their hosts flout planning laws and strata by-laws, refusing to de-list them, despite claiming they require hosts to obey local laws.

These same agencies now expect us to believe that they should police themselves.

Based on their misleading publicity campaigns, their misrepresentation of statistics, their selective reporting and their failure to reveal the true extent and nature of their businesses, they cannot and should not be trusted.

The same applies to many of their hosts, many of whom for the past few years have knowingly flouted local council zoning and strata by-laws for their own profits. And perhaps both the agencies and their clients can start paying tax on those profits.

The proposed code of conduct and register should be allowed restore a level of honesty and decency to the holiday letting scene, especially in regard to apartment blocks. But that will only happen provided they are given teeth.

This is not about punishing genuine home-sharers. It’s about deterring those who would break the rules in pursuit of profits, and that will require meaningful penalties and simple mechanisms by which the culprits can be exposed.

The registry should be a simple system, paid for via a fee to an independent, possibly commercial agency, which would provide two unique serial numbers – one for the host and one for the property.

Agencies that listed properties without having both serial numbers would be in breach. Proven breaches of the Code of Conduct would result in fines (as outlined) while the serial numbers would be blacklisted.

Further finessing of the rules could include:

1. Any breach of the Code of Conduct or failure to register should result in immediate, if temporary, suspension by the apartment and the host from all online agencies until the matter is resolved by an independent tribunal such as NCAT.
2. Owners Corporations should be allowed to charge illegal or unregistered holiday let “hosts” the full costs of investigations and tribunal actions, should it be proved they were operating illegally.
3. Illegal or unregistered holiday let hosts should be required to compensate owners’ corporations by the amount they earned while they were operating illegally.
4. NCAT should be able to issue enforceable orders allowing officers and agents of the owners corporation, as well as fire safety officers, to enter apartments that they have good reason to believe are being used for illegal or unregistered short-term holiday lets, to check and gather evidence.
5. Owners and tenants of apartment who have been proved to be in breach of the code of conduct or the rules of the register, should have to inform any other strata scheme where they own or rent homes, that they have a history of ignoring or flouting the law.
6. All holiday let strata apartments should carry a 10 per cent additional fee on their levies to compensate for additional wear and tear of common property, use of facilities, additional administration costs and disruption.
7. From Day 1 of the new legislation, apartment blocks that have been given planning approval on the basis that they were not for holiday letting, should have, by default, a new by-law that reflects that status. This would protect owners who bought in on that basis. The owners corporation can remove or change the by-law by normal processes later, if they wish.

As a final observation, it’s all very well for people to be excited and enthused by “disruptive” entrepreneurs. But this is an opportunity to assess who and what is being disrupted.

This is not just about noisy parties – far from it. One of the main reasons people choose to live in apartment blocks is for personal security. That is severely diminished when you don’t know who your neighbours will be from one weekend to the next.

The whole strata system is based on all owners paying a fair share for the use of common property. That is disrupted by unfair “sharing” with paying guests.

And long-term tenants are having to compete with tourists if they want to stay in areas that they may have called home for decades.

It’s time we stopped encouraging disruption for its own sake. This is an opportunity to apply logic and fairness to the situation before we end up worse off than the cities around the world that have already been gutted by holiday lets.

**Subject:** Feedback on Short Term Rental Accommodation provided by 11 September, 2019

Feedback on the Short Term Rental Accommodation was until 11 September, however I couldn't find a link on your website to register my feedback today (11 September). Please ensure the below is included when reviewing feedback.

My feedback relates to Section 4.2.4 and in particular that "No more than 2 persons/bedroom or 12 persons, whichever is the lesser. "

We have a large home with 7 bedrooms (which comfortably sleeps up to 17: 12 adults, 5 children and also has cots for 2 babies) which is available for short term rental in the Shoalhaven shire. Our guests quite often are family members gatherings to celebrate significant birthdays/wedding anniversaries of elderly relatives or just getting together to enjoy extended family time. By restricting the number of persons to 12 this would mean these groups would be restricted in their numbers and they would either be unable to meet together as a family to share a celebration over a weekend or have to rent another house increasing the cost of the family gathering and reducing their time together as they would be in different locations.

Also quite often families have younger children or babies that may need to sleep in the same room as their parents, by restricting the number of people in bedroom to 2 this could put undue stress on younger members of the family not being able to sleep in their parents room.

We also have one room that has four beds, two single beds and bunks this rooms is type that enables younger members of the different families to sleep in the same room and enjoy the company of their young relatives, creating fond memories of the times spent together.

Thank you for considering the above.

Regards

Paula Carleton

**Submission**

Dear Sir/Madam,

I have been a permanent resident of Byron Bay for 52 years and an owner/rate payer of a four bedroom family residence for 38 of those years. My wife and three children were all born and raised here. We live only a few blocks from the main street and have witnessed the unprecedented growth of Air BnB in our area. For example, of the fourteen residences in our short and narrow lane way that ends in a cul-de-sac, only three premises are owner-occupied...all the others are owned by absentee landlords (mostly from interstate) and short-term rented, either on Air BnB, Home Away or Booking.com just to name a few of the prominent sites, or a .com site sign out front to contact for bookings. This situation has led to late night noise and anti-social behaviour that has seen the gradual loss of amenity for residents, particularly those of us living anywhere near the CBD. I could go on, but rather the purpose of my submission is to urge those in power to implement the guidelines proposed that would view Byron

Bay as an exceptional case...i.e.limiting the number of days a property can be short term holiday let.Additionally, this proposed exception if passed needs to be strictly monitored and those found in breach penalised.

Yours Faithfully,

P.J.Prideaux

58 Shirley Lane

Byron Bay 2481.

Byron Bay 2481

**Submission**

I can't talk for every town and city in NSW, nor the world, but what I know very well, having lived in Byron Bay for 22 years, is that Byron Bay is suffering a huge housing crisis.

Not because of the lack of housing being built, but because most of the houses built end up empty most of the year and available only for holiday accommodation rental or AirBnB.

This has pushed all the locals who didn't already own their own house out of Byron and now they are being pushed further and further.

Housing prices are being pushed up by all the rich investors, coming to buy or build and not renting long term to locals.

The houses for holiday letting, without owner present, disturb neighbors and get heaps of complains. The police ends up being busy for petty noise disturbance calls, working locals can't sleep.

Not to talk about the amount of extra tourists that the holiday letting brings to a town, without council having the ability to charge them a bed tax. The extra use if the info-structure, roads, etc has a major toll on council's finances.

What about the approved holiday letting businesses who have paid extra for DA approval, who pay extra in taxes, who make sure health and safety is all ok? They are all closing down, not being able to sustain the competition with people who don't have to comply and pay anything extra.

I personally don't find it right to overcome council's decisions. Every town and city is different and they should have the power to decide what is best for their own town, for the particular circumstances.

Nothing of this kind is ever good at a national level. You are taking local council's power away and destroying our towns.

Let council decide what is best and how long to limit holiday letting for.

Thank you

Byron Bay NSW Australia 2481

**Submission**

I, Marie Hayes object toThe new proposed State Environmental Planning Policy (Short-term Rental Accommodation) 2019 under the Environmental Planning and Assessment Act 1979 .

The unlawful Short Term Rental Accommodation has resulted in a rapid recent change in demographics in Byron Bay resulting in increased crime, unavailability of affordable rental accommodation forcing people living on the streets, being the highest number in NSW.

In my culdesac alone abuse to home owners by short term rentals e.g. people unknown every 3 or 6 months is an ongoing concern, bicycles, lawn mowers house hold items stolen, mismanagement of parking ,rubbish ,and undue noise in a residential zone where children and workers need their sleep , Quiet enjoyment and peace of their property is a common law. It is abhorrent and pure greed that someone interstate or over seas can buy 20 houses in residential zones in Byron Bay as an investment to let out in full for short term rentals leaving them empty for 6

months of the year , no onsite management causing disruption of small town, (population 9,000) residential living, a noticeable breakdown of community values, preventing Byron Shire families and working residents of all ages to find affordable full time rental accommodation. To adhere to relevant zoning for Short term rental accommodation is the only way forward and equitable to legal Bed and Breakfast Establishments and managed services apartments by development application for residential zones. Yours sincerely Marie Hayes

**Submission**

The attached submission Word document file represents the views of the Strata Committee of Strata Plan 96847 Vance at Harold Park, a large apartment complex comprising approximately 220 apartments, within the City of Sydney.

The submission addresses each question in the STRA Discussion Paper, with "no comments" for some questions.

We would appreciate an opportunity to discuss or clarify any of the issues raised in our answers to the questions.

Please note, SP 96847 has by-laws relating to STRA that we understand directly relate to the approved Development Consent for the building, which provisions we were required by the City of Sydney to include in our by-laws. Obviously we are concerned to clarify the current legal status of these by-laws and our approved Development Consent.

Prepared by John McPhail, Secretary, SC, SP 96847

**Submission**

Good afternoon,

I wish to make a submission based on the information above for the new planning policy for STRA. My one concern is limiting properties to 2 people per room. Many holiday houses are designed so multiple families can share accommodation and holiday together. The policy doesn't allow for bunk rooms for children or large rooms that can accommodate various sleeping arrangements. Please reconsider this proposal.

Kind regards  
Sarah Galvin

Short-term Rental Accommodation Submission

Eurobodalla thanks the Department of Planning, Industry and Environment for the opportunity to provide comment on the short-term rental accommodation (STRA) draft code, draft amendment regulations and STRA property register. Eurobodalla Shire Council recognizes the complexity regarding the policy review and welcomes clarity for STRA in NSW.

The following points form the basis of Eurobodallas's submission, which is currently in a draft form. We will submit a completed endorsed submission by COB Wednesday 18th September. Thank you for extending the submission time

frame.

**Key Points**

- The STRA Framework and regulations should support local planning and regulatory responses which reflect the specific contexts of each community. The one size fits all approach strips away our ability to strategic plan for this important land use.
- The majority of residential zoned land in Eurobodalla is mapped bushfire prone land and a minor amount is on flood control lots, meaning that little STRA in the region will fall within the exempt or complying development criteria
- Eurobodalla supports the industry led, funded and managed property registration system and the administration and enforcement of the code of conduct.

To Whom It May Concern

I STRONGLY object to being told how many people I am allowed to accommodate in my house. Regardless of the fact that I choose to currently rent our property as short term rental, this is bordering on complete over-governing ie. SOCIALISM at it's best (or worst).

To OUTLAW a bunk room? Are you joking?

A maximum of 12 guests in a house that might sleep 14 or 16. HOW DARE YOU - who even thinks up these ridiculous rulings and limitations?

How have you decided that 12 guests in a house should be a maximum?

For your information, we have a large house that sleeps 14. One bedroom is a bunk room (extremely popular for children and families). Another is a HUGE upstairs room that sleeps 4 people. The remainder of the accommodation comprises of 3 bedrooms that sleep 2 people per bedroom.

Should this legislation be passed then I will seek compensation from the NSW Government for loss of earnings and loss of freedom of choice. We have voted and we live in a democratic society - how dare the NSW Government dictate how many people are allowed to occupy a house.

I would appreciate your response to my appeal.

Regards  
Katrina Welch

My submission is a simple one. The proprietors of a strata plan, (a strata community), must be able to say how they want their strata plan to run. Democratic decisions taken by the proprietors must be allowed to stand and should these decisions be flouted by individual owners, then the decisions of the strata plan must have enforceable remedies at law. It is not the place of the government to force short term tenancies on any unwilling strata community.

thank you, Ian Curdie.

Submission regarding proposed changes to legislation outlined in the Government papers:  
Short Term Rental Accommodation Businesses operating in Residential zoned areas.

Dear Sir / Madam

The recent decision of our Council to reject an application for STRA has greatly improved the amenity of our neighbourhood and I thank the Council for their decision.

The worry of STRA visitors' behaviour in not considering neighbours has gone since the Council's decision. Neighbours in the past have had to tolerate inconsiderate and badly behaved visitors, the main issue being the loud

noise until early hours of the morning. Visitors are just there to party! They have scant regard for the immediate residents.

It should not be up to residents to fix the problems. The owner can earn \$1000 per night whilst sleeping peacefully somewhere and the residents in surrounding homes of the STRA lie awake with noise.

I hope that the Central Coast Region is included in the Greater Sydney Region and therefore that the decision by Council in rejecting the STRA application is upheld.

Yours faithfully  
Noel

The Elan  
1 Kings Cross Rd  
Darlinghurst 2010  
September 10, 2019

As Secretary of the Elan Strata Committee elected by the Owners Corporation, I write on behalf of the residents of the Elan, a residential strata plan of 275 apartments over 38 floors, with approximately 450 plus owner-occupiers and tenants.

The Elan is situated in Kings Cross Rd Darlinghurst and our by-laws for over 20 years have prohibited short term letting. The proposed changes are of great significance to our residents, presenting an unnecessary risk to our Strata Plan. STRA is not a 'minor impact' in residential strata.

As proposed, the changes to STRA essentially re-write the NSW strata housing model that has been successful for the past 60 years and open the Elan to tourist and visitor accommodation without need for planning permission or control. The proposed Code of Conduct ignores the major impact of STRA on planning issues, increased costs, security, privacy, and the ability of the Strata Committee to meet legal obligations under the NSW Strata Act. The proposals contradict the essence of NSW strata management, which requires an Owners Corporation and their Strata Committee to control strata plans.

#### Costs to Owners Corporation

A disproportionate cost will be borne by non STRA owners and the Owners Corporation in residential strata buildings with STRA operations. Concierge workload, wear and tear on lifts, gyms and other utility areas, administration and management costs will increase due to increased changeover in the numbers of residents throughout the building. In NSW, "serviced apartments" and complying "B&B" in mixed-use areas must currently meet stringent conditions for segregation of lifts and floors, and often Owners Corporation approval. STRA in NSW now does not. Unless these issues are addressed, owner/occupiers, and investors with residential tenants, will be significantly subsidising the business models of those running STRA business, while having no power to monitor the number or place of STRA within their strata building.

#### Complying Development

The proposal for short term letting to be classified as "exempt development" will turn apartment communities into quasi-hotels without any of the limitations or controls that currently exist under NSW planning law. All STRA needs to be classified as "complying development" so that Local Council is able to ensure fire safety standards are adhered to appropriately.

Fire safety in residential strata schemes must not be left to the self-regulating and fragmented industry of amateur hosts or platforms. Self-regulation poses an unacceptable risk to all strata residents, including STRA 'guests.'

It is not possible for an Owners' Corporation to know whether fire safety upgrades have been undertaken or whether the work meets the required standard, whether such work has damaged common property, or whether it interferes with the building's existing fire safety system.

Therefore, in order to ensure mandatory fire safety standards are met, all STRA in every residential Strata scheme needs to be complying, not exempt development, and why inspection must be by Local Council or a licenced certifier.

#### Un-hosted Day Limits

Allowing short term letting in the absence of existing planning restrictions, and Owners Corporation control, ignores the shared structure, legal responsibility and intrinsic nature of Strata Plans.

We do not want un-hosted STRA in residential Strata schemes. At a maximum, STRA in residential strata schemes must be capped at 60 days for the Greater Sydney Region. Under the proposed change a 'host' can apply for consent to increase the already excessive 180-day cap for a 'non-complying' development. The reduction in days allowed would help contain STRA as 'home sharing', not commercial business.

STRA in a Principal Place of Residence category allows a permanent resident in a Strata scheme to conduct un-hosted STRA for 21 days without it counting toward the cap, in addition to 180 days in a single year. This pushes the boundaries of what is a principal place of residence in a residential strata scheme, and when is sharing in essence a commercial tourist business? Volunteer Strata committees cannot monitor compliance. The assumption that a 21day stay is less intrusive or disruptive is fallacious - STRA 'guests' are not neighbours. All un-hosted STRA must count toward the maximum cap without exceptions.

## Residential Strata Schemes Register

STRA must be registered by an independent body. The planning law changes should not start without a Government run register or at least, a neutral platform that is not part of the short-term letting industry. In addition, registration for STRA in a Strata scheme with a by-law currently prohibiting STRA must be prohibited.

An enforceable obligation for Hosts to register their premises before it is listed and used for STRA purposes is essential. This should be part of the planning law criteria, so it is clear the use of unregistered premises for STRA is illegal and penalties apply. The Host must display the unique Host ID on all listings.

There must also be a legal obligation for Platforms and agents not to list an unregistered residential dwelling for STRA. Platforms must also have an obligation to share data with state and local government. All listings and other advertising must display clearly the Host's unique ID.

The Register needs to identify STRA properties, including address, location, number of rooms and days availability, reporting on days of occupation (caps), and the Host must disclose all the platforms on which the premises is listed. Local Councils must be involved in designing the system and have unimpeded access to data. The Register needs to generate a unique Host ID. The register must be easily accessible to residential Owners Corporations so that they can meet the relevant legal obligations.

Local Councils must have flexibility to set a lower cap and apply zoning restrictions to meet their strategic planning objectives.

Residential Strata schemes must have access to the Register and authority to levy charges and fees to Hosts conducting STRA.

## Questions:

What specific authority and pathway will our Owners Corporation have in regard to addressing the following issues that will arise -

Responsibility for breaches of By-laws by 'guests' and extra non-registered 'guests' or visitors in STRA

Non-compliance with fire regulations

Misuse or damage to common property

Safety and security of children and elderly who live in residential strata

The STRA changes as proposed do not allow Owners Corporations the autonomy, democratic right to self-determination, regulation or power and authority to ameliorate the financial and social burden of STRA that have been imposed upon us. Owners Corporations and their volunteer Strata Committees will no longer be able to confidently meet their legal obligations under NSW Strata law, which will damage residential strata as we know it in NSW. Our homes will no longer be ours.

Yours truly,

Kerry Needs

Note that while we live mainly in the ACT, we do have a property in Wollongong which we list on AirBnB so we do have a stake in the new regulations and code.

In particular, we have a concern about 5.4.1 (a) for class 2 dwellings in the Fire Safety Standards. If we interpret it correctly, it means that within the apartment, the bedrooms, bathroom, and laundry which all open into an internal corridor inside the flat would need self-closing fire doors! These would be defeated by people simply propping these internal doors open because of the inconvenience of constantly having to open and close them just to walk around in the place you're living in. See further notes and comments about the other matters raised in the discussion paper which are in the attached document. By contrast, 5.4.1(b) does make sense - just having a self-closing egress door to

keep smoke within a particular apartment and out of the communal corridors - people won't keep it propped open and it will do its job.

**Categories:** Rob submission 3.0, non Air BNB run

Good afternoon

NSW Health intends to make a submission on short-term rental accommodation with respect to swimming pools and private water supplies (for premises that do not have a public drinking water supply).

The submission is pending approval. I expect that we will submit tomorrow.

Please call me or email if you wish to discuss.

Kind regards Paul

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Re; Proposed changes to STRA is Brunswick Heads & Byron Shire NSW

My wife and i currently own a flat in Brunswick Heads which we use regularly when we are visiting, the rest of the time we Holiday Let our flat.

We do this to offset some of the costs associated and to make it easier for us to spend time in the shire that we love, We have the flat managed by a local agent and we adhere to all regulations currently in place by council and the body corporate.

It is a flat in a block surrounded by permanent tenants so we are very sensitive to the fact that our neighbors do not want to be disturbed by noise or anything else associated with having guests in our flat, we have very strict rules regarding noise and behavior and as a result we do not have complaints.

With regards the new changes to the STRA,

Firstly we would not be able to absorb any further costs, we are not making a profit to start with and any further cost involved in having our flat as a holiday rental would simply have us cease us running it as a holiday rental; i.e we

would pull it from the holiday market;

The same would apply to having more administrative work involved in running the holiday rental; this would simply have us cease us running it as a holiday rental; i.e we would pull it from the holiday market;

We know that our tenants service the eateries, shops and general business in Brunswick Heads & Byron Shire, if we stop allowing visitors this will no doubt have a reduced effect on local business,

My wife and i are active in two body corporates in the shire as well as the Brunswick chamber of commerce, we speak with locals constantly and we know that our thoughts on this are reflected by everyone we have discussed STRA with,i.e everyone we know that is currently running a STRA at present have said that they would cease doing so is the new regulations come into effect, is simply wouldn't be worth the effort. In our case it would be easier to leave the flat vacant while we arent in town. As i said we are not doing it for the money and if the Byron Shire think that holiday letting is a big money spinner for the owners then they had better do a bit more research, because it isn't.

Kind regards

Stuart Riley

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

I would like to voice my opinion on the growing number of air b&b in the shire. I feel this increase in holiday accomodation, mostly situated in suburban areas, is an intrusion on the daily lives of the ratepaying residents of Byron Shire in many ways. The additional noise, the irregular hours, the parking issues, the increased burden of the use of facilities, predominantly water use for our shire are just a few of the reasons against the existance of air b&b.

**I agree to the above statement**

Yes

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

My wife and I currently host STRA in a 'granny flat' apartment which is part of our detached house. We are always present as hosts and the income is vital to our retirement income stream. We receive wonderful reviews from guests and our neighbours are supportive as no inconvenience ever occurs to them.

I support all aspects of the proposed plans. Safety and appropriate regulations are supportive of hosts, guests and neighbours.

It is important that the benefit of STRA to the economy of local communities and the state is recognised and valued. The structure of 'holiday and travel' accommodation has changed dramatically since on-line platforms came into being. There is now a much greater volume and diversity of accommodation and it has led to a huge increase in

traveller numbers across the state. Quite simply, traditional accommodation providers cannot alone provide the volume and diversity of accommodation that is being taken up by today's travellers.

It is important that the provisions for 'hosted' STRA remain as currently stated; Exempt development for 365 days per year. There should be no move to allow Councils to seek a lower number of days, as is the case for non-hosted STRA.

While there are some complaints about STRA, the vast majority occur without inconvenience to others. This must be recognised in the big picture.

Byron Bay 2481

**Submission**

To whom it may concern

I live in Byron Bay and in the last 10 years, I have watched neighbourhoods become fragmented by more and more Airbnb and other private holiday rentals. The street in which I live has now - between numbers 1 – 20, approximately half those properties given over to holiday lets. 1 owner now has at least eight homes within the town with 2 more infill blocks in the process of being built for holiday let.

We have had to put up with drunken behaviour, increased traffic, loud music, overflowing rubbish and even bucks parties with a stripper. One place opposite can generate \$10,000 per week in a peak period in summer.

The latest data from Inside Air BnB shows that Air BnB properties in Byron shire have jumped from 1,172 in 2016 to 3,306 in August this year. Of those, 1,331 listings for an entire home/apt are listed by 359 landlords only - evidence of multiple landlords with multiple properties.

Byron Bay has to cater for 2 million tourists annually and these holiday let houses pay no commercial rates as do the traditional motels, hotels and other registered resorts who have to pay commercial rates as they are businesses. This new gig economy is entirely unfair for businesses that have been operating in the traditional way and providing for tourists. These owners make enormous profits by having their houses available all year round while residents are unfairly disadvantaged by the constant coming and going of holiday makers in residential zones.

Byron Bay is drowning in tourism and the sense of community is more and more fragmented by the large influx of holidaymakers and tourists from regional areas and overseas visitors.

We want to keep a sense of community and a sense of Neighbourhood within our streets as this gives a sense of belonging. These holiday makers have no investment in our town other than pleasure and taking what they can, while we have to put up with no ability to raise funds for infrastructure and the damage that they do in the process of seeking pleasure and enjoyment. They're not interested in contributing to the community which prides itself on the many innovative alternative sustainable ways in which we can protect the planet.

For this reason it is imperative in Byron Bay, due to its unique situation and location, that there is a 90-day cap on any holiday house that is not owner occupied, so that people who want to have long term rentals and a place to live take precedence over short term financial gain, and often greed, by many of these absent landlords. There is also a large number of vacant homes in Byron Bay that are investment properties, owned by people that do not live here, and further restrict long term rental homes. There are many families who have had to leave this area because of the inflated rental prices due to Byron Bay being a much sought destination on the world map.

Please give our small town a chance for a cohesive community that is not fragmented and fractured by profit and greed of the many who choose to game the system. There must be legislation and a 90-day limit, and for all these owners to be registered and pay commercial rates, just as the other traditional holiday places do.

Yours sincerely

Robyn Winter Blick

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I want to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows me to share my weekender with interesting travellers.

The Airbnb host community provides important economic opportunities in regional Australia and help us pay the mortgage and the bills. As a host I can add to the tourism experience with my local knowledge and personal expertise of my local environment and community. This boosts local small businesses from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I oppose the requirement for costly complying development permits. This will make hosting so much more difficult and the red tape will be discouraging for many hosts, and so reduce the tourism experience to the usual same/same that is so uninspiring. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. These proposed permits will end up making holidays across NSW more expensive, encouraging tourists to holiday overseas instead.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host, I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because there is no suitable wheelchair accommodation that supplies equipment for the disabled in western Sydney.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and

provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

My husband and I host Airbnb by sharing our small home in Nth NSW rural area of Kyogle. We have two guests max at a time and we do not make a large profit. We started this after becoming made redundant at year ago. Now in our 50s, it's difficult to find alternative work, especially in regional NSW. The income from Airbnb helps us enormously but it is very modest. It effectively helps us to pay our mortgage and council rates. We also recommend guests to patronise our favourite cafes, restaurants and shops so small businesses get a boost from local tourism. This is especially important in a struggling country town such as Kyogle which has a diminishing population.

We are deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for us to share my home.

We understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally we support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, we want to comment on the following:

#### STRA State Environmental Planning Policy

We oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

We oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if our house is approved to be safe for us to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

Our property already complies with these requirements. We take occupational health and safety regulations and obligations very seriously and we have an Operations Policy and Environmental Management plan having contemplated emergency situations which deal with evacuations and guest education.

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework. This does directly impact on us but I understand it is difficult for other Airbnb hosts.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a self funded retiree and rely heavily on holiday rental income at our holiday house in Copacabana to cover outgoings and general living expenses

The Airbnb host community depends on hosting as an economic lifeline to help us pay the the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I enjoy meeting people and sharing our beautiful local area. As I am now retired, it supplements my income and allows me to manage the upkeep of my house. It keeps me active and engaged and prevents loneliness. I feel proud that I am bringing tourist dollars into our community. I have visitors from all over Australia and overseas, friends and families getting together.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because, the cost of living makes it a challenge for me to afford a property and get ahead. I enjoy the ability to host people from different walks of life, cultures and nationalities. It has opened my eyes up to cultural diversities and acceptance. Some of the conversations that I have had with guests, and the views I now hold were different from that formed in the media.

For me leaving Airbnb the way it is, is about giving an opportunity for individuals to make ends meet and increase social acceptance of cultural differences.

Thank you for reading my submission.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

As an older woman I depend on my occasional guest to help cover the cost of living. Since I have become an AIRBNB host I have managed to pay my rates. Before hosting I was in debt to the council with no hope of repayment. I offer a valuable service to my guests both local and overseas. I have the opportunity of working in my own home to help the economy both locally and Australia wide. I cannot afford costly changes to my home. AIRBNB gives me dignity and the ability to survive. Without it I might be another homeless older woman. I also offer low cost accommodation to other older women who visit my area. This is an important social consideration. As a home owner I have few guests per month, perhaps as little as seven nights, but my value to my local community is significant. If you disrupt this valuable service you will cause much harm to people like me with few options for income that makes living possible.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I'm unemployed over 57 and have been looking for a job for four years. I have applied for at least 50 jobs. It seems no one wants to employ anyone in the late fifties. I have studied to keep my skills up to date over the last 15 years to keep me relevant for today's job market.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

I operate three properties on short term rental and we have had an amazing time with guests staying. All have been respectful with no issues. We are selective in who we let stay. To seek regulation as strict as what is proposed is absurd. It's costly, time consuming and imply makes it hard for anyone to make any income in this state.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I want to give people from either Australia or overseas visitors, a very positive and wonderful holiday experience in the city of Coffs Harbour & and surrounding areas.

I really enjoy hosting guests in my home and providing lots of information & recommendations on the attractions, both natural and commercial, for them to enjoy and impacts positively for both my guests and the community as a whole.

I believe I provide an accommodation experience for my guests that is unique in a very positive way, offering home style accommodation is vastly different than staying in a motel, resort, caravan park or the like.

I place a very high priority on educating my guests on safety regulations applicable to my building and the absolute highest importance on that and also the compliance with local laws, regulations etc to ensure it is a safe and happy experience for both them, myself and neighbours.

I have had nothing but glowing reviews and feedback from my guests about their holiday experience and activities they enjoyed and this has generated repeat visits with only positive results for all concerned including the local economy.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides an essential component to my family's income and ability to provide for my retirement. My Airbnb Property is a key asset in my SMSF and would have to be sold if I am not able to Airbnb under the current system - at a likely loss. My Airbnb also provides a retirement income to me retired neighbours who are caretakers and manage my property, the income they have earned has enabled them to pay off a financially destructive reverse mortgage they had taken against their home and now provides with enough money to afford regular holidays and the retirement lifestyle they have always wanted. Your decision to change rules will destroy their ability to supplement their self-funded retirement income.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,

Trenton Jamieson

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a senior citizen who does not draw benefits. I am able to support myself from the income derived from Airbnb, hosting within my home. Not only do I derive an income but the experience adds to the quality of my life, introducing a wide range of people to my life. The World comes to me.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I love hosting and sharing my home with national and international guests. I like to bring people to Newcastle. Home sharing as in Bed and breakfast has been around forever.

The Airbnb host community depends on hosting as an economic lifeline to help me pay the bills. At my age I struggle to get a job in Newcastle. I also recommend my favourite cafes, galleries, museums, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because of the scarcity of jobs in the area, it helps me to stay in my own home, Airbnb is efficient & has great customer service and this is the best job I've ever had in ByronBay. I also pay locals to help me as the need arises, refer my guests to local businesses and look after my neighbours by having strict house rules, a high bond and Being very fussy about the attitude of my guests & adherence to house rules

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I love being able to share our beautiful home with those who are visiting our area.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I'm a teacher who likes to travel and it works very well to host in the holidays while we're away.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage, superannuation and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

We host on Airbnb because it enables us to earn a small amount of income to help up in our retirement. We don't receive the aged pension or any other rebates or assistance. We are self funded retirees and just want to add to our income. With low interest rates etc we continue to struggle to fund a way to have an income that meets our basic needs

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I enjoy meeting people and it increases visitors to the country and it's my home and my choice who stays in my home just as it's your choice to have visitors in your home. After all you can have visitors who stay in your home and you can receive gifts for payments no one would know about. We are being open and honest and providing much needed places for people to stay and visit australia

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I need to supplement my income.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I want to provide my feedback on the Government's proposed regulations.

I host on Airbnb for the following reasons:

1. As retirees it provides just enough income to prevent us from having to go on the government pension.
2. There are no hotels or motels in our immediate area and we provide accommodation for a local tertiary institution, local wedding venues, our immediate community and for overseas visitors who wish to be central to the Central Coast, the Watagans, various beaches, Lake Macquarie, the Hunter and Newcastle.
4. People travelling from either north or south from centres such as Brisbane/Melbourne/Canberra/Woollongong etc like to have a stop-over mid-way in the country rather than the city and choose our location as a half way spot and perhaps because it is more affordable.
3. As retirees it also serves us as a hobby as we enjoy interaction with travellers and love to show, and tell them, what is available in our area.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am retired and I do not draw a pension from the government. The income I receive is my major source of revenue, without this opportunity I would be in a dire financial position.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it helps me support my living in a community where employment is a problem and I have space when my kids are not in my care.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because... at 61 yrs I lost my job and have not been able to get another. Hosting guests in my home has been a godsend for me. I am also unable to receive any government assistance as I have a couple of rental properties which pay for themselves i.e. the rent I receive pays mortgage therefore am not eligible for the newstart payment, without Airbnb I would be literally up the creek without paddle. Apart from the financial rewards of airbnb'ing my home, I get a social benefits. Living alone, without the social engagement of a workplace each day, I love the interactions I have with of my guests who are from diverse nationalities, ages, and life stages. Apart from the above, I am expressing my creativity styling my home (spending in local businesses and have honed my housekeeping skills to perfection

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. I feel this is especially important in our regional and country communities that are severely effected By drought and economic downturn. For farming communities this provides an option for diversifying their income in tough times from using their homes and local knowledge to provide a local insight to enhance travel experiences for both domestic and overseas travelers. It also provides a social and emotional support system for both travelers and those struggling with the devastation of the drought.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home and will be detrimental to communities and individuals that benefit socially, economically and emotionally from these accomodation options.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides a safer way to sublet my apartment where I'm covered by insurance and visitors are properly vetted. Rather than going through sites like Gumtree which are saturated and make it difficult to know who you are hosting.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is so rewarding to share my beautiful home with travellers and giving them 'local' knowledge about the area. It has become an important income stream and more importantly, creating more jobs in our small country town (Population 2500)

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. - Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,  
Mr Burrows

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides necessary income to support my daughter as a solo parent.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb with my existing home when we go on holiday to help pay for our trip and our mortgage. I live in a quiet residential area, and because it's our own house, we are very picky about who stays, and it's only up to 4 weeks a year.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because of the ease and control I have over sharing my home with guests. My Airbnb is one private room and my guest is more a part of the household.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills.

I recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. I guide Airbnb guests toward local businesses by conversing and providing a folder for them. The folder contains a Sydney map and information thereby advertising and promoting nearby businesses: transport options - (aside public), i.e., shuttle services and tourist bus companies; sightseeing - both in and out of Sydney City, e.g., The Blue Mountains and Sydney Beaches; local business - i.e., eateries, restaurants and shopping at Broadway Shopping Centre, Paddy's Market and Chinatown, The Rocks, Circular Quay and Sydney CBD.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am an independent worker with a small business and I derive an extra income from it that is much needed. I also enjoy receiving guests because I live on my own and I love contact and travelling (which I can't do much currently) and hear about other people's travels and lives.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a recent new home owner and am struggling to make my mortgage payments. Without air bnb I would not be able to afford my home in this already impossible first home buyers market.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I work part time and although I only host guests a couple of times a year, it provides me with a small supplementary income which I declare in my income tax assessment.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is an excellent way to make efficient use of my place when I am away. It also provides a good source of alternative income to cover off the rent that I have to pay while I am away.

The Airbnb host community depends on hosting as an economic lifeline to help with rising affordability issues (including bills, rents and mortgages). By recommending favourite cafes, restaurants and shops, and other small businesses in the area, hosting also contributes to the local economy and tourism.

It is deeply concerning that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. The global economy's future is in a sharing economy, and it is only right that we embrace it and harness its potential instead of resisting change.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development applications. As an urban planner, this appears to me as a narrow-viewed interpretation of the permissibility of short term rental accommodation within existing zones. Treating STRA similar to other tourist and visitor accommodation uses is not appropriate given its temporary nature. A more nuanced approach is required. The City of Sydney's tourist and visitor accommodation plan for example, highlights the need for a more diverse supply of short term accommodation here in Sydney. This move of making it more complex (and potentially costly) for more non-traditional STRA supply to be available is directly counter productive to supporting the visitor economy. Home sharing (when used and done as it should be) also do not impede on the housing supply. It merely allows existing owners and renters to share their homes and use each dwelling more efficiently from a supply perspective. It also helps with a huge proportion of renters and owners that are currently in housing stress (paying 30% or more of their income in rent or mortgage).

This proposed intervention will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. This is therefore in no way an appropriate solution to both the housing affordability and low-supply of short term accommodation issues. If Sydney is to continue to be a global city, the NSW government should do better in addressing these concerns, not just slap more onerous regulation (see how the lockout laws affected the night time economy and creative and cultural uses in the city).

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. #### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides a quality apartment in a snow resort and the local economy relies on dwellings such as mine for its lifeblood.

Airbnb provides a safe and easy way to provide my community with the visitors it needs.

The Airbnb host community also depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a single mother who gets no child support or government benefits. I share a room in my home to assist paying large bills as the cost of living continues to rise and allows me to take a break once a year. Without this varied, sporadic and valuable income I would struggle to make ends meet. To have to pay red tape to government to be permitted to do this would outweigh the small amount I make from it or have to have someone in my room more than I currently do.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. The people who come and stay are coming to the area and spending money which is what is best for our economy. Stop making it so hard for everyone to live a happy life!!

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive. And after all they are our homes not the governments we should be able to do what we like with them we already have enough rules and regulations!

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we enjoy showing families country living. Children who live in cities have little opportunity to experience things like collecting eggs, interacting with animals, getting fruit off trees or watching the bees make honey. We provide that in the beautiful surround of the Tweed Valley.

The Airbnb host community depends on hosting as an economic lifeline to help supplement the pension. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I want to provide my feedback on the Government's proposed regulations.

I am a widow living alone and I use the space my children once occupied to host on Airbnb to help with my mortgage and road to retirement. I provide a valuable service to visitors to this area where there are no other hotels or motels nearby.

Like me, the Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a single mum and our home provides an extra source of income which enables me to spend more time with my 1 year old son. I rely on the extra income. It helps me pay my mortgage and our bills. Without it I would have to put my son in childcare full time, which as you know is incredibly expensive in NSW.

As an Airbnb host, I make sure that my guests hear about local attractions and businesses which boosts tourism and business.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows me to generate some extra income from my investment properties. Especially as a single parent it allows me to spend some time with my family, rather than having to work extra jobs to cover the mortgage repayments.

I also genuinely love travel and meeting guests from around the world and giving them suggestions and ideas on how to experience our beautiful city. I always recommend my favourite local cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host, I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it brings in essential income to help me pay the bills and my mortgage, especially given I am a single person. I am coming to the end of my career, with future work dwindling, and the income Airbnb brings in, allows me to stay in my home and in my community which I love dearly. This brings a level of security comfort and joy in my life, essential qualities to maintain a healthy and full life, and without the income, I would most likely be forced to sell my sanctuary and home of 19 years, which I have worked so hard for during my working life. I also enjoy meeting people across all generations, both locally and from around the globe, enjoying the engagement and perspectives my interactions with guests always bring. This has given me new perspectives on the world we live in, and life itself. I love to share with my guests the special qualities that Australia and my neighbourhood embody, and believe a homestay provides guests with a far deeper insight into our wonderful country than hotel accommodation could ever bring. The relatively modest rates I charge also allow less advantaged people, especially both older and young people to travel the world and experience different cultures. This engages me socially and intellectually, and I have made some wonderful friends through hosting.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. I believe this to be an important component of my local community of Redfern, with evidence of ever-increasing closed shops in the neighbourhood.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have 6 expensive teenagers and only have them every other week because we are a split family so need a house big enough but have 5 empty rooms on opposite weeks. Our area have very few hotel options so it is ideal for visitors. We have plenty of onsite parking so our street is not impacted. When we go on holidays it helps fund the expense of our family of 8. Without Airbnb we are less likely to be able to afford these special family moments.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I love my house and want others to enjoy an authentic and real experience here our lovely town of PMQ.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because, as an older resident and living in a regional area, I find it extremely hard to get sufficient work to pay the bills. During our peak tourist season, there is a massive demand for accommodation that can't be met without people like myself opening part of our homes to support both the tourists and local business community. I still live in the home and I am able to supervise and provide support and recommendations to my guests, who are not only very grateful, but often return and recommend our community to their friends.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is flexible and easy without unnecessary 'red tape'.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my granny flat is empty.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

As usual, the government is focusing on the WRONG areas to improve our way of life and community.

So, WAKE UP and try doing a reasonable job. after all you are all paid by us - the tax paying public.

Sure, regulate in a sensible manner, where people may be requiring, for example, party houses to be sorted. We live on 77 acres and nobody is affected by our hosting.

If we dont host we will become just another burden on the government.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

There is NOT enough of the appropriate type of lodging in our area to meet the needs of established businesses

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

My wife and I host on Airbnb because we love showcasing the Australian way of life to overseas visitors. At the same time it provides a much needed boost to supplement our irregular income.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am certain that QANTAS and the airline industry are selling more seats because people are now able to afford overseas holidays more readily

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am recently separated from my husband and he has destroyed my financial situation so I share my house with visitors to our area

It provides a clean comfortable bed for people who want to stay for a week or just one night at an affordable price. The income of air bnb isn't huge and I use it to pay my rates and if anything is left over the rest of the money goes into the local community stimulating the local economy which has got to be a good thing. It also gives me a sense of purpose giving back to the community meeting people from all over the world I have a son with Down syndrome and he also loves meeting new people so it is giving my son stimulation we are actually supporting the local tourist trade by sharing our home and even helping reduce the road toll as a lot of people choose to stay after they have spent a full busy day seeing the beautiful south coast instead of driving 2-3 hours back to Sydney that choose to stay Airbnb as it is not expensive instead of driving home tired after a long day of sight seeing. The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it gives us a small boost of income to our pension which is not saved but used or pay increasing living, service and power costs, for example, this year our septic system service fee (a NSW government requirement) rose by 10.%, an insurance fee increased by 40%

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host, I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a stay at home mum and this is a great income for our family. It also provides reasonably priced accommodation to people visiting this area. There are only 2 boutique hotels that charge over \$400 per night which makes it unavailable for many families.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however, parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have the space that is not used very often for family/visitors and the income generated from paying guests supplements our other income and lessens our dependency on future aged pension payments.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because, it enables me to share my home predominantly during festival and peak seasons. I offer affordable accommodation and provide a service to the local community/environment. I would average about 7 weekends a year hosting Airbnb.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

### Submission

With reference to the following dot point

No more than 2 persons/bedroom or 12 persons, whichever is the lesser

We feel this proposal is unfair, inequitable and discriminatory.

We have a two storey beach house in northern New South Wales with 5 spacious bedrooms which, if we adhere to

the above proposal, would allow 10 guests. Our house can comfortably accommodate 13. We target our audience very carefully and find that our guests are predominately extended family groups – grandparents, children and grandchildren - gathering to enjoy an affordable, family holiday together at the beach. We do not accept bookings from those wishing to party. Our House Rules, which guests must confirm prior to our accepting their booking, have been a successful deterrent for noisy, disrespectful guests. Living in the area, keeping peace with our neighbours, is paramount.

- ♣ One of our bedrooms comfortably allows two sets of bunk beds which equates to a maximum of four for this bedroom. As a rule, these four guests are children as young as 3.
- ♣ At times we assemble a travel cot to comfortably fit in with a queen bed making three per room, mirroring the arrangement some families live with.
- ♣ In a common area we have a day bed which comfortably sleeps two children or one adult.

Possible alternatives for management of this proposal could include...

- ♣ allowing exceptions to the rule upon inspection
- ♣ considering dimensions of bedrooms

Limiting occupancy to a maximum of two per room would seriously impact families seeking an affordable, beach holiday. Families possibly would not book, stay for shorter periods or take the cheaper option of Asian or Pacific Island holidays.

Our digital guide book, sent to all guests, promotes restaurants, shopping centres, attractions and natural environments in our local area. Loss of this patronage would severely impact our local area.

We feel this proposal is unfair, inequitable and discriminatory.

Steve & Marg Walgers

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because... my wife and I are retired. We raise some money hosting and enjoy the experience of meeting people.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Submission**

Submission in response to the 'Short-term rental Accommodation - A new regulatory framework' Discussion Paper.

At present, STRA is regulated differently in different local government area (LGAs) across NSW.

It has to be understood that different councils also have different requirements. Small regional communities might be happy to have visitors come to their area and contribute to their economy in a responsible fashion and have no issues with buck's parties, weddings and schoolies.

However, some communities with a high influx of visitors on an ongoing basis might need a very different approach. Especially if there is already a thriving, licensed tourism accommodation industry present.

Byron Bay is a great example where it is going wrong. Just like other popular places such as Western Australia, Tasmania, Amsterdam, Venice, Barcelona and New York, Byron Bay struggles with a partially unlicensed tourism accommodation industry.

Byron Bay actually already offers a variety of licensed accommodation styles ranging from luxury resorts to hotels, motels, serviced apartments, backpackers and B&Bs. The licensing of those business is challenging for the proprietors. They comply with fire safety regulations, they pay commercial council rates and contribute to the infrastructure maintenance and upgrade through their licensing.

The Byron Shire Council has a DCP and LEP regulating the accommodation industry. It is clearly stated what requirements are needed, business owners go through the process and voila...

With the advance of ease of listing any kind of building (!! garage, sheds etc) for tourist accommodation purposes this has completely gotten out of hand in Byron Bay. Dwellings built to accommodate a family now host twice the number of people it was intended for most of the time, putting pressure on existing infrastructure such as drinking water and waste water facilities. In addition those houses do not offer adequate parking for the extra cars.

Houses are being purchased and sold with the sole purpose of letting them out as holiday letting places, which inflates the purchase prices to a level that no one can afford to just live in them.

Importantly, the rental pool is shrinking and existing rentable places are at a premium. Ironically, some people that do rent, sub-let their place and move in with relatives when they receive a booking.

Backpackers, who are particularly vulnerable being from overseas, have been charged \$500 per week in a shared room in a house!

The houses built with a DA for a 'residence' should be mainly used for this purpose.

NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"

Neighbours of those residences used for unlicensed holiday accommodation - who thought they had moved into a home in a residential street - suffer from sleep deprivation and stress as there is generally no host on-site. Council can't do anything as it is a residential house not a business, police might not always be able deal with the noise issues long term. All they can do is visit ask the visitors to turn it down. However, the next day with new people staying, the neighbours have to go through the whole process again. Hearing the people arrive, music starts but it is still early and then wait until it is past 10 pm.....

Byron Bay tried self-regulation by the Holiday Letting Organisation (HLO) who funded a Holiday Letting hotline. The idea was that a host would get three strikes and they could no longer operate. It doesn't work. The hotline recommends anybody who complains in the middle of the night to call council and report. Council, the next day, says to call the hotline or the police. The police has better things to do as their hands are tied anyway: every time it is a different person causing the noise, so no one can be held responsible. Neighbours give up and sometimes try to confront the perpetrators, resulting often in verbal abuse and revenge vomiting, vandalism and littering by the tourists who feel entitled to have the time of their life.

The next week those poor people seize up when they hear the roller bags coming down the drive way next door.

The proposed Code of Conduct for STRA sounds admirable, but to have an exclusion list for hosts and guests is not realistic.

As owners of licensed accommodation, we have seen a significant decline in viability of our business. Before we

even open our doors we have a long lists of costs to keep our license current and up to date. Unlicensed premises are able to charge a much lower fee without having all those costs and there is no GST they need to pay despite offering exactly the same service we do.

Surely, the government is missing out on an enormous amount of GST they can't collect.

The number of people staying has not increased, instead people expect to pay less. Our prices are back at what they were 15 years ago! We can't afford staff anymore, we had to let them go.

Many of our colleagues have left the industry, their business being considered worthless. Why get a DA if you will be restricted by the number of people that can stay, have to provide off road car parking, disabled access and pay extra to top it off?

As the unlicensed operators do not pay any contributions, do not have to pay for fire inspections once a year or increased council rates it is impossible to compete with the low prices these rogue operators can charge.

AirBnB uses the 'average' of incomes to show how little money is made by individuals, but they have not published the median or spread of money made. If one person can have 30 odd places and uses so-called 'super hosts' to manage them, you can't tell me that there is no money to be made.

Of the many, many listings in the Byron Shire there are 1331 listings for whole houses/apartment with only 359 landlords, which means that those hosts are not just your regular mum and dad trying to make an extra buck they are full blown commercial operators.

To suggest that these operators can operate 365 days a year is a ridiculous proposal. The hosts/landlords know it is worth their while, why don't they go through the process of obtaining a license. They had their go at seeing if it works for them financially. They could even do a business plan!

Even if Byron Bay would get a 90 day limit it would be not workable for our community. This would still be 45 weekends. This would still be the whole month of January and then 2 more months.

And what does it mean 90 days? Can the property be available for 90 days in total or does it mean 90 nights booked? What if there is a cancellation of 4 days, can that place be re-booked for another 4 days at another time? Can they keep the cancellation fee? How will this be monitored? What about direct bookings? How would this work? How can you expect the on-line booking platforms to keep track on this and be honest about it if they make a 20% commission on each booking.

This does not provide any clarity at all!

It is understandable though as politicians - for example the Deputy Premier - have their own property listed as a holiday home as well.

The proposed framework states that un-hosted bookings of 21 or more consecutive days will not have to comply with the applicable day thresholds.

If a family comes for a 3 week holiday and rents a house, the owner can do two lots over summer and still have 90 days for the rest of the year?

This certainly offers a loophole. Someone can just rent out their property to someone else for 6 months and they can sub-let it on an overnight basis. How is this going to be policed?

The fact that unlicensed tourism accommodation is put under the banner short-term rental is terribly confusing.

The overall proposal seems to have the attitude of "It is all too hard to police, so we are just going to allow it and pretend there is a system in place". Meanwhile, our town is being taken over and no locals will be left. No staff available for restaurants, schools, the hospital, etc because they can't afford to live here.

It is a fact that a regulated industry is being de-regulated, all for the short-term benefit of realistically only a few and

the on-line booking agents. This is no longer about home sharing or someone letting out their holiday home on a few occasions a year.

## SUMMARY

- The proposal is that a regulated industry has been de-regulated and needs to be re-regulated, but is ridiculously unfair compared to the existing licensed businesses in that same industry
- Unlicensed tourist accommodation providers are not paying GST even though some of them supply overnight accommodation, breakfast, room service just like hotels, motels and B&Bs. They are not paying commercial rates and are not subject to Council inspections for fire safety and compliance
- The proposed Code of Conduct is not a realistic approach. It can not be policed and implemented. The process to bring awareness to hosts and guests about their unruly behaviour and solve the problem of loss of amenity to the neighbours that way is flawed thinking.
- Owners of a property responsible to the noise/interruption to daily life of their neighbours should be held responsible by law when rented out to tourist or visitors. That way there is clarity for the authorities, neighbours, hosts and visitors.
- If people/hosts want to rent out their homes/properties on a commercial basis to tourists or visitors, ie more than twice, thrice a year, they need a DA and contribute to the community as has been decided on by the local council. If local councils feel there is no need for a DA than let them do that!
- Our town of Byron Bay and surrounds and our business are severely negatively impacted by unlicensed operators. A maximum 90 night limit should apply to Byron Bay's unlicensed tourism accommodation, but 60 days (or less!) would be much more preferable.
- We are not confident that the proposed reforms are realistic.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it helps my wife and I pay the mortgage. We are a young married couple who work hard and still struggle to make ends meet with crazy apartment prices. Airbnb supports us with a little extra income that really helps with the mortgage.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. I've made a booklet, like many others, with pictures and addresses of local businesses.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation,

registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

The proposed regulations for short term holiday letting are entirely inadequate.

I live in the Byron Shire where there are 3,306 properties listed on Air BnB, this is a rise of 200% in three years.

Of these, 80% are for whole homes. This shows that the idea that Air BnB is for spare room letting is a fiction.

In this shire Air BnB has destroyed the permanent rental market and has pushed up property prices.

The lives of local residents who own their houses are being disrupted by suburban party houses.

Byron Shire was promised a cap of 90 days but there is no evidence of this.

Short term holiday letting should only be allowed if there is a permanently residing house holder.

The renting out of whole houses should be regulated by local councils.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host an Airbnb in Mackerel Beach (your electorate). We bought the tiny shack in 2013 (after it sat on the market for 2.5 years). Although it was not heritage listed it was considered a local piece of history and a landmark by locals. However, due to its poor condition (asbestos clad exterior and termite ridden interior) and the size of the land upon which it sits, it was a knockdown and development scenario. Instead, we restored the shack (using environmentally friendly practices) and preserved it for many more generations to come. After friends and family who came and experienced the restored shack encouraged us to share it and our sustainable and environmentally friendly principles with others we began making it available on Airbnb. Our aim was simple: to positively influence the environment and our guests, one couple one weekend at a time. Judging by the amazing feedback we've received to date The Little Black Shack has done just that. Perhaps you'd like to visit the shack and see what successful, low impact eco-tourism can look like.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend local transport, boat hire, cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. How can the government allow thousands of families to use their homes on Pittwater's Western Foreshores and Scotland Island (designated bushfire zones) yet prohibit guests from

staying in the exact same homes? Are guests lives more important than home owners? The impact this will have on owners, property values, the tourism industry and local businesses will be catastrophic. Has government looked at the number of properties that are in Bush Fire Zones? For instance, the entire village of Thredbo falls under this category.

I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because with experience it is a better option than real estate agents and I do not want to rent the house permanently. I have total control as to the amount of time I want to rent the property.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

We host on Airbnb because we have a home that has been designed specifically for those people who are looking for a fully wheel chair accessible holiday accommodation , where they can come and have time away in comfort and enjoy the Central Coast and all it has to offer  
Our home has a lovely view of the ocean which they can enjoy in the comfort of our home. The income also helps us as an economic lifeline as a self funded retired couple

I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it enables us to meet so many interesting people from all over the world and different parts of Australia. It also helps us enormously to help cover our significant mortgage repayments and takes a lot of financial stress out of our lives by having this extra income stream.

I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. Why create unnecessary red tape and penalise hosts who take all the responsibility and liability themselves at present. This is a further intrusion into our personal choices and right to invite anyone into our home.

I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. #### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I love meeting new people and travelling myself. Hosting helps me save extra money to be able to travel more. The rising cost of living in NSW has had a negative effect for our savings so earning extra money by simply having a fellow traveller rest their head is a blessing for us.

As a business owner within your electorate I can confirm that since the increase in Airbnb properties in the area I have seen an increase in tourist dollars to our small town, who would otherwise have either not visited the area or stayed at larger hotels and not even set foot in Cessnock

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

2. Are there any elements of the draft instrument that are open to misinterpretation or require further clarification? Yes, the definition of STRA in Section 4 defines all STRA as 'commercial' however this has the potential to allow councils to force STRA hosts into complying with a Class 1B building as defined by the NCC building code Vol 2. This would be uneconomical for many people and I believe is in conflict with the intent of STRA regulation.

Additionally, this definition also seems to conflict with the draft Code of Conduct for STRA which states "Industry Short-term rental accommodation does not involve purely commercial accommodation providers such as hotels, motels and bed and breakfast establishments. It generally involves residential dwellings that may also be used by the owners for their own accommodation at times." This shows a clear separation between STRA and typical commercial providers who operate as a business as defined by the ATO. While some STRA are being operated in a business-like manner, the vast majority do not nor do the hosts rely on the income as their primary income. Further, it is unclear if a STRA is booked for more than 21 days, what number of days is actually counted? Is it 0, 1 or capped at 21? This requires clarification.

6. Are the specific obligations on booking platforms, letting agents, hosts, guests and facilitators in the Code adequate? If not, what other obligations should be considered for each of these industry participants? Why? There is an error in 5.4.3 which states "host must hold public liability insurance that is valid for the occupancy period. This insurance must cover: (b) damage to or loss of a guest's or visitor's property at the premises." Public liability does not cover property, only personal injury or death.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

9. What are potential ways to facilitate industry participants' access to the exclusion register while limiting potential privacy impacts? What factors should be considered? The proposal of a formal exclusion register hosts and guests is very positive however this should only be available to industry participants, not the general public. If this information were made public, it could cause embarrassment and distress to those named. 20 to 29 – Registration: A central register should be held by Fair Trading since each booking platform could only record the information for those who are registered with them. This would prevent people who have say, 2 strikes, jumping to another booking platform who has no history of their conduct and continuing like they have a clean record. The information would be provided by each booking platform as a standard export from their database.

30 to 32 – Access to Registration Data: Public access to the register has significant privacy and safety implications. There is no reason that anyone other than government and the booking platform should access to the sensitive information. This could also encourage criminal activity by allowing people to target STRA for theft (while tourists are visiting) or squatting (if the dwelling is vacant). I object in the strongest of terms to a register being made public.  
Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

7. Is the complaints process detailed in part 6 of the Code sufficient? If not, what other matters should be considered or set out in the process? Why? This is very positive, however, complainants who continue to make vexatious allegations, should be subject to penalty.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I have an amazing space within my home and decided to share it with travellers. I live in an area that is a half way stop between Sydney and Brisbane and popular as a stop over. The whole area is also popular with holiday makers. I know that this area struggles to provide enough accommodation when there are big sporting events etc here. I love meeting people and it keeps me active and mobile.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I have had enormous pleasure over almost six years in meeting and helping a great number and variety of people at the same time as I supplement my limited retirement income. Families who have stayed in my house include those visiting relatives in the local area; some coming for special events such as weddings; mature age students enrolled in PhD studies at Macquarie University; people needing accommodation while they attend specialist medical services at local hospitals; occasional tourists; sporting enthusiasts and Easter show workers from regional towns who value my proximity to Olympic Park and people on PR visas keen to get to know regular friendly Australians as they begin the challenge of making our wonderful country their new home.

My current guests from Iran fall into this last category and are benefiting greatly by having me able and willing to share local knowledge in a patient and positive way.

All of these guests have enjoyed dealing with local business people at Midway and Top Ryde because I recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following: regulations that would mean additional spending on lighting and other home safety measures. My smoke alarm installed immediately outside the booked bedrooms, a carbon monoxide alarm, fire blanket and small fire extinguisher in the kitchen already make my home safe for my guests. Added expense would make home sharing unviable for me. I live in an area where rent must be kept at a moderate level and I aim to present my home as "a home away from home". It has been made safe for me, so safe for others to enjoy.

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations

which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it enables myself and my husband to continue supporting ourselves financially. It also enables us to be able to keep living in our home for as long as possible while our health permits.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as a long time single mother, the upkeep on the house is expensive. The few dollars I earn after the work I put in provide some extra income to a house that I own and should have the right to use as I wish. I'm saving to paint the outside of the house as the wood is rotting.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired which I already have installed.
- Require evacuation or emergency plans and guest education, which I currently have displayed.

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

The people I think you should target is those people who lease many properties and run it as a big business. They should have different rules. For example, owning more than 2 properties. Often these people are living overseas and having locals clean them, with keys left in key boxes.

Don't make it difficult for the mum and dad, who sacrifice privacy for a few dollars, often where there are no hotels for visitors on a budget such as casual workers to Sydney, family members visiting family who don't have room to put them up.

Thank you for reading my submission.

Regards,  
Rhonda Rourke  
Forest Rd  
Miranda, Nsw 2228

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am struggling to pay rent in this day and age with my young family and ever increasing cost of living. I've seen the opportunity to homeshare and make some extra money to ease some financial stress. Orange needs Airbnb for tourism, health, construction and mining and if these proposed changes were to be put into place it would play a massive domino effect on our town with not enough accommodation culling tourism in the region affecting all local business.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants cellar doors and shops so small businesses get a massive boost from local tourism here in Orange.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as my wife & I are aged pensioners. The little I get from renting a room through Airbnb enables us to keep up with the increasing costs of staying in our own home.

As you would know the council rates, electricity, gas and water charges are rising quickly and without Airbnb we would be forced to move into aged care.

yours sincerely,  
Ronald Wilkinson

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it subsidises our business during the quiet periods.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

My wife and I have been hosting guests for nearly 7 years now. We make a single room available to guests in our 3 bedroom house, in a quiet suburban street, through listing it on the AirBnB website. It has during this time provided us with some financial security, but most of all it has given us the opportunity to meet with some wonderful and interesting individuals we would otherwise not have had the opportunity to know in our lifetimes.

Home sharing and hosting has been a part of our family for many years, even before AirBnB. In the 1990's we made available a single room in our home to many overseas students that primarily came to learn English at international schools in the Sydney CBD. Students varied from young foreign high school students, to mature aged married couples. We had the most wonderful experiences with them in the short time they stayed with us – generally 1-2 weeks. We also provided them with directions and guidance on what other places to see and visit here in NSW and interstate.

In 2013, we saw AirBnB as a direct extension of these experiences. As with students, our AirBnB guests come with glowing reviews and are fully verified by AirBnB and ourselves before we let them stay with us. Same applies to travelling and being guests ourselves. There is a total degree of 'trust' that flows both ways between host and guest. It is this 'trust' that bonds us and makes our experiences even more exciting and pleasurable.

This degree of 'trust' and verification does not exist in the Hotel Industry, or in similar accommodation providers such as Stayz or Bookings.com.

Our experiences using AirBnB have been varied and are widely different with each new guest. All have been pleasurable, and some have extended in to friendships, with many being return guests, all because of the fabulous experience they had in staying with us. Many ask us to visit us in their home town or country so they can reciprocate the experience.

AirBnB have provided us with a semi-structured, semi-formal, accommodation providing, income producing platform, that works for all parties be they hosts, guests, families or individuals. We think it works well for us and the many people we know and have met through AirBnB. We feel that the proposed legislation and its regulations have gone too far, and some are not necessary to maintain the already high quality of service we provide to our guests.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb to earn a small income so that we do not have to apply for a pension. I provide a clean room and a comfortable bed for travellers heading north and south to various destinations. Our Air BnB room does not impact neighbours and we keep the price down to accommodate those who do not want to spend a fortune on a room. We do not make a massive income from this but it means we do not have to dip into hard earned savings!

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because

1. I am a 76 year old self funded retiree only just outside the requirements of the Aged pension.
2. As a host with Airbnb I am able to earn that little bit extra to help towards living expenses and Strata levies.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows me a small income to support myself and my family. There are not that many employment opportunities in Coffs Harbour and this is a way that I can support myself and also provide a service to travellers that is affordable.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is a beneficial community activity. It helps travellers and allows us to be hospitable to others. It is a great thing for children to see others helping one another.

The Airbnb host community depends on hosting as an a viable sharing option across the world. We use it overseas and have enjoyed the warmth shown to us and we are motivated to do that for others. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. This cannot be underestimated.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have two holiday properties in Byron Bay that we run as an accommodation business and use for our own personal use as well. AirBnB is a great platform to promote the houses, but we also have them managed by a professional property management team, Luxico Byron Bay to ensure both guests and neighbours are taken care of.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. We also have a detailed compendium at the properties and online where I recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. We also use social media extensively to do this - @barefootesapes.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my homes.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive. For us specifically, the increased requirements regarding properties within bushfire zones are particularly onerous. We have recently completed significant renovations and building works to both houses and are fully compliant with all of the requirements so this would represent an additional expense and further unnecessary restrictions. Our particular location is actually within the central CBD area, but is across from a lovely nature reserve in the old town section so have a BAL29 rating imposed.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

We already adhere to all of these things as providing a high end, luxury home with all of the inclusions is what we are aiming for. We are already an exclusive AirBnB Plus host and a SuperHost.

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is a best way for visitors to experience and share our great city of Sydney. In doing so, it adds value and increases the economy by way of my tax payment/contributions.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it helps pay mortgage and school fees.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,  
Mrs Isele

Dear Director, Housing and Infrastructure Policy,

I run a short-term rental management company based in Sydney. I will go over a few aspects to dissect the underlying reasons on why a fair regulation on short-term accommodation is much needed. For a regulation to be fair, it has to be relevant and constructive to the current economic outlook of NSW rental market corroborated with ample facts and evidences.

As a local STRA host, I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because

(i) Home-sharing is my way to share the Australian culture with fellow travelers around the world. Most of the guests I have hosted love what they have been offered. Some of them chose to stay with Airbnb because they want to go local, explore the neighborhood, and connect to local people. Hotels do offer them great accommodation experience but short-term accommodations offer more than just accommodation, they offer a sense of personal connectedness, cultural immersion, and experience internalization.

(ii) Home-sharing is a business, but it is a people business that go deeper than superficial hospitality. As a host, I have had great joy sharing moments with fellow travelers over drinks, barby etc. Exchanging words and banter.... Hosting travelers has become an important part of my lifestyle. I am opposed to imposing the day thresholds. Why should my lifestyle be penalized just because I have done a great job in hosting people from oversea while corporate hotels are not as good as me in providing what travelers are looking for?

(iii) Home-sharing is a way for me to earn some extra bucks. Having this passive income stream helps me to pay my mortgage and finance my expenses.

As a visitor who chooses to stay with short-term accommodation ever since the birth of home-sharing model,

(i) I document my travel stories all the time and I love the creativity hosts put into their STRA. Some of my stays have been with STRA, not because how big the houses were, or how much money the hosts have put into each accessory, but it is just that "peer-to-peer" experience you can't get from a hotel. It doesn't make sense why I can't stay with certain STRA hosts whom can offer the best worthwhile STRA experience compared to the like of big branded hotels due to the imposition of day thresholds. Staying in a hotel feels like I have to sidestep all the "business traps". The snacks bar costs you extra dollar, the wines in fridge are another \$50. I also have to be of certain manners when I stay with a hotel. I am not saying STRA allows me to trash a person's place or be inconsiderate to neighbors, but I can be more at ease while staying with STRA. Also, STRA has been so good at offering these little goodies and drinks as a welcome gesture for me.

(ii) STRA is a way for me to explore the locals. I used to love staying in hotels because they are of certain standards. However, STRA nowadays have become a great alternative for travelers as they have evolved to outmatch the experiences hotels can offer. This allows me to have great accommodation experience but at the same time to be "inside" the local community. The people I come across while staying off the major tourist attraction areas are more real and more "unexpected". This adds an extra flavor to my adventure without only seeing the infrastructures and major scenes that are made to be seen by tourists. I love the rawness of traveling abroad. And I expect fellow oversea travelers will want similar experience when coming to Australia.

As a property investor, STRA has been a way for me to diversify my investment portfolio. The option to finance mortgage loan through STRA has added a push factor for property investment market in Australia, in turn leveling out the further downturn of housing market that has plagued Australia in recent years. I could not imagine if more property turn back to long term rental market after those regulation launched and how will this affect the property rental market. Somehow STRA vs long term have found an equilibrium in the Sydney rental market. If more property back to long term market which heavily affect the market and push the rental price down which might lead to real estate market drop again.

As a local business owner, thanks to the birth of home-sharing, more and more people in the local neighborhood are

opening up their home which attract more travelers to this “unseen” area. Their arrivals have helped local business to grow as they spend more money on services and amenities that are outside of the major tourist scenes. This has helped regional and local economy to grow. This also draws more attention to the local area and implores local councils to pay more attention to local business opportunities that will support local tourism and finance city planning.

The economic impacts of Airbnb on housing market in Australia:

The growing number of STRA has tapped into a significant amount of properties left vacant in the past and attempted to solve the longstanding issue of housing market being underutilized in Australia (Crommelin et al, 2018). The rise of Airbnb didn't trigger the inaccessibility of private rental sector to long-term renters but just amplified the distortion of existing market direction (Crommelin et al, 2018). So, to point finger at STRA for the unaffordability and unavailability of private rental sector is ruthless. We can't deny the contribution of STRA to the tourism market. The additional supply of STRA has created a buffer zone to facilitate the rising influx of tourists into Australia each year. It has also added \$1.6 billion to Australia's gross domestic product between 2015 and 2016 and has “supported” over 14,000 jobs. 74% Airbnb properties in major markets across the world are located outside the main tourism district, and the flow-on benefit we saw from the Airbnb effect can funnel down the surrounding local business which is recorded by 27% expenditure spent toward food service at local restaurant and a combined 29% went towards leisure activities (Deloitte, 2017) Here we see a free competitive new market, without the regulation of government, has this economic trickle-down effect. More complicated unnecessary regulation will strip away this economic effect on NSW's GDP.

Is This A Fair Regulation on STRA?

We understand that a fair proper regulation on STRA will ensure that every involving party can comply with the reasonable requirement set forth without complicating the process of home-sharing with unnecessary bureaucracy measures that see no practical implication on the safe and sound operation of hosting. In general, I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments to a “fair regulation on STRA”. Here are some relevant rebuttal points:

(i) 180-day thresholds: This is a very unfair regulation as this approach is an effort to undermine a free competitive existing rental market. Having the rental cap per year is essentially similar to penalizing business which provide great valued hospitality services. We understand STRA hosts are positioned on a higher playing grounds as they don't have to pay hotel tax and adhere to the strict safety regulation standard for hotels etc, but government should consider levelling out the field by imposing taxes on registered STRA instead of limiting their access to the playing ground. We agree on property registration for STRA but not for the purpose of facilitating the overseeing of hosts' compliance towards the 180-day threshold regulation. The imposition of day limits will further make the already inelastic housing market even more inelastic, further worsening the price fluctuation in the STRA and LTRA simultaneously.

(ii) The “strike system” introduced as part of the effort to regulate STRA will be controversial upon implementation. We understand this regulation is targeting “party house” or properties that disrupt neighborhood peace. But, most of the hosts in general do not allow “partying” in the house. We are concerned that the existence of “strike system” will unfairly punish hosts who are against “partying” to begin with (and as a result becoming a victim of unfair complaints and regulation by neighbors and building owners).

a. How are the Code of Conduct commissioners going to evaluate the validity of lodged complaints with consistent and fair judgment given that these complaints are filed based on subjectivity entirely? Hosts are most likely going to be penalized more often than not.

(iii) Regulation is hard to pin down if someone violates the 180 day threshold given the conditional clause that if hosts are present in the premises, it is “exempt development”. There seems to be no practical and efficient way to verify every single reservation whether hosts will be at the premises.

(iv) I specifically want to comment on the Environmental Planning and Assessment (STRA) Regulation 2019. The additional safety and evacuation requirement for dwellings used for STRA will impose additional cost barriers that are already stacking up against hosts while yield no significant practical application. I oppose to the introduction red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- a. Respect the ancillary use of my home for home sharing
- b. Mandate smoke alarms
- c. Require evacuation or emergency plans and guest education

This requirement can be easily achieved with brief safety instruction given upon check-in.

(v) I also oppose the requirement set forth by the STRA State Environmental Planning Policy for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. If I am just sharing my home for a few weeks a year, applying for a permit may not even breakeven for my cost. This makes hosting uneconomical. The expensive permit, if implemented, will severely impact holiday homes up and down the coast which have existed for decades without these permits. Of course, the additional cost will shift from owners to travelers, making traveling in NSW more expensive.

(vi) I oppose the potentially costly, complex, and onerous STRA property register. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost-effective self-assessment form, which is only required in limited circumstances. I don't see how STRA property can do a better job in protecting hosts and guests given that existing platforms like Airbnb has had systems in place to remove guests or hosts that are violating community agreement. Most importantly, profit and reputation are much more powerful driver for quality services than regulatory compliance. This has been achieved due to the connectivity and transparency of the internet where feedback with reviews, pictures and peer references are readily made available. If host wants to thrive in this STRA business, they will of course have to meet all the societal and community expectations of how a good STRA looks like.

What Does Regulation on STRA Imply?

If we think the annual day threshold regulation can address the issue of equity concerns, the existing housing market participants are still going to benefit from the STR and LTR market regardless. The issue at hand is the barrier to get into the housing market for low to middle-income earners, and government should place more emphasis on how to help these socioeconomic groups get into the playing field.

If we think the 180-day thresholds regulation can put more houses back to the long-term market:

(i) Homeowners are going to turn their property to short-term rental during peak travel season and turn it back to long-term rental during non-peak season.

(ii) Housing in suburbs like Bondi, Darlinghurst, Manly will exhibit this constant fluctuation between STRA and LTRA, creating more uncertainties for long-term renters. This will also create further frictions and barriers to enter into rental agreement. So, do the long-term renters get to live in these areas during off seasons but have to find somewhere else to live during travel season?

The Bigger Picture: Relationships between Housing Affordability & Availability & STRA

There have been investor-led building booms around Gordon, Miranda, Botany, Sutherland and Homebush areas. The number of units listed for rent in June 2017 has ballooned from 17,500 units to 32,680 listings, leading to a drop of rental price \$25 a week less median rent than last year. If we look at figures from Domain.com.au, there has been a city-wide level drop of rental price in all area from June 2017 to 2019, particularly for a one-bedroom unit in Chatswood which recorded a \$120 drop per week between September 2017 and March 2019. Sydney-wide rental vacancy rates have almost doubled from 1.7% in 2017 to 3.2% in 2019. So, the question is: Do we have undersupply housing issue?

The undersupply of long-term housing market, in the inner city Sydney and areas around Bondi, Manly and Darlinghurst can be resolved if better public transport system can be achieved that connect non-traditional rental area such as Northwest Sydney where there are massive boom of new housing for rents to these area. A good transport network is the best way to resolve the issue of overcrowding in certain areas given limited supply of long-term affordable housing. Imposing 180-day threshold will only solve the housing issue in these areas seasonally. This ties back to my point (ii).

Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I propose that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

A New Economic Framework:

As the NSW Government tries to best regulate home sharing, it is important to understand how working with existing market force can yield a more competitive and better economic outcome than imposing stringent rules and complicated planning requirements that can dampen the benefit of home-sharing. Home-sharing culture has sipped into a lot of homebuyers' decision-making process and it has very much been a new rising relational culture for residents of NSW. We want to work with the government to best regulate home-sharing but in an innovative way that is reflective of how people travel and how people use their homes.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I have listed my property and decided to host on Airbnb because it provides me with great flexibility in renting my property. I am able to earn a higher income from guests travelling from overseas through the airbnb platform when compared to the traditional long-term rental.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I have also placed many pamphlets and menus from the local cafes, restaurants and shops for my guests to view and consider so the small businesses get a boost from the guests staying at my property. Many guests decide to follow my suggestions and provide business to the local cafes and restaurants rather than purchasing groceries and cooking at home over a short stay as it is more convenient.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home through airbnb.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills while I study to improve my employment future possibilities. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. We offer to take them to the local bistro, give them links where they can book themselves a surf lesson, hire a bike, a car, which routes to take, and several other suggested services they can use and which in return boosts the local economy, especially in rural areas, areas where it is difficult to find employment, surrounding businesses welcome a boost in their clientele, so, hosting goes a lot further than just taking away otherwise rentable properties ( only in tourism and high density areas) one rule should not apply to all, we are in a remote area and if it was not for air bnb , we would struggle a hell of a lot more to make ends meet.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a widow and it helps to support my pension . Keeping me financially independent. As well as having the opportunity not to feel too much alone.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we enjoy meeting people from all around the world, as do we when traveling overseas ourselves. We enjoy showing true Australian hospitality and authentic experience of genuine Australian people. We only host in our home whilst we are there, ensuring no inconvenience to neighbors or area. Due to our own travels we host less than 20 nights per year. For us it isn't about making money, it's about hospitality and the joy of meeting fellow travelers.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my partner and I have relocated for a few years for his next project and I want to be able to continue enjoying my home by sharing it with guests rather than permanently renting it. It is also providing a vital income source to help me pay all my bills while transitioning into a fully eco career path - and to catch up financially after being a solo mum for most of the last 18 years.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. I am currently leading the launch of an eco focussed local host club in the area and have had a very enthusiastic response from local businesses to a host partner program so we can grow the eco tourism market in the Mountains.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. I think it's a particularly wonderful opportunity for single mothers and women over 50 who own property to create vital income sources especially in regional areas and where mainstream employment may not be a viable alternative.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

My experience as an Airbnb host has been a very positive one since we started late December 2018. I have found the Airbnb platform a great regulator of good hosting and eco tourism. Thank you for reading my submission.

Regards,  
Simone Novello

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I feel it's wonderful to offer travelers the choice to stay in a home and enjoy a local experience, rather than the choices prior to Airbnb which were either cost prohibitive home stays or a generic hotel experience.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

I am opposed to 180 day cap per annum when the host isn't present. I feel people should be able to use their properties to provide accommodation 365 days a year and would like to highlight that Sydney has a real shortage of accommodation for traveling families. Also imposing the 180 cap will not lead to an increase in housing in the inner city. It will result in home owners leasing their homes 180 days and then offering short term leases on furnished properties which will only benefit the serviced apartment market.

I also feel that buildings zoned for short stays and serviced apartments should be exempt from the 180 day cap when the host isn't present. Owners of apartments in building zoned for short term stay should not be penalized as they have purchased their property on the basis that it can be leased 365 days a year on a short term basis.

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for

me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because to supplement my income and provide a comfortable lifestyle for my family. I have been working since I was 16. I was never dependent on government money. Paid for my own education and continued to work and support my kids education. I have always paid my share of tax unlike the multi millionaires who get away from not paying tax or the doll bludgers who never work and get all the benefits from government. I have worked hard for what I have and now I am working towards my retirement.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as I had forced retirement, and we have a space available, the small amount we receive from hosting our space helps with our Mortgage and household.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my wife and I have built a granny flat for our parents to use in a few year's time. In the meantime, we have chosen to use Airbnb to rent the villa as it gives us an opportunity to have local and international guests experience Sydney from a homely perspective. It's not rented full time but we like to keep and eye on it through cleaning and general maintenance. It

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation,

registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows us to speculate on the property market at the same time as a negative geared asset for tax time. It was an easier way to upgrade our residence as we moved out of the property to create the Airbnb.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I enjoy sharing our unique property with guests from all over the world. We are located in the Hawkesbury at the crossroads of 2 rivers in settled in a unique converted little Church! We are in the heart of local communities and also fuelling local businesses, we hosts many guests coming in the neighbourhood for weddings.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

Dear NSW Government,

Regarding your current proposal of State Environmental Planning Policy, I would like to raise a few points for your attention.

I respect your intention to regulate the short-term rental market. However, I believe your upcoming proposal is too strict and is detrimental to small property owner like myself.

As a stay-at-home single mother, I have 2 children and I live mainly by the income from AirBnb short-term rental. I bought my 3 apartment properties 7 years ago and I still have 23 year of mortgage to pay off. I tried long-term rental before. However, the long-term rental price and rent-out rate in my area are not idea at all and left me a large gap between rental income and mortgage payment.

When I was introduced to short-term rental option like AirBnb, Booking and Stayz, I found a new way to support my family. I had experience in hospitality before I had children and I know very well how to manage and organize service for hotel or service like environment. I am proud to say that I have a quite successful small business in the short-term rental. I have been hosting over 200 guests in the past and most of them loved their experience in my properties. They found it this way of rental is more affordable and more flexible than the traditional commercial hotels or long-term leasing contracts. I received so much great reviews from those guests, which not only increase my income but also boost my confidence for life.

According to Butterfly effect theory, even though my business is small, it does initiate some other related business to flourish in my community, such as cleaning, plumbing, furniture, florist and ect. It is fulfilling for me to bring opportunity and make my part of contribution to my community.

To be honest, the reason I am sharing my story of short-term rental with you, is to raise your attention to reconsider your regulation proposal. I think it is too strict and not being considerable for the situations of small short-term rental business owners like myself. Even though I know I have rights to claim support from Centrelink for single parent payment to support my children and myself. I do not want to do that because I regard it undignified to the live on welfare system when in fact it could have been possible to make a living on my own.

At the contrary, I would like to pay my own share of tax; I would like to help and support other people; I would like to set a good example for my children to be a self-respect and independent human being. Please do not take away these import things in life!

Regards,  
Lily Seeto

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I am a self-funded retiree living in Goulburn with my wife. We run a small business from our home in which we provide short term accommodation for visitors to Goulburn in a friendly home environment at a reasonable cost. We started our business in November 2017. In August 2018 we made a submission to the Dept of Housing and Planning regarding the impact of proposed changes to STHL legislation in NSW. We received a letter from the Minister for Planning, Minister for Housing, Special Minister of State the Hon Anthony Roberts MP via our local member the Hon Pru Goward on 8th October 2018. The letter stated that in our situation, there would be no limit on the number of days we could operate and that our property would be considered an exempt development. Recently, we received information from Airbnb that the policy is again up for review.

We are concerned that the pending legislation to regulate STHL properties will restrict our ability to run our business. Our understanding of the purpose of the legislation is that it aims to control the burgeoning growth of short term accommodation in strata properties predominantly in the busy parts of the major cities. The impact of this on the housing market and on the amenity of other residents in strata units has been well addressed in the Options Paper of 2017.

However, we do not fall into the above categories. Our premises are our family home. We are not locking up any housing stock from the market place, nor are we creating a nuisance for our neighbours. We are simply utilising a large house to provide an alternative accommodation experience for our guests. We live onsite and personally welcome and supervise all guests. We also provide additional accommodation in a tight market and promote Goulburn in ways that the more impersonal types of accommodation cannot do.

The demographic profile of our guests is predominantly retirees who are on a road trip via Goulburn or who are coming to Goulburn to visit family or to attend other functions in the district. For example we recently hosted guests who were in Goulburn to attend the attestation parade at the Police Academy. (On that particular day, all accommodation in Goulburn was booked out.) This activity does not create any noise, parking or waste management issues in our neighbourhood.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I believe it is a great way to offer quality accommodation in areas that do not have available accommodation, and importantly are available to those with a larger family where traditional accommodation does not seem to offer a reasonably priced option.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host (and someone who voted for you) I wanted to provide my feedback on the Government's proposed regulations.

My partner and I host on Airbnb because we can't afford to buy our own home and this gave us an entry into the property market. My Partner managed the property while looking after our newborn allowing her to work from home and generate some income for the family.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because hosting help me pay for the mortgage associated with the high cost of property in Sydney. I am also the founder of a new business so hosting supplements my cost of living while I grow this business which will contributes to the NSW economy.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

I have noticed the new regulatory framework for short-term rental accommodation which is going to implement from this September. I truly understand the concern and necessity of regulating the short-term rental market, but I think this framework is excessively rigorous, and I would like to share some of my personal opinions regarding this.

I am an Airbnb host who has one investment property used for Airbnb. I recently gave birth, so I have to quit my job to look after my daughter. Thus, I'm facing lots of financial pressure. Due to the depressed real estate market in recent years, it's not easy to sell or get good rental income from long-term leasing, I start to do Airbnb for my apartment, and I found the short-term leasing income could cover my mortgage better and help me reduce financial stress. I'm trying hard to find a way to earn money independently rather than get money from Centrelink. Also, in my previous long-term rental experience, my property was damaged by tenant badly even there is 6-month inspection conducted. I found the short-term leasing could maintain my property better due to frequent check and clean.

Another advantage of short-term leasing I found is the short-term rental provides more job opportunity for housekeeping. Lots of cleaners I have cooperation are very appreciated that they can have this job to live. Most of Airbnb hosts like me have lots of love for our properties, and we try to decorate the holiday houses as a beautiful home. We hope guests will love and feel like being at home with an affordable accommodation fee. I believe that the short-term leasing is beneficial for the tourism industry, and the purchase of furniture and decoration from supermarkets and shops also benefits for the national economy. Indeed, we claim tax legally for all the income from short-term leasing.

The framework of 180days limitation will have a significant impact on my daily living and family. It is difficult to put the property on a long-term leasing market for 180 days in a year which means the rental fee cannot be satisfied, and there is more possibility to leave the property unoccupied. That will lead to much more substantial financial difficulty for me to pay my mortgage, raise my daughter and afford daily living expense (As you know, childcare and living expense are costly in Sydney). The limitation will be worse the short-term leasing market, which will lead cleaners to lose a job, decrease the number of tourists, and affect the income of shops which even will worsen the national finance. I don't think this limitation can help long-term leasing and also will exacerbate the real estate market because it's not able to get the balance for both long-term and short-term leasing in a year.

I do understand the government's concern of safety and regulation of short-term leasing market. However, I genuinely believe that this limitation is not suitable to implement, and the weakness and leading consequences are much more significant than the advantages. It will not only get thousands of families to struggle with their lives, suffering from financial difficulties but also impact on the national economic situation. I genuinely wish you could take careful consideration to determine whether this limitation of days is appropriate in deep national concern. Thank you for your attention.

Kind regards,

Linda

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

We love the Southern highland & all it has to offer & want to share it with the world.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because travellers wish to stay in our gorgeous village on the lake and there are no hotels/motels here and by allowing hundreds of people per year to stay in my house, we provide additional income for the local community. Also holiday rental supplements our own income.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it helps to cover the costs of owning property in Terrigal, especially with the high tourism rates charged by council.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. Very often our guests use other small local business for day trips, meals and entertainment.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is a convenient way of providing some additional income for my forthcoming retirement.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism as well as promoting my own small local enterprises.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive. This is red tape for sake of red tape. As a small business initiative the Liberal government should be supporting not hindering this type of enterprise by introducing zero value overhead such as this proposed legislation.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation,

registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it gives my partner and I an opportunity to earn extra funds to support ourselves in our retirement. We like to meet and host guests from Australia and around the world and offer a customised service to all our guests.

We have one apartment in Darlinghurst which is listed on Airbnb and is not listed on any other platform. We run our listing and apartment in a professional and responsible manner. We see our listing as our business and therefore our behaviour and services provided are focused on boosting our credibility and reliability.

To date, we have hosted over 200 stays. We have never received a complaint from guests or any resident or tenant within our small apartment block.

We also meet our guests on they arrival. We do not have a latch key system. We also close the calendar to bookings when we are not in Sydney; in other words, we do not rely on other people to act of proxy hosts.

The Airbnb host community depends on hosting as an economic lifeline to help us support our retirement without resorting to Government assistance and support for paying bills. We also recommend our favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

We are deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for us to share our apartment.

I understand that the Government has made commitments to support 'fair short term rental accommodation (STRA) regulation that supports the sharing economy'.

Generally, I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people and for us who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my apartment before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an

ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my apartment is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my apartment for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

I also believe that the proposed regulation and strike out system where the guest displays problematic behaviour, but the punishment falls directly upon the host is wrong and unfair. A host in good faith lets their entire house or apartment to a guest who they believe will act in good faith. All Airbnb hosts are required to set House Rules. Our House Rules clearly state that parties, noise and abhorrent behaviour will not be tolerated which could lead to the stay being terminated and Airbnb informed, and Police is necessary. I believe a more nuanced system should be developed to punish the guest if the guest solely contravenes the Code of Conduct. I suggest all guests when booking be asked to sign that they have read and understood a summary of the Code of Conduct before their booking is confirmed. This summary would highlight appropriate, expected behaviour and which behaviour will not be tolerated. As proposed, the 2 strike rule seems to only apply to hosts. I suggest guests who are found to contravene the Code of Conduct should be flagged by Airbnb (in our case), so they cannot book any accommodation with a host on Airbnb for 2 years after 2 strikes. This way the responsibility falls to the perpetrator. Any other way means the perpetrator walks away while the host takes all the responsibility. This is unjust.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows families to have much needed affordable holidays together. Motels in my area charge up to \$600 per night over summer. We need tourists in our area to survive!

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host, I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am away from my home for part of the year and this allows me to maximise my rental income which is my SOLE income.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however, parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home-sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which, will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is a major income for myself and my husband in retirement. With these new rules, our income will be halved immediately plus the cost of implementing all the new requirements.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because after the breakdown of my marriage in 2016 I needed to supplement my income to pay for the mortgage. I saw moving our children from their family home as not an option.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I want to give families to opportunity to enjoy our town of Byron Bay at an affordable cost. We are a unique house where we mainly focus on families with young children so they can have the best experience possible in a home away from home.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host, I am writing to give some personal feedback on the Government's proposed regulations to Airbnb participation.

I host on Airbnb because it is the only way I can afford to live in Sydney on a single income. I have three children to support and this is the best way to monetise my principal place of residence. I am not a big investor. Just a mum who is making the most of my home.

By hosting, I also support the local economy by recommending my favourite cafes, restaurants and shops in Coogee and beyond.

I am concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. They will create a barrier to entry which will stop many people from making an additional income. Single mothers, especially.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however, parts of the current proposals are unfair and fall short of the Government's commitments which is very disappointing.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because there are no hotels in the Pearl Beach area and very few in the surrounding areas. We offer very affordable accommodation and mostly on the weekends. There is so much wear and tear on the property to rent this way and even after one year, we have to replace the bathroom and hall floors due to tenants flooding the bathroom a few months ago. However, this allows us and our young family to use the house ourselves when it is not rented.

We provide jobs for a local cleaning company in Umina. They are a husband and wife couple and without the income from Airbnb and stayz, would be destitute. We also provide jobs for regular maintenance, due to the heavy wear and tear the house receives. We also employed a whole team of local carpenters, painters, plumbers and electricians to renovate the house to the level needed for a popular rental on Airbnb. If the tax or tariffs were to increase on Airbnb and Stayz (they are already expensive) it would be price prohibitive to holiday rent and we would either sell or rent out permanently, which, in turn would kill the local tourist economy and this is the only way half the local community survives. The local cafe and one hat restaurant would surely close and the area would die a slow death.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Dear Director, Housing and Infrastructure Policy,

As a potential local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I would like to host on Airbnb to provide some additional income to my pension, whilst encouraging tourist interest in my region.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the bills. I also recommend local cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired. The sophisticated 10 year battery, interconnected systems available on the market should be recognised as equal to hard-wired systems.
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows me to earn income to support my family living in a resort town where permanent jobs are scarce. If we could not rent out our property to earn extra income we would be forced to sell it as the cost of the mortgage would be too high for us to sustain any other way.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I love sharing my hometown with visitors hosting fellow Australians looking for a local holiday. The more Australians holiday within Australia, the more money is spent supporting our local communities, giving jobs in hospitality that may otherwise not be available.

I have been hosting guests at my properties for over 10 years and I have never received a complaint regarding my guests. I educate them on all the rules and regulations that I have in place to ensure my neighbours amenities are not disturbed.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I have recently decided to host on Airbnb because it permits me to rent my cottage to guests who are looking for a pleasant home to stay will visiting Goulburn. I appreciate knowing the guests coming have been recommended. I believe staying in a home is more personal and relaxing than staying in commercial accommodation. Also, hosting through Airbnb allows me to closely monitor my small rental property. I had previously rented my cottage to long term tenants who damaged the property extensively and failed to pay rent for an extended time. I have also chosen to host through Airbnb as a transparent system for short term rental. While I am working, I can organise my calendar to accept guests when it suits my work commitments.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host a couple of times a year on Airbnb because...

It's an income stream to help us pay the mortgage and the bills.

It's also good for the Manly community as I bring in tourists, recommend my favourite cafes, restaurants and shops which are all local small businesses (that an ordinary tourist may not get to know and only see the large national and global chains) - so the local economy gets a boost as well

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people like me who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts like me who share their home for only a few weeks a year, this is a significant barrier and will make hosting uneconomical.

For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive for me as well when I want to go on holiday myself and may drive me off shore.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because ...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host a council approved self contained dwelling on my property through Airbnb. I started hosting this space (which was originally built for in-laws and family/ friends) 2 years ago when I had an infant and was pregnant with my 2nd child. I was working part-time but living outside of Dorrigo with no family in the area I had little child care options for an infant under 2.

Being on Airbnb allowed me to still earn income without having to leave my property and pursue childcare etc. 2 years on it is still a main financial contributor to my income for which I am eternally grateful!! All the income I receive through this is declared.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because holiday letting my property through the local real estate agent was failing to attract enough guests. I rely on the Airbnb income to pay the mortgage on the property.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I strongly oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it supplements my retirement income and allows my partner and I to travel and live a better life than we could otherwise do on limited retirement incomes.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we enjoy having people stay in our house, it is a large house and until we move into it permanently in retirement, this is an ideal way to share the pleasure of the house and earn taxable income. We prefer to make the house available as a holiday rental on Airbnb than to have private tenants, thus allowing us to constantly upgrade the property and adding amenity.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it promotes local tourism and helps local economies. It does not line my pockets with as much money as you think. I still have to pay rates and taxes.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and skyrocketing Rates and land taxes.

I recommend my local cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

The Govt just want a piece of the pie and it has been shown that building regulators dont do their job properly (opal towers).

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

I do not support the government's approach.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I enjoy creating a beautiful space for people to experience bondi and Mullumbimby that is more affordable than the scarce and overpriced existing accommodation. It also helps paying my mortgage and supporting my family.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. This is classic Australian over regulation at the behest of vested interests and will seriously undermine the regional tourism industry and make Australia less attractive to international visitors.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have space in our house that is excess to our family's requirements. As the mother of small children, earning money through hosting allows me to contribute to our family's income while still being available to care for the kids, avoiding paying for childcare. Whilst the space we use for hosting is self-contained, it does not have kitchen facilities and is not suitable for long-term accommodation- therefore we are not reducing the availability of rental housing in our area. We are present on the property whilst we host, therefore able to prevent any noise or nuisance issues that could affect neighbours. We purchase additional public liability insurance on top of the insurance supplied by Airbnb.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as a farmer, it allows me to showcase what we do and why we love farming life. It provides a very modest income that assists with payment of rising feed costs. It provides a connection with guests from other locations, countries, cultural backgrounds and a platform to promote further exploration of Australia.

The Airbnb host community depends on hosting as an economic lifeline to help us pay for animal feed and the bills. I also recommend my favourite cafes, restaurants, attractions and shops so small businesses get a boost from local tourism. In a small town, this is very important and appreciated.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century.
