**Subject:** Short Term Rental submission  
**Attachments:** Submission on Short Term Rentals in Millers Point.pdf

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

As residents of Millers Point for three years, we are greatly concerned about the proposed regulations (or lack thereof) of STRA in our little suburb, the impact on our amenity that we should be able to enjoy in our homes and the adverse impact of the heritage qualities of the Millers Point precinct.

We fully endorse the submission of the Millers Point Community Resident Action Group submission. The sensible and practical regulatory suggestions are substantive and should be fully accepted.

As a resident of Millers Point, we are concerned that our little suburb is being overrun by short-term rental accommodation. As has been well documented in other locales around the world, particularly North America and Europe, unchecked STRA has had a highly adverse consequence for local communities in similar contexts. We don't want to see what has happened in parts of Barcelona, San Francisco, Venice and other major cities happen in Millers Point.

Being a medium-density housing environment, of mostly older building from the 19<sup>th</sup> century, quite simply the heritage and amenity implications are substantial and adverse. These are state heritage listed homes being used by people who have no concept of the heritage value of the building they are in, let alone the community and suburb. Longer term, heritage building fabric will be irrevocably damaged, which makes a mockery of the Conservation Management Plans. People who bought in Millers Point to live and build a new community are being terribly affected. The amenity of having weekly changeover of guests next door means noise, disruption, inappropriate behaviour and overcrowding which simply does not happen with long term residential arrangements, which are respectful, accommodating and neighbourly, something that STRA arrangements will never be able to replicate.

As an addition to the proposed regulatory framework proposed by MPCRAG, one additional item needs to be stressed to eliminate overcrowding and inappropriate room use. Under BCA definitions, habitable rooms are defined by the amount of natural light they receive and of course access/egress options. We believe these definitions should be incorporated into what rooms are allowed to be let (particularly for unattended STRA) so that only rooms that would sensibly be defined as a bedroom are used as such.

From a heritage perspective, we believe that any heritage listed property being presented for unattended STRA should have to undergo regular inspections of the property by either the NSW Heritage Council or LGA (in our case City of Sydney). This inspection will ensure the CMP is being adhered to, both in terms of the initial renovation undertaken, as well as ongoing maintenance and protection of heritage fabric.

We look forward to these submissions being accepted by the Government, who of course as former owners of Millers Point, have paramount responsibility for ensuring the birthplace of European settlement in Australia is properly protected and long term residents amenity and community is protected.

Yours sincerely

Bernard and Charley Kelly  
40 Argyle Place, Millers Point

I am writing regarding the large number of homes in my neighbourhood which are being used as commercial operations through Air BNB. I don't understand why the government thinks it is ok for people to run property rental businesses but pay no tax. As a PAYE taxpayer I must be subsidising these businesses.

My street has many homes that are being used as AirBNB. We deal with garbage strewn across the footpaths, late night arrivals and departures, overflowing bins and groups using The Paddock for late night gatherings.

**Subject:** STRA Consultation - Response from Highgate, Kent Street

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Sir / Madam,

Re: STRA Consultation Submission

I live in Highgate, Kent Street which is a strata building and I am extremely concerned as to the prospect of short term rentals within the building.

There are unique implications for strata buildings which need to be taken into consideration that simply do not apply to non-strata flats and houses

Shared, communal areas such as the pool, spa, sauna and gym inevitably deteriorate when high numbers of transient, short term guests use them.

Incidents of damage, theft, assaults, unwanted attention and antisocial behaviour are likely to increase, with the culprit not easily traceable or held to account.

Security procedures are also likely to be tested to their limits by transient travellers which in turn puts additional pressure on Highgate concierge.

High value items in communal areas such as marble, statues, paintings, sofas and rugs are likely to be at risk of damage or theft leading to increased insurance claims and higher premiums that will be reflected in increased strata fees for all residents.

I fully appreciate that not all dwellings have the same level of communal facilities, fixtures and furnishings as Highgate which is why I feel that individual strata buildings should have the right to choose whether they allow short term rentals or not. The relevant considerations are detailed, subtle and unique to individual strata buildings and are best decided locally rather than at state level.

Yours faithfully,

Cheryl M Harris

Hi Tom,

As per your email below, please find attached the City of Sydney's draft Submission (a submission letter and response to discussion paper questions) on the Short-term Rental Accommodation New Regulatory Framework – Released August 2019.

As requested, we will forward to you the City's final submission once Council has endorsed it, by email again if the exhibition page is closed.

Could you please only publish on the Department's website the final submission (not this draft) when that is submitted.

Please return an acknowledgement of the email receipt.

Hi Peter,

Thank you for your email relating to requesting an extension to submit feedback on the proposed STRA regulatory framework.

We understand that Council will need to endorse your submission prior to providing the feedback. The Department will be happy to accept a draft version of Council's submission during the exhibition period, by the 11<sup>th</sup> of September. We can then accept the final version once council has endorsed it.

Please don't hesitate to contact us if you have any further questions.

Thanks  
Tom

To whom it MUST be of Concern.

I am the owner of an apartment that currently has strict policies applicable to owners utilization of their properties restricting use for Short Term Accommodation.

I fully support and endorse the current policy, that effectively ensures that our building does not become a ""Resort""

The behavior metric of Short Term occupants, being Holiday Makers or Travelers are completely opposite to long term owner / normal occupancy behavior and therefore if permitted will create challenges to the long endorsed principal that " One must be allowed quite enjoyment of one's property"

Beyond the personal issues, the fair and reasonable sharing of the added management costs of a building places unfair burden on those not benefiting from commercial exploitation of the ""Common Property and Facilities"" paid by all contributing Strata members.

IF within a Strata holding a 75% + majority determine a policy, then THAT POLICY must be allowed to prevail. Externally generated laws or regulations MUST not over-ride existing rules.

In my specific circumstances, I have an apartment in a very well managed complex of over 200 units that prohibit Short Term Rentals. I am firmly of the opinion that should Short Term Rentals be forced upon the overwhelming wishes of unit holders their will be unfair loading of extra operating costs, and facility usage beyond design parameters which must result in a diminution in values.

We currently enjoy the benefit of having and no doubt paying for the facilities we have. This is reflected in the prestigious reputation our property enjoys.

You must not allow for a minority to impact on the wishes of the majority. Facilitation of " Opt Out" provisions must be provided within any regulation / law you are considering.

**Subject:** Re: ASTRA Response

Hi Alanna, Diane and John,

Please find attached ASTRA's response to the Questions.

As I've mentioned in the covering letter, the questions have led to a comprehensive and at times challenging review process for us as we've worked to consider the wide range of views across our membership.

This process has also raised other important questions and led to valuable debate on matters such as:

Maximum Guest Numbers  
Terms & Conditions  
Trust Accounting  
Licensing Requirements

the 21 day exclusion (which we support)  
Industry representation  
Instant Bookings

We have also naturally considered the importance of education and training as a means to raise standards and preempt issues, as part of a wider investigation of how the new regulations and registry systems might best be implemented and managed.

We have made notes of all items and will continue the work of finalising these as we finalise these now.

Rather than dilute the focus from the Responses sought - or have them canvassed publicly with our response, I hope we might have the opportunity to present them to you as items for further discussion and consideration.

Finally I must give credit to ASTRA's regulatory team for their passionate interest, time and the quality of their individual contributions to this response.

Thank you again for the extra time we were given. We're looking forward to taking a breath and would appreciate it if you could confirm your receipt.

Subject: ASTRA Response

Good morning John,

While we're delighted to be preparing responses for you, we're finding ourselves running behind with our response.

Rather than racing to finalise our submission and preempt the balance of work required to explore differing views from our members and other STRA organisations, I hope you might be able to offer us an extension.

As volunteers, an extra weekend would be ideal and a few days after that for Zsuzsanna, John Gudgeon & I to distill the rest of the input for our Board to confirm.

Many thanks in advance for your consideration Rob

I would like to make comment to the new proposal.

The addition of short term visitors adds to the cost of operating and maintaining a strata building and increases the cost of living of all residents.

This is attributed to new occupiers not knowing or in most cases not caring about by-laws and guidelines. Any recourse available to the owners corporation is negated as the short term tenants have departed before any action is possible.

Every strata must have the right to adopt its own STRA position. This should be determined by special resolution i.e. 75% vote.

The New Regulatory Framework Discussion Paper does not consider and make allowances for the diverse range of vastly diverse residential types in NSW.

Self-regulation by the STRA industry will not work. STRA must be regulated by an independent government body.

**Subject:** STRA Discussion Panel

Dear Sir/Madam,

I am writing to express my opinion and concerns regarding the new Regulations and Code of Conduct for AirBnb.

It is apparent to me that these regulations are far too broad sweeping, and do not address the concerns of those of us who live in Strata buildings. We feel it is our right to manage our building in a manner that best serves both Owners and Residents, and any changes are currently determined by special resolution requiring a 75% vote. Currently our bylaws do not permit any rentals under a 3 month period. There is a spirit of community in our building which I think is unusual for city living and both Owners and Renters share our amenities in a caring and responsible way.

If short term AirBnb rentals are permitted, against the specific wishes of the larger community, it will change entirely the character of our building. It will also place a burden on all the shared facilities and Concierge staff, and we will have to bear the excess costs of this burden. I believe this legislation is undemocratic and unfair for those of us who choose to live permanently in Strata communities, and that our views should be taken into consideration.

Sincerely,  
Carol Ladd  
#1103, 127 Kent Street  
Miller's Point, NSW 2000

**Subject:** Opinion on proposed STRA

Dear Sir/madam,

My wife and I are the owners of Unit 802/127 Kent Street, Millers Point, NSW 2000.

We bought this property for our retirement living having considered the mix of owner occupiers and investors and related outgoing for this building.

Whilst we are in support of new and affordable ways of providing short term accomodations by new age disrupters like AirBnb, it is very important that impact this may bring upon owner occupiers and longer term tenants of Strata properties. Strata living by nature is high density living which is likely to be adversely impacted by allowing short term stayers unless such lettings are properly managed and regulated. Recent constructions of Strata apartments in transport corridors and major town centres of NSW are occupied by multitude of citizens such as young families, professional couples and retirees. Allowing self regulated short term stayers in such properties will undoubtedly adversely impact the peaceful living of longer term stayers of these properties.

Therefore, taking the power away from Strata body corporation may leave the quiet enjoyment of the properties by longer term residents. The needs of the short term stayers and the way they look after common facilities such as gyms, meeting rooms, visitor parking and general wear and tare due to higher volumes of foot traffic to Strata buildings.

Therefore, we appeal you to allow Strata Committees to decide what measures they can adopt to their own buildings as the owners themselves can agree on their way forward with short term stays under AirBnB type arrangements.

Regards,

Gamini and Vasitthi Iddawela

**Subject:** Protection of Strata dwellers in NSW with STRA

Dear Sir/Madam,

I am writing with grave concerns about the proposed STRA (Short Term Rental Accommodation) Regulatory Framework Discussion Paper recently released for comment.

I live in a Strata building in Sydney and am deeply troubled by the changes the proposed regulations will make to my quality of life.

Strata buildings are most similar to Company Title buildings in that the separation of residents is a wall only, not a block of land. However, under the proposed regulations, Strata buildings do not have the same capacity to operate their buildings for the benefit of residents as those under Company Title. Company Title buildings are permitted to restrict STRA, whereas Strata buildings are not, and this is inequitable.

The shared property of Strata apartments are improved and maintained by the residents for their own use, not for that of STRA that places additional wear and tear and reduction in privacy, increase in garbage, and costs of providing access and concierge services to STRA people. STRA will increase the cost of living for other Strata residents as well as dramatically reduce amenity.

All other aspects of Strata life are determined via a 75% vote of residents. This is the condition under which residents bought into Strata dwellings.

Furthermore, it is self evident from recent problems within the building industry that self-regulation of housing industries is dangerous, and residents are left bearing the costs of the inherent failures of these systems. The cost of regulating STRA MUST be borne by the Government for the protection and safety of the public.

It is essential that Strata buildings are permitted to continue to regulate the management of their buildings according to the wishes of the residents,

Dr Judy Hyde

It is a fundamental private ownership right, above & beyond any State regulations, that Strata must be able to determine by a majority of owners' vote, the terms & conditions of their private building's use - including the short term letting via AirB&B and the like intermediary.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear MP Elliott,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

## STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

## Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

#### Submission

I bought into a block of 7 units that are very close together with the understanding that it was residential only at 44 Armstrong st. 5 were owner occupied and 2 permanent rentals.

One women who is on the strata committee started airbnbng a year ago. She moves out when airbnb moves in you can see her site Beach Villa Suffolk park she has one car space the overflow park on the street. The unit directly opposite me sold about 8 months ago to a person from Brisbane, he is also on the strata committee he now has the other airbnb women managing his property just for airbnb purposes again they don't use their garage if renters park on the street. So now I have to put up with a steady stream of strangers moving in and out plus laundry

deliveries and cleaning people. What was once a nice place to now leaves me concerned about security, noise and privacy. If the owners live on site and want to rent a room I have no issue with that if they have adequate parking but turning a small residential block in holiday let's is unjust. Thank you Faith

The problem is obvious, the solution difficult.

There is little doubt that Australia, like many communities the world over, is being impacted by what amounts to mini-motels springing up in urban areas. The associated problems are manifold - constant noise from revellers not just from AirB&B occupiers but friends and visitors, parking and traffic congestion, the constant noise of next door comings- and- goings as one group of AirB&B visitors replaces another. This is tailored to create hostility, and detract from our reputation for being a welcoming and friendly people. As well legitimate accommodation houses are suffering from unfair competition as are prospective long-term renters looking for affordable accommodation.

As for the solution.

Strict conditions are one thing, policing them another. To work, the legislation must come with strict penalties and regular spot checks.

How strict the conditions - whatever it takes to prevent someone establishing a mini hotel in a residential area.

**Subject:** Holiday rental regulations for NSW

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Minister,

**See below our comments on part of the short-term rental accommodation regulations.**

This submission is in regards to holiday lettings in Jindabyne NSW, postcode 2627 not the postcode where our office is located.

We book a lot of holiday apartments at & near the snow.

I am strongly in favour of the overall plans to allow short term rental accommodation BUT severely object to the proposed limit of 2 people per bedroom in cases where higher limits are already allowed for DA approved holiday apartments.

This seemingly minor condition (max 2 per bedroom) appears to have been sneaked in on the sly and with little thought applied at all. Such an added restriction would DECIMATE the existing (already DA certified) holiday accommodation market in Jindabyne.

At present Jindabyne Holiday approved apartments are allowed MORE beds than this. The current bed limits were imposed about 15 years ago and at the time were very controversial – holidaymakers were mostly appalled at the limits imposed back in 2003. The vast majority of holidaymakers want accommodation near the snow to be as cheap as possible. The public WANT the option to have at the bare minimum:

- 10 people in a 4 bedroom unit
- 8 people in a 3 bedroom unit (eg: 2+2+4)
- 6 people sleep in a 2 bedroom unit (eg: 2+4 in 2 bedrooms)
- 4 people in a 1 bedroom (2+2 in sofa bed)
- 3 in a studio (tribunk).
- Etc

The proposed 2 person limit appears to have been added on a whim (very sloppy policy drafting). It makes no consideration for different areas, no consideration for existing holiday accommodation. Even more shockingly it makes no reference or consideration at all to:

- studio apartments
- apartments with loft(s) that exist purely for sleeping
- no thought at all given to fold out sofa beds often found in living rooms

When the local council imposed the present restrictions on holiday apartments back in (I think 2003) they introduced a formula based on the square meters of each bedroom. Back then it was considered poor policy within the industry as the local Government policy drafters didn't survey a single tourist accommodation business, and more shockingly they did not even ask a single holiday maker to ask what THEY want before imposing the rules. They arrogantly decided they knew what the public wanted and were 100% wrong. I was trying to tell them over the phone (as they did not ask for any public submissions) but they insisted they knew what was best for people despite admitting they had personally never needed such accommodation for their own personal or family holidays!

Whist there is certainly a market at the snow for people prepared to pay the very high cost of max 2 adults per bedroom, the vast majority of people want a higher density than this in Jindabyne and nearby areas. The present system is already strict (It allows beds per bedroom based on a formula), but 2 beds per bedroom will make a Jindabyne snow holiday prohibitively expensive for the vast majority of holiday makers. It will also decimate the value of exiting holiday-DA approved apartments by limiting their beds far more than under their existing approved numbers.

There is no point in adding such a restriction knee-jerk state-wide! The local community is not opposed to the present bed limits (which are more generous than 2 per bedroom).

It is ironic that the new policy proposes to allow MORE short term accommodation (and more competition) but it conversely imposes a NEW SEVERE limit of ONLY 2 beds per bedroom. So in Jindabyne and surrounding areas used for budget snow accommodation it will have the opposite effect!! This 2 bed limit will perversely reduce the beds allowed in existing holiday-DA-approved apartments in Jindabyne. It is ironic as it will allow more properties to accept short term bookings BUT restrict those that have existing DA approvals.

**FIRE SAFETY?** Note that its absurd to suggest there are fire safety reasons for max 2 per bedroom – there is no basis for this. The more in a bedroom the more people can wake up and alert others and escape. Having 4 people in a sizeable bedroom does not add any fire safety risk at all, in fact it lowers it. You'd have to really CRAM in beds so much as to prevent the bedroom door being opened properly in order to lower fire safety. Only 2 per room is a massive overkill in that regard and gives no consideration for how large a bedroom is. Limiting bed numbers in regards to fore safety stemmed from the Childers backpackers fire where many people died. But in the Childers fire it was a case of a dozen or more beds crammed into rooms where bunks were blocking the fire escape; notably it was also an old wooden building with illegally poor fire safety systems. It is crazy to limit beds to only 2 per bedroom based on any supposed fire safety concerns. Maximum only 2 per bedroom is a massive overkill in regards to trying to assert fire safety as an issue.

I realise that 2 per bedroom may be a good idea in essentially residential areas where overcrowding is not desired by residents, but in Jindabyne we have an existing tourist town where there are already DA approved holiday apartments – these should not be restricted beyond present bed limits by this policy.

As a seller of holiday accommodation at the snow I can expertly assert that most people who go to the snow do NOT want such an extreme limit as 2 beds per bedroom imposed on them – regulations are already in place in regards to bed numbers and new lower limits should not be imposed here.

Regards,  
Bruce Doig

To whom it may concern,

I broadly support the reforms, however I have one proposal which is that the cap on the max number of nights a peppery be advertised be limited to Sydney Metro and not include tourist areas in greater Sydney such as the upper blue mountains. My rationale is that these tourist regions rely heavily on tourists being able to source short term rental accommodation and that the cap will decrease supply and be at risk of adversely impacting the local economy. Alternatively, you could provide councils in those regions the flexibility to provide individual exemptions.

Thank you

David

**Submission**

As president of the Suffolk park progress association I have witnessed the impact of short term holiday let ( Sthl) in our community

Not only is it a disruption of the domestic harmony of neighbours , noise and parking as well as threatening interaction if a neighbour to a STHL approaches a late night party house to keep the noise down late at night.

I know of families who have severe personal problem because of being located in streets where STHL are located When a house is purchased and turned into a STHL and the permanent resident who has been removed this adds to the fragmentation of the community loose volunteers, neighbour support, security

In short STHL is destroying our community and contributes nothing to the maintenance of community service It must be limited

Donald

**Submission**

I would suggest that Government should include solutions to provide owners corporations greater powers to make and enforce by-laws dealing with the issues. It is understandable that each strata building is different. Hence, these issues can only be dealt with properly by way of by-laws specific to a particular building which the owners desire. I am proposing

1. That the Strata Schemes Management Act 2015 be amended to allow owners' corporations (by a majority vote) to make a by-law that prohibits entirely the use of a lot for STRA in the building.

or

2. That the Strata Schemes Management Act 2015 be amended to allow owners' corporations (by a majority vote) to

make a by-law that approve the use of a lot for STRA; and  
3. That the Strata Schemes Management Act 2015 be amended to allow owners' corporations (by a majority vote) to make a by-law that revoke the approval of the use of a lot for STRA after breaches of by-laws and related regulations.

Other comments on STRA are found in the attached document.

**Submission**

Thank you for the opportunity to comment on the proposed State Environmental Planning Policy (Short Term Rental Accommodation) 2019 (STRA SEPP) and the associated integrated reporting framework.

Penrith City Council (PCC) appreciates the need to provide a legislative framework to regulate STRA to improve outcomes for renters and the community. PCC supports the proposed introduction of a standard land use definition, permissibility and development approval pathways.

PCC supports the delayed commencement of the STRA SEPP to align with the commencement of the mandatory Code of Conduct.

PCC is concerned that the Code of Conduct methodology for the proposed registration system is unclear, as responsibility for design and implementation has been given to the industry. Timeframes and accountability for

implementation of the registration system should be defined and monitored.

PCC is concerned that the current approach will continue to produce negative results for the community. Council believes that using a complaints based process to identify non-compliances is inadequate to respond to health, safety, amenity and noise issues in the interim, particularly for complying development.

In order to make the complaints process more robust, PCC recommends that the operators of STRA are required to obtain consent. This would mean neighbours could be informed of the change of use and of where to find relevant material such as the Code of Conduct and compliance information.

PCC recommends that STRA only be provided within 800m of the following, as defined by “A Metropolis of Three Cities”:

- Metropolitan Cluster
- Health and Education Precinct
- Strategic Centre, or
- Tourist attractions, including event facilities.

This approach is intended to improve social and environmental outcomes and support the local economic benefits of STRA, while providing affordable accommodation options.

It is recommended that STRA be regarded as exempt development only where the host is present. Where no host is present, STRA should be:

- defined as a serviced apartment or other short stay form of accommodation, or
- required to progress through the development assessment process, as is required for other forms of tourist and visitor accommodation.

Penrith City Council also asks for the opportunity to provide further, more detailed comment after the exhibition period has ended. To confirm whether this is possible and if you have any further questions regarding this matter, please contact Breannan Dent, Planner on 4732 8001 or at [breannan.dent@penrith.city](mailto:breannan.dent@penrith.city).

Introducing restrictions on short term holiday letting makes no sense to me.

A property owner is entitled to let their property to long term tenants for 365 days of the year, if they wish. A property owner who wishes to use their property themselves for part of the year is not able to do so. Instead, they may attempt to offer the property for short term holiday accommodation. If they do so, it is most likely they will find there are lengthy periods of the year, outside main holiday periods, when their property will remain empty. In other words, it would only be the luckiest of property owners who would approach 365 days STHR lettings in a year. I contend, these owners are providing a better economic service to their region than are long term leasers. They are encouraging more visitors to the region, and are making it possible for those visitors to sample the facilities of the holiday region at affordable cost.

Hence, short term holiday rentals should be actively encouraged by the Councils in noted holiday regions, such as the Byron Shire. If the Councillors were to restrict short term letting, then as far as I can see, they would be acting against the interests of the region they have been elected to represent!

I strongly support the right of a Body Corporate to decide whether or not short-term letting is allowed in their complex. Short-term letting should not be allowed if the majority of owners oppose it.

Short-term letting in a residential building often causes issues of noise, security and damage. It is very hard to police, because the tenants are often gone before anything can be done, and then new ones arrive who often cause the same problems.

The potential for damage is great, as many of these short-term tenants have little consideration for the other residents. It often causes great expense to the other residents to fix issues, and may mean greater insurance premiums and higher levies.

The problem is greater in small apartment blocks, where short-term letting can have a greater impact on existing residents.

People buy into apartment blocks knowing what the short-term letting rule is. The Government should not over-rule the wishes of the majority of owners.

[stayz-submission-on-nsw-government-stra-regulatory-framework---11.09.2019.pdf](#)

**Submission**

Dear Director,

Please find attached a submission from Stayz on the NSW Government's short-term rental accommodation draft regulatory framework.

This submission provides a background to our company, Stayz, and presents our perspective on four of the features

of the NSW Government's draft regulatory framework that we believe require further clarification and development, in particular the:

1. Draft planning instruments
2. Draft Code of Conduct for the Short-term Rental Accommodation Industry
3. Proposed industry-led STRA property register
4. Commencement timeframe and 12-month review of regulatory framework

In Appendix A we have summarised our responses to the questions posed in the Discussion Paper. In Appendix B we present recently commissioned data showing the STRA sector's size and economic contribution to NSW and its tourism regions for the 2017-18 financial year.

Our aim through this submission and in our further engagement with the NSW Government is to raise the policy and regulatory issues that require detailed attention and the solutions that we think are best suited to deliver on the Government's policy aims. In doing so, we have sought to provide value to your deliberations and a starting point for our further engagement with the Department and the NSW Government.

We look forward to hearing from you.

Kind regards,

Eacham Curry, Director of Government & Corporate Affairs at Stayz

I would like to add my voice to the opposition on the 2 persons/12 persons per dwelling rule. I own a rural property which allows for a maximum of 14 people in a 6 bedroom house. The property is isolated and I have never had any complaints from neighbours or guests about the number of people staying there or anything related to the number of people staying there such as noise. The property was originally purchased for the purpose of family gatherings and is, I believe, ideally suited to the purpose. The size of the property is one of the main attractions for short-term rent and this rule would adversely affect the value of the property.

As a sidenote, two persons per bedroom would seem to contradict the idea of babies and small children sleeping in the same room as their parents which would seem unsafe or rooms left needlessly empty.

Hi Tom,

As per your email below, please find attached the City of Sydney's draft Submission (a submission letter and response to discussion paper questions) on the Short-term Rental Accommodation New Regulatory Framework – Released August 2019.

As requested, we will forward to you the City's final submission once Council has endorsed it, by email again if the exhibition page is closed.

Could you please only publish on the Department's website the final submission (not this draft) when that is submitted.

Please return an acknowledgement of the email receipt.

Hi Peter,

Thank you for your email relating to requesting an extension to submit feedback on the proposed STRA regulatory framework.

We understand that Council will need to endorse your submission prior to providing the feedback. The Department will be happy to accept a draft version of Council's submission during the exhibition period, by the 11<sup>th</sup> of September. We can then accept the final version once council has endorsed it.

Please don't hesitate to contact us if you have any further questions.

Thanks  
Tom

**Submission**

I am a senior Property Manager at Berry Getaways which has been a very successful Short Term Holiday Rental accommodation business for over 10 years, employing 3 full time staff and one part time staff member. We have stringently adhered to the accommodation code of conduct which was set by Industry leaders such as Stayz, HomeAway, VicAia etc. We currently manage 50 high end holiday rental properties and have strict terms and conditions in place with regards to guest numbers, noise policies and requirements for owners to provide a safe property for guests to stay in and we are proud of the fact we rarely have complaints from neighbours about noise issues and guests about problems at any of our houses.

The proposed change to allow a maximum of 2 guests per bedroom, or maximum of 12 guests per dwelling, whichever is less, would almost ruin our business and the general holiday rental industry in the Shoalhaven.

We have a number of properties that are able to accommodate up to 12 guests, however most of these properties

would have at least one bedroom in the dwelling that could sleep up to 6 people in bunk beds or single beds with roll away trundles. To remove the option of hosting 2 or 3 families in our holiday rentals using the existing bedding configurations, which is the clientele we are trying to attract, would not only halt an enormous number of bookings, it would no longer be financially viable for our landlords to retain their properties, therefore a number of them would have to sell them which in turn would see a downturn in the local tourism economy if we see holiday rentals disappear. In the last financial year we handled approximately 1500 holiday bookings which would have generate approximately 15000 to 20000 people through the local businesses and economy.

The problem we can also foresee is if a large group are unable to secure a large house to accommodate up to 16 or 18 guests, they will simply book two smaller houses and all congregate and entertain at one of the dwellings. This goes against our terms and conditions and we would see an increase in complaints from neighbours due to noise and therefore guests losing their bonds for breaking the terms and conditions.

We can see what you are trying to achieve however most of the industry changes should be fore metropolitan areas and not regional areas. You would simply kill the industry, create a loss of jobs in an area where there is already exceptionally high unemployment.

A number of the properties we manage are on acreage, are very large properties with amenities to suit and accommodate a couple of families getting away for a special celebration like a 70th birthday with 3 or 4 generations of family in one house. These changes would see so many of these happy times ruined by more rules and regulations.

I would be happy to talk to anyone further about these changes and how it would affect our business.

FORBES

**Submission**

My first question is - Is the advisory committee members a fair balance of the stakeholders?

Question 1. All holiday rentals should be subject to the new rules. I think Tasmania has led the way . If a house or housing was approved for me to live in then the regulation should be completely adequate for guests. Smoke alarm regulation should meet the same standards as the housing regulations stipulate.

Question 2. Heat alarms for residences above garages sounds like a good idea

Question 3. as do the the ideas for bush fire prone land. Flood prone land is a huge variable. In my domestic area the statistics are every 50 years there may be a flood.

Question 4. I am supportive of compulsory simple registration. That has been achieved in South Australia and Tasmania. Registration which does not need to employ a fleet of public service workers at great cost to the STRA.

The government does not have a great track record in the business world and has off loaded many great assets for a

negligible price. eg: The department of land titles, Electricity, gas.

Question 5. The platforms have provided for a complaint section, plus local councils have implemented a voice for independent redress. For the commissioner of Fair trading to be another layer ... seems a wasted use of the commissions limited resources that we read so much about. I think I am talking reality here.

Question 6. I have been on the booking platform for 9 years. They seem adequate to me. My next door neighbours are also more than adequate. In that time I have had 2 complaints out of many bookings and have dealt with them to my neighbours satisfaction. My neighbours also tell me how much they enjoy speaking to my guests.

Question 7. Yes

Question 8. A Strike rate assessed by the platform or local council is fair and reasonable. A commissioner is a waste of a valuable resource for more important matters.

Question 9. That may be something to consult with the various platforms, Destination NSW and local council.

Question 10. Yes industry platform review and local council

Question 11. Let local council decide the penalties pertinent to their region. We must not slide into revenue raising.

Question 12. Yes

Question 13. The internet platforms, all other short term rental businesses and private hosts

Question 14. All should come under the same regulation. That way you don't have traditional stake holders trying to force other STRA people out to protect their own interests. Too much territorial argy bargy goes on in this world - look at how the medical world behaves eg: the college of surgeons.

Question 15. As outlined above. I believe in a level playing field and I believe free trade is an essential catalyst in a robust business world.

Question 16. The platforms and local council

Question 17. The small registration fee of all participants say \$100 should raise enough revenue.

Question 18. Equal fee per number of rentals

Question 19. Not sure - Let council decide.

Question 20. It's been done else where in the world and in other states, I am sure it is not rocket science

Question 21. I would say \$100/ unit of rental ie a fair and adequate algorithm

Question 22. Historically government does not have a very good record of good stewardship. Utilise someone that does.

Question 23. Data collection, tourist analysis, feedback from the community, information that leads to the development of sensible rule and governance.

Question 24. Registration with an independent holiday rental body. HRIA

Question 25. Same body as above

Question 26. Yes - \$200/ rental property

Question 27. Pass

Question 28. Consultation with the registering body eg: HRIA

Question 29. Input from Destination NSW and local councils

I am sorry I can't answer any more questions I have to get the submission in by the deadline 4 more minutes. Kind regards, I hope this has been a help I think the information should be publically available as I believe in transparency.

**Submission**

To Whom It May Concern,

As the licensee of Beach Retreats Central Coast I would like to make this submission in behalf of 24 property owners, 15 cleaning staff and other local businesses including boat and yach chartered, cafes and restaurants, retail outlets and community events. The short term holiday letting industry has been in existence on the Central Coast for longer than I can remember so well over 40 years. I as a 12 year old would clean holiday properties for my summer income.it is nothing new and brings not only financial security to small coastal towns but also diversity, vibrancy and new business.

Although some things have changed with the introduction of new booking portals the fundamentals have not

changed and it is interesting that after so many years of successful holiday lettings taking place that this is even up for discussion.

I would suggest that there are fewer holiday rental noise complaints than the average residents gatherings. Will we soon be required to lodge a "I am going to have a gathering at my house register"

I believe with the added transparency of the various booking portals that misbehaviour by guests has actually declined significantly in recent years and continues to do so - probably far more effective than any bad guest register which is very easy to circumnavigate.

The majority of hosts and guests do the right thing. When travelling I believe there should be an element of self responsibility. There are risks involved with travelling - take away all the risks it becomes a bit boring and sterile.

As a guest if I book a small house up amongst the treetops (which is the reason I booked I want to get away from the city and into the trees) I understand there is a risk of fire albeit a small one and I take on this risk. It is unlikely a fire will start in a bedroom it is more likely to start in the kitchen and there is already a smoke alarm in the hallway - covered.

Balance is important

A register fine it will be good for data anyway

A code of conduct fine formalise it - I would suggest the transparency measures already in place are far more effective.

Current smoke alarm requirements are adequate why change

How many short term holiday guests have been caught out in flood or fire? I would suggest many travelers around the world have been caught out in larger numbers as guests we are aware of the risks and we choose to travel anyway.

In short I think a lot of this submission and discussion is not necessary brought about by a few people who make a lot of noise with no real understanding of the positive impact short term holiday letting actually has across NSW. Is it just a waste of tax payers money. The proposed planning changes are too stringent and not required.

Thank you for your time

Yours Sincerely

Anna McCall

**Submission**

Submissions relating to proposed changes to the Short Term Rental Accommodation Industry

**Introduction**

Advent of online accommodation booking services

Just because someone dreams up an idea on how to make money by inundating the community with online booking platforms does not mean we should embrace this idea and legalise it .

These online booking platforms have circumvented the law and are designed for one thing, to make money for themselves and the hosts.

Like a giant pyramid scheme the online booking platforms promise that everyone can make money just by following

their system. Easy money and they only take a small bit of every dollar you get. But like any pyramid scheme eventually the money goes to the top, to the people who thought up this idea.

What I am worried about is if STRA is allowed to flourish and neighbourhoods and communities have been hollowed out by STRA how hard it will be to rebuild community spirit, to bring back normality to neighbourhoods? Long standing Planning Laws have been implemented to regulate the use of land and property, part of this is to protect residential areas and limit what land can be used for.

No-one should be able to build a holiday resort or a hotel in a R2 low density residential area let alone changing a large house into a quasi-hotel with no onsite management or security, but this is happening now and will happen even more if it is legalised.

If planning laws are changed to allow businesses to encroach into residential areas where previously they were not allowed substantial compensation must be provided to the affected residents. The residents though would rather just have their quiet enjoyment of life back.

Many people move to quiet residential areas to retire or just provide a quiet, safe environment to bring up their children and enjoy the serenity, the feeling of community and a neighbourhood where everyone knows each other and everyone feels safe, this is what living in a small village is like.

This is of course turned upside down when an investor buys the house next door and decides to maximise profits and set up an un-hosted STRA quasi-hotel next door.

The concept of AirBnB and the likes started off as what seemed like a reasonable idea with sharing unused parts of your own house, I believe that the hosted traditional B&B works well in communities and should be still allowed. With the online proliferation of the hosted AirBnB and as the money started to flow the idea expanded into people renting out their entire home un-hosted and then to investors buying houses purely to set up unsupervised quasi-hotels in residential areas. The online booking platforms have pushed the expansion all in the name of money and expanding their agenda. The greed took over.

Some investors have found this so profitable they have multiple investment properties listed as STRA. Can you imagine what will happen to neighbourhoods and communities if un-hosted STRA is actually legalised and the green light is given to these investors? Every desirable village and community could be inundated with STRA to the detriment of those communities.

Local Councils have been unable to enforce their local environmental planning regulations because they have been overwhelmed and they simply do not have the resources or funding to prosecute each illegal Short-term rental.

Let us remember that this all began by the pushing of a concept that is still currently in breach of planning legislation in many areas. Just because a lot of people are doing this does not make it right and definitely it does not mean it is best for our communities. I believe that the opposite is true.

These un-hosted STRA businesses are profiting on the misery of the neighbours who have no say and are often ignored by managing agents and hosts. Most guests simply do not care, they have paid their money and expect to get their monies worth. They are gone after a few days and the neighbours have another group to deal with and suffer through.

From reading the Draft Legislation and Code of Conduct I see that this will encourage more investors to enter this very lucrative market. Why would an investor long term rent to a family and put a roof over their head and make small return when they can short term rent out an entire house and make many times that amount of money? They also use this property themselves when they want to and pick up some tax deductions along the way. It is all about the money and greed.

This legislation will increase the gap of the rich and the poor. The rich will buy up more properties for STRA and the poor will struggle to afford to rent a property long term. I fear for the younger generation who are unable to afford to buy a house to live in now, how will they ever be able to afford one if investors push up prices even more. It will be unaffordable to buy a house unless they short term rent it for high returns adding to the problem. This is undermining the great Australian dream of buying a home for your family to live in.

This is what is already happening to many properties in my small village community and if this legislation is enacted I can see this will escalate. Some Real Estate agents are already advertising and promoting to potential buyers on how much money investors can make by buying up waterfront houses and the most desirable properties and short term

renting them even though it is still currently illegal to do this in many parts of Lake Macquarie.

Investors are already breaking the current council regulations. I have been told by Council that they have been investigating 450 short term rentals in the Lake Macquarie area that there have been complaints about, that was six months ago. Some investors that have complaints against their property used as STRA have temporarily let their properties for three months and have listed them again for short term rental after that period. If the gate is opened and STRA is legalised it will be much harder to put the genie back into the bottle.

If hosts, owners and booking platforms are circumventing the law now why would they change their behaviour just because new laws are introduced. Past behaviour is a very good indication of future behaviour, especially where money can be made. Again I say this industry is driven by money and greed.

All over the world people are rallying against the erosion of neighbourhoods and communities caused by online booking platforms disrupting normal neighbourhoods turning houses into hotels, over tourism. In Australia too we see areas like Margaret River in WA and Hobart in Tas, and Byron Bay in NSW where local people are struggling to afford to live in the local community because of the rise of STRA. Homelessness in Hobart is a huge problem except if you want to rent a STRA by the night. The Tas Government at one stage even started paying Hotels to give the homeless somewhere to stay. So the world has been turned upside down with homes being turned into Hotels and Hotels being used to house the homeless.

In Australia, country motels are struggling to run a business as there is an unfair playing field and competition from online booking platforms promoting unauthorised STRA accommodation which do not have the costs, levies and taxes of a business. In NSW the government seems to want to legislate and regulate these STRA which I believe are not compatible with a normal quiet R2 residential area. I believe the proposed code of conduct is completely unworkable.

The only way to properly manage STRA is to have an on site Host or Manager, onsite 24 hours a day 7 nights a week. Why do the neighbors of these STRA properties have to be the default STRA Police to firstly suffer through disruptions to their usually quiet enjoyment of life then, to determine if it is serious enough to make a complaint, decide whether to attempt to ask the renters to cease their behaviour or to call the owner or host, then to convince the managing agent, owner or platform that it is serious enough to need action. To be put into potential danger when the manager does not attend the premises but makes a phone call or a text message to the STRA and asks them to cease the behaviour. To then hear the anger and yelling from the large group next door as they argue about what they are going to do next. To then decide if you should contact the Police or to just lock all the doors and windows and hope for the best. To have the managing agent tell you that you over reacted. This has all happened to me and much more. We tend to go away on weekends now. Home does not feel the same anymore.

No wonder neighbours of STRA suffer anxiety, stress, Post Traumatic Stress Disorder, a loss of the sense of control over their own home and amenity. With new renters arriving every few days full of energy "on holiday" it is very draining. I believe this impact has not been addressed at all.

Why would a developer bother to go through proper planning regulations and council approvals to build a motel or a resort when they can avoid red tape, have less restrictions and not have to pay for staff and security. Just buy a house, list it on an online booking platform and walk away. Have a managing agent fob off any issues with the neighbours and they all rake in the money. All this to the detriment and misery of the poor suffering neighbours.

On looking at the list on the STRA advisory Committee Members it appears that there is little representation by community groups or representations by persons who are directly affected by STRA. I cannot see a group that represents owners of Torrens title houses that are affected by party houses that are STRA. From the outside it appears that many of the representatives have a vested interest into allowing the legislation to be introduced.

There has been very little promotion or advertising that the draft legislation and code of conduct is open for public submissions. It appears that it is being pushed through by stealth, without proper community consultation, or research on community impact, and neighbourhood impact.

The fact is until you have an unhosted STRA next door to you it is difficult to understand the stress and the impact that this will have on your once quiet daily life. It is not just the noise. After having a number of bad experiences

with large numbers of unruly guests next door, it becomes stressful each time a new group of people arrive next door. It is the fear of the unknown, it is post traumatic stress.

Imagine this, you have lived a peaceful and quiet existence in your own home for 16 years. You love the area, your neighbours are fantastic and the community spirit of the small village is delightful. The house next door is sold and the new owner is not from the community and he sets it up as a STRA. This is a business to him, he admits that. No he does not want to retire to the community, he admits that, it's all about the money.

Below is a review and response to the review by a managing agent (names withheld) of a nearby illegal STRA

Review by {.....}.

Terrible

Response from the managing agent

January 2019

A very disappointing stay with ..... group. Multiple noise complaints from neighbours. We spoke personally on the 30th Dec & trusted they understood their responsibility to respect the neighbours and surroundings was paramount. Sadly this understanding did not translate to their actions. Guests set off illegal fireworks on the property on New Years Eve. During their stay an issue arose with the gas supply which was reported in the afternoon on the 30th Dec. By 5pm the issue was resolved by our ..... staff attending the property and increasing the gas bottle supply yet the guest claimed they were without gas & hot water for 24hrs. We acted as soon as we were notified and thus do not accept these claims. Departure proved to be a nightmare. With an incoming booking arriving at 2pm and the current guests confirmed with a 10am departure, our cleaner arrived at 10:20 to begin the process of turning a 4 bedroom house around for our new booking. The cleaner found the front door open which they deemed odd (and a security breach of the property to us) so entered the house calling out hello. All occupants were asleep. Once awake they became abusive and threatening, demanding the cleaner leave 'their' house and claiming he would be bashed if he stayed on site. Our office staff was contacted by the cleaner who was now forced to wait. .... eventually spoke with ..... after several calls and texts. .... claims she was offered a 12noon checkout. There is no evidence of this in text or any written correspondence from our office. We run a sophisticated communication system from start to finish and confirmed at all stages of communication that departure was strictly 10am. .... group was advised to vacate immediately which they refused spending another 2 hours at the property causing our owner extra costs of wait time by the cleaner. This also only provided a 2 hr turnaround window for our incoming guests placing extreme pressure on the cleaning team. The house was not damaged but grime and filth from days of partying had built up in all areas of the property. 8 bath towels have been completely destroyed requiring replacement. Council otto bins were full (general waste and recycling) plus 8 x large garbage bags of rubbish and 3 x garbage bags of recycling. Excess rubbish has cost us over \$200 to remove and dump. Whilst we wish our guests to enjoy themselves, especially over the festive season, we expect groups to be mindful and respectful of the property inside & out, their surroundings, neighbours, letting agent and any member of staff who attends the property. The treatment of our cleaner was uncalled for. The breaches of the lease agreement which ..... agreed to & signed prior to arrival have caused extra costs and forced our team to respond to several varying complaints from neighbours placing our staff in difficult and unnecessary positions. We warn all future hosts to be wary of such guests.

If neighbours were given an opportunity to review the property and managing agent and owner

I would state:-

The renters partied for four days straight with loud doof doof music playing most of the time. They started a wood bbq which they placed near an outdoor deck which proceeded to fill the house with smoke. The noise was so intolerable that the direct neighbours left the house for as much time as they could. Complaints were made with the owner, property manager, some were unanswered some were responded to a day later. Still the partying continued, they were less offensive for one night then let it rip on the last night. Neighbours could not enjoy the outdoors each night and had to lock the doors and go inside. With the direct neighbours seen leaving the premises the renters got louder and partied harder. The renters lost their bond, the neighbours had four days of misery. Happy New Year!

At 2pm the next renters arrived, a few days later the next lot arrived, they were louder and more aggressive than the first. We were abused and felt threatened on our own deck by a "family group" They were loud and aggressive for four days constantly yelling at each other, there goes the quiet neighbourhood.

No wonder neighbours feel anxious and stressed whenever new short term renters arrive, you never know what you are going to get.

Economic Benefits to owners and STRA business not to the community and neighbours.

My experience of living next door to a STRA unsupervised house has been horrendous to say the least. I see the people arrive with car loads of food and drink. Because we live in a scenic area they usually do not leave the premises for the entire stay. We have spoken to some and suggested local places to eat and drink but their response is, "Oh no we have brought everything with us." In some areas there may be some economic benefits but in small towns STRA takes money out of the hands of legitimate accommodation providers and places it into owners/investors and the booking platforms. Many of these owners of STRA in our community do not live in the community and have no ties to the community except they use the STRA for their own use when they want to.

#### Unreasonable Impacts on Neighbours

How do you define unreasonable impacts on neighbours? According to the 2016 Census my village of Wangi Wangi has an average of 2.7 persons per household. This is a small village with many retired people and small families. The average age in Wangi Wangi is 53 years old. It is a quiet village until STRA comes next door. Living on a peninsular noise travels near the water. Just the fact that the 5 Bedroom house next door is a STRA would be an unreasonable impact on the neighbours.

If a 6 bedroom house next door is a STRA the house is being used at 100% capacity as often as possible for the investor to maximise their profits. They fill every bedroom. 6 couples/12 people can arrive in six cars causing parking problems in the narrow street. Because of the steep driveway access none of the "guests" bother to park on the premises. They all park on the narrow street which happens to be the local bus route. The people arrive in an excited mood everyone is on holidays, in a holiday mood, wanting to spend time on decks and outdoor areas most of the time, drinking, talking, laughing yelling, screaming all the activities that you expect in a Holiday Resort, Hotel, or a caravan park. Except that in a hotel, holiday park, caravan park or Resort onsite management and security would constantly monitor, address any issues, shut down unruly behaviour and noise, evict guests if necessary.

With STRA the neighbours cop it all. The neighbours are not on holidays they are just trying to live their normal lives, trying to sleep and work, look after kids and grandkids. Some people work shift work and night work. Neighbours want a normal home life, they want to sit on their own out door deck and entertainment areas and have a quiet meal with their family or have some friends over occasionally. This becomes an impossibility when the house next door is a STRA. Even if there is 6 or 8 people in "holiday mode" sitting talking, laughing on a deck 3 metres away, strangers looking at you as if you are invading their space it impacts on the neighbours. The short term renters we have experienced next door stay for an average of 3 or 4 nights, then they leave and the next group arrive. This time it could be 8, 12, 15. Add some visitors and all of a sudden there is 20 or 30 people next door.

If an above average size family lived in a six bedroom house with 2 adults and 3 children, both or one parent would work 8 hours per day five days per week, the children would attend school and activities during the week and some of the weekend, sometimes friends come over, occasionally they have a party for a special event. There is a spare bedroom for guests and maybe a home office. They would have 2 cars which they park in the garage. The total use of the house would be somewhere around 25% to 50% use of the property, this is normal neighbourhood living. I would say that just by the fact that the house is rented as a STRA the neighbours have unreasonable impacts of noise and disturbance of our quiet enjoyment of life.

From my experience of living next to an unhosted STRA for the last 8 months I would say it is impossible to ensure neighbours can enjoy the amenity of their own home without full time onsite management or a host on the STRA property.

#### State wide Planning

This cannot be a one size fits all policy. Every community has a different culture, a different make-up, different types of dwellings from units to separate houses to rural properties. Different communities have different expectations. Some communities like Port Stephens and The Gold Coast have always been holiday areas, but also in those areas there is the local community that must be protected. Other communities like ours are quiet villages with a large proportion of retired people. The Local Councils are in the best position to know the culture and expectations of their ratepayers. A statewide policy that changes the fundamental rights of people and allows what are basically unsupervised hotels next door to low density residential houses is absolutely absurd.

I suggest that everyone on the planning committee have an unhosted STRA next door to them for the 12 month trial

period so that they can appreciate the impacts that the neighbours have to put up with. This of course is not possible but I ask you to walk a mile in my shoes. Think about how you would feel if you were living a quiet life in your own home and all of a sudden your life is impacted on by the house next door or both houses, one on each side, became an unhosted STRA.

I believe a much greater weight should be given to any submissions of directly affected neighbours to unhosted STRA as they have lived through and have experienced what it is you are proposing to legalise. I believe most people don't actually understand the full impact of living next door to an unhosted STRA until it happens to them and I believe if this is legalised it could quite easily happen to you all.

#### Obligation to neighbours

Without onsite management who will Police the obligations to neighbours?

How will it be determined if noise is affecting neighbours only by neighbours having to complain? Why should the onus be on the neighbours? The STRA has already been imposed on them with no regard from the host.

There seems to be no obligations by the host to the neighbours except to give them contact details for normal hours. Hosts should be required to be in attendance and contactable 24 hours per day. The host needs to be obliged to respond in a timely manner to complaints from neighbours and the community. To shut down parties, to evict unruly guests. To pay compensation to affected neighbours. All that seems to happen now is that the renters lose their bond, the owner claims on insurance and the neighbours suffer through it.

What evidence is needed to satisfy the commissioner of offences? If video or sound recordings are required are those in breach of privacy laws? If it is against privacy laws will an exemption in law be provided to neighbours of STRA so they can gather evidence to prove a disturbance has occurred? Do the neighbours have to put themselves in further potential danger to gather evidence and further aggravate the renters?

Why should the neighbours have to be the STRA Police? If a complaint is made by the neighbours, say an elderly retired couple, and the complaint is against the 12 renters next door, will the testimony of the now 12 sober renters be taken over the poor suffering couple? The only solution is to ban unhosted STRA, have an on site manager or host, not just a 24 hour phone number to ring.

The code of conduct as proposed is completely unworkable. There is so much emphasis placed on the neighbours to supervise, complain, convince the commissioner then to have findings made to later have them appealed and dismissed as trivial is a complete joke.

A levy should also be attached to any fine, penalty and adverse Tribunal Finding to fund a Neighbours and Community Compensation Fund. This fund could be similar to the Victims Compensation Tribunal to compensate Neighbours and the Community for any adverse effects. Also, to neighbours for devaluation of their property and amenity, loss of enjoyment of life, depression, anxiety, pain and suffering,.

If this legislation is implemented it should be at no cost to the government with a user pay system. Registered hosts and booking platforms should be required to register and pay taxes in Australia. There should be a substantial levy to hosts, enablers, booking platforms, owners, being a percentage of the daily fee say 30% of the per day accommodation. Fees charged to go to a fund to offset the administration costs of managing the registers, to fund tribunals and to offset costs of the commissioner and his investigation team. To fund enforcement officers similar to council rangers who could be called in to deal with minor complaints and refer serious breaches of noise and criminal matters to Police.

Without these the neighbours become the default complainants and Police. Owners may say any problems ring me, neighbours should not have to monitor, complain, prove disturbances are occurring. They are stressed enough just being invaded every few days by STR that have paid a lot of money, who feel entitled with the following attitude, "I have paid a lot of money to stay here and I'm not going to go inside and shut the door and be quiet."

They leave, the next lot arrives and here we go again with the same issues. Many neighbours of STRA myself included tend to now move out of their own homes on the weekends just to regain a bit of sanity. Why should I be forced out of my own home? Short term renters have also cheered when I have left my house.

My adult children cannot afford to buy a property in our local neighbourhood. The cost of long term rental has increased over the last year as the number of STRA properties have increased. There are less suitable long term rentals available for families to rent as the larger houses are bought for STRA so the hosts can put more beds in and charge higher per night rates. Houses that are four bedrooms are being converted to six bedrooms for the same reason, more beds more people in the STRA, more money for the owners.

#### Maximum Occupancy

The maximum occupancy of guests should be limited to 6 persons and no visitors in R2 low density residential areas. It needs to be remembered that these houses are in residential areas, not holiday resorts.

A maximum occupancy of 12 guests and no restrictions on visitors, with a turnover every few days is not conducive to residential living and peaceful enjoyment of one's home for those houses around the STRA. Any more than 6 persons, by the very nature of the number of people will introduce noise and disruption to everyday residential living and introduce "party conditions".

Even if 6 persons are constantly staying in the STRA it is more than the average household in Australia. Why because a property is a STRA should more than double the amount of an average family be allowed to stay in a house in a residential area simply because it has 6 bedrooms? If two families want to holiday together then they should stay somewhere that is zoned as a holiday accommodation area, a resort, a caravan park, or in two residential houses, this way residential properties would not be overloaded and there would be less impact on neighbours.

This limit could be increased on application in relation to homes in rural areas where the impact on neighbouring properties would not be so great.

#### Home Owners Or Investors

I submit that only your principle place of Residence be allowed to be a STRA. By allowing investors to have multiple STRA renting by the day it is effectively running an unauthorized unsupervised hotel business activity in a residential area. If a local resident with ties to the area rents out part of their principle place of residence they would be much more aware and responsive to any impacts to their neighbours. An investor who buys a property solely for the purpose of getting the highest return as a STRA is less likely to care about impacts to the community and the neighbours, because to them its all about the money.

This proposed legislation makes it easier for STRA investors to make more money, because returns of STRA are much higher than long term rentals. This will affect long term rentals as there will be less long term rentals available for families and residents of communities. The costs of long term rentals will increase. This will have a profound impact on housing affordability and homelessness.

The NSW government should be encouraging home ownership and helping families to buy themselves a home to live in, not making it harder for families to get into the property market as this legislation will do. By restricting STRA to the principle place of residence the playing field for first home buyers and young families struggling to enter the property market would be much more even.

#### Number of Days

I submit that 60 days should be the maximum number of days a property can be used for STRA. This is more than enough to cover holiday periods and enable home owners to rent out their homes while on holidays and travelling. There should be no exemption for longer periods of 21 days and each day should count towards the yearly cap.

#### Exempt or Complying Development

Every STRA should be complying development. Properties should be independently inspected and certified for the following:-

1. That the appropriate fire and safety standards have been met;
2. That there is sufficient, adequate and accessible on-site parking to accommodate the guests;
3. Houses used as STRA must erect privacy screens and noise minimising structures to lessen the impact on neighbouring properties; and
4. That the property is registered.

I live next door to a STRA house with a short steep driveway, I have noticed that visitors to the property prefer to park on the street. If my neighbouring property had a maximum occupancy of 10 (which it would if the maximum occupancy was enacted) this could possibly mean 5 or more cars parked on the street. In a narrow village street that

is also a bus route this has an impact on the whole community. Busses struggle to get past, residents struggle to find a carpark near their own home. All this plus you want to allow visitors to the STRA as well. This is a huge impact to neighbours.

As the STRA is being used as a holiday let it is important that the neighbours retain quiet enjoyment of their home. I have, and others I know, have experienced anxiety, stress, hypersensitivity and loss of sense of security by the constant flow of strangers to the STRA. After having gone through some very bad experiences with short term renters next door with each new lot of renters arriving there is a sense of dread and feelings of helplessness. It is post traumatic stress and fear of the unknown. What are these people going to be like? Will it be a small group, a family, a bucks party, a hens weekend, a boys weekend away, a full on party with drinking games and loud doof doof music all day and night?

With a Torrens Title home, with gardens and outdoor areas, guests to the property are easily seen and heard. It is my submission, that the host should be required to minimise the impact the use of the property as a STRA has on neighbours, by installing privacy screens in outdoor entertaining areas and also erecting structures to minimise noise impact. Noise limiting devices that entertainment venues have to shut off power if noise limits are exceeded.

It is my submissions that each STRA needs to be registered and the host given a licence number. Each Torrens Title STRA should have a sign erected outside the property stating the following:-

1. The registration number of the short-term rental;
2. A 24 hour contact number;
3. The maximum occupancy allowed on the premises at any one time. (It is my submission that if the maximum occupancy was 6 this requirement would not be necessary).

It is my submission that Torrens Title STRA affect more than just the neighbouring property. Un-hosted short-term rental houses impact many neighbouring houses not only houses directly bordering the subject premises. In steep country, around gullies and valleys, especially in quiet residential areas, sound travels and disturbs people to a far greater extent than on flat country. Also, as many of the homes in my area are waterfront, sound travels over the water which again has a greater impact than on flat country. For instance you only need to hear a dog barking down the street or across the gully to know it affects far more than just the "directly neighbouring premises".

#### Exclusion Register

There appears to be little or no personal contact with hosts of un-hosted short term rentals. Access is usually by way of a lock box or a code on entry.

Therefore I fail to see how an exclusion register can be policed.

How, will the exclusion register be enforced if visitors are permitted onto the property?

The booking may be made in the name of the one person who is not on the exclusion register and the remaining guests may be all listed on the exclusion register. Even if every guest staying or visiting a short-term rental was registered as an occupant with official identification and checked against the register how would that be policed? Who is going to do this? One person could book in at 2pm and the other 11 guests could arrive later. Will there be spot checks by the host? My experience is that the host / owner does not come near the STRA until after the premises is vacated. Even when complaints are made the host / owner just sends a text message or makes a phone call to the guest.

How will underage guests be policed from not booking the premises? For example, schoolies.

#### Self-Regulation

It is a conflict of interest for the industry to self-regulate the short-term rental regulations. This has already been proven with the current failure of the Building Industry to self-regulate. This is like putting the lunatics in charge of the asylum. The register should be administered and enforced by the respective Councils and State Government. The register should be a public record, how else can affected residents and neighbours see if the house next door has been prohibited or if the house down the road that is constantly having parties is a STRA?

There should also be a substantial levy imposed on owners, hosts, and booking platforms to support the administration, enforcement, monitoring and costs of short-term rentals sufficient to cover the costs of the complaints process and registration, monitoring, enforcement costs. I suggest a team of enforcement officers or rangers who can monitor and be called to troublesome STRA properties. Perhaps a user pay system could be implemented similar to where there are concerts or sporting events, where the organisers of these events must pay

for a certain number of Police to be supplied in order for these events to be allowed to operate.

#### Complaints System

It should not be for the neighbours to police the STRA. The only way this can be avoided and complaints minimised is to have an on-site host. The onus should not be placed on the neighbour to collect evidence, potentially place themselves in a dangerous situation and make a complaint because their home-life is being disturbed.

#### Not a one size fits all Policy

This should not be a State wide one-size fits all policy. Councils need to have more control over their LGA and property owners living in residential areas, who have made probably the biggest investment of their lives need to be considered and protected. Councils are in the best position to know how STRA affects each suburb differently and should be able to make changes to how STRA are allowed in different parts of their local area.

#### Serious impacts on Neighbours

There needs to be studies conducted into how these houses impact on the mental health of neighbours. I have personally suffered from loss of peace and enjoyment, powerlessness, hypersensitivity, stress, anxiety, depression and symptoms of post-traumatic stress disorder as a direct result of living next to a STRA. These are matters that impact on the health of communities and need to be considered in the Code of Conduct particularly in relation to Torrens Title un-hosted entire house short term rentals.

This also needs to be considered in relation to the complaints system. Outside enforcement, monitoring, and patrols would take some of the stress away from the neighbours who are basically left alone to suffer through disturbances and be the STRA Police, a position they don't want to be in and shouldn't have to be in.

#### Compensation for Neighbours

How will home owners who find themselves with a STRA next door or across the road be compensated? If you are unable to sell your house or the value is depreciated because this new legislation has allowed STRA to set up next door is the NSW Government going to pay compensation for this? Is the NSW Government going to set up a compensation fund for affected neighbours for pain and suffering, loss of amenity, loss of enjoyment of life, health issues that develop like anxiety, post traumatic stress disorder, or do those affected have to resort to civil action against the Government, Owners and Hosts.

#### STRA Social Impacts

Before any implementation of STRA is considered perhaps a list of all addresses of the STRA for the last 12 months could be supplied from the represented booking platforms that are on the committee and then a study and survey of all direct neighbours of these STRA be conducted so that a realistic assessment of any impacts can be gained. This would be an unbiased assessment of real people who have experienced living next to a STRA. This would give some accountability and balance.

Without this type of research and consultation by allowing STRA the NSW Government I believe is forcing an unwanted social experiment on the unsuspecting neighbours of any future STRA that spring up once it is enacted. If the NSW government is not willing to do this then you may find yourself living with a STRA next door to you or maybe even have one each side of your family home.

**Submission**

Although making a personal submission, as treasurer of Encore, I am aware that this submission represents the view of all 7 other committee members. I am disappointed with the 21 day loophole in the proposed legislation that allows STRA to proceed. In other words someone can book accommodation through ABNB or another entity to stay in an unhosted unit for up to 21 without it even affecting the 180 day cap.

There are many arguments against short term rentals- increased noise, reduced security, loss of use of residents amenities due to overcrowding, increased costs, no supervision and therefore no control of the number of people staying in a unit.

STRA is detrimental to the hospitality industry. It has been banned in Japan and should be banned here. Finally I believe that all owner occupiers in units, in a democratic, country, should have the final say in how their unit is managed .

Byron Bay

**Submission**

Byron Bay has become over run by tourists!

We need restrictions for short term rental - like Air BnB accomodation in Byron Bay, otherwise we will become like the Gold Coast - a party town!

Byron Bay needs locals living in this town to maintain the spirit of Byron Bay's community.

**Submission**

Dear Sirs

I write to express my concern over several of the proposed changes to the short term rental accommodation (STRA) planning framework of the New South Wales Government.

My wife and I have run a short term rental accommodation property on the New South Wales south coast now for almost two years, and have run it safely without incident. It is professionally managed through Berry Getaways, who are excellent agents and have always adhered to the accommodation code of conduct set by industry organisations. These set guidelines of allowing no more than two adults per bedroom, and we adhere to that.

Both my managing agents and we are always supportive of continued safety measures and improvements to STRA.

However, we have concerns and express our absolute opposition to some of the recommended safety standards at 4.24 of the STRA planning framework proposal. In particular, the proposal that:

- That there be no more than two guests per bedroom; and
- A maximum of twelve guests in any dwelling (whichever is the lesser).

Our property is a large property with seven bedrooms and so can easily accommodate 14 adults. Why should we be penalised for having a large property and an ability to accommodate more than twelve guests when we have done so without incident, completely safely for a long period of time. ?

Second, one of our bedrooms is a bunk bedroom that can accommodate 4-5 children – and it is specifically set up to accommodate children. The proposed change allowing only two guests (as opposed to two adults) per bedroom would unfairly prejudice us and, importantly, would have enormous negative impact on the income stream from our property which is set up to accommodate several family groups which is the clientele the house has attracted without incident in the past.

We strongly urge that reconsideration be given to these proposed recommended safety standards in terms of the maximum amount of persons per bedroom and per dwelling.

thank you

**Submission**

My submission is a brief one. I am a home owner with an apartment in the city. I have been stung before when I leased my property to a tenant, who then rented the property out as a short term rental (unknown to me until later). I believe the proposed reforms should consider this innocent class of people who try to do the right thing, rent their property according to the applicable laws and by-laws, and yet are punished when a third party (the tenant or sub-tenant) does the wrong thing.

In my case, while my tenant was in breach of the tenancy agreement, I was punished by the Owners Corporation with threats of being taken to the NSW Civil and Administrative Tribunal (NCAT), fines, shamed at Owners Corporation meetings and ultimately received a stern letter from the Building Manager forcing me to terminate my tenant.

I ask that the Department of Planning, Industry and Environment (the Department) draft a carve out or exception for

home owners who have 'clean hands' and acted in good faith when renting their property to a tenant, so that if their tenant is later found to be in breach of the laws or by-laws, the Owners Corporation are required to give the owner a couple of opportunities to rectify the breaches with their tenant. If this is unsuccessful, then a reasonable period of time (perhaps 8 weeks) could be formally provided to the owner to find a new tenant, while the current tenant continues to rent the property. If the tenant terminates before the end of 8 weeks and is outside contract, then I propose the owner could access the difference in rent (minus agency fees) from a public pool of funds that is collected from major "home sharing" agencies such as Stayz and Airbnb. This is because they indirectly caused the lawful tenancy agreement to end, and would help minimise the financial impact on 'mum and dad' investors and home owners.

Please do not punish innocent home owners. Especially with falling apartment prices in Sydney (and NSW more broadly) which dissuade the sale of property, the Department should move quickly to protect a potentially vulnerable class who rely on rental income to meet their mortgage repayments.

I can be contacted by email on [much.bobness@gmail.com](mailto:much.bobness@gmail.com)

Dear MInister

Airbnb provides flexibility to those who need to rent in a short term. Sharing economy is here to stay, just like Uber, Airbnb, car next door and Airtasker etc.

This is an outcome of both the advancement of information technology and human economic behaviour. Times have changed, so should regulations and rules of the state.

Although it is not banking nor the stock market where heavy regulations must be in place. STRA should be regulated

but only to a certain degree, for tax and public safety purposes.

Any artificial or we shall call non-economical regulations and rules against STRA will only slow down/put a drag on the growth of the market/industry, but lose any financial benefits of the homeowners and the state. The STRA industry will eventually and inevitably catch up to the rest of the world.

In my opinion, the platform of Airbnb brings people from the world to Sydney particularly in center of Sydney where boosted economic, employment rate of New South Wales. STRA properties should be registered with the local council and/or building management to allow regulators and managers to provide policing services to the community.

STRA owners and service providers should pay a premium/surcharge/levy for the extra services provided by the relevant authorities/entities.

There are bad tenants everywhere which you can't judge that bad people are from short term tenancy such as Airbnb. I come across a few recently cases that long term tenants planted drugs in the accommodation because they are long term tenants. They think the chance of being caught were rare. In regards to disrespectful/bad guests throwing parties and damaging property or unreasonable owners providing unacceptable conditions of listings (small numbers compared to the industry volume), these issues should be referred back to the platform provider and its insurers. That's their job being a responsible middle man and they financially benefit from doing so. After all, there is no guarantee that long term tenants would not damage property, carry out illegal activities on the premises.

Ultimately it is an economical issue. Economical problems should be resolved by economical policies.

Kind Regards

Christine He

**From:** David McAndrew <mcandrew.dkla@bigpond.com>  
**Sent:** Wednesday, 11 September 2019 2:18 PM  
**To:** DPE PS STHL Mailbox  
**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

Being Self Funded retirees (wife and myself), the small amount of additional income from being an Airbnb Host does help ends meet, let alone the opportunity to meet new People and show off our local area (Gunnedah).

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,  
David McAndrew  
1888 Kelvin Rd  
Kelvin, Nsw 2380

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb as an over 60's Australian it is a way I can subsidise my other part time income. It is also a way I can personally share with travellers who visit this regional area.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because... we have a self contained unit under our deck. The money we make from hosting helps our family make ends meet. We claim all income from the apartment and pay tax on this. We keep tabs on everyone who stays with us and ensure they are not an annoyance to our community. Since starting hosting four years ago, we have found those who stay to be respectful of our house rules and our neighbourhood.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a single mum with 2 teens, already have 2 jobs but the council and life bills are unbearable, this is my way to survive, to have another income due to the higher life cost in Byron Bay. I work hard to maintain my property, to manage and to give a great service to my guests. The love I put into my place is recognised by the beautiful reviews I keep having and have DA approval in my property, I pay taxes insurance it's all open in the air in my books.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because after living and working extensively overseas, I enjoy meeting travellers and introducing them to the scenic beauty of Nambucca Heads. I have been involved in tourism and hospitality in various forms since taking a redundancy from the public service 11 years ago. Early retirement and limited job prospects in regional Australia has meant living on a very limited budget. Listing my house on airbnb has given me such much-needed financial support. So many benefits!

Until recently I also provided a personal private taxi service taking locals to the Coffs Harbour airport or taking elderly residents to medical appointments. It was a small but much-appreciated business that was unfortunately destroyed by excessive NSW State Government fees that dictated I pay the same authorisation fees as a metropolitan taxi doing 20,000 bookings a year. I barely did 50 in a year! Ms Pavey - you were the Transport Minister overseeing the debacle Point-To-Point Commission. Please don't further threaten my livelihood and keep in mind that airbnb generates many personal and community economic benefits.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

Having lost my private taxi business and its small source of income it would be a travesty to have the same draconian government interfere with the little bit of earnings I scrape on airbnb. I rent my spare room for \$53 - on average 1-3 nights per month. The house is safe for me, my friends, family, guests and is fully insured. The costs I incur for home ownership and maintenance are already substantial and regulated by local council.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy". But I have personally seen how this regulation designed to protect powerful interests - accommodation providers not the taxi industry in this example - can decimate small struggling operators in country Australia.

I do not support the Government's approach and strongly object to parts of the current proposals are unfair. Once again this government is falling well short of its electoral commitments. I'm sick of it interfering with my entrepreneurial efforts be be self-supporting and not on welfare!

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

These costs are simply a revenue-raising measure to partially pay the running costs of yet another regulatory body. As with my private taxi business they are sure to be prohibitive and escalate over time. And will the fee structure be as unrealistic and unfair on small regional home-sharers as the poorly-drafted transport regulations?

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am a local of the Nelson Bay area & unlike other so called 'locals' I enjoy encouraging people to visit the area & share it's rich natural beauty with them.

By being welcoming of guests & sharing my local knowledge, visitors are more likely to spend more time & money in our community.

The money I make from being a local Airbnb host is spent in the local community.

From my perspective, the most important outcome from my hosting on Airbnb is - it makes people happy.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I don't have enough money to pay the bills. I need to supplement my income to survive. My husband has cancer & we are on a limited budget.

We have battled all our life & paid taxes all our life. I have a right to earn money. We don't have any savings. I don't want to go on Centrelink.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. Coffs is a tourist town and depends on tourists, and there is many times in the year where there is not enough accommodation. We can't have NSW government legislating an accommodation monopoly for just a limited few businesses !

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive. More expensive for the tourists and much too expensive for home-owners.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

If you have excellent reviews, you are already letting market work. You don't need to be regulated, or have a Code of Conduct, because market chooses you because of excellent conduct, super cleanliness, & consideration of neighbors (noise) etc.

Plus, there is the privacy issue. I am entitled to function with my own privacy & anonymity. If a customer wants to book in & pay the money, THEN they get the address, contact details etc. Otherwise, they don't get the information. This information should not be freely available in a register.

There are a lot of private businesses operating in Australia, where there is absolutely no requirement to be on a register. They are simply as 'c/- the accountants office', or a trading company/name.

Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform. (Again, I stress that the if you have excellent reviews, you are already letting market work. You don't really need to be really need to have a Code of Conduct, because the market chooses you because of excellent conduct, super cleanliness, & consideration of neighbors (noise) etc.)

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

All towns depending on tourism to survive should be able to trade 365 days a year. Tourist's are fundamental to town's survival There should be no 'day caps' on amount of days you can use homesharing on AirBnB/Stayz etc in a calendar year. If there is a 'day cap' imposed on me, it should be imposed on every accommodation business i.e. resorts, hotels, council caravan parks, backpackers, B & B's etc.

With this legislation, everyone should be treated equally, including councils. Any talk of a 'day cap' should apply to every caravan site, tent site, and cabin in council caravan parks ..... otherwise we are furthering another very large monopoly accommodation business in our town. The caravan parks are effectively now built like resorts. As well, local resorts and hotels are now advertising on AirBnb/Stayz and many other similar platforms. Where do you draw the line ?

Council also should have no legislative or other type of right to limit days with 'day cap', or charge a toll or otherwise interfere in my accommodation, because they have a huge conflict of interest because of their ownership of all the numerous caravan parks in our area....most of which are now like resorts. (Plus, they are waiving fees to developers.)

Strata title should & must be a separate issue. Ideally, with each strata title block voting to look after their own patch. Or at worst, separate legislation dealing only with strata title issues.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. I love showing my visitors from overseas around my town.

Living alone and being able to host international visitors from all over the world has been a blessing for me, whilst, at the same time, providing guests with the experience of living in an authentic, Australian family home. This promotes positive connection with people from all over the world, who then pass on their experiences when they return home. Overall, this promotes tourism by word of mouth.

I'll never forget my very first guests who where from India, living in America. That were apprehensive about coming to Australia because they'd heard we were a racist country. I was saddened to hear that we perceived this way, but so thrilled to be able contribute in my own small way, via the Airbnb experience, that we Australians are welcoming, warm-loving people. They went home with a very different opinion and shared this with their family & friends. Powerful!

I am a 60 year old widow and have struggled to find full time employment in my country town. I am not eligible for the aged pension for another 7 years, so Airbnb has been a lifeline for me, enabling me to keep paying my mortgage.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no

requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. **Submission**

Hi

I am making this submission as Chairman of the strata Committee for the Trafalgar Apt building at 361 - 363 Kent Street Sydney.

Our concern is with the monitoring and control of the fire safety requirements. It would be helpful if the legislation allowed for the following

1/ All short term rental apts be required to be registered with building management. This would then allow us to incorporate a check on the new fires safety requirements for those designated short term rent apts, when our annual fire safety audit is undertaken by our external fire safety provider.

2/ We further propose that the legislation provide for the requirement that all registered short term stay apts,

produce to building management a fire safety sign off document issued by a certified fire safety provider. This will in the first instance satisfy the fire safety concerns, with our annual fire safety audit providing ongoing confirmation of fire safety compliance

**I agree to the above statement**

Yes

I have read the submission of Nicky Burgess and would endorse her sentiments. My wife and I have been personally impacted by the use of a property two houses from ours, and seen the effect it has had on Nicky and her husband, Chris Cummins. We have also recently utilised such accommodation (travelling for 10 weeks through mainland Italy, Malta, Sicily, Sardinia, Corsica and southern France). We accept that STRA is here to stay and is a world-wide phenomenon, however it needs to be appropriately regulated and such regulation enforced.

The issues I feel must be adequately addressed are:

1. Number of days allowed per annum. A reasonable balance between an owner's right to income, guest utilisation of STRA and mitigation of potential impact on neighbouring residents would be 60 days. Most STRA will be weekend use, so such a limit would enable most weekends to be accessed for the owner and by guests. Periods outside the limit could be used for longer term letting by the owner, or personal use.

2. Number of guests allowed. We have witnessed very poor behaviour when a large number of guests (up to 12) used the property, and it caused disruption to the whole neighbourhood. Nicky and Chris were most severely impacted - regular use of the property for STRA purposes has had a noticeable affect on their health and well-being. We would submit that the number of guests be limited to six, including any visitors to the site while being used by the paying guests.

3. Parking. Off-street parking should be mandated to ensure no traffic issues arise.

4. Control of poor behaviour. A process of stepped penalties for proven poor behaviour should be introduced, with the final step involving a ban on guests using STRA. An owner should also face restriction on the ability to let their property if guest behaviour is unsatisfactory. Ideally, there should be an on-site presence either by the owner personally, or their representative. Otherwise neighbours will be required to access police support when their home-life is disrupted.

**I agree to the above statement**

Yes

**Submission**

11th September 2019

Submission on Draft STRA SEPP

South Golden Beach Community Association (SGBCA) is greatly concerned about the proliferation of Short Term Rental Accommodation (STRA) in Byron Shire.

The NSW Government continues to push Byron Shire as a desirable tourist destination. The exponential increase in domestic and international tourists of more than 2.1 million annually has impacted heavily upon our Shire. Some of the detrimental effects include negative traffic and parking impacts, dangerous pot-holed roads, poorly maintained infrastructure such as public toilets and parks and gardens which Byron Council is unable to maintain due to lack of

funds. There is no means of obtaining funds from tourists to assist in the up-keep of the shire given that NSW Govt. is resistant to the introduction of a bed tax. Many cities across the world rely heavily on a bed-tax to assist in reducing the impact associated with tourism.

As a result in the increase of tourists, investors and property speculators are cashing in on profits to be made by STRA at the expense of the amenity of our neighbourhoods.

Consequently, Byron Shire has been swamped by STRAs, particularly in residential precincts. These STHAs are not registered as commercial businesses and do not pay Council to operate their businesses. The reduction in permanent housing supply caused by property developers renting whole houses for short periods has increased property values across the shire. The inability to find affordable housing is forcing residents to move outside the Shire away from their friends and family or to find sub-standard housing in unapproved illegal accommodation such as garages, sheds and caravans. The sense of community has diminished as many neighbourhoods largely exist of short-term renters. Many of these tourists have little respect for the amenity of the permanent residents or, indeed, the natural environment. Currently Council is unable to effectively manage the adverse impacts of these non-hosted properties.

Permanent residents who have bought or rent a property in an urban area have a right to expect a degree of peace and quiet instead of being negatively impacted by party houses operating on a continual basis next door.

Byron Shire has a relatively small rate base and the concentration of non-hosted STHAs is totally out of proportion to permanent dwellings. SGBCA feels that a 90 day threshold for STRA is an equitable and workable compromise. This would be a deterrent to property investors who wish to rent out their properties year-round and would free up housing stock for permanent residents. We are seriously concerned about the potential loophole wherein a booking for 21 or more consecutive days will not count towards the limit when a host is not present. A host will then be able to book out as many 21 day periods as they wish and these days will not be included in the annual limit. This means the true extent of short-term letting can never be monitored or measured.

We do not have faith in a self-regulated system to protect our villages and towns. This takes the power away from local councils to monitor non-compliance for their residents. Council needs to have powers to police host, online platforms and letting agents instead of NSW Fair Trading.

Yours Sincerely  
Angela Dunlop  
Secretary, SGBCA

**I agree to the above statement**

Yes

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because its a way to help pay flights when we visit our family overseas.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive. This is an unreasonable requirement, which works against the sharing economy and for the government coffers.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it gives me an added income as a single parent (who does not and have never claimed any form of benefit) which means I don't have to work so much in a full time job and allows me to spend more time with my son.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

Our property via Airbnb is meeting a specific need for family and travelling groups that is not well serviced by other venues and this has a very positive impact for Bathurst and the region.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. **Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I herewith provide my feedback on the Government's proposed regulations.

I am an Airbnb host because it helps me to pay my mortgage and I like to meet people from different walks of life. I recommend my favourite cafes, restaurants and shops to my guests and in that way support the local business community.

I usually only rent out one or two rooms on air Bnb with me living in the same house. But I might want to rent out my entire house if my partner and I move to Europe for a year or so. Why would I not be allowed to do so (without enormous red tape and huge additional costs)? It is my property!

I am very concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. That is despite the government having stated to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Parts of the current proposals are in my view unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting. For instance, battery operated (not hard-wired) smoke detectors should suffice.

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it gives an opportunity for students, teachers and friends to access low-cost, safe, friendly, supportive accommodation in our local area. It also gives my family an opportunity to meet new people from all walks of life and places on the planet.

As free people, we should be fairly free to choose whom we invite into our living space and in turn receive an exchange of culture, kindness and nominal financial contribution for sharing spaces. This is the true meaning of a global community these days.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because its more flexible as a landlord and provides for affordable holiday accommodation for NSW visitors and helps our tourism industry.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Regards,

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because... As a retired, and often lonely person in my own home, living alone I find the process of airbnb adds to my quality of life. its like having a part time job run from home. It gives me interesting people to talk to. it gives me a little extra income. Many guests are backpackers into the local area looking to find a share house and pick blueberries. So I consider I am contributing to the local economy, and providing cheaper accommodation for those with limited means. It helps me to pay for my most expensive yearly bills. Council rates and car rego.

I understand that many Councils regard sharing ones home as an ancillary use of such.

If my house is approved to be safe for me and my family to live in, it's safe for my guests.

Airbnb has provided me with a very effective carbon monoxide and smoke sensor which I installed. If the Govt decides to create costly barriers in order to share ones living space with others, then it will deprive many of both modest income and cheaper temp accommodation for a variety of guests.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform. Airbnb provides hosting insurance on their platform..

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same -we need to move into the future. There is room for all forms of accommodation from tents to luxury pads. There needs to be fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

Wage growth has been stagnant for years, especially for the standard worker (unless you are a CEO). Yet the cost of living and inflation continue to rise. The rising discrepancy between flat wages and higher costs of living means your average Aussie worker needs to make extra dollars on the side to survive. Targeting the standard Joe Bloggs on the street isn't fair. Why aren't Apple and High Net Worth individuals (who are frequently revealed to pay zero or low tax, eg: James Packer) being targeted?

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host, I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows me to live with and support my 95-year-old mother in her own home. Plus it allowed me to continue to pay my mortgage when made redundant until I found another job.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however, parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home-sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because... i enjoy sharing my home with others

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I definitely oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for

holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform. this is the easiest and most cost effective form of insurance for owners and guests

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. Dear Director, Housing and Infrastructure Policy,

Please read the first 3 paragraphs of personal wording. As an Annandale Airbnb host I would like to appeal to you directly Jamie, by providing my feedback on the Government's proposed regulations. I have included personal details as well as relying on wording provided by Airbnb which I have read and with which I agree.

I host on Airbnb because I could not survive financially without it. I pride myself on being independent and secure. But mostly, I thrive on sharing my home with guests from all around the world. I have been welcomed in this way myself over a longish life and now can return the favour by living the way I see contributes to harmony in the world. In nearly 4 years of hosting, I have never had a negative experience and have maintained an unbroken Super Host status. Local businesses benefit through my suggestions to guests, people have a better, warmer experience of Sydney and Australia and I make just enough money to pay my bills - services and rates, and afford the cinema regularly (about \$12,000 a year)

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home. In fact it would make it impossible for me to continue and this would be very worrying. I am nearly 70 with a long life ahead, and existing on small savings, drawing from a small Super fund and a small UK Pension. And from here - Airbnb words help me underline my genuine concern for my future.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired

- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. Dear Director, Housing and Infrastructure Policy,

I don't oppose the legislation! Going by what a house costs in other parts of Australia it is already at least twice as expensive as it should be in Sydney and you need to do more to stop the housing market being a Ponzi scheme - That means all forms of investment in housing be it local or international. Denmark (Copenhagen) are the leaders here. Have a look at their legislation.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because the income provided allows me to go to university, something I previously was bit in a position to do.

I also love sharing my home with people from around Australia and the world under the controlled yet informal and relaxed Airbnb business model. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I like the idea of sharing my wonderful city. Over the six years of hosting and being a guest, I have met wonderful people from all over the world.

As a host I get to share the passion for the things and place I enjoy. Many of my guests frequent the businesses suggested and refer on to other visitors to Wollongong.

The income from my Airbnb also assists in allowing me to have a reasonable income in retirement. I am not dependant on the government for a pension or newstart.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it helps to pay for the costs of maintaining the property for my stepfather as he is in full time nursing care.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the bills. I also recommend our local attractions, favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to AirBnB his home, and we may have to sell it.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive. It will also drive families and other holiday makers considering local holidays to go overseas to cheaper destinations.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

Dear Director, Housing and Infrastructure Policy,

This is Dean Young. I'm a father of two children. It has been 9 years since I moved to Sydney. Here are a few thoughts about the coming State Environment Planning Policy (Short-term rental accommodation 2019). Please take some time to read this letter. And it will be much appreciated!

The first time I heard about airbnb was from my friend Zack. I was planning to travel around Europe and had a struggle of finding a place to stay. After he told me about this app, I then checked properties in Sydney. I was surprised that so many properties were listed around my location. After I went back from my trip, I started to think about the possibility of posting my apartment on airbnb. The short-term rental was actually something I wanted to try one year ago. Because I tell you why. Because long-term rental wouldn't perform well anymore in Sydney. For the past 9 years, god knows how many residential buildings were being built throughout Sydney. Long-term rental returns wouldn't increase because of the high pressure of competition. For those who bought the residential apartment in Sydney in recent years like me, long-term rental returns wouldn't even cover the monthly mortgage. The worst situation was last year, long-term rental returns even dropped. In this case, I had to try short-term rental to achieve more returns.

After I have tried airbnb for half a year, I calculated my returns were around 5% higher than long-term rental returns. I then started to manage my other two apartments as well. Now I have 3 listings, and my returns continuously went up to 18% higher than long-term returns. I could then use this method to support my family and my two children. Honestly, most of my income has come from airbnb now. If the Policy of 180 days was officially made, I wouldn't be able to live and support my children. And think about it, not just me, my cleaner also my friend Ray will lose her cleaning job as well. What would happen to her family then?

Please take my concerns into consideration and please evaluate the situation by facts, I think some countries are not suitable for airbnb, but definitely not Australia especially not Sydney. Large tour population will bring plenty of tourists to Australia, house owners need another option when long-term rental doesn't perform well, and mostly I pay tax for short-term rental income. It should be considered as full reasonable. Please

Regards,  
Dean Young  
Wentworth Ave  
Haymarket, Nsw 2000

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is a reliable source of income. I was commuting to Sydney, travelling 4 hours a day, before being made redundant. Now I do seasonal tax consulting, seasonal contract bookkeeping, contract cleaning and Airbnb hosting. Being able to host makes paying bills easier and also ensures that visitors to the area are hosted by someone who has an interest in making sure the guest has a good experience and is provided with detailed local knowledge about the best restaurants, pubs, entertainment and walks.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

Sharing economy is a new trend of social development, meanwhile it has greatly relieved my financial pressure. I believe it also provides many flexible job opportunities.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation,

registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my wife and I want to make enough money to help cover our living costs as it is difficult to find work in our area for people in their late 50s and we would prefer not to have to rely on government assistance.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage, the bills and in my case to support my children by helping them enter the home market and being available to babysit grandchildren. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I became a host to survive. Unfortunately like the many groups in our society who through no fault of their own find themselves in financial crisis. My case. I am one of a great number of older women who ended up on their own, retiring with negligible super, no savings & still paying a mortgage. Unlike those who just spent all their money each week & remained renters we did try to provide for our future. As usual Australia rewards those who didn't even try by giving them rent assistance. We who did try get no help in keeping a roof over our heads in old age. We are & have always been prepared to work to pay our way. Just don't make everything too complicated for us. I am 72

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because there are very little hotels, motels or other accommodation in the area, this area has seen enormous growth and there is very little temporary accommodation available to host the workers and skilled employees that are currently working in the area in large numbers. All of which need somewhere to stay whilst the works are completed, and so they area can continue to grow as per the government planning required.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills.

I also recommend all the local businesses as well as the whole of Sydney to people using the accommodation. The house location is great for travelling by car. We are located near the Hawkesbury region with the quaint traditional Aussie towns of Richmond and Windsor. These towns are sat on the Hawkesbury river for water sports and a traditional ride on the steam/paddle boat. The house is 15 minutes drive from the updated Raging Waters, water park which would be a huge must for all ages! We are close to the Blue Mountains which is a 45 minute drive up to see the beautiful scenery and enjoy long walks.

Down the other side of the mountain is Bilpin great for fruit picking and popular for apple picking, apple pies and cider tasting.

We are 1 hour from the central coast were you will find quiet clam beaches to visit and relax. Rather than the big waves of Manley and Bondi. 2 hours drive from the Hunter Valley for huge range of vineyards, wine & cheese tasting. As for the city, Sydney can be accessed easier by train which is approximately 1 hours journey. There are 2 train lines to the city within 3 km of the house. One is the brand new west connects. The closest is 1km away from the house and drops you right in the centre of the city. From here you can access quick links to other famous areas such as Manley, Bondi, Watson's bay etc..

In the town Alone there are cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my only other income is a NSW Police Pension. The extra income I have received through house sharing has enabled me to support my adult children through recent and ongoing significant health and welfare issues. As a result, my children have not been dependant on Government assistance. I also pay tax on the extra income I receive. If the NSW Government was introduce onerous, unfair and unaffordable regulations on shared accommodation, it would result in myself and my family becoming more reliant on Government assistance.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it helps me to pay my mortgage and my bills (including rising electricity prices and health bills). As a casual academic teacher and PhD candidate, I very much depend on the income I make on AirBnB.

I'm not alone. The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it impossible due to red tape and costs for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year like myself, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation,

registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I need someone else to share with to pay rent. I have lived in shared housing for most of my adult life mostly with long term housemates who I have maintained ongoing friendships with. When my last housemate left after sharing for over 4 years, I thought I would try something different and have been enjoying the new faces and experiences that Airbnb guests bring to my home. What has surprised me is the number of locals who come to stay because they live in the country and have a few days work, or a meeting to attend in the city, or the commonest, for me, are the grandmothers who live interstate and want to stay near their grandchildren but cannot be accommodated in the grandchildren's home. I of course also have overseas travellers who simply like home comforts while on the road.

So while as an Airbnb host it helps me economically with paying the rent and the bills, I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. I also suggest many other activities and sites that are not always covered in the major tourist brochures. And as I am now retired it enables me to meet new people who have also become my friends.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for me if I have to pay hundreds or thousands of dollars for a permit to simply share my home. For other hosts who share their home for a few weeks a year, it will probably make hosting uneconomical.

For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems.

Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which respect the ancillary use of my home for home sharing; mandate smoke alarms – either battery operated or hard-wired and require evacuation or emergency plans and guest education, which I have to say Airbnb are excellent at prodding hosts to ensure that these things are in place.

### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is a pleasant very controlled way to rent out my part of my house for half of the year. I am retired and need to have an income to allow me to continue to live in my home in Byron Bay. AirBnB allows me to preapprove guests, set house rules and make sure my home is cared for, guests respect the neighbours and behave well.

I have previously rented long term through a real estate property manager and this was highly unsatisfactory as the house was damaged and the renters were not controlled. It was difficult to evict them even though the damage and disrespect of neighbours was obvious. My neighbours are really happy now the house is part rented on AirBnB.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as an over 55 year old female it allows me to supplement my income. It also provides ongoing financial support as I spent most of my life as a married woman supporting my husband and home and have no to very minimal superannuation when I retire. It helps me live in my own home.

Women and others like me depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have a holiday apartment that caters for guests who want that getaway close to Sydney. Specifically its located in a building and location designed for holidaying.

As an Airbnb host, hosting as an economic lifeline to help us pay the mortgage and the bills on the property. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I am keen to provide affordable accommodation in a rural setting.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host we wanted to provide our feedback on the Government's proposed regulations.

My husband and I host on Airbnb because we need the income. Being on the aged pension we must supplement our income to pay the bills. We do not regard this as a business but a necessary additional income in order to live. If the Government chooses to regulate and force us to make changes to our home, we will stop hosting as we have no financial resources to either pay a registration fee or undertake further changes to our home.

Our hosting on Airbnb is irregular with the total income being well under \$5,000 p.a..

Ours is a small home and we offer clean and comfortable accommodation for two people within our home. We offer a continental breakfast in our dining room only. There are no separate cooking facilities available to guests. We live on the premises. This is our primary residence.

We see ourselves as providing a service as well as earning a little from our efforts. We live in a desirable rural environment where there is a dearth of accommodation from hotels, motels and the like whilst being a major wedding region.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the bills. We also recommend our favourite cafes, restaurants and shops, so small businesses get a boost from local tourism.

We are deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will remove any economic benefit for us to share our home.

We understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally we support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, we want to comment on the following:

STRA State Environmental Planning Policy

We oppose the requirement for costly compliance development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

We oppose the unprecedented requirements to introduce red tape to make costly alterations to our home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling. For the vast majority of hosts, this means there are no

requirements to alter a home to be compliant with regulations. Put simply, if our home is approved to be safe for us and our family and friends to live in, it's safe for our guests. We support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of our home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

We oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated and ultimately rejected. In South Australia there are no fees and no registration or licensing systems, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

We are Airbnb hosts and we wanted to provide some feedback on the Government's proposed regulations.

We host on Airbnb for a few reasons - it means someone is able to make use of our home while we're away, they can keep an eye on things, keep the garden alive in summer, and most significantly, help us make a little extra income to help out with the mortgage and bills. Our guests can find an affordable, comfortable, family-friendly place to stay when they visit Sydney - and judging by their reviews, they love it. If we weren't able to share our home in this way, it would be sitting there vacant.

We also recommend favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

We are very concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for us to share our home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

the relatively low tariff we charge allows many travelers to enjoy our region at a reasonable cost. We host many overseas guests who enjoy and appreciate staying and mixing with locals.

We suggest tourist activities, shopping and dining experiences which they might otherwise miss. Airbnb hosts while remaining affordable can continue to contribute to the traveler's overall experience.

Airbnb is not just a sharing community it is also a caring community. If we are not bound by restrictive rules and regulations we do hope that we can continue Airbnb hosting.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb .

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I was made redundant and being close to retirement I could not find a suitable position. Also I am not entitled to Centrelink so it is my sole source of income to pay the bills & mortgage.

For those facing uncertain times of businesses downsizing, closing down or going overseas, this is a last resort to keep struggling families and singles afloat.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides me with an income that will enable me to transition to retirement. As a single woman with children my superannuation is minimal and would like to provide an alternative income from my profession of nursing.

I have the room in my house in a beautiful area of Ettalong Beach and provides the possibility for a economical break for guests I host.

As a Airbnb member when I travel I prefer to use Airbnb as it provides a more intimate holiday experience.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. Dear Director, Housing and Infrastructure Policy,

I am a local Airbnb host, and I would like to provide my feedback on the Government's proposed regulations.

My wife and I host on Airbnb because we like to provide a boutique accommodation experience for visitors to our special area. We rent out half our home because we no longer need that space as our children have grown up and have their own families. We have attracted many people to the area, who often would not have come without the specific experience we provide. This helps the local economy, and means, as self funded retirees of limited means, we do not need to ask the government for a pension or any other handouts.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb for several reasons: 1/ it is a critical source of income for my family. Our main property is based in the Blue Mountains which has long been a popular tourism spot for Sydneysiders renting weekenders. Airbnb has been a key platform for developing our business. Our business has operated since 2012 and since it begun we have hosted over 5,000 guests bring much needed business to the Blue Mountains economy; 2/ it allows us to share our unique property with both international and domestic guests. Our business has grown steadily over the years allowing us to reinvest and improve the quality of the property and the landscape it is situated in; and 3/ we are avid supporters of the sharing economy. Hosting via Airbnb allows property owners to share their property flexibly and cost effectively. By sharing our property, we effectively make available to travellers our property's "spare capacity". This is a win for the environment. It means that our existing property is utilised by others and reduces the need for new, additional accommodation to be built in the fragile environment of The Blue Mountains, a World Heritage National Park.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

We host on Airbnb because it enables my family to maintain a weekender holiday house in the beach community of Pottsville.

We depend on AirBNB rentals for the upkeep of the house. The benefit to the local community of Pottsville is an economic one - our renters bring cash to local economy.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I want to 'pay it forward'. I have travelled with my family and enjoyed the opportunities that staying a home with Air bnbers around the world provides. It is a potentially and exciting, inexpensive way to see the local culture. Opening our home to travellers for a small fee (from \$44 per night) allows us to share what this bountiful region has to offer. Once the laundry is done and the cleaning is finished, the occasional set of new sheets and a fresh towel and bar of locally made goat soap is provided there is little financial benefit, in fact if you add the tea/coffee, toast etc we would probably be going backwards. The reason we persist is because of the wonderful people we get to meet as hosts.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick

and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Further I suggest that there is a clear distinction between those who live in their own home and have guests within their own home, and business operators who illegally use a residential property as a purely business operation, leasing via websites at great profit without them living onsite.

If this distinction is clarified in the legal regulations this would solve a lot of the current problems,

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because of several reasons:

- a love of travel and meeting people from all around the world, in my back yard;
- Providing family friendly accommodation not only for travellers, but for families relocating, renovating and simply wanting a house rather than an apartment or hotel; and
- flexibility to rent our spare space or have extended family stay with us.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I like to meet new people from other countries and offer a homestay type of experience.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because as a mature woman with little opportunity to find regular consistent employment since I was made redundant from TAFE cutbacks 4 years ago, I need to supplement with earnings from Airbnb.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired - Airbnb even supply carbon monoxide alarms which I have installed
- Require evacuation or emergency plans and guest education - these already are mandated by the Airbnb platform.

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform. Personally, I already pay additional insurance premiums to protect myself and my guests because I share my home.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home-sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it is a great way to earn extra money. Without Air Bnb I couldn't afford to pay all bills including my ever so big power bill which seems to get bigger every quarter! I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because sharing my home with a student who wants to see the world is better than an entitled Bondi local. I don't make any profit, Australian people are great, but preferably I'd rather share my home with a traveller from time to time. It's my right, it's my home.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it provides choices for people traveling to our regional tourist area. Having cost homely accommodation close to town is another way for people to travel and be a part of a local community.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host short term letting (not just specifically Airbnb) because I'm struggling to make ends meet. I only do so for a maximum of three nights per week (in reality it's more like one stay every fortnight), mainly because I'm letting out my home, my place of residence. When guests are here I'm couch-surfing at friends houses...btw I'm 57 years old, so not a real good look, but I'll do whatever it takes to ensure I have enough money to pay for food, mortgage & bills. I am not doing this to make lots of money, I'm doing it to increase standard of living. I work full-time in the city of Sydney as a Computer Developer, so not a bad job, but am trying to make ends meet after a devastating divorce. Please don't make it harder for me to host.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism (I'm more than happy to supply you with a copy of the "Guest handbook" I've written recommending local places to go, see & spend money on).

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired

- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

We need to see the immediate stop of complete tenancies on air bnb as it is pricing out local families. However we need to fully support homeowners ability to rent out a spare or room sharing their home with others.

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have a spare unused apartment that is not suitable for long term rental as it is next door to a night club. But is perfect for people coming to Byron as a visitor. Without Airbnb it would be empty most of the time.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no

registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I've been hosting on Airbnb for over six years and sharing my rental accommodation to cover part of my rent for close to 17 years. I host on Airbnb because I found it to be the most effective way of getting in good quality guests.

When I lost my job in 2017, it was the income from Airbnb that kept me able to pay a share of my rent while I borrowed money from others and used credit cards for the extra expenses.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage or rent and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

People moving to NSW, visiting for such things as work or study opportunities at The University of Sydney, or work, study or visiting loved ones at Royal Prince Alfred Hospital, or tourists looking for an economical and local, safe place to stay use my home via Airbnb. Outside of Airbnb I've used Gumtree and Easy Room Mate. I've had guests and housemates stay for as long as a couple of years or one night, as they needed.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

I wanted to provide my feedback on the Government's proposed regulations for home sharing

Id like to host on Airbnb because we live on a small acreage, we've bred here almost 20 years, we're trying to sell the place, ( sadly unsuccessfully) we'd like to retire, we both almost 70 years old, we have this huge place and our even our grandchildren are too grown up and busy to stay here any more.

Allowing others to pay us to stay on our lovely farm will give us a reasonable income.

Neither of us take any government benefits as yet. We don't have excess money to change the building or pay more fees.

We're registered for GST and Income Tax.

Our property is approved by local council as a "habitable dwelling."

The requirements for this approval have proven very strict, very lengthy and very expensive. It has cost \$7200 for all the reports from various consultants and council in order to lodge a DA to obtain a second dwelling approval and it has taken over 12 months.

I can not see why an Airbnb guest would need anything more than any other person to temporarily 'dwell' here like we do and our family has enjoyed for 20 years!

The local Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills.

We'll also recommend local cafes, restaurants and shops so small businesses will get a boost from local tourism.

Guests will shop in Goulburn for their stay.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. #### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

I love meeting people from all over the world. I love the people who want to be in a home with local people not an impersonal hotel. I am one of these travellers who stay in Airbnb to enjoy the local experience. I as a local born and bred in Sydney offer a tourism experience tourists do not enjoy without Airbnb.

I have been an Airbnb host for 4 years. What about the BNB which has been going for years! No rules have been required Why the need to make it more difficult. Airbnb do this all over the world. People go through Airbnb because they want a home not a hotel. Don't make the changes to only attract business people. We pay our taxes.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have the space to welcome people and it gives me an opportunity to work very flexible while the kids are still young.

I also consult locals opening their family home to guests while they are away on holidays. This generates jobs for local cleaners & photographers and business opportunities for local restaurants and shops, which would not exist with an empty home.

I am also using Airbnb as a guest, because I don't want to go to a hotel with my kids and tell them to be quiet all the time. I want to enjoy the space only another home can give me when I am on a holiday.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

## STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

In my circumstances, my guests are often inconvenienced by noisy long term tenants next door, whereas I have not had one complaint from the long term tenants about my guests who stay there from 2 to 30 days.

Rather than punishing all Airbnb'ers for the poor decisions made by some, why not have a '3 strikes and you're out' process. If there are 3 quantifiable complaints about an Airbnb property, then they should be stopped from hosting for 6 months. I am sure this would make Airbnb hosts more choosey about who they let into their properties.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows my family to afford holidays in other parts of Australia.

I have rented it out twice so far, we had a extended family from Paddington NSW stay and an extended family from Melbourne during the school holidays. It allowed three generations to have a family holiday together in a way that is affordable for this area and in the comfort of a home not a hotel.

It also meant that we could afford to take holidays within Australia too. With the cost of housing so expensive in Manly we have found it a great way to be able to afford to live here and still travel in school holidays.

We love the share economy, it makes sense to share assets with others. We also loan our car out in a share car system, rent with Airbnb ourselves and use share ride services.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired

- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because there are very limited accommodation options available on our beautiful NSW South Coast and Sapphire Coast given the number of people that want to visit the area on weekends, and school holidays - most homes are privately owned "holiday residences" and offer an affordable "local" warm invitation to those wanting to visit who cannot afford to own a holiday home themselves, but love spending time on this amazing coastline. Our visitors are so grateful and complimentary for the opportunity to share our place and enjoy the surrounding beauty and be so welcomed. Please don't over-engineer the process!

The Airbnb host community often also depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...I am able to share my home with travelers least able to afford expensive hotels. I get to meet people from all over the world and am able to share experiences, knowledge and friendship (many have returned at least once) and the suitability and cleanliness of my house is recorded in the multitude of favourable reviews my home and I have received.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays to Australians as well as tourists from overseas across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it allows me some extra income for our family and it most importantly gives my youngest son who is autistic the opportunity to meet people and learn to socialise. We have meet many interesting people whom he wouldn't have met without this platform.

I also find it incredulous that once again the government is dictating what we can and can't do.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we live in a small town, jobs are hard to come by and hosting part of our house provides an income for us and cleaners get a job, tradesman fix the place and get work and it helps keep our little town alive. The holiday makers go to cafes and buy food from the small deli and go to restaurants, it's hard enough surviving in small regional towns and we would go backwards if this is taken away from us.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I love having my own business and hosting for people. I am also a single Mum keeping a roof over my sons head. I work in an area with very little job opportunities and my business is something that gives back not only to my local community but to the area's tourism sector. Strict and frivolous restrictions are just not required, why would you ruin something that helps communities?? I just dont get this.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation,

registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay bills. It allows my partner and me to pay for private health cover so we are not a drain on the public health system. We are of pensionable age but because of our hosting, we receive only a small part-pension therefore we cost the Government very little in age support.

I also recommend local cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we vacate our house over the holidays and Airbnb is a fun way to share our fantastic location and make some money at the same time. It helps us pay our mortgage, insurance, rates and power bills. We love hosting.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it helps to provide income in my retirement. As I am self funded and not on the pension, every bit helps. If it becomes difficult to host then I will apply for the pension.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I have a weekender in the Hinter Valley. Airbnb provides a great platform for me to rent out the cottage when I am not using it.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we have extra room in our home and through Airbnb we are able to share it with a diverse range of visitors to our beautiful coastal community. Gives us a little retirement income too. But any costly registration or alterations would make it not viable for us.

The Airbnb host community depends on hosting as an economic lifeline to help us stay off the pension in retirement. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I love meeting interesting people from all over the world. I have been offering holiday houses on the beautiful south coast for over 15 years. This has been a very successful and enjoyable way of funding retirement.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it supplements our retirement income whilst at the same time provides affordable holiday accommodation for many people who could not afford it otherwise.

We also live in an area that benefits from the additional tourism as hotel accommodation is limited and expensive.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because... of the way interest rates are today and being a modest self funded retiree who receives just about nothing from the government I depend on this income to exist Stop bowing down to big money interests such as overseas hotel chains who charge room rates in line with occupancy rates You pay for the empty rooms!

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because this is something I love to do and something I am really good at. I also love the fact that hosting provides positive benefits to the whole community such as more beautiful homes, gardens, and help local businesses to thrive.

Holiday makers create a really happy vibe which is wonderful to see.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because my husband and I are self employed. We run two small businesses and unfortunately don't have enough income to put aside for "holiday pay". Renting our house for the summer school holidays allows us to have a paid holiday and important time off away from the daily grind with our two children. It has been life changing for us, where as before we would of gone into debt to have a holiday or not had a holiday at all.

We pay taxes on the income we make and ensure our home is safe and secure for all guests. I give the guests a home manual so they are aware how to be safe and enjoy our home.

Because Airbnb guests rate and review your home, you have no choice but to present it at a high standard. We spend all year making repairs, maintaining and improving our home to make it a safe enjoyable place for our family and guests to stay.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired

- Require evacuation or emergency plans and guest education

I currently tick these boxes with my home and endorse that all Airbnb hosts should do the same.

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because we live on a farm, are currently in drought, and haven't enough acreage to sustain us through farm only, but aren't allowed to subdivide either. So no win situation all round! It is very expensive to own and manage land and luckily we have accommodation on the farm that we can generate some income from. If we weren't able to do this we would not survive on the land.

There is also a shortage of accommodation in our area.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or fees licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday

homes or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because it enables me to help local businesses, improve the state of my acreage that provides home to abundant wildlife that has migrated to our property due to your monstrous destruction caused by the woolgoolgah bypass. Many koalas have been seeking refuge due to all the trees taken down for that highway. My income from Airbnb house sharing my place helps keep the land abundant as well as pay my mortgage to ensure this 15 acres is kept in its current state. Many neighbouring properties are only used for recreational/ farming purposes and ours is untouched. I hope that you realise that your actions have a vast impact on much more than just humans making money from Airbnb.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because this is an important income to support my art practice.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I recognize that holiday makers come in all types and sizes and that not all holiday makers want to stay in a hotel. I am a host who allows guests to bring their animals with them on holiday. Lots of people want to have their pet dogs / cats with them rather than putting them into a kennel. I am able to provide that opportunity for them by hosting on AIRBNB.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. Hotels are not the only beneficiaries when other people are allowed to host paying guests.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I want to protest at this proposed legislation. I live in the UK, am an Australian citizen by birth, pay taxes in your country and own an apartment in Manly which is used for holiday rentals when I am not staying in it. I am cash poor and cannot afford to pay the mortgage if the holiday rental income is limited to 180 nights a year and you will be forcing me to sell my beloved Manly home which I use to visit my family in the area when I have saved up enough money every two years to come and see my children. It's disgraceful what you are proposing to do. Almost no one ever stays for longer than three weeks, who ever gave you the idea that that may make a suitable exception? We get some bookings for one week or more but three weeks is almost unheard of! The licensed agency that manages my property are very conscientious and there have never been any complaints as a result of the guests staying in my property because they are properly managed by professionals. Why can't you come up with some system to ensure anyone who manages these properties are qualified, trained and licensed to do so thereby minimising impact for

other residents? To tell people they can only do rentals for 180 nights of the year rather than actually try to improve the management is such a poor approach that is going to totally ruin tourism in the city. Why haven't you come up with more sensible ideas? At the very least the 3 week exception needs to be taken down to 1 week to give us any hope of making this work still.

**I agree to the above statement**

B and B letting in Byron Bay is out of control. More and more so called Granny Flats are being passed through Council in this Shire. Owners in many cases are moving into these approved dwellings and then renting their own homes as B and B,s. which shouldn't be allowed. We know this as it is happening in the street where we have resided for 20 years. We have spoken to one home owner who's plans are in Council at the moment for an additional building and He says is not legal but "everyone' does it.!!!!

These B and Bs are causing young families to be forced out of their abodes because of exuberant rental prices.

We need to stop this happening.

as a resident,property owner and business owner i wish to strongly object to Holiday letting being allowed for more than 90 days per year.This should include 21 day periods .I am referring to property where the owner does not live at the property but even where the owner lives at the property 180 day letting should be the maxmium allowed. Any holiday letting should be closely regulated by the local council NOT the state government. Holiday letting creates a negative influence on the local community by restricting accommodation for local residents and making rent too expensive.

I submit that a central issue in this matter is the definition of short term. The discussion paper proposes that rentals of longer than three weeks be excluded from the effects of the legislation, both major and subsidiary. In effect, rentals of more than three weeks will not be considered to be short term. It is my contention that this is too long a period and that a systematic investigation of the rentals provided by Tourist and Visitor Accommodation providers would show that the average, however calculated, would be for less than one calendar week. The possible exception to this would be providers of specific types of accommodation in specific areas during holiday periods. My basis for these comments is my own experience as an owner and lessor of a house at Malua Bay. I therefore submit that on the basis of equity, rentals of more than one calendar week rather than three weeks should be excluded.

In making this submission I acknowledge that I am not a member of the New South Wales public. However, my wife and I own a unit in Sydney which we use privately but also make available for short term rental to help defray costs so I trust that, as an interested party, my views will be taken into consideration.

Short Term Holiday Letting is destroying the fabric of our community. People who work here cannot find anywhere to live. Air BnB properties in Byron Shire have doubled in 3 years! Most of these are owned by investors and property speculators who are driving up prices and destroying the permanent rental market in our shire.

The new proposed State Environmental Planning Policy (Short-term Rental Accommodation) 2019 under the Environmental Planning and Assessment Act 1979 will entrench Short Term Holiday Letting in our Shire and change it for good. There are 2,572 whole homes listed on Air BnB in Byron Shire! Only 725 listings are for private rooms in people's homes.

In other parts of the world governments are placing restrictions on Air BnB but in NSW the state government

appears to have allowed the short term letting accommodation industry to write the rules to the detriment of local population.

We need to cap the number of nights to 90 to turn this situation around and make it a less profitable business, and go back to having neighbours instead of strangers.

The law should support the residents.

Short term holiday rentals have been around for many years. The only change is the platform in which they are booked which now allows the owner more control over letting to the best fit guest and reduced fees. Why should there be a change to this. It has been working well for decades.

Given the small percentage of short-term rental properties that provide accom for more than 12 guests it seems arbitrary. If someone is lucky enough to have a large house then they shouldnt be disadvantaged.

Limiting the number of guests per bedroom is ridiculous. Our children always sleep with us in our room when we go away. Australian holidaying has always included multiple bunk beds in a room where kids can have fun together!

I support the concept of smoke detection in each room but definitely not the exit sign requirements. We also live in our property and would hate to see it looking commercial with exit signs. The BCA does not require these measure for residential house so it should not be included.

**Submission**

My main submission points are:

- the installation of a lighting system in hallways is excessive for a standalone dwelling, unless it is part of a smoke alarm.
- the definition of "bushfire prone land" needs to be clarified and defined, so that it is clear to participants, and only applies to the very high bushfire risk areas in regional areas.
- where the framework documents refer to limits on number of days (ie 365, 180 etc) it needs to be clear that this applies to actual number of days of rental, and not to number of days available for rental. It is unusual for any

property to have 100% occupancy and so the number of actual rental days, will be less than the number of days available for rental. So the day limits stated in the SEPP in particular LGAs, need to be stated/defined as "rental days" not "available for rental days", as that should be the intention.

The balance of my comments are included in the attached submission.

**I agree to the above statement**

Yes

**Submission**

hello,

i am a 17 year resident of the byron shire. i have enjoyed the area since the mid-seventies. over the years one of the most significant changes has been the upward spiral of the rental market. i know people who began to speculate on real estate since the 70's, buying properties and renting them out long term. this had a somewhat neutral trending effect on affordability. now the trend towards AirBnB has changed everything. just in my neighbourhood alone, many many properties are now listed on holiday rental sites, and in town and closer to the beach it is even more prevalent. this has destroyed the amenities of many neighbourhoods, made it impossible to find long term rentals at reasonable prices driving many long standing citizens out of the area, and changed the feeling of the shire at large.

i believe this is one of the most important issues to be dealt with and brought under control if our shire is going to

survive as a place to live, rather than just a place to come and party, go to festivals, and helicopter in for the weekend.

please stand up for our town and our shire and find a way to limit this cancer to our possible enjoyment of our homes, which is very much under threat at present.

thank you.

D. Coyne

**Submission**

AirBNb home letting is having a disastrous impact on the health and well being of the long term and permanent residents our shire. The cost of living and availability of comfortable livable premises has been severely impacted by the huge influx of whole properties being short term let year round - over 3000 homes in Byron Bay Area alone. Where do residents go? Something needs to change immediately before complete devastation of community health, welfare and culture. When will those who short term let through sites such as Airbnb be charged Income Tax on this enterprise such as Uber drivers must declare as Income or is this only the case because many politicians have multiple investment properties and are never condemned to driving a ride share vehicle to make means to end. A heavy tax must be implemented on the short term letting industry to bring about some balance that which has been heavily skewed in favour of the short term lessor/investor to the utter detriment of a healthy community.

Newtown 2042

**Submission**

**BACKGROUND**

This submission is based on the experience of living next door to an unhosted Airbnb rental for more than 2 years. The STRA next door, which was previously a small 2 bedroom terrace, was adapted for STRA to 3 bedroom dwelling by converting much of the communal living space to a third bedroom. Group activity in the house has thus been forced outside. The house, once home to 2 people, is listed as suitable to sleep 8. At times, the noise late at night and early in the morning is intolerable and affects at least a dozen neighbouring properties.

The host has never responded to written requests about noise and for his contact details. Lodging a complaint via the Airbnb website is an unnecessarily complex procedure and seems to result only in a response that the complaint will be passed on to the host. Self-regulation, in my experience, has failed.

**RESPONSES**

1. Page 7: The change to the previously exhibited policy to include the exemption of 21 or more day bookings from the 180 day cap is an unacceptable concession to the STRA industry and will adversely impact on local residents and those wishing to rent properties in sought-after inner-city areas. I hope the review will look closely at the implementation of this (should it go ahead) to ensure there is no abuse by industry.

2. Page 8, Question 2: Are there any elements of the draft instrument that are open to misinterpretation or require further clarification?

The stipulation that the carrying capacity of a STRA unhosted dwelling should be limited to 2 persons per bedroom is too generous and does not account for hosts reconfiguring dwellings to add bedrooms and reduce communal space. This requirement should also take into account the total square metre space of the house.

I did not see any reference to dwellings being 'child safe'. Surely this is a consideration.

The requirement for multiple smoke alarms is obvious. But inner city properties often have windows with fixed bars preventing easy exit from upper floors. They also frequently have old, dry timber staircases and security doors that lock from the inside. Guests may have just a single set of keys between them. The regulations proposed for 'dwellings in multi-unit buildings only' should apply to all un-hosted dwellings.

3. Page 10: Question 6: Are the specific obligations on booking platforms ... industry participants? Why?

The contact details (specifically mobile phone numbers and email addresses) of hosts should be provided to neighbours and owners' corporation personnel as a matter of priority. Hosts should be required to respond to and deal with complaints from neighbours in real time (just as they respond to communication from paying guests) especially at unsociable hours. This is not an onerous imposition on hosts. If hosts understood they would be required to respond to neighbours overnight they would likely ensure that problems did not occur in the first place. Unhosted STRA properties should be required to display signs advising guests of their obligations in relation to neighbours (just as registered accommodation and other licensed premises do).

4. Page 11: Question 8: Are the grounds for recording a strike fair and reasonable?

The bar for guests failing to comply with an obligation to a neighbour (eg. a STRA guest acting violently) has been set far too high and reflects an unacceptable concession to STRA owners and hosts as opposed to other community members. Noise and disruption which prevent neighbours from sleeping are not 'minor' matters. Two such episodes should be considered as a strike against a host.

5. Page 17: Questions 30 and 31:

If self regulation is permitted (though I don't feel this industry has earned that privilege) it should be required to report data to the state government and local councils at least quarterly and all information on the register should be made public so that other stakeholders (such as neighbours) are able to evaluate its veracity and impact.

6. Page 18: Question 33: How much lead-time ...?

The legislation for these changes was passed over a year ago. Industry has had plenty of time to plan for them. Lead-time should be no more than 3 months. Community members – including neighbours – have already been forced to wait a year for relief.

**Submission**

Thank you for the opportunity to make a submission.

And all praise to your methodology of issuing an informative discussion paper and draft legislation for public comment.

My submission takes the form of responses to the 36 questions in the discussion paper.

Q 1 The form works well.

Q 2 In the SEPP, reference short-term rental accommodation arrangement as defined in the Fair Trading Amendment (Short-term Rental Accommodation) Act in the definition of short-term rental accommodation; also, I am intrigued by the use of the word 'existing' as in 'existing dwelling' in the definition - does it mean that the use can only be valid for dwellings in existence at the date the SEPP commences? Could s 8(h) of the Residential Tenancies Act 2010 be amended by substituting 'short-term rental accommodation' for 'a holiday'? In terms of the Safety

Standard, where the dwelling is a lot in a strata scheme, a clear indication that the cost of compliance with the fire safety requirements is to be borne by the owner, tenant or permanent resident who carries on the short-term rental accommodation, and not the owners corporation, will resolve many potential disputes.

Q 3 Either 14 to 21 days is an appropriate borderline between holidays and executive rentals. Flood control restrictions should apply only to 1 in 20 or greater chance of flooding because large areas of Sydney and regional NSW have flood control affectations imposed for a reason, but not sufficient to make them ineligible for short-term rentals without a complying development application. The Bushfire Controls are appropriate.

Q 4 Add \* register their properties on the register; \* comply with fire safety standards.

Q 5 Annual registration renewal forms should be required which contain provision for information such as how many days of use in the past 12 months - all registrations should be 1 January - 31 December.

Q 6 Annual registration renewal forms in which the host certifies compliance with these obligations - just like motor vehicle registration renewals require a mechanical inspection and third party insurance.

Q 7 A complaints form on the Department's website with categories for complaints would help.

Q 8 The definition of 'strike' needs to be clear to reduce disputes.

Q 9 What right to privacy is there for people who have behaved badly and are banned from any industry? Many industry and professional registers display the names of banned people, readily accessible by internet search.

Q 10 The due process outlined is satisfactory.

Q 11 No comment.

Q 12 I think so.

Q 13 The current list is satisfactory.

Q 14 & 15 Serious consideration should be given to harmonising the application of the code to participants excluded in 22C, but only after appropriate consultation with their industry. They are all offering tourist accommodation services.

Q 16 Yes.

Q 17 An annual registration fee per property is needed - payable in the same way as motor vehicle registration / driver's licence renewals, are paid.

Q 18 The participants can decide between themselves who pays. The register should be extended to other operators in the tourist accommodation industry, such as bed & breakfast facilities, eco-lodges, to stop short-term rental participants from re-badging as an operator such as a B&B to avoid registration and other compliances.

Q 19 Yes.

Q 20 The register be maintained by the Office of Fair Trading, not by the industry.

Q 21 & 22 See above.

Q 23 Publicly accessible.

Q 24 Registration is mandatory for use of a dwelling for short-term rentals of more than 30 to 60 days in total - failure to register and maintain registration should be an offence.

Q 25 The register is publicly accessible, annual registration renewals.

Q 26 Yes - imposed on the owner, tenant or permanent resident who carries on the short-term rental accommodation.

Q 27 Ownership and participant details, contact details, address of property, type of property, if hosted or non-hosted, and booking platform used.

Q 28 Their details should appear on the property registration.

Q 29 The administrator of the register.

Q 30 Yes - see Q 27.

Q 31 Yes - but in the annual registration renewal form, details of which should be publicly available.

Q 32 Yes - as much as possible - see Q 27.

Q 33 Until 30 June 2020.

Q 34 Realistically, 1 July 2020.

Q 35 The scope of the review is wide enough.

Q 36 The register, with details described in Q 27.

Feel free to contact me for clarification and further assistance.

As a family man and business owner in tourism I can see the negative impact of AirBnB in our community. I totally agree on a short term restriction of 90 days. Everything else destroys a healthy sustainable community. Most of us life from the tourism but I can see as well that more and more jobs in the tourism are done by backpackers which come to town live in a shared house stay here for a few months and move on instead of locals. Most locals can't afford anymore to live hear. The house prices got to expansive due to an undersupply. It was really complicated for my family to find a house to rent ( we pay \$750 for 3 bed rooms) in the area and unfortunately we need to move out next year again. There are no houses in this price range available to rent. My kids going hear to school and day care. I don't want to take them out the community and move to a new area. I can see how more and more houses getting bought by investors and converted to luxury holiday rental properties. These investors don't care about neighbours or a safe community. There are more foreigner number plates on the road with holiday makes which don't respect

locals. Unfortunately the town is losing a healthy community.  
Please make sure to reduce the max number to 90 days for an AirBNB to keep a town alive.

We have an investment property in a block of four. One apartment has recently gone into short-term rental arrangements with Airbnb. The other three, including ours, have long-term rental arrangements and intend to continue with that.

If the new legislation requires changes to existing arrangements and conditions (e.g. fire signs, safety modifications etc.) to cater for short-term rental tenants then these should not be a responsibility or cost for strata but for those offering short-term rental.

Short-term rentals generally have a higher return on their property and therefore they should cover the additional costs of having short-term tenants on the property.

There is growing problem in some areas of short-term rentals driving out long-term rentals. The strata body should

not be made to pay, and therefore, encourage this trend.

We operate zing and original backpackers in Potts point . We have been in the hotel tourism industry for the last 25 years . Over the last 5 years we have faced increasing competition from unregulated bodies due to the changing digital world such as air bnb .

Our business turnover has been plummeting . We think it is unfair that air bnb and other accommodation entities are able to operate at all, with limited controls . The damage caused to the hotel industry has been prolific.

We have many expenses such as insurance and fire certification councils rates. We have a 24 hour office to control noise.

Please do something to stop this and make it fairer for hotels that have invested a lot of capital and effort to create great accommodation spaces in Sydney n

regards Brian Harrison

One problem we have with very short term residents in an apartment in the building where I live is often they cause excessive noise about which we cannot take effective action against the Owner of the apartment through the Strata Legislation nor Municipal Council processes because each particular noise-maker has left before the noise complaint can be acted on. That is, by the time a Notice To Comply has been sent to the Owner of the Lot any particular noise-maker has vacated. Also, if the noise-maker does not open the door on which-ever later date when a Municipal Council inspector knocks then there is no evidence to Council that there is any person resident and thus Council cannot take action against the Lot Owner.

The new 'fire' legislation would only serve to break the economy more than what it already is. Spending on property, local tourism and many other areas would go down. Tourists themselves won't venture out as much if there isn't suitable accommodation in the area that they're looking to stay. Some Airbnb operators will likely be put out and remove their dwelling from the website.

Airbnb is like staying at a friend's house. They don't need a map out the door. So long as there's sensors, necessary fire extinguishers and blankets, etc, it's all that matters.

Over regulating can just end up opening a big old can of worms that would have been best left alone.

**Submission file**

[anthony-smith-submission-10:9:2019.docx](#)

**Submission**

10th September 2019

Anthony Smith  
PO Box 1209  
Byron Bay 2481

I moved to Byron Shire in 1993 and have lived in the area for 25 years relying on rental properties. During recent years the explosion in holiday letting and Airbnb led to a massive increase in rent in Suffolk Park where I had been living for the past 14 years and then a shortage of rental properties being available on the market. In 2014 the home I was living in Suffolk Park was sold to an investor whose intention was to not renew our lease, but maximise income through Airbnb. At the time the only way to maintain a rental was to negotiate a highly disadvantageous lease where we were able to remain in the home but needed to move out several times a year during holiday periods. We accepted this arrangement due to the scarcity of other rentals. After enduring this arrangement for a number of years the home was sold again, with the result being us entering the rental market again.

The enormous jump in entire homes in Suffolk Park and Byron Shire being listed on Airbnb left us in the situation where rents had risen approximately \$400 a week or more for a comparable property in only a few years. After numerous home inspections and applications where up to 30 couples were attending and handing in application forms, we were unable to secure the lease even though we had 15 years of continuous references and were both employed professionals. We eventually accepted that we have been forced out of the area and accepted a rental in Lennox Head in the neighbouring shire.

During the 14 years that I lived in Suffolk Park, I watched the invasion of holiday lets and short-term rentals on Airbnb and the impact of loss of community and quality of life that came with it. The streets that we lived in had a number of notorious party homes where Airbnb clients created constant noise disturbances and rubbish issues as well as parking issues on the street with each unit or home often having several cars on the lawn or parked in front, jamming the street. We watched a street go from a collection of neighbours to strangers with no regard for the consequences on others. During this period I also watched a large number of friends move their families out of Suffolk Park as they suffered the same fate as us with lack of rentals.

In my mind these residential areas were never designed to be places where commercial hotels or businesses offering accommodation were meant to be. It appears that local council has lost its ability to regulate and to maintain the structures that support community.

I strongly support the moves to legislate the limits on holiday letting and Airbnb now that it is abundantly clear the negative impacts that have come with its unregulated rise in our local area. I genuinely believe these limits are crucial in supporting the people and families living in the area and their rights to live in respectful and positive communities.

Please feel free to contact me about my submission contact.

thanks  
Anthony Smith

You need to explain why the Blue Mountains is suddenly considered as part of Greater Sydney. People travel to the Blue Mountains for a get-away. The local community in the Blue Mountains heavily relies on tourism unlike the rest of Sydney. It is a very different economy to the likes of Parramatta, Penrith, Balmain, etc.

Introducing this harsh new set of rules will cripple the local communities in the Blue Mountains for the following reasons:

- the vast majority of homes used for Short Stay rental are in Bush Fire rated areas. People want to get away and stay in remote areas with bush views.
- most rentals are older style homes meaning that they will not be able to comply with BAL29+ conditions.
- this results in these houses being removed from the short stay market.

- The hotels in the area are not capable of picking up the difference simply because there isn't a large number of hotels in the area.
- hence the local community suffers as tourism decays.

An example:

We have a short stay rental house in Mount Victoria and there are no hotels in this town. When tourist numbers drop (and under this scheme they have to drop) this will decimate the local economy. Not clever.

If such a scheme is introduced (and I certainly hope it isn't) you need to consider that homes that have met AS3959 (Bushfire code) and have already received an Occupation Certificate, should not have to re-apply to council for a Complying Development certificate. Our rental house was built post 2009 and complies however we fail to see why we should pay for yet another certificate after already meeting all the strict bushfire codes of AS3959 (which cost tens of thousands of dollars!!).

Why is a home in Blue Mountains restricted to 180 days of rental? If the house complies then it shouldn't matter if the house is rented 1 day or 365 days a year. This makes no sense at all.

Hotels are a very expensive option for a family. Short stay rental houses fill this gap very nicely and provide a better family friendly environment.

In summary, you are introducing red tape to system that is not broken - particularly in a tourist spot like the Blue Mountains. Why does this government want to see tourism rates decimated and local communities severely impacted. This is not smart governance!

**I agree to the above statement**

Yes

**Subject:** Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As an owner operator of several holiday rentals (& permanent rentals) this current draft is quite disturbing & poses more questions than it solves.

The lack of response time makes me ponder why this is being pushed through, without ample time to communicate this with all stake holders. The speed of which this is being pushed through makes me ponder as to the intent of some of the legislation & whether the agenda is more on political or other unknown grounds instead of regulation of STRA as this short response timeframe can hardly be seen as Transparent.

The use of BAL zones to exclude existing and or future homes from STRA unfairly disadvantages rural & remote area's with very limited other accommodation options. The ensuing ripple effects will impact jobs & the local

economy, in our area this will force the closure of 50% of current STRA's which provide critical jobs & spending by visitors staying in them at local businesses & tourist operations.

Additionally this divide in use will affect the valuations & future sale prospects which is neither fair or equitable. This then leads to the question of will there be some sort of compensation for people whom don't have STRA which see their property values go down in a marke in which it is harder to sell? This again will not be fair to those who own properties that qualify for STRA by BAL zoning, whom will have to pay higher rates as the rates are determined by property values in most areas. Given that there is a higher proportion of retirees in our area, again how is it fair & equitable?

What is the driver behind this? I ask as for permanent rentals there are no such limitations on use defined by BAL zoning or the need to retrospectively comply which in many cases will be up to \$45000-\$50000 to do so, if it actually can be done.

I note that the last bush fire incident Callala Beach had, of the 4 sets of guests we had booked in, 1 set elected not to come & 2 sets delayed their arrival until after the event so actual risk to public safety was reduced by having properties in the BAL40 zone vacant. (Note there was no loss of assets in the event)

The limitation of guests per bedroom is neither fair or equitable as not all houses are the same. What is the driver not to continue with the current code of conduct which everyone has to comply with when using listing sites? Again this section in particular is not broken.

In Short, the current system is not broken so don't try to fix it for rural & remote area's that had holiday homes prior to the sharing economy with no problems. I think there really needs to be a delineation between urban/metro (City) & traditional STRA area's as, in my opinion, the problems are in the urban area's with the advent of the Airbnb enabled amateur's.

I don't think the one size fits all approach should be implemented & particularly the theoretical BAL restriction concerns, would be better addressed through the complying development process, assuming the driver for BAL restrictions is guest/public safety.

I am happy to be contacted

Kind regards

Geoff

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens and that all parties, specifically Platforms and Guests should be held to account for their actions and that the burden should not just be overwhelmingly borne by Letting agents and property owners as is the current proposal.

Please find attached my Submission,

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes

or weekenders only – and a data sharing framework.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

I enjoy sharing my home with guests it's a choice I wish to keep.

Since I have worked all my life and now in Aged care industry that is so poorly paid I rely on extra income for my rates and now the government has added 2 more years to my retirement age being 67 when I retire.

Thank you for reading my submission.

The draft policy creates enormous problems for residential communities. For example, I live in a Community Title development with medium density houses- several of which are operated exclusively as short term holiday lettings - in other words , they are operating as BUSINESSES in a residential zoning. This creates problems with parking , noise and ( sadly in many cases) anti social behavior. They are often “ party houses “ and the owners exercise no control over their tenant’s unruly behaviors. Other residents have been abused , threatened and spat on when , for example, they have asked the renter to move their cars which they have parked on the neighbor’s lawns and across driveways .

Breakfast Point

**Submission**

General Comments.

The STRA industry like Uber overstates the benefits and manipulates the regulations for their own benefit.

The following comments are directed at the Strata section of the industry.

Participants must be registered and that information made available to Local Councils, the Taxation Office, Strata Managers and Owners Corporations

My primary concern relates to the definition and use of Host. Where the host is not the owner of the lot, the host must provide written approval from the owner. The reason for this is that an Owners Corporation will seek compensation from the owner if they cannot get it from the tenant or host. If the owner is unaware their property is being used for STRA it makes recovery of damages difficult and costly.

Nothing in the documentation addresses the fact that most Strata Committees take considerable time to act due to

factors such as being volunteers, time between meetings etc. Their needs to be provision for information being made available at least to Strata Managers regarding details of useage, contact details for guests etc so action can be taken against them when required. Unless this can be done quickly the guest has long gone.

The owner and host are responsible for the conduct of guest and must make guests aware of all By-Laws. A Strata Committee is responsible for enforcing Strata, Precinct and Community-By Laws and must be given the means to do so. In your documentation you state in Contravention of By-Laws 6.2.5 the complaint is only accepted if the Tribunal has already made orders for a financial penalty. This is a very long winded procedure and the guest is most probably long gone.

I support the tightening of fire requirements. STRA is a commercial operation and requirements for fire, registration and insurance should be the same as hotels and motels. I would note that few apartments would meet the proposed fire requirements. Many have smoke alarms near but not in bedrooms, few are linked or have escape lighting capabilities. Modifying these instillation would require owner and Owners Corporation approval.

I do not support the exemption for bookings over 21 days. In apartment living we do not like high turn over. Provision should be made to allow rental leases made through and managed by Real Estate Agents for ant rental in excess of 21 days. Otherwise you could have a rolling arrangement with little control over the host actually doing a rental for almost the whole year.

Comments on Draft Code Of Conduct.

Record Keeping Requirements. Owners and Hosts must also keep full records

Obligations

owners/Hosts must also have Landlord Insurance

Information of Guest

Also to be provided to the Lot Owner, Strata Manager, Building Manager.

Obligation to neighbours

Add details of each rental to Strata Manger

5.5.6 Add damage to Common Property

5.6 Facilitators

Must have owners written approval

Contravention of By-Laws

6.2.5 Most Strata issues are contraventions of By-Laws. This section needs to be revised and toughened up.

Discussion Paper

1. Generally ok. Exception change to 21 day or longer bookings. Reason reflects industry position not residents concerns. No justification for excluding it from day count as you have no control over who comes into your building.

2. Yes there are a number of issues which need to be discussed with Strata Representatives.

3. Excellent idea

4. No . Proper registration procedures required. Owners and guests need better protection from unscrupulous hosts.

Insufficient protection of Common Property

issues.

5. More complete information on owner, host, platform organisations, agents, facilitators, host or owners doing their own arrangements, protections in place for guests to prevent them being ripped off.

6. No Ignores owners and hosts not ensuring guests are fully aware of By-Law requirements the guests and their friends must comply with. Tighten the obligation on hosts to look after the guests and not try and put this onto Owners Corporations or Building Managers.

7. No the Industry must pay for a rapid intervention process. Registration and an individual booking fee for each booking could fund this.

8. The owner of the property must be aware STRA is being undertaken and give their approval in writing as part of the registration process. Contravention of By-Laws and damage to common property are the 2 most common problems in strata properties.

9. These are commercial activities therefore privacy is a secondary aspect. How can you prohibit a banned host or guest unless you have the information

10. Yes

11. No. Should be made clearer. Points etc don't mean anything. State it in Dollars.

12 No. Make anyone offering to provide accommodation services included and liable.

13. Same reason. Doesn't matter if they are large or small they must be required to conform to the code and requirements.

14. Yes if they are required to comply with existing regulations or laws

15. None.

16. Yes satisfactory provided an owner has to give any non owner written approval to be a host or facilitator.

17. All hosts should be charged a booking fee for each booking which would be used solely to administer the cost of administering industry and enforcing the code.

18. Only hosts to pay. Only actual cost to be passed on to guest - user pays

19. Don't understand how the penalties work. Fraudulent or criminal activity should be heavy penalties.

20 Registration needs to be taken out of the industry hands and handled by a government authority. The industry can provide the data ( which must be compulsory with each booking) but the regulation and enforcement must be by an independent authority.

21. Hey the industry is trying to undercut the accommodation industry by avoiding having to comply with requirements. Sorry but you cant have it both ways. If you want to be in the STRA industry you have to pay your share of the costs.

22. Total control integrated with the taxation department.

23. The shonks and the manipulators acting only from greed will not want to be involved if the tax department is aware of their activities. Genuine hosts will accept it to be a cost of running a business. Initially there may be some reduction in the number of available rentals but that will recover with time. The conventional rental market will benefit from less disruption

24. Putting in place substantial penalties for not complying fully with registration and code procedures.

25. That would be a matter for the new authority to determine.

26. The host for not registering and the Platform, Agency, Facilitator for promoting or using an unregistered property.

27. All information required for the authority to undertake legal action against host, platform, agent or facilitator.

28. Host register property. Platform(s) or persons promoting property to register they are promoting that registered property. Authority to cross check details agree.

29. Total Control whether it be a central organisation or a regional organisation dealing with properties in their local area.

30. Yes. The name of the property owner and the host should be available as should the name of any platform agent or facilitator promoting the property. People should be able to know who they are dealing with.

31. Yes Monthly and in the case of Strata Properties also to the local council, Strata Manager and Owners Corporation as it affects common property useage, fire and insurance issues.

32. Yes. It is a commercial activity. Also a register if banned hosts and guests should be available.

Kind regards

David Foster

**Subject:** Submission to Short Term Rental Accommodation Discussion Paper

Dear Director, Housing and Infrastructure Policy,

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because...

I have a business that represents home-owners who wish to host on Airbnb. Airbnb helps these home-owners to pay the mortgage and the bills, and to share their spaces to guests so that they can become part of other communities.

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share the homes of our home-owners.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

#### STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive.

#### Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

## Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform.

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

Thank you for reading my submission.

**Subject:** Holiday rental regulations for NSW

**Categories:** recorded in DPIE subs register, recorded and not sent to DCS, Purple category

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry, including the North Coast where I have a house in Red Rock.

Red Rock has no commercial accommodation available except the caravan park and holiday makers have relied for years on privately owned houses made available as STRA.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct.

However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on. I am a cattle farmer, if I didn't have the extra income from the STRA I could not keep my farm operating in tough times as we experience at present.

Kind regards,

Eva Staehelin

Sydney 2000

**Submission**

I am an owner of a beautiful top floor 361 Kent Street Sydney residential building and the Treasurer of the Owners Corporation (OC) for the past 5 years. Over the past 2 years our building has been constantly overrun with short term leasing, despite being contra to our Building's DA. We are constantly dealing with over crowding, party central behaviour, excessive wear and tear including damage to our common property. The owners in our building are funding the repair work, whilst the people looking after the short term leasing are raking in the money.

This is not the lifestyle that I signed up for. I appreciate the framework and code of conduct is required, however this does not stop the overcrowding issue, which is a fire safety matter to me. The Code is not strong enough to deal with the bad behaviour of many short term letters that are invading our peaceful homes. As a member of the OC we have to deal with the aftermath, along with Building and Security management. We have no idea who is coming and

going into our building.

Please reconsider how this impacts on the owners and long term residents as this is our home!

Byron Bay 2481

**Submission**

To whom it may concern,

I am against Airbnb listing of properties in the Byron Bay region for short term holiday accommodation, except where there is a private room in a home or when a home owner wished to rent their own home during their own short vacation elsewhere .ie. the way Airbnb started out years ago.

The negative knock on effect of Airbnb short term rental of whole properties including granny flats in Byron Shire has been devastating for permanent tenants and has just about sunk Byron under tourists, to the great detriment of our community .

Kind regards,

Teena Wright

Sapphire Beach Front Estates/Coffs Harbour 2450

**Submission**

Did submit but wrong zone , It is R2 Not R1. This estate is low housing and neighbours operating business as A and B without any controls.Excessive noise ,overcrowding and traffic congestion.

Estate DA did not consider such activities and is not designrd for such a small estate. Many owners purchased based on this and are now faced with unlawfull business operators.This affects our life style ,impacts on health and impacts on value of our properties.We have had to police and sometimes faced with aggressive replies.

It should never be allowed in existing R2 zones ,this ignoring of whats allowed or not , would deemed to be false fake information for owners /purchasers.

This is a new estate , old R2 yes for change if the area has not been used or totally cleared and then re Zoned

**Subject:** Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As a local Airbnb host I wanted to provide my feedback on the Government's proposed regulations.

I host on Airbnb because I don't have enough money to pay the bills. I need to supplement my income to survive. My husband has cancer & we are on a limited budget.

We have battled all our life & paid taxes all our life. I have a right to earn money. We don't have any savings. I don't want to go on Centrelink.

The Airbnb host community depends on hosting as an economic lifeline to help us pay the mortgage and the bills. I also recommend my favourite cafes, restaurants and shops so small businesses get a boost from local tourism. Coffs is a tourist town and depends on tourists, and there is many times in the year where there is not enough accommodation. We can't have NSW government legislating an accommodation monopoly for just a limited few businesses !

I am deeply concerned that the NSW Government's proposed short-term rental accommodation (STRA) rules will make it harder and more expensive for me to share my home.

I understand that the Government has made commitments to support "fair short term rental accommodation (STRA) regulation that supports the sharing economy".

Generally I support the Government's approach, however parts of the current proposals are unfair and fall short of the Government's commitments.

Specifically, I want to comment on the following:

STRA State Environmental Planning Policy

I oppose the requirement for costly complying development permits. This expensive permit will make hosting out of reach for most people who will be forced to pay hundreds or thousands of dollars for a permit to simply share their home. For hosts who share their home for a few weeks a year, this is a significant barrier to home sharing and will make hosting uneconomical. For holiday homes up and down the coast, and in the regions, these have existed for decades without these expensive permits which will end up making holidays across NSW more expensive. More expensive for the tourists and much too expensive for home-owners.

Environmental Planning and Assessment (STRA) Regulation 2019

I oppose the unprecedented requirements to introduce red tape to make costly alterations to my home before hosting, such as expensive lighting systems. Both South Australia and Tasmania state clearly that hosting is an ancillary use of an approved residential dwelling – for the vast majority of hosts, this means there are no requirements to alter a home to be compliant with regulations. Put simply, if my house is approved to be safe for me and my family to live in, it's safe for my guests. I support the NSW Government streamlining safety regulations which:

- Respect the ancillary use of my home for home sharing
- Mandate smoke alarms – either battery operated or hard-wired
- Require evacuation or emergency plans and guest education

#### STRA Property Register

I oppose the potentially costly, complex, and onerous STRA property register. At every stage of consultation, registration has been considered, debated, and ultimately rejected. In South Australia there are no fees and no registration or licensing system, allowing the home sharing economy to thrive. In Tasmania, there is a simple, quick and cost effective self-assessment form, which is only required in limited circumstances – usually for holiday homes or weekenders only – and a data sharing framework.

If you have excellent reviews, you are already letting market work. You don't need to be regulated, or have a Code of Conduct, because market chooses you because of excellent conduct, super cleanliness, & consideration of neighbors (noise) etc.

Plus, there is the privacy issue. I am entitled to function with my own privacy & anonymity. If a customer wants to book in & pay the money, THEN they get the address, contact details etc. Otherwise, they don't get the information. This information should not be freely available in a register.

There are a lot of private businesses operating in Australia, where there is absolutely no requirement to be on a register. They are simply as 'c/- the accountants office', or a trading company/name.

#### Code of Conduct

I support the Code of Conduct which overall is reasonable and representative of the home sharing community, and provides strong protections for hosts and guests from vexatious or frivolous complaints. I ask that the Government amend the Code to allow hosts such as myself to be covered by insurance directly provided by a booking platform. (Again, I stress that the if you have excellent reviews, you are already letting market work. You don't really need to be really need to have a Code of Conduct, because the market chooses you because of excellent conduct, super cleanliness, & consideration of neighbors (noise) etc.)

As the NSW Government considers how best to regulate home sharing, the message of hosts across NSW remains the same - we want to work with you and have a say on developing fair, innovative rules that reflect how people travel and use their homes today, not last century. We don't want severe home sharing rules, overly complicated planning requirements, or expensive or complex registration systems.

All towns depending on tourism to survive should be able to trade 365 days a year. Tourist's are fundamental to town's survival There should be no '**day caps**' on amount of days you can use homesharing on AirBnB/Stayz etc in a calendar year. If there is a 'day cap' imposed on me, it should be imposed on every accommodation business i.e. resorts, hotels, council caravan parks, backpackers, B & B's etc.

With this legislation, everyone should be treated equally, including councils. Any talk of a 'day cap' should apply to every caravan site, tent site, and cabin in council caravan parks ..... otherwise we are furthering another very large monopoly accommodation business in our town. The caravan parks are effectively now

built like resorts. As well, local resorts and hotels are now advertising on AirBnb/Stayz and many other similar platforms. Where do you draw the line ?

Council also should have no legislative or other type of right to limit days with 'day cap', or charge a toll or otherwise interfere in my accommodation, because they have a huge conflict of interest because of their ownership of all the numerous caravan parks in our area....most of which are now like resorts. (Plus, they are waiving fees to developers.)

Strata title should & must be a separate issue. Ideally, with each strata title block voting to look after their own patch. Or at worst, separate legislation dealing only with strata title issues.

Thank you for reading my submission.

Cherie Hawke

**Suburb/Town & Postcode**

12-25 Wentworth St Manly 2095

**Submission**

The Peninsula complex consists of 163 apartments, 16 retail Shops, Coles Supermarket & Northern Beaches Council car park.

We have an existing by-law which prohibits short term rental under 90 days which we understand may not be valid with the new regulations.

We note that the suggested new regulations may allow STRA, because of previous problems with short term renters we are against allowing STRA in our building.

However if the new regulations allow STRA we suggest it is restricted to owner residents WHO MUST RESIDE IN THE APARTMENT FOR AT LEAST 6 MONTHS OF THE YEAR.

The suggested fire regulations should be mandatory.

Also that regulations include that any additional costs incurred by the strata for administration, insurance, damage to common property etc due to STRA be the responsibility of the renting owner.

Our replies to your questions are below.

1. What is your view on the form of and provisions in the STRA SEPP, Regulation and Safety Standard?
2. Are there any elements of the draft instrument that are open to misinterpretation or require further clarification?
3. What are your views on new policy elements relating to days, flood control lots and bushfire prone land?

Answer

1. Seems adequate
2. I dont see any
- 3.No Comment

Table 2.

1. Seems adequate
2. I dont see any
3. 180 days for Sydney area if STRA letting is approved seems reasonable

Table 3. No comment

4. Are the general obligations for industry participants adequate? If not, what other general obligations should be considered? Why?

Seems ok

5. What types of STRA information will be useful for the Secretary to collect to inform the further improvement of the Code and the STRA regulatory framework? Why?

No comment

6. Are the specific obligations on booking platforms, letting agents, hosts, guests and facilitators in the Code adequate? If not, what other obligations should be considered for each of these industry participants? Why?

Answer

I cant see how the industry can possibly form a regulatory body to police STRA. The main proponents, Air BnB, Booking.com, Stay as etc are global companies & the industry is so fragmented I cant see that they would want to waste their time with an organisation in NSW. Strata committees do not have the time or facilities to be involved. The only way this would work is for a state government controlled organisation be formed, which the state government does not want or for local councils to do it funded by the owners of the rented premises. It is questionable whether councils would be interested.

Who is going to oversee the owners & guests obligations? Strata committees are voluntary & do not have the resources to carry out these duties.

7. Is the complaints process detailed in part 6 of the Code sufficient? If not, what other matters should be considered or set out in the process? Why?

Answer. Same as previous paras. Not practical unless a special government agency is formed to oversee & record all required details. How to overcome rogue operators who do not properly register?

8. Are the grounds for recording a strike fair and reasonable? What other matters (if any) should the Commissioner consider when deciding whether to record a strike? Why?

Answer

Same as previous paras. Who is going to be responsible to report non compliance to the secretary?

9. What are potential ways to facilitate industry participants' access to the exclusion register while limiting potential privacy impacts? What factors should be considered?

10. Is the review process clear and sufficient? What other matters (if any) should be considered? Why?

11. Are the proposed penalty notice offence and civil penalty provisions appropriate? What provisions should or should not be identified as penalty notice offence and/or civil penalty provisions? Why?

12. Does clause 22B(1) appropriately capture end to end property management services that specifically service STRA properties? Why or why not?

[redacted] Seems OK [redacted]

13. What other organisations or persons should be prescribed classes of STRA industry participants (if any)? Why? [redacted]

No Comment

14. 14. Is it appropriate to exclude the STRA industry participants set out in clause [redacted]

15. 22C? Why or why not? [redacted]

No as they are specifically covered by other regulations

[redacted] 16. What other STRA operators (if any) should be excluded from being covered by the Code? Why? [redacted]

No Comment

17. Which industry participants should contribute to the cost of administering and enforcing the Code? Why?

[redacted] All who are in receipt of accomodation revenue or commissions [redacted]

18. How should costs be apportioned across different STRA industry participants? Why?

[redacted] A tax on all bookings. Administration?? [redacted]

19. Is the proposed penalty notice offence amount appropriate? Why or why not?

No comment

20. How can industry be organised to develop and manage the registration system? [redacted]

Cant see how, it is too fragmented.

21. What would be the costs to industry in establishing and maintaining the register? How would industry propose to meet these costs?

No Comment

[redacted]

22. What role should the Government play in developing or overseeing the register, if any? [redacted]

Can only see it working if government establishes the organisation [redacted]

23.

24. Are there other outcomes a register should deliver? [redacted]

No Comment

24. How can the approach ensure registration applies to all STRA operators, regardless of how the property is advertised for rent?

[redacted] Almost impossible [redacted]

25. What audit and verification processes would be needed to ensure accuracy of data? [redacted]

26. Should there be separate or additional penalties for failure to register? If so, which industry participants should they be imposed on? [redacted]

27. What information should the register collect? Why? [SEP]

28. What role should different industry participants (e.g. hosts and booking platforms) play in the registration process? [SEP]

29. What role should Government play in the registration process or providing information for the register?  
Suggest it could only work if government run the register

30. Should any information on the register be made publicly available? If so, what information could be made available and why? [SEP] Should be publicly available so that renters can ensure they are renting a complying residence. [SEP]

31. Should industry be required to report registration information, including number of stays (days), to Government and/or local councils? If so, how frequently?

Why?

[SEP] Looks like it would need a monthly or quarterly return similar to PAYG. [SEP]

32. Should any information on the register be made publicly available? Why? [SEP]  
Should be publicly available so that renters can ensure they are renting a complying residence.

33. How much lead time would industry need to develop and establish the proposed STRA property register? Please provide reasons.

[SEP] No Comment [SEP]

34. When should the STRA regulatory framework start? Please provide reasons.

[SEP] Sooner rather than later to get the industry into order

**I agree to the above statement**

Yes

#### Submission

Hello. My name is Glenda Meir and I have been a Suffolk Park/Byron Bay resident for 43 years. I would like to speak in favour of as much limitation that is possible to be applied to Short Term Holiday Letting/Air BNB and similar platforms. I truly believe that short term letting (in residential areas) has been so detrimental- to community, to rentals, to the skyrocketing house prices that have locked our young people out of the market. I know this is not the only contributing factor but it definitely has had an impact. Genuine singles, couples and families are struggling to find permanent accommodation- this is shocking for our community. Residents having to cope with noise, litter, unsociable behaviour so that absentee landlords who contribute nothing to our struggling council must be besides

themselves. Legitimate accommodation providers have to comply with health and safety, fire, licenses etc. but are any such conditions applied to STHA providers? For me, there would be no short term letting in residential areas. I know that that genie is out of the bottle, but surely we can regulate this issue better to allow more permanent rentals and the benefits that brings to all the community, not just the property owner. Thank you.

**Subject:** Holiday rental regulations for NSW

**Categories:** recorded and not sent to DCS, recorded in DPIE subs register, Purple category

Dear Minister,

Please read my submission and take it seriously

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

I look forward to your response and I thank you for your time

Your faithfully

Andrew W Murray

Broken Head

**Submission**

I would like to voice my objection to the renting of homes in Byron Shire for holiday accommodation I feel this activity is destroying our community. Residential areas should remain so and holiday letting should not be permitted within residential areas.  
House prices and rents have escalated to an unaffordable level for people that work and live in the community. People without a connection to the area, apart from owning a home for holiday letting, are destroying the community purely for profit.

My husband and I have owned an official short term rental unit in Byron Bay for 16 years and have noticed with the increased availability of unofficial short term rental properties via internet booking sites in Byron Bay, there has been an affect on our ability to let our unit. During the less busy periods the occupancy of our unit is less than 50% and is obviously severely affected by the non-official short term rental properties available in Byron. We are unable to let it on a permanent basis, as it is listed as a short term renal property, but people are able to 'illegally' rent their permanent residences on the short term market. Not only does this affect us, but it affects the ability of normal people to be able to find a permanent home to rent in the Byron area.

The laws around letting properties need to be very strict with no loopholes as there are at present. Properties should be able to be rented out only in peak season and not for long periods and restricted to somewhere like a

maximum of 8 weeks per year.  
Thanks you for considering my submission.

Re: Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

**As a result, regulation for our sector should avoid unnecessary burdens on our operations.**

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

Sapphire Beach Front Estates/Coffs Harbour 2450

**Submission**

We are concerned about our life style ,health and investment in our retirement property built at the above address .We did so as It was Zoned R1 low density.

Have had to endure times when an investment neighbour built a property designed as a business, viz Air B and B with unruly ,vulgar over crowded guests.

Attempts to discuss with the owner and letting agent a form of control management was futile.  
Coffs Council was approached as short term rentals was unlawful and advised awaiting the new rulings.

Our concerns are .

Business in a R1 Zone not permissible .

We live in a private small estate, with limited resources, parking .

One beach access catering for residents only..

The estate was not designed for large numbers of vehicles , creating safety issues and nuisance.

No in house management control.Negative financial impact on our investments

Feedback on a New Regulatory Framework  
For Short-term Rental Accommodation  
Announced by the NSW Government

In September 2018 the Australian Coastal Councils Association Inc. released the final report of a study into planning

responses to the impact of online short-term holiday rental (STHR) platforms on coastal communities. The study was conducted by a team of researchers headed by Professor Nicole Gurran, Professor of Urban Planning at The University of Sydney.

The study was commissioned by the Association in response to growing concern about the impact that rapid growth in listings on STHR platforms is having on local communities. It found that although the growth of STHR platforms is raising important opportunities for communities it is also presenting new risks and challenges, in particular in relation to planning controls. The draft study report identified these opportunities and risks and proposed a number of planning responses, tools and strategies that can be adopted by councils.

Key points identified in the research project include the following:

- Properties listed on STHR platforms often circumvent traditional urban planning controls because of unclear regulations or enforcement difficulties;
- There is a need for a regulatory approach which clearly establishes criteria for defining when the primary use of a property is for residential use or visitor accommodation;
- Councils report an increase in resident complaints about noise or other disruptions associated with properties used for STHR accommodation.
- Internationally, planning and management responses have emerged to address the impacts of online STHR listings on permanent communities.

#### AN IDEAL REGULATORY APPROACH

The research report proposed what it identified as an ideal State government regulatory approach to managing the risks associated with online holiday rentals in residential neighbourhoods and homes. This ideal regulatory approach, led by State governments, would:

- 1) Clarify the definition of short term rental accommodation, as a residential or tourism use, and the threshold criteria between categories (i.e. the duration of time in a calendar year, and/or the number of guests able to be accommodated in a property before the primary use of the dwelling is considered to be tourist or visitor accommodation)
- 2) Set baseline standards for short term rentals in residential areas, including: building code compliance and safety standards, including fire/bushfire safety and evacuation information; signage displaying a 24 hour local contact point; controls to manage potential neighbourhood amenity impacts including noise, parking, and traffic movements; and registration requirements for monitoring compliance.
- 3) Enable local planning responses via a suite of model opt in/out provisions
- 4) Require online platforms to share data with local Councils and comply with local regulatory requirements
- 5) Establish a basis for local communities to share in rental income revenue where appropriate and consistent with charging regimes for other tourism accommodation providers, through special levies, fees, or rates.

#### FEEDBACK ON THE NEW REGULATORY FRAMEWORK

The proposed regulatory framework for the short-term rental accommodation sector in NSW addresses a number of the major concerns expressed by coastal councils in relation to the sector.

The new framework recognises the benefits of the sector in terms of job creation, community economic benefits and income generation for property owners. At the same time, it introduces a mandatory code of conduct with accompanying exclusion provisions with the aim of protecting communities from anti-social behaviour, such as increased noise disturbance.

The mechanisms establishing baseline standards for building code compliance, fire safety standards and evacuation information for STRA properties will provide much-needed protection for guests renting accommodation in STRA properties.

The proposed regulatory framework does not appear to establish a basis for local communities to share in rental income revenue where appropriate and consistent with the current charging regimes for other tourism accommodation providers through special levies, fees or rates.

Our feedback on specific matters concerning the state-wide planning framework and mandatory Code of Conduct for short-term-rental accommodation (STRA) is provided as follows:

Definition of short-term rental accommodation – This is adequately addressed at Clause 4 of the State Environmental Planning Policy (Short-term Rental Accommodation) 2019.

Duration of time (day limits) on STRA activity – This is addressed at Clauses 9, 11 and 12, of the State Environmental Planning Policy (Short-term Rental Accommodation) 2019, which set out general requirements and proposed day limits for STRA activity. Clauses 12 and 13 of the policy would enable regional councils to apply to nominate reductions in un-hosted STRA permissibility to no lower than 180 days.

Set baseline standards for short-term rental accommodation in residential areas - Baseline standards including building code compliance, fire safety standards and evacuation information requirements, are addressed in the proposed Short-term Accommodation Fire Safety Standard and the proposed Environmental Planning and Assessment Amendment (Short-term Rental Accommodation) Regulation 2019.

Manage potential neighbourhood amenity impacts – This is addressed in the Draft Code of Conduct for the Short-term Rental Accommodation Industry and the draft Fair Trading Amendment (Code of Conduct for Short-term Rental Accommodation Industry) Regulation 2019.

Require online platforms to share data with local councils – This is addressed through the proposed industry-led STRA property register, which consolidates data in relation to all STRA properties, including their compliance with local council regulations and exclusion register status. The proposed property register, to be administered by STRA industry participants, will assist in administering the proposed Code of Conduct, thereby enabling neighbourhood amenity impacts to be adequately addressed.

The final report of the study into planning responses to the impact of online short-term holiday rental (STHR) platforms is available at - <http://bit.ly/2HaroYG>

Short term holiday letting is undermining our community. We need to have housing for people to live here year round - these people contribute to the community through volunteering, working and just caring about where they call home.

Short term holiday lets should be restricted so that they can only rent full time if the owner lives onsite.

Unfortunately without the owner onsite group bookings in large houses often end up being way too noisy for the residents around them.

Holiday makers also generally can't be bothered to understand our recycling requirements in the shire and so don't

bother to separate any of their waste.

#### **Submission**

The Government needs to prohibit Short Term Letting in Strata Complexes. Main reasons are that the security of the complex is compromised with people coming and going especially when gate codes need to be used. The wear and tear on residents pool and amenities which we all pay for through our fees are used like a resort full of strangers. Noise levels are increased with children and these holiday renters do not adhere to our complex parking, driving recklessly and also it does not work fundamentally with a complex full of over 60 year olds. We have a Bi-law in place prohibiting Short Term Rental but this is being ignored. Our council zoning is also R2 which is residential only and no business is allowed to be carried out. In our complex of 34 townhouses only 1 is being used as AirBnB, these

owners are ignoring the council rules and our Bi-law. Something like this needs to be prohibited through the Government passing a law.

Sunrise Beach Byron Bay 2481

**Submission**

I am writing in regard to the State Government's Short-term Rental proposals regarding Air B&B accommodation in Byron Shire.

Something which started as a low-key way of providing income-enhancing home-stay accommodation in people's homes - while the owners were in attendance - has changed into a huge industry that benefits not just regular residents as it was originally intended for, but which is almost completely dominated by commercial accommodation providers who are actually buying houses for the express purpose of providing accommodation all

year round.

This situation has disadvantaged permanent residents who are often bothered by noise and numbers and have lost the feeling of being part of a community of residents; it has also taken business away from licensed and rates-paying accommodation providers and it has deprived Council of business taxes.

The overall social effect has been a hollowing out of the community - a sense that the whole town of Byron Bay especially is no longer a place to live, but a place overwhelmingly dedicated to servicing tourists. It has also raised the land values and real estate rental prices to almost the highest in the country, making it less and possible to local people to buy houses or afford rentals.

Please fight this move by the state government - please stand up for us and say no to increasing the cap from 90 to 180 days allowed in the landlord's absence; say no to the exemption of 21 consecutive booked days and say no to the allowing the accommodation industry to 'regulate' itself.

Thank you  
Christine Willmot

Dear Planning Dept and other representatives,

I wholly object to the land/unit/home grab being endorsed by AirBnB and others. There is a reason for having managed hotels and serviced apartments in our community. Unqualified business persons who simply want to make a quick dollar off those of us who must bear the cost of poorly managed short term rentals, is totally unacceptable.

Please limit un-hosted STRA to 60 days per year.

Please ensure all STRA comply to local development requirements.

Please ensure an enforceable host register for STRA framework is created.

Please ensure residential schemes have the authority to collect levy charges against STRA hosts.

Thank you,  
Adam Barnes

**Submission**

Att: Director, Housing and Infrastructure Policy,

Thank you for the opportunity to express my concerns regarding the draft policy and regulation for STRA. I only find out the request for submission today. My fast reading of the overview of the subject matters revealed that the ultimately affected people like permanent residents and owners corporations were omitted in this consultative process for the draft policy and regulations. While the Owners Corporation Network was consulted, the grass-root level has been ignored. My concerns are as follows: -

1. The members of an owners corporation(OC) are volunteers, most of whom have no expertise in running a building operating by modern technology in electronic, mechanic, hydraulic, and digital systems. They rely on their strata manager and/or building manager to make the building functioning efficiently. Budgeting for both administration and capital works require hiring consultants to forecast expenditure over 10 or more years. STRA is the last thing the OC members would like to take on board. Our building cannot control the traffic of STRA clients, we have to engage two concierges to maintain safety and decorum in our buildings with little success.
2. The framework is based on the registration of a number of days allowed for STRA and the complaints received and recorded on the Register. A system based on complaints to control the efficacy of the operation will never work well because the framework lacks intrinsic controls, accountability, and transparency.
3. The industry-led register has just thrown the cat among the pigeons. How closely and often are the STRA industry and the regulator going to work with the OC?
4. How are the OCs work out how much to charge extra for the utilization of their amenities and common property - extra electricity, water, security, gym, atrium, garden, and BBQ? We had a drunken STRA person damaged our front door wall, which needed a replacement with the whole column repainted.
5. In the situation mentioned 4 above, claiming insurance will increase our premium. Our insurance premium is already very high due to the combustible cladding on our building. We have given all permanent residents and owners notice of fire precautionary action. With the coming and going of STRA clients, how can OC control this traffic of these holidaymakers?
6. Another missing link in this equation is the insurers. OC in the disclosure statement declares it is a residential building with no commercial interest. By allowing STRA, it means a commercial business in place. There is a conflict of interest in legislations covering the insurance and the reality of STRA. OCs are caught in the middle through no faults of their own. How can this be?
7. Our building wasn't built to cater to the high traffic of STRA business, as a result our lifts are constantly out of order due to high usage, causing a fortune for repairs not to mention the inconvenience.
8. Some of the STRA clients defied gravity climbing our trees and plants in our atrium to reach other owners and residents' balconies, resulting in an emergency call for security. How to control this sort of behaviour and identify the culprit?
9. Please don't pass all these troubles to OCs, they have their worries in terms of what is going on with the building industry, let alone this STRA industry, which is only thriving at the expense of hotelling and service apartment industry. Residential schemes cannot afford to subsidize the STRA industry at any level.
10. Self-regulation of the STRA industry will never work. Just look at the residential building industry. What a mess they have made!

**Submission**

Overall the aims of the regulations are excellent however there are a couple of areas I would like to see reviewed and potentially updated:

1) Draft SEPP

Division 1, 11(b) and 12(c) & Division 2, 13 (c):

This strict "2 persons for each bedroom in the dwelling, or 12 persons in total for the dwelling, whichever is the lesser" limitation should be relaxed (at least for complying development) as -

- 1 - it does not consider large properties which have more than 6 bedrooms (of which I have stayed in a number over the years and are used for big groups),
  - 2 - it would mean families that have babies would have to consider them as adults for the purposes of STRA (so a couple with a 3 month old baby would need a place with 2 beds even though baby would not use a full bed), this is out of sync with all other regulations/customs, i.e. airline seats
  - 3 - many places have large/multiple living areas and rumpus rooms which can comfortably be used as a sleeping space but the proposal prevents this
  - 4 - some places have large bedrooms which have space for multiple beds (particularly kids bunks). The proposal stops this
  - 5 – studio/granny flats have only a general living/sleeping area and no bedroom so could not even host a single person.
- Personally I would suggest 2 per bedroom plus 2 with no maximum limit on the number of bedrooms which would then allow all the above scenarios to exist.

Division 1, 11:

Why does hosted not have the same conditions as section 12, notably

“(d) the dwelling is not situated on bush fire prone land, and

(e) the dwelling is not situated on a flood control lot, and”

as whilst the host is staying there it doesn't mean they will be in the property at all times. I would also question whether these should apply even in non-hosted as if it good/safe enough for general residential accommodation then it should be good enough for STRA.

## 2) Short-term Rental Accommodation Fire Safety Standard

Whilst fire safety is important the requirement for having smoke alarms both inside every bedroom and in every hallway next to a bedroom and the kitchen seems excessive. This means a 2 storey 3 bed inner city house on a 150m block would end up with more than 6 alarms (1 for each bedroom, 1+ for each floor and 1 for the kitchen) even if only rented out for 2 weeks a year. This is significantly greater than the standard code, I would hope that the STRA policy is aligned with the current building code requirements for the different building types so smoke alarms put in following a renovation or new build align with the requirements for STRA as standard prior to issue of an Occupation Certificate.

The additional smoke alarm requirements would also likely prevent anyone renting their home from meeting the STRA requirements as landlords would not be inclined to spend the required additional costs for the many additional alarms.

Additionally, many unit buildings have smoke alarms managed by Strata inside the flats, the proposed additional alarm requirements could “unofficially” give strata a way of preventing all STRA in their block.

Section 4 of the draft standard requires hard wired, interconnected smoke alarms with emergency lights. Hard wired smoke alarms with lights do not appear to be readily available for residential properties in Australia (I haven't been able to find any from the Major Australian suppliers), would an evacuation diagram not cover instead of lights?

This is well done! Congratulations.

I especially like the Draft of Conduct for short-term Rental accommodation Industry. In the 3 places we have lived, the short-term rental guests believe they can be on Holiday until the early morning hours, even though most councils have noise ordinances that supposedly stop loud noise around 10:00 PM on weekdays and midnight on holidays and weekends.

What I would like you to consider is adding to the host's responsibility about making sure section 5.5.2 is upheld : Somewhere put in the hosts are responsible to alert quests about 5.5.2 . and hosts are responsible for their guest or guests behavior.

Thanks again for a thorough document.

MILSONS POINT 2061

#### **Submission**

We live in a twelve storey apartment building in Milsons Point.

I have several areas of acute concern with the short-term letting package proposed by the NSW Government:

#### 1. Preservation of Owners' Rights:

Residential apartment buildings in mixed use and commercial zones with express prohibitions or limitations on short term letting must have their by-laws respected and preserved. There can be no over-riding policy reason which

dictates limitations on the right of apartment owners to collectively decide whether or not to permit short-term rental accommodation (STRA) where this is the clear desire of the democratic majority.

## 2. Collective Cost of Permitted Short-term Letting

Residential schemes must have authority to levy charges and fees on owners/tenants (Hosts) conducting short-term letting. The disproportionate cost to owners and owners' corporations from STRA operations (e.g. wear and tear of lifts, gyms, garbage and other utility areas as well as administration and management costs) means they are effectively subsidising those running STRA businesses. Security arrangements in our buildings must not be compromised. The Hosts should also be required to advise the Owners Corporation of intent to let their property on a short-term basis and to pay any extra insurance costs levied on the building.

## 3. Preservation of Local Government Oversight

Local Councils must have the ability to set and apply zoning restrictions to meet their strategic planning objectives. They should be involved in designing and be part of the compliance and enforcement function of any registration system.

## 4. Fire Safety Standards:

The only way to ensure that mandatory fire safety standards are met is for STRA operations in residential strata schemes to be classed as "complying development" (not "exempt development") which allows for inspection by Local Council or a private certifier. In addition:

- (a) Fire safety standards should be more onerous for short-term holiday visitors in high-rise apartment buildings as the threat to life of all residents is increased significantly.
- (b) Fire standards applicable to residential apartment buildings do not address the fire risks of cooking, BBQ's or smoking on balconies which are common problems with short stay visitors unfamiliar with by-laws or local customs.
- (c) Fire safety in residential strata schemes must not be left to self-regulating platforms or amateur Hosts as it poses an unacceptable risk to all residents.
- (d) Fire and Rescue NSW should have direct access to Register data such as the number of apartments listed for STRA in a high-rise building to enable accurate assessment in emergency situations.

## 5. Effective Registration:

An independent, publicly funded registration system is essential to identify STRA properties, the Host, the agent or nominated representative as well as having data on address, location, intensity, volume, days of availability, days of occupation, number of rooms, etc. in order to develop a profile and analysis of the STRA industry. Other major cities such as New York, San Francisco, Barcelona, Paris, Toronto and Vancouver, who have experienced this industry, are now devising or implementing legislation to strictly regulate its operation. At the very least, NSW should have controls in place BEFORE allowing STRA in apartment buildings as well as enforceable and fast-acting conflict resolution processes.

Given the disparate issues involved with the regulation of AirBnB, Stayz and the like, it is essential that a Register is established, managed by either the NSW Government, local Councils or an independent body, with powers that are time-sensitive, practically enforceable and of real utility to residential strata schemes. This Register must be necessary pre-requisite to any new regulatory framework. STRA transforms homes into hotel rooms and neighbours should not be obliged to give up their right to quiet enjoyment with bland reassurances about conflict resolution. Such a Register has been found to be helpful in somewhat alleviating these problems in cities overseas.

## 6. Host's Registration Obligations:

There must be enforceable obligations for Hosts to register the premises before it is used for STRA purposes. Penalties should apply for unregistered premises. The Host should identify all platforms on which their property is listed, identify days of availability and report nights of occupations. Additionally, there must be a legal obligation for Platforms and agents not to list an unregistered residential dwelling for STRA. Again, there should be no change in planning laws in residential apartment buildings until the Register is in place.

## 7. By-Law Enforcement:

Our strata scheme has a by-law prohibiting STRA. It must not be possible for this to be circumvented by any person who is not an actual owner being registered as a Host. In the case of residential tenants, there must be evidence that the landlord has expressly permitted the conduct of STRA by the lessee. STRA in strata buildings must require a

complying certificate. This should be part of the registration process as it is essential data for regulatory oversight and enforcement.

**8. 180 Day Cap:**

The proposed 180 day cap is unacceptable and excessive by world standards. It makes a mockery of the original intention that the caps were to be an economic lever to drive apartments back into the domestic residential market.

The rapid growth in STRA in recent years has had significant impact on apartment buildings as well as residents on areas such as amenity, strata costs and individual safety. Such growth has clearly outpaced regulation and owner's corporations should be given greater ability to manage these impacts. Under no circumstances should this industry be self-regulated.

I am writing in support of STHL in BYRON BAY not because it's a good thing but the town has to live with the concept as it brings money to the town. This revenue does not stay with us here as most of the town itself is now an investor town. The properties owned by investors 65% are all for holiday letting and therefore the money for rent leaves town.

We accept that beaurocrats in Macquarie St. have taken our community away and now we are left with visitors and no soul but that is the way of the future and that is why I support the policy.

There is no need to restrict or define a number of days as the weather will dictate rental returns.

It is hard to wind back the clock so why try.

Good luck and you sent my family like so many other legal operators out of business so you don't care anyway.

Now we have nothing.

It is our belief that Strata Association's By-Laws should not be further weakened by the State Government on the issue of short-term letting in residential apartment housing. After reviewing the various draft reports on your website, the State Government puts the obligation for compliance of various constraints squarely on individual apartment complexes as far as reporting goes. Strata Committees which would have oversight of these compliance issues are volunteer organisations which are already overstretched with their normal duties to manage By-Laws and building issues (such as repair and maintenance of the buildings - please note that our buildings are clad in combustible material which will have to be changed, thanks to a lack of oversight on the building industry in NSW). To be responsible for breaches of our By-Laws for short term letting owners and tenants when, in fact, over 75% of our particular buildings' owners do not wish to have short term letting, is unjust and far too time consuming for all

concerned. In short, we oppose any State Government policy of short term letting that does not allow residential buildings to have the ability to allow or reject such a policy after consulting with individual owners: this is a matter for the Building owners, not for the State Government to force upon Strata Associations.

**Subject:** Holiday rental regulations for NSW

**Categories:** recorded in DPIE subs register, recorded and not sent to DCS, Purple category

Dear Minister,

We believe that short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. It is also obvious there is demand for such service. In our situation, which is a fully self-contained and private one bedroom apartment that accommodates 2 people, we are running at about 30% occupancy. So in our case the 180 day restriction will not impact on us, but we believe there is a principle here. We would be happy to get to 50% or more, but the market determines our occupancy, not an arbitrary number imposed upon us. The setting of a limit, no matter the size, is something that restricts the opportunity for trade. There doesn't appear to be logic in the number, nor for that matter, the reason for restriction of any kind. Its like saying to Mr BHP, see that pile of stuff from the hole you just dug, you can't sell more than half of it, and he says, why not? its my hole!

We understand the need for registration but this should be seen predominantly from a Safety point of view. To make sure that standards are met. Registration for the sake of setting up a list is not warranted, but to ensure the appropriate safety measures are put in place, is warranted.

There is mention of Councils being involved, but why isn't this issue looked at from a State perspective or even from a National perspective. If an overseas traveller is looking to travel through more than one state in this country, why should they have to have different standards and requirements imposed upon them as they travel from one state to another, or from one council area to another. We hear all the time about Globalisation and how the world is becoming a smaller, closer place. Then why too is that not the case for our Nation. Conditions of accommodation should be the same no matter where in the country someone travels.

Taking this angle to the next level, has a review of what happens elsewhere in the world been done? Do we really need to reinvent the wheel? Are you sure that the best solution has not already been put in place somewhere else?

As for a register of strikes for hosts or guests, the larger more prominent on-line booking companies provide a "review" system that works well in sorting out hosts and or guests that do not meet standard. So we would question the need for an imposed additional system. Let the working system do its job.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Thanks for reading

B& B must remain true to its original purpose and require an owner to remain living on the premises during the rental period.

Full house short term letting in residential areas is unacceptable due to the inconvenience it places upon permanent residents in regard to noise, traffic movements, parking, rubbish, and abuse from these tenants when complaints are made about their behaviour.

**I agree to the above statement**

Yes

Milsons Point. Sydney 2061

**Submission**

I am the chairman of an apartment building in Milsons Point, . The population density in Milsons Point is one of the highest in Sydney and makes our area particularly vulnerable to the problems associated with short-term letting and the tourist market.

I have several areas of acute concern with the short-term letting package proposed by the NSW Government:

1. Preservation of Owners' Rights:

Residential apartment buildings in mixed use and commercial zones with express prohibitions or limitations on short term letting must have their by-laws respected and preserved. There can be no over-riding policy reason which

dictates limitations on the right of apartment owners to collectively decide whether or not to permit short-term letting where this is the clear desire of the democratic majority.

## 2. Collective Cost of Permitted Short-term Letting

Residential schemes must have authority to levy charges and fees on Hosts conducting short-term letting. The disproportionate cost to owners and owners' corporations from STRA operations (e.g. wear and tear of lifts, gyms, garbage and other utility areas as well as administration and management costs) means they are effectively subsidising those running STRA businesses. Security arrangements in individual buildings must not be compromised. The Hosts should also be required to advise the Owners Corporation of intent to let their property on a short-term basis and to pay any extra insurance costs levied on the building.

## 3. Preservation of Local Government Oversight

Local Councils must have the ability to set and apply zoning restrictions to meet their strategic planning objectives. They should be involved in designing and be part of the compliance and enforcement function of any registration system.

## 4. Fire Safety Standards:

The only way to ensure that mandatory fire safety standards are met is for STRA in residential strata schemes to be classed as "complying development" (not "exempt development") which allows for inspection by Local Council or a private certifier. In addition:

- (a) Fire safety standards should be more onerous for short-term holiday visitors in high-rise apartment buildings as the threat to life of all residents is increased significantly.
- (b) Fire standards applicable to residential apartment buildings do not address the fire risks of cooking, BBQ's or smoking on balconies which are common problems with short stay visitors unfamiliar with by-laws or local customs.
- (c) Fire safety in residential strata schemes must not be left to self-regulating platforms or amateur hosts as it poses an unacceptable risk to all residents.
- (d) Fire and Rescue NSW should have direct access to Register data such as how many STRA apartments are listed in a single high-rise building to enable accurate assessment in emergency situations.

## 5. Effective Registration:

An independent, publicly funded registration system is essential to identify STRA properties, the owner/host, their agent or nominated representative as well as having data on address, location, intensity, volume, days of availability, days of occupation, number of rooms, etc. in order to develop a profile and analysis of the STRA industry. Other major cities such as New York, San Francisco, Barcelona, Paris, Toronto and Vancouver, who have experienced this industry, are now devising or implementing legislation to strictly regulate its operation. At the very least, NSW should have controls in place BEFORE allowing STRAs to operate in apartment buildings as well as enforceable and fast-acting conflict resolution processes.

Given the disparate issues involved with the regulation of AirBnB, Stayz and the like, the Milsons Point Community Group regards as essential the establishment of a Register run by either Government, local Councils or a neutral platform, with powers that are time-sensitive, practically enforceable and of real utility to residential strata schemes. This Register must be necessary pre-requisite to any new regulatory framework. STRA can transform homes into hotel rooms and neighbours should not be obliged to give up their right to quiet enjoyment with bland reassurances about conflict resolution. Such a Register has been found to be helpful in somewhat alleviating these problems in cities overseas.

## 6. Host's Registration Obligations:

There must be enforceable obligations for Hosts to register the premises before it is used for STRA purposes. Penalties should apply for unregistered premises. The Host should identify all platforms on which their property is listed, identify days of availability and report nights of occupations. Additionally, there must be a legal obligation for Platforms and agents not to list an unregistered residential dwelling for STRA. Again, there should be no change in planning laws in residential apartment buildings until the Register is in place.

## 7. By-Law Enforcement:

In cases where a strata scheme has a by-law prohibiting STRA, it must not be possible for this to be circumvented by any person who is not an actual owner being registered as a host. In the case of residential tenants, there must be evidence that the landlord has expressly permitted the conduct of STRA by the lessee. STRA in strata buildings must require a complying certificate. This should be part of the registration process as it is essential data for regulatory oversight and enforcement.

## 8. 180 Day Cap:

The proposed 180 day cap is unacceptable and excessive by world standards. It makes a mockery of the original intention that the caps were to be an economic lever to drive apartments back into the domestic residential market.

The rapid growth in short-term letting in recent years has had significant impact on apartment buildings as well as residents on areas such as amenity, strata costs and individual safety. Such growth has clearly outpaced regulation and owner's corporations should be given greater ability to manage these impacts. Under no circumstances should this industry be self-regulated.

AirBnb in designated buildings purpose built gives certainty of choice to all residents prior to purchasing into such real estate.

Allowing retrospectively AirBnb to fit into otherwise residential abode causes safety and security issues of revolving strangers who are not long term residents within my building which is my home. Everyday sharing my lift rides with my neighbors is not the same as with transient Airbnb tenants.

As home owners I face intrusion and higher costs of maintenance & fees and unfair to subsidise another owner carrying out a business.

Dear Minister, Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Background - opening paragraph Lines 4/5. I am outraged that the Government is being so disingenuous as to say that "it has heard that STRA can cause problems.....".It must have been obvious to anyone from the outset that the forced disruption of life in stratas would not be acceptable to the majority of strata residents.

Integrated Policy Framework - It should be mandatory for STRA hosts to be provided with or to obtain details of the salient parts of the Code of Conduct required of them.They or their agents should also be obliged to give a copy of the Code of Conduct expected of anyone taking up short term accommodation.Guests should also be required to

leave a deposit (say \$100) with the host/agent to cover possible loss of keys security tags etc and there are plenty of these. An owners' corporation spends enough time on revising security systems because of careless (or unlucky) owners let alone casual visitors.

Registration system- This should be wholly at the expense of the so-called industry and should be kept by an organisation independent of that industry. It is not clear how it will deal with the cases where there are multiple letting agents and this must be clarified. Before the first occasion on which there is to be letting activity a host should be required to notify the owners' corporation :-

(a) that STRA letting is proposed

(b) producing evidence of insurance cover

(c) producing evidence that smoke alarms have been fitted to bedrooms which are the subject of STRA. NB This shouldn't be a problem because smoke alarms will be fitted to common property and the Strata Schemes Management Act requires the prior permission of the owners' corporation for such installations

(d) in writing that he/she is aware of a host's responsibilities and that he /she has fact sheets to be given to guests regarding their responsibilities.

Once an owners' corporation is satisfied on all the above points it could notify the register accordingly (it would be necessary to produce a procedure for this).

The Register should be open for inspection by owners' corporations to be sure that a host is acting in accordance with the previously stated plans. This new system pays scant regard to the privacy of strata residents who do not act as STRA hosts so hosts do not deserve special treatment. After all property sale prices are publicly available. Presumably the ATO would be able to see the Register. I may have missed it but I have not noticed any attempt to inform hosts of their tax obligations.

Provision must be made requiring tenants to receive written permission from the owners before being allowed to engage in STRA activity.

Unhosted STRA bookings of 21 days or more - This is a blatant attempt to permit lettings to exceed the 180 days limit in Greater Sydney and fertile minds will already have plans to exploit this egregious loophole. It must be cancelled

Another outrage is the way in which the Government has blithely ignored local councils' development plans re residential apartments.

The complaints system is inadequate to say the least. By the time a complaint is considered, if at all, any problem guests will have disappeared and hosts (in particular non-resident hosts) will disclaim knowledge of any problems. Never mind about two strikes etc any problem cases should be barred from any future lettings. This complaints system is doomed to fail unless there are quicker means of dealing with complaints, preferably by having people readily available to visit premises where there are problems as in the case of noise-abatement inspectors. Perhaps they could be brought into the equation. Any costs of such "home visits" could be built into the costs paid by the industry in respect of the rights it has received to potentially intrude upon the peace and privacy of the majority of strata residents.

The STRA should be introduced soonest as it has been mooted for years & the industry has grown & needs security to ensure that housing prices do not drop any further & the benefits it brings to the community & economy.

A review of the STRA regulatory framework 12 months after it commences will ensure that unintended consequences can be dealt with.

Milsons Point, 2061

**Submission**

I am making this submission in my capacity as Chairman of the strata committee of the building at 6 Glen St, Milsons Point.

Milsons Point includes around 30 multi-storied apartment buildings and has a population of around 4000 people. This population density is one of the highest in Sydney and makes our area particularly vulnerable to the problems associated with short-term letting and the tourist market.

We have several areas of acute concern with the short-term letting package proposed by the NSW Government:

1. Preservation of Owners' Rights:

Residential apartment buildings in mixed use and commercial zones with express prohibitions or limitations on short term letting must have their by-laws respected and preserved. There can be no over-riding policy reason which dictates limitations on the right of apartment owners to collectively decide whether or not to permit short-term letting where this is the clear desire of the democratic majority.

## 2. Collective Cost of Permitted Short-term Letting

Residential schemes must have authority to levy charges and fees on Hosts conducting short-term letting. The disproportionate cost to owners and owners' corporations from STRA operations (e.g. wear and tear of lifts, gyms, garbage and other utility areas as well as administration and management costs) means they are effectively subsidising those running STRA businesses. Security arrangements in individual buildings must not be compromised. The Hosts should also be required to advise the Owners Corporation of intent to let their property on a short-term basis and to pay any extra insurance costs levied on the building.

## 3. Preservation of Local Government Oversight

Local Councils must have the ability to set and apply zoning restrictions to meet their strategic planning objectives. They should be involved in designing and be part of the compliance and enforcement function of any registration system.

## 4. Fire Safety Standards:

The only way to ensure that mandatory fire safety standards are met is for STRA in residential strata schemes to be classed as "complying development" (not "exempt development") which allows for inspection by Local Council or a private certifier. In addition:

- (a) Fire safety standards should be more onerous for short-term holiday visitors in high-rise apartment buildings as the threat to life of all residents is increased significantly.
- (b) Fire standards applicable to residential apartment buildings do not address the fire risks of cooking, BBQ's or smoking on balconies which are common problems with short stay visitors unfamiliar with by-laws or local customs.
- (c) Fire safety in residential strata schemes must not be left to self-regulating platforms or amateur hosts as it poses an unacceptable risk to all residents.
- (d) Fire and Rescue NSW should have direct access to Register data such as how many STRA apartments are listed in a single high-rise building to enable accurate assessment in emergency situations.

## 5. Effective Registration:

An independent, publicly funded registration system is essential to identify STRA properties, the owner/host, their agent or nominated representative as well as having data on address, location, intensity, volume, days of availability, days of occupation, number of rooms, etc. in order to develop a profile and analysis of the STRA industry. Other major cities such as New York, San Francisco, Barcelona, Paris, Toronto and Vancouver, who have experienced this industry, are now devising or implementing legislation to strictly regulate its operation. At the very least, NSW should have controls in place BEFORE allowing STRAs to operate in apartment buildings as well as enforceable and fast-acting conflict resolution processes.

Given the disparate issues involved with the regulation of AirBnB, Stayz and the like, the Milsons Point Community Group regards as essential the establishment of a Register run by either Government, local Councils or a neutral platform, with powers that are time-sensitive, practically enforceable and of real utility to residential strata schemes. This Register must be necessary pre-requisite to any new regulatory framework. STRA can transform homes into hotel rooms and neighbours should not be obliged to give up their right to quiet enjoyment with bland reassurances about conflict resolution. Such a Register has been found to be helpful in somewhat alleviating these problems in cities overseas.

## 6. Host's Registration Obligations:

There must be enforceable obligations for Hosts to register the premises before it is used for STRA purposes. Penalties should apply for unregistered premises. The Host should identify all platforms on which their property is listed, identify days of availability and report nights of occupations. Additionally, there must be a legal obligation for Platforms and agents not to list an unregistered residential dwelling for STRA. Again, there should be no change in planning laws in residential apartment buildings until the Register is in place.

## 7. By-Law Enforcement:

In cases where a strata scheme has a by-law prohibiting STRA, it must not be possible for this to be circumvented by any person who is not an actual owner being registered as a host. In the case of residential tenants, there must be evidence that the landlord has expressly permitted the conduct of STRA by the lessee. STRA in strata buildings must require a complying certificate. This should be part of the registration process as it is essential data for regulatory oversight and enforcement.

## 8. 180 Day Cap:

The proposed 180 day cap is unacceptable and excessive by world standards. It makes a mockery of the original intention that the caps were to be an economic lever to drive apartments back into the domestic residential market. The rapid growth in short-term letting in recent years has had significant impact on apartment buildings as well as residents on areas such as amenity, strata costs and individual safety. Such growth has clearly outpaced regulation and owner's corporations should be given greater ability to manage these impacts. Under no circumstances should this industry be self-regulated.

Submission on draft instrument for short-term-rental accommodation reforms

## Executive Summary

- Without strong enforcement of STRA rules, many hosts will simply ignore them, as has happened overseas, with or without a register
- Many hosts already flout the rules (eg tenancy, occupancy, fire safety) to increase their profits
- The number of STRA platforms is exploding, and any registration approach must account for the increasing importance of niche sites and aggregators
- An industry-led register is risky because platforms cannot be relied on to cooperate, and separate deals must be negotiated with increasing numbers of platforms, all of which make more money by ignoring the rules rather than ensuring compliance
- A neutral platform has incentives aligned with those of NSW's citizens, which is for an efficient, effective system that enables hosts to participate without unreasonable costs and enable the state and local governments to have relevant and timely data and confidence.

## About BnbGuard

BnbGuard is a Sydney company specialising in STRA monitoring, identification, data and advice services for owners corporations and local governments across Australia and New Zealand. We have become the trusted neutral platform in the STRA space. Our integrated approach combines property identification with registration for low-cost, effective enforcement that covers all STRA platforms, and can be easily extended as more platforms and sites enter the market

## STRA Registers

In general the proposed rules regulating short-term rental accommodation (STRA) in NSW are a step in the right direction, though they lag significantly those of other global tourist hotspots. Please see the Appendix for examples of regulatory models in comparable countries and cities around the world.

An industry-led register, as has been suggested, is risky for NSW, chiefly for three reasons:

- (i) Platforms can't be relied on to cooperate;
- (ii) the market itself is splitting into more and more platforms, and;
- (ii) a registration system must be closely tied to monitoring and enforcement by a range of regulatory authorities (e.g. local council and fire and rescue) to be a worthwhile and cost-effective compliance and enforcement model.

## Enforcement

Ensuring compliance and having the capacity to enforce STRA-related rules (e.g. planning, fire safety, code of conduct, bylaw) is necessary for preventing illegal STRA, ensuring tourists and visitors are safe, and making sure that legitimate businesses that do the right thing can operate on a sustainable basis with a level playing field. The NSW model encompasses many existing STRA operators as well as the new "Airbnb-style" letting because it is state-wide and STRA is not restricted to the principal place of residence. As a consequence, the registration system needs to work for hosts and a range of different business operators, many who are not global platforms.

Enforcing STRA rules is not easy or cheap. The international experience is that STRA platforms tend to be uncooperative once rules are enforced, and with so much money at stake, hosts find and exploit any loophole they can. BnbGuard works with governments to advise on STRA rules and enforcement strategies, and also to enforce those rules using our technology that identifies the real property addresses of listings. In the absence of this kind of technology, the best approach is for a dedicated team of people to be assigned the task of responding to complaints and proactively enforcing compliance (for example, the city of Berlin has a team of six). In the NSW model, which is state-wide, it will be essential to adopt a technology-led strategy which is more cost effective and efficient because neither the state nor the local government entities have the resources to rely purely on manpower.

Integrating monitoring, compliance and enforcement with a register greatly reduces the cost of policing the industry, promoting better standards and reducing conflict. Without adequate enforcement, many operators will just ignore the rules (as often happens overseas). There's too much money to be made to follow the rules for their own sake. For example, hosts in NSW will be obliged to carry public liability insurance, meet certain fire safety standards, not list a property in a strata scheme that has a bylaw banning them, and observe the code of conduct. An integrated system will better enable hosts to know their obligations and comply across all the sites where their listings appear.

For example, Paris has operated an STRA register for two years, and still has a crisis of housing affordability and over-touristification in its urban centre because of poor compliance with the rules. Often the STRA platforms have little interest in policing their hosts (eg Paris has sued Airbnb for accepting unregistered properties). It is an example of why platforms should have an obligation not to list an unregistered dwelling.

BnbGuard's technology automatically reports on overcrowding violations for our customers. For example, in many areas (especially city centres) nearly half the matches we find have too many guests, because it's an easy way for hosts to improve profits (and nobody but BnbGuard is looking for it). Once they're caught hosts will often reduce the occupancy on major sites but keep it high on smaller, niche sites that they assume aren't monitored by our technology (but in fact are). The problem of overcrowding is especially significant in high-rise apartment buildings where increased fire risks and amenity impacts cause conflict with residents. The owners corporation has no power to inspect the lot, and few apartment buildings have on site managers. The registration system operated by a neutral platform with monitoring technology is a significant valued added offering that no single STRA platform is capable of delivering.

The benefit of a neutral register is that it can scan, identify and ensure compliance with NSW's regulatory system across any STRA platform. Access to registration data greatly reduces the cost of enforcement using technology like BnbGuard's, which will greatly improve NSW's ability to police the roles.

Lax enforcement or difficult-to-enforce rules have let down STRA regulations in Santa Monica, Chicago, New York and many other places. Those cities have since moved to stricter STRA rules.

It would be a good idea for any government looking to regulate STRAs to visit these cities and others suffering from the unwanted side-effects of the recent STRA boom (e.g. Vancouver, San Francisco, Madrid, London, Paris, Berlin, Amsterdam). Ineffective regulation can have drastic long-term, if not irreversible, effects on communities and local economies. There is a growing body of evidence for NSW and elsewhere in Australia about the unwanted impacts of STRA, which was not available at the time of the initial Parliamentary Inquiry on which this policy has relied.

### Reliance on the Platforms

When examining the pattern of behaviour of STRA platforms in their recent battles with regulators, a clear pattern emerges - Platforms will concede only as much as they have to to stay in business.

Airbnb is frequently under the spotlight, but is actually one of the industries' better players. It cooperates much more fully with governments than most of its competitors (see for example, Expedia's battle to avoid the rules Airbnb follows in New Orleans). In the STRA industry, illegal activity flows to the platforms that break the rules (for example, London saw illegal activity go from Airbnb to competing sites as Airbnb was the only one following the rules). There is little incentive for them to cooperate with each other and, as mentioned in detail below, the industry is highly fragmented into hundreds of global platforms as well as many smaller localised sites.

Airbnb opposes rules in some areas it is only too happy to meet in others. The best example of this is sharing host data (eg names, addresses) with governments, which it has lambasted in New Zealand, Queensland, New South Wales, and New York City. However, it is sharing host data in other jurisdictions such as Vancouver and Portland. Similarly, Airbnb is cooperating with registers in Paris, Vancouver and many other areas, but is lobbying against the approach in NSW.

Relying on the major STRA platforms to cooperate makes government vulnerable to a high risk of regulatory failure and the social, economic and political consequences that tend to follow. Cooperation will come on their terms (and there is a real gap of expertise and knowledge between them and government agencies) and can be ended or restricted when it's no longer in their interest to play nice.

This is in fact the pattern of behaviour of both Airbnb and Expedia around the world, and they are only two in a market of hundreds of platforms. Having the platforms police their own registration compliance in a hyper-competitive industry is likely to lead to many unreported breaches and blind eyes being turned.

A neutral platform is incentivised to hunt out all compliance breaches, and so are aligned with NSW's goals of putting STRA onto a more professional and legitimate basis with greater social acceptability. STRA platforms' incentives are focused to customer growth and revenue in a rapidly changing, competitive industry.,

### The Market is Splitting

Airbnb has normalised staying in other people's homes, and made the experience so easy it's changing the face of tourism. But it's increasingly just one player in a fragmented market.

Now that home-sharing is normalised, it's easy for other companies to jump on board because the platform technology itself is cheap and easy to set up. These new platforms focus only a specific community, and so often do a better job of appealing to that community. Examples include:

- Holiday Paws (pet friendly)
- Kid & Coe (family friendly)
- Ecobnb (environmentally friendly)
- Muzbnb (muslim friendly)
- Misterb&b (gay friendly, actually one of the biggest sites in Sydney)

Any NSW register that ignores these sites is at best a band-aid fix. For example, Misterb&b alone has more than 300,000 hosts and in some parts of Sydney its popularity rivals that of Airbnb, though most people in Australia have never heard of it.

Hard data on the growth of these platforms isn't available, but BnbGuard's property address identification increasingly detect matches off the major platforms.

Compelling compliance with NSW rules on all these platforms is not feasible. Moreso, enforcing rules is impossible. There is little a local or state government can threaten a company based overseas that doesn't care about playing by the rules. And these cheaters will prosper when other companies play by the rules, including legitimate domestic property management companies who have been in operation for several decades. Compliance can only reliably be enforced on the hosts themselves, who must be local.

Further to this, there are the "metasearch engine" sites, aggregators like Tripping.com and HomeToGo, that serve up listings from all major STRA platforms in one place. So guests are increasingly going to these aggregator sites to see more listings without paying any more money.

Many investors and industry experts predict that aggregators will dominate the market in future, as Skyscanner.com has for flights and Wotif.com has for hotels. As with these industries, Google is even beginning to show STRAs in its search results for local accommodation.

What this means is that being banned from major sites Airbnb and Homeaway is no longer the end of an STRA business. Just list on a smaller site that ignores the rules, and your listings will get picked up by an aggregator anyway. By partnering with neutral companies like BnBGuard those industry trends will simply be tracked as part of the evolution of the market, and NSW's STRA policies will be future-proofed.

This proliferation of sites and channels will continue to accelerate, making independent monitoring and enforcement the only sustainable solution.

Please don't hesitate to contact me to discuss any of the above further.

## Subject: Short-term Rental Accommodation Reforms

In the Byron Shire area short-term rental accommodation is killing our towns and rural areas by destroying the social fabric of communities, and driving the rental market out of reach of locals. Our coastal and hinterland villages and rural areas have been bought up by absentee landholders who have no interest but profit. The consequence is that owner-occupiers and local residents are fast disappearing in the face of an aspirational market place that has no room for them.

The proposed policy on short-term rental accommodation overrides other legislation that supports residents. Making local residents second class citizens in their own towns and local areas, and sacrificed by Clause 7 (1) In the event of an inconsistency between this Policy and another environmental planning instrument, whether made before or after this Policy, this Policy prevails to the extent of the inconsistency.

NSW is out of step with locations all over the world. Major towns and cities are placing restrictions on Air BnB and short-term rentals to prevent the destruction of local communities, but in NSW the state government appears ready to do business with anyone, and appear to have allowed the short term letting accommodation industry to write the rules.

The new legislation places a cap on days allowed for letting, where the host is not present, of 180 days per year or 365 days in regional areas. Byron was promised a 90 day limit in the run up to the last election but it is still to be approved and Council has to prove its case as to why Byron gets special treatment before it is approved. 90 days is still 45 weekends a year and, given weekend prices, this is likely not a deterrent to making owners return houses to the permanent rental market.

Unlimited days - no caps: Also, a loophole has appeared in the proposed regulation: a booking for 21 or more consecutive days will not count towards the limit when a host is not present. So a cap is not really a cap!! This means the true extent of short-term letting can never be monitored or measured. A host could add as many 21 day letting periods as they want for the rest of the year and it would not be counted in the annual total!

The state govt is also proposing an industry-led register to keep track of all short-term lets. It is expected to record the name of the host, the property's address, the duration of each booking and whether it complied with bylaws. The industry self-regulating? Really? This takes the power away from local councils to monitor non-compliance for their residents.

It is also known that a number of NSW MPs own short term rental properties, including the Deputy Premier. Politicians with clear conflicts of interest should not be allowed to vote on this issue.

The law supports residents - NSW Land and Environment Court has analysed case law on the definitions of "residential accommodation", "residential building", "residential flat building", "domicile" and "flats", and concluded that there must be "an element of permanence or residence for a considerable time, or having the character of a person's settled or usual abode" in order to constitute "residential buildings"; relying particularly on *North Sydney Municipal Council v Sydney Serviced Apartments Pty Ltd* (1990)21 NSWLR 532 and *Derring Lane Pty Ltd v Port Phillip City Council* (No 2) (1999) 108 LGERA 129.

Further to my submission on 7 September 2019, I make the following additional point:

Strata complexes - additional impact on common property and services:

The 'package' (amendment Act, proposed Code and proposed Regulation do not address a very real issue for Owners Corporations, being the cost of increased wear and tear, maintenance, cleaning and services use (water and electricity) of common property and common services (including waste disposal) caused by STR. Guests (of STR) are indifferent about such matters and mostly do not think or act like owners.

These costs are borne by the Owners collectively and owners who engage in and profit from STR are receiving a material benefit from other owners, which is inequitable. This needs to be addressed by permitting Owners

Corporations to pass bylaws to impose a levy on owners of lots used for STR to reasonably contribute to these additional costs.

MILLERS POINT 2000

### Submission

There are several points we the Stamford Marque Owners Corporation, would like to have clarified

1. There does not seem to be any system to include council rules. eg our building DA says only residential, no holiday letting. Will this legislation overrule those laws?
2. The registration list needs to be kept by an independent body eg Fair Trading or Council other wise conflict of interest is perceived.
3. Will anyone be checking that fire regulations are met. eg our fire safety each year is quite expensive and stringent, do they have to be notified of STRA owners so they can inspect? If so, then any registration needs to be sent to Owners Corporations as well.

4. Owners Corporations need access to registration lists and a way of filing complaints

I wish to register my concerns with the scope and intent on the proposed reforms for Short Term Residential Accommodation (STRA). My concerns centers on the absence of detailed empirical evidence of a need for such significant building modifications to rental houses, the use of 'one model suits all' with these proposed building modifications and on the impact of these reforms on smaller communities where short term accommodation is a much needed economic driver for the local community and fills a gap in the absence of local or nearby motels or hotels. I accept the proposed reforms may be appropriate to address concerns over older and in some cases poorly maintained rental properties. I own a modern 4 bedroom home which I rent out over the Christmas/New Year period, about 3 weeks. I already meet most of the proposed modifications - have several hard wired smoke detectors throughout the house and have the other safety items such as fire extinguisher and fire blanket. There is

no evidence that justifies lumping a modern house such as mine in with older and poorly maintained properties. It is unfair. Further with no available commercial accommodation in this area I object to what will be in effect a discriminatory economic penalty imposed on this community. Why?

In short I would propose an alternative regime that targets older properties that could be seen to be a safety threat to renters and initially focuses in areas where suitable and available commercial properties such as motels and hotels are available.

COFFS HARBOUR JETTY

#### **Submission**

As an owner/occupier in a residential apartment building, I object to the fact that council/government can override the wishes of our strata committee when it comes to short-term holiday letting. As residents we are not on holiday. We have jobs, families and need to get a good night's sleep. Non-resident owners can currently let their property for single-night stays, and are not present to control their guests. In addition to noise, building security is an issue as we their is almost no vetting completed over guests.

Should the strata committee vote to allow short-term lets, or the owner be present in the property to address issues overnight I have no objection. It is simply undemocratic and unfair not to allow us control over our own building and

it's use.

**Submission**

Dear Minister,

We operate a short term holiday rental in the Eurobodalla shire. We have been running it via the Stayz and now AirBnB platform for over 10 years and our house has had many people stay for short term holidays. The model of the short term holiday home rental is something that many Australian's enjoy and utilise. It is here to stay because it offers people choice in the style of accommodation, the location and the price point.

As part of our responsibility to our local street and town community, we have adopted the code of conduct that the Stayz group developed in partnership with a number of regional councils. This has helped us communicate with our

guests which has led to over 10 years of issue free hosting.

As an owner participating in the short term rental industry we maintained our house at a high standard and to this end have:

- employed cleaners, gardeners, local handy jobs people, builders, painters, plumbers, electricians and roofing specialists;
- sourced materials and goods for our house purchasing from local business retailers.

We have also promoted local tourism industries and businesses such as boat charters, cafes, restaurants, clubs, supermarkets, local markets and retailers of personal goods and charities

We would like to note the following points in response to the proposals:

- \* We agree that a code of conduct is one of the most useful tools in helping create short term rental with minimum impacts on neighbours. We support a common code of conduct for this industry.
- \* We do not support a capping of nights: over the previous ten years we have found that we have increased bookings around the year which originally started as predominantly summer month rentals, bringing tourism to the region at times that were typically very low for tourism benefit.
- \* We support good safety standards for visitors, and any house that has been approved and is compliant with existing industry codes should not have to retrospectively be forced into an upgrade that is not building greater benefit overall.
- \* The recommendation for smoke detector alarms in each bedroom is excessive. For hotels/hostels where rooms are behind fire doors to corridors, and where doors always remain shut for privacy this may be appropriate. Short term holiday homes with bedrooms very close together often with internal doors left open overnight, having a smoke detector alarm in each bedroom and the adjacent hallway is in excess, and potentially creates a new hazard of deafening noise and confusion that can occur from overwhelming noise levels. Smoke detector alarms in corridors outside bedrooms is a known effective level of hazard mitigation and should not be increased. Hard-wiring these alarms is appropriate.
- \* The registration system is problematic, over complicated and does not seem to be able to demonstrate in the current proposed model effective management and process of membership. The current model seems overly bureaucratic and expensive for short term rental owners and potentially disadvantaging guests through the passing on of costs.

We support better relationships between holiday home short term rental and our local communities and responsible service delivery. We do not support systems that will potentially cripple this market through heavy cost compliance.

We wish to continue to give back to the community that we have belonged to for more than 10 years. The reforms you are suggesting need to be carefully considered, including thinking about unintended consequences.

Thank you.

I object to allowing short term accommodation in strata buildings.

1. It is unsafe. Strata buildings do not have fire escape instructions for short term renters. There is no one help them in case of emergency.
2. It is unsafe to long term occupiers in the building. At the moment, we notice strangers as we basically know most of our neighbours. Our building will become insecure building when our entrance code is given away to short term renters.

3. Short term renters do not know the etiquette expected of in our buildings such as garbage room, common laundry etc.

I hope the State stops messing up our life. There is enough accommodation types available for short term renter. Please leave us alone.

We very much object to any changes in laws/regulations that will make it legal for strata Owners or occupants to conduct short term letting. We consider it grossly unfair and wrong that the apartment we purchased in good faith as our home, under the regulations that existed at the time of purchase, could be threatened by a revolving door of unknown itinerants in our building, many in party mode. Moreover the increased costs incurred in common property maintenance, cleaning costs, security costs, fire safety costs, insurance increase costs, rubbish disposal and more will be passed onto us via increased strata levies. The friendly ambience in our building will change as more strangers come and go. It is outrageous to us that this government cannot see how wrong and de stabilising this

legislation's ramifications could be. We have already experienced "hot bedding" in our small apartment block. This was horrendous with people coming and going at all hours, keys left in letterboxes, people climbing in through the gym windows at night to gain access, strangers using our gym showers on a regular basis while locking owners out of the gym- even sleeping in there, and smoking in the building that permeated throughout. We successfully stopped this and have introduced a by law to prevent leases under six months, and now we read that the NSW government is proposing changes to Planning Laws to permit and encourage airbnb and others to operate openly and to override our by laws and our wishes as long term owner-occupiers. We are most unhappy with these proposals and would not be voting for a government that sought to override and legislate against the best interests of owner occupiers In strata schemes.

Manly 2095

**Submission**

We are a retired couple & invested all our retirement savings into an apartment at 22 Central Ave Manly. The building has always been dominantly used for short term letting as it was originally a hotel & almost 90% one bedroom / studios. We invested heavily to renovate & furnish the apartment to a high level to attract the sophisticated overseas tourist. The high price we paid for an ocean facing studio plus the renovation & furnishing costs make short term letting the only viable option for us to obtain a decent retirement income stream.

Long term renters are not interested in furnished apartments & are generally not prepared to pay higher rents for prestige apartments. Forcing us to pull our apartment off the short term market for 50% of the year & to hope that we can attract someone to rent the property for that exact 6 month window is highly improbable. Our retirement

income will be slashed.

Whilst this legislation makes sense for many Strata communities, a one size fits all approach ignores the impact that this legislation has on many retired couples. Existing STRA properties should be forced to register & only new properties should have the draconian 180 day rule apply.

Manly is a tourist destination & there is a lack of hotel accommodation. Short term rentals play a vital role in increasing available accommodation for tourism - one of Australia's major employers & industry sectors.

**Subject:** Holiday rental regulations for NSW

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

My property contributes significant tourist income to the Jervis Bay area, if you place restrictions you are therefore limiting the economic & cultural benefit of people visiting & discovering the area.

Yours Faithfully

David Harris

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry, especially in the rural area we are in. So any regulation for our sector should avoid unnecessary burdens on our operations.

As responsible operators, we strongly support the creation of a register of all holiday rental properties listed on a platform (not just secondary holiday homes) and the code of conduct. However, we oppose both the night limits as it can deprive many holiday homeowners of income they have come to rely on and use restrictions for our properties, as restrictions of this kind will put an important holiday tradition at risk as extended family groups get together to enjoy each others company.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential. We believe with the right regulatory settings, short-term rentals can act as a catalyst for growth in regional areas where the availability of traditional hotels is limited.

Thank you reading my submission.

Yours sincerely,

Bronwyn & Max Greive

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

We are retired, nearing 70, and on a fixed allocated pension. We do NOT claim any government subsidies or pension. We also 100% support our adult son who suffers with crippling mental health issues. The small income generated by our short stay holiday letting of a room in our home is critical to assist us cover our financial living costs. Should new legislation impact our ability to earn this extra income, we may be forced to claim a part pension which we very much would like to avoid.

We support some reasonable restrictions and controls for some areas (Byron Bay) where entire homes are purchased by absent owners for the express purpose of air bnb and where these properties often stand empty outside of key holiday season periods - but NOT where the guests are renting a bedroom/seperate living room area under the same roof as their hosts, the property owners.

Thank you

Gill Sutherland

**Submission**

I strongly support the Owners Corporation Network's comments on the Department's STRA draft code of conduct.

In addition I believe that EVERY owners corporation should have the right, by say a 2/3 majority vote, to pass a by-law refusing to allow short term letting in their specific strata.

Alternatively if this is not agreed to by the Department then EVERY owners corporation should have the right to impose higher levies on owners engaged in short-term letting, reflecting that such owners are imposing higher

maintenance and security costs on fellow owners while receiving personal financial benefits though this short-term letting NOT shared with their fellow owners.

**I agree to the above statement**

Yes

**Submission**

Dear Sir/Madam

Thank you for the opportunity to comment on the proposed legislative framework for regulating short-term rental accommodation (STRA) in NSW. Providing clarity for all stakeholders on the extent and nature of STRA that is permitted as exempt or complying development under the proposed State Environmental Planning Policy is supported. The following comments are provided for your consideration in finalising the legislation:

- STRA is proposed to be permitted for rural workers' dwellings - this seems inconsistent with the intention of this

land use.

- Clause 13(1)(d) requires the land to be bushfire prone in order to carry out complying development. This seems strange as it would exclude complying development on land that is not bushfire prone. It would make more sense for it to say that if the dwelling is located on bushfire prone land subclauses (e), (f), (g), and (h) apply.
- From a systems/register perspective Council has often found that with State Registers (e.g. Combustible Cladding, Swimming Pool Fencing, Companion Animals, Food) there is no ability for investigating officers to record complaints or manage compliance workflow from the State Register. This then requires Council's to keep their own separate registers and records. A more dynamic approach to State registers is considered necessary to efficiently and effectively implement the proposed legislation.

**Subject:** Re: Holiday rental regulations for NSW

Dear Minister,

We own a holiday property in regional Australia and as such, in some periods of the year, the short-term rental accommodation market is an important *occasional* supplemental revenue driver for our family as we near retirement. Outside of the holiday periods there is not that much revenue opportunity. Availability of good quality short term housing in areas such as ours support regional tourism which is really important for the local businesses and people who live there.

As a result, too much regulation and un-necessary additional costs should be avoided to ensure there is no excessive financial burden or work required on the property forced on us.

As responsible owners, we support the creation of a register of holiday rental properties however, We would oppose overly stringent night limits and excessive use restrictions for our property as this may potentially deprive us of income we may rely on in the future. As we have good fire protection in place already, which complies with domestic requirements, We would also advocate no more requirements other than domestic ones in class 1a buildings as this will drive cost into properties like ours which are not rented out a great deal. Maybe only additional requirements are forced on those who rent out properties for over 90 days per annum for example. Otherwise, trades will charge significant money in a short space of time for requirements over and above domestic purposes for properties who may only have 5 short term visitors in any one year. If additional requirements become necessary, then for those who only rent out for less than 90 days per annum should have 3 years in update any requirements in order to spread the additional cost of any upgrades required.

I hope that good sense can prevail in the case of occasional renting such that costs are not driven up for occasional rentals.

Thank you reading our submission.

Caz and Dave Boorman

Dear Minister, Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct.

However, I strongly oppose regulations which will significantly impact a very successful property we have had listed for over 3 years with 50+ five star reviews

It resides in a regional area and support a destination people go to often seeking large group accommodation...banning properties with more than 12 Beds ??? What about a 7 bedroom, 4 bathroom very large property ?

Maximum of 2 adults per bedroom ?? What about children.. and especially bunk beds which allow families to combine share a great experience and save money..

Restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on, remove unique high quality accommodation and lead to the visitors paying more, cost local employment and more.

Thank you reading my submission.

I have safely and successfully operated a home on the edge of the forest for 3 years, and now will be required to get an expensive DA just to continue operating the home for what it has been used for. I am worried that this process will expose me to NIMBY opposition. I would like to see the requirement for DA removed for Bushfire affected land.

Dear Minister,

Short-term rental accommodation is important for home owners and for holiday-makers. I am both so I see both sides. I support the creation of a register of all holiday rental properties listed on a platform and the code of conduct.

However, I strongly believe the following should be restricted:

- **number of bedrooms available in houses for short-term rentals.** I don't believe a house with 6 or more bedrooms should be rented out without any special permissions. A B&B has to apply for a permit, as does any other motel or similar. I have a house in a regional town in NSW in Smiths Lake which is a 3 bedroom house. Our neighbours have an 8 bedroom house that is available for holiday rental for 16 people 365 days of the year and is rented 95% of the time. The owners never stay there it is an investment property only, so they benefit financially to the detriment of neighbours who are mostly permanent residents. The idea of renting your private residence out for holiday rentals occasionally is fine but it should reflect normal residential usage. This is a 100% commercial use of a property in a residential area. The owners have no idea what it is to live next to a house with 16 people staying in it who are on holidays almost every night of the year. It's devastating. And, when we rent our 3 bedroom house out from time to time, we get complaints from our tenants about the house next door as it ruins their holiday.

- **number of nights per year a house can be rented for short-term rentals.** This should be restricted to a maximum of 180 nights per year. It is entirely greedy and selfish for owners to want short-term holiday rentals all year around. If they need income they can get long-term tenants. It's purely greed that argues for full year short-term rentals as people make more money than permanent tenants. With long-term tenants, they are part of the community and much more respectful. In our current situation, the property manager tells us to call her if there are issues and there are issues all the time as there are new tenants in every week and we have to go through the same process. It becomes our responsibility to manage the neighbours property - the owners are never there and have no idea what it's like to live in the area. Some people who argue for no maximum night restriction say it will stifle tourism. That's not true at all, if you have a limit of say 180 nights then all houses can be available in busy seasons such as Xmas, Easter etc. During the off-season there is a massive over supply of holiday houses and there aren't enough tourists to book all the available houses.

As a responsible home-owner, community member, and occasional renter of my house for short-term rentals, I think it is critical to find a way to minimise disturbance on local communities and residence while still giving people the option to rent out their house from time to time.

Yours sincerely,

Gabrielle Shaw

I am a 65 year old divorced woman that relies on short term rental as my main and only source of INCOME. To cut me back to 180 night cap would be devastating for my income, I would not survive. I really love hosting. I have worked hard all my life to set my self up to be self funded, not to rely on the old age pension.

If I am capped at 180 nights I would be forced to sell and live off the cash which will not long, I would have to apply for the old age pension which I do not want to as hosting not only supports my life but gives me a huge interest in life.

I do not want to be a burden on society in my golden years

My rental property is located in Greater Sydney so it is popular with tourists especially families that do not want hotel accommodation they want a home away from home experience.

I offer that void where hotels can not.

Please look after the small Aussie that's just trying to SURVIVE.

Kindest regards

Geraldine

**Subject:** Rental regulations for NSW

Dear Minister,

Home rental whether it be short, medium or long term is a right of home owners. It is becoming a necessity for many home owners to look at ways to generate income in order to pay the extraordinary amount of rates, taxes, utilities and other rising costs. Much of these costs relate to all levels of government grasping for ever increasing mounts of money from ordinary Australians to pay for their poor and inefficient government services and inadequate infrastructure. Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. Government placing restrictions on home owners renting their own properties will seriously erode governments own revenue base and damage an economic sector that is functioning with no real issues. There is no basis to impinge on the rights of Australian citizens and home owners who have made great sacrifices to pursue property ownership and who are the bedrock of the Australian economy.

There is no regulatory failure within the rental accommodation sector that warrants government intervention. The tiny proportion of trivial complaints about noise, parties, parking, smoke detectors etc, can and should, be dealt with under existing laws. These issues are not specific to short term accommodation they equally relate to longer term tenants and owner occupied dwellings. The only failure is that of local law enforcement who do not always respond quickly and effectively to complaints applying their existing manifold powers.

The NSW Government has many bigger problems to address such as infrastructure challenges and problems in the building and construction sector. The Government should put its resources and energy into these high priority issues and avoid risking damage to a sector that has adequate existing regulation and few problems.

**Subject:** Holiday rental regulations for NSW

Dear Minister

When our two boys grew up and left home, my wife and I began welcoming holiday makers and travellers for short term holiday lets in the self contained ground floor of our two story home.

That was almost 20 years ago, well before Airbnb and HomeAway and other big players entered the market. We now list on those two platforms, as well as welcoming many returning guests. Some come back regularly - the record is 15 visits!

After hundreds of hostings, we have had no complaints from neighbours, who are very supportive of our little enterprise. Many of them have used us at various times to accommodate friends and relatives.

We offer a niche service that does not compete with hotels, motels or resorts.

We contribute to the local economy and have always paid all due taxes and charges, complying with local authority regulations - eg dogs, fire regulations etc.

We understand that short term holiday rentals have caused and continue to cause problems in some areas, with some guests causing noise issues and possibly reducing long term rental availability for local residents and workers. In those areas, we fully support restrictions and regulations, best implemented locally.

Generally (state wide or even eventually nationally) we support "registration and regulation light". Any scheme should put a minimal cost and burden on owners, or they will simply leave the industry, leaving a big hole in local economies and choices for travellers and holidaymakers.

In our case, we are self funded retirees. We live on our superannuation, rent from another rental property, and our short term holiday let income. We do not draw a pension or any other government benefits. If any more than minimal regulations and additional costs were imposed by government, we would simply stop renting out part of our home and apply for an age pension.

Thank you for your attention to this submission.

Kind regards

Alan and Helen Pursch

Dear Minister and Stayz

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct but with restrictions. Here is why.

I believe that if both Stayz and Airbnb dig in too hard, it will polarise the situation becoming a lose lose for everyone. There is a workable middle ground. *(see attached detailed research and summary below)*

As an owner / Stays Airbnb host & guest (for over 20 years), the chairman of a 16 luxury unit complex at a popular Sydney beach, (and design thinking expert), listening to all sides of the argument to resolve this we first need to craft the **right question to which I believe is the following:**

**“how do we allow and respect people’s private homes (Principle Place of Residence- PPR) stemming from the initial idea of a ‘shared home idea’ and yet stop the abuse of by those that try to over commercialise it, (buying renting units for the sole purpose of renting it short term with no regard to the other owners. (who do not want to live in an unmanaged ‘hotel’ transient block of strangers 52 weeks of the year?)**

- "This is about getting the balance right to ensure that neighbours have certain rights and protections as well as providing for those people that choose to rent out their accommodation for a short period of time, ie whilst they are away on holidays"
- "People have right to 'respectfully' share own homes PPR." (OSR website states 200 days to count as PP)
- "Short-term letting of empty places (ie. which would otherwise be vacant) should be subject to "impact thresholds"
- "Airbnb hosts who temporarily let out their home during a holiday should be exempt from any ban
- "As a principal place of residence, the owner will likely be in residence for a majority of the time. While such a let would not be hosted, we believe that it will be of low impact. This is because the dwelling is a private home rather than an investment property. Therefore an owner in this scenario to a degree the problems will be self managed, and evaporate, as they will do all they can to look after it, ensuring the right holiday people stay there and they manage the whole process as its their home (as it is) so there is no conflict of interest with "profits&parties" V "responsible people"
- Units should not be allowed to be rented 'commercially', through models exercising short term holiday rental, (using Air BNb and the likes). 'Commercial' means the place's primary use is holiday short term rental, and or the place is managed by a third party / agent, and or the use of 'instant booking. Primary place means more than 45 days in a calendar year. Units cannot be sub rented from tenants to other tenants).
- Units however should be allowed to be used under the shared economy model (AirBNB, Stayz HouseSwaps, Home Exchange etc) for temporary, limited and private use, on a non commercial basis. This is defined as being: only directly through the owner in their own unit, which is their primary place of residency, and for no longer than a total of 90 days in a calendar year, All parties to be personally screened by the owner. The owners are the primary occupants of the unit for most of the year (9 months). The owners will arrange and have direct contact and responsibility of all visitors in their unit and strict enforceable rules and behaviours set out. All standard noise bylaws will still apply and if these are not adhered to the owner will be asked to cease. This needs to be approved by the OC based on track record of respecting the property to date.

Registration of all holiday rentals – We are supportive of compulsory and simple registration for all properties listed on a short-term rental accommodation platform. When implemented correctly in other parts of the world, the registration of holiday rentals has proven to be a low-cost and effective way of informing the development of sensible rules for our growing sector.

Day caps – We remain opposed to the proposed day limits in Sydney and regional areas. Day caps for holiday rentals not only put the economic uplift associated with the tourism sector at risk, but also fail to address the three most consistently cited concerns about the industry, namely; housing affordability, availability and the impact on amenity.

Making sure the new planning rules have the right coverage – We support a regulatory approach that provides the best balance of consumer safety, community amenity and the contribution of the sector to the economy. For the

NSW approach to work properly, it must treat all properties equally - whether hosted or unhosted, primary or secondary.

Exclusion of 21-day stays from applicable day cap – This proposal is inconsistent with other pieces of legislation, for example long-term rental is defined as an agreement lasting three-months or longer. We would rather that the government develop a clear definition of short-term rental accommodation and work from there.

Banning properties with 12 or more bedrooms – Given the small percentage of short-term rental properties that provided such an offering, this seems to be an arbitrary measure and we have requested more information about the case for this proposal.

If the Government is determined to implement this proposal, we believe the owners of properties that contain 12 or more bedrooms should have the power to apply to their local council for development approval to use their property as a short-term rental.

Limiting the number of guests allowed in a bedroom – We do not support this measure in its current form. This proposal is particularly problematic for people with close supervision needs, for example babies who sleep in cots, very young children who still sleep with their parents and people with special needs.

We are arguing for the current short-term rental code, which has worked well for eight years, to prevail on this matter. The current rules allow for two adults per bedroom, plus two for the household i.e. a two-bedroom property is allowed six people.

For properties that are specifically designed to cater for larger groups than what the above rule would allow, we believe that owners should have the power to apply to their local council for development approval to use their property as a short-term rental and cater a higher number of guests.

Dear Minister, Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

Additionally our property in a tourist destination is a purpose built apartment building for tourists. Limitations on our ability to rent it out all year round impacts our ability to own and maintain the property resulting an economic impact to us, limits guests ability to holiday when they want and potentially increases costs for holidaymakers and could reduce the value of properties.

Thanks

Dear Minister, Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry. As a result, regulation for our sector should avoid unnecessary burdens on our operations. As a responsible operator, I support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the smoke alarms requirements - the cost of installing all required smoke alarms and security lightning etc will be unaffordable for many owners and therefore you will deprive many holiday homeowners of income they have come to rely on. Maybe a requirement for normal smoke alarms in all rooms will be much better (to follow the requirements in normal long term rentals).

Kind regards

Dear Minister,

Short-term rental accommodation to allow self funded retirees an opportunity to make some extra money without having to need a government pension.

As a result, regulation for our rural sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As a self funded retiree, this is one of the few opportunities I have to continue to earn some income and not be dependent on government pensions. If you permit a reduction in day limits in regional areas, then I will need to rely on government funds for my survival.

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

I think the most critical change I strongly believe would fix the majority of issues continues to be overlooked. Renters in NSW list their rental properties, almost always without the owners permission and in breach of their residential lease agreements, to short term renters. If you actually got ahead of that and stopped that a lot of the issues would be immediately resolved.

Cathy Hoyle

Dear Minister,

*Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.*

*As a result, regulation for our sector should avoid unnecessary burdens on our operations.*

*As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.*

Our SMSF has a property in Liverpool NSW (which would be considered Sydney metro) that is fully furnished and is available full-time on Stayz for short-term accommodation.

It is mostly rented to people who are staying with relatives undergoing treatment at Liverpool Hospital, or to people coming from interstate to work in the local area, often on government and large infrastructure projects. They prefer to stay somewhere with space and a full kitchen that they can prepare proper meals in, and a laundry that they can wash clothing in.

If you restrict us to only being able to rent it out for 180days a year, where would those people stay for the other 185 days?

If you restrict us to only being able to rent it out for 180days a year, what do we do with the property for the other 185 days? We cannot live in it because it is owned by SMSF. If the answer is to rent it on a long term basis what do we do with the furniture in the meantime?

I am not sure what you would be trying to achieve by restricting us? This seems like another layer of unnecessary regulation.

In relation to strata properties being able to ban short-term holiday letting ... this is also unfair to landlords – as landlords we now CANNOT ban people having pets within our property (so our properties become smelly, flea-ridden and attract noise complaints) but we are not allowed to have people there who can only stay for a short time who are typically very well behaved because they will be reviewed at the end of their stay and they want a good rating. Again, this does not make any sense to me.

We support the responses and submissions made by Stayz/HomeAway.

Thank you,

Diana Oakes

Dear Madam/Sir,

I am a divorced retired 65 year old woman with one income.

This change will have an extremely negative impact on not only my life but my children and grandchildren that I help.

It will be a financial and mental disaster if I do not continue with short term rental which is my only SOURCE of INCOME.

I have worked hard all my life and set up my self funded retirement.

If I am unable to short term rent for the whole 12 months I will have no option but to sell and live off the cash which

will not last long and then I will be forced to apply for the old age pension which I do not want to do.  
Being a burden to society instead of being a benefit as in supplying housing for rent in the greater Sydney CBD.

Please do not take this away from us little people as we fill a void that hotel chains can not, we generate income for restaurants, taxi, buses, trains, Opal cards etc, etc.

Overseas families love what we provide

A very worried Aussie

Regards

Geraldine

I purchased my first home this year in a brand new block of units. The unit block has 20 apartments and is in a busy location near Newcastle.

Since the properties settled in February, 5 of the 20 apartments are now leased to a short term accommodation company, Astra Apartments. This company now subleases the apartments to the general public and the minimum is one night staying.

We raised concerns through our strata manager and sought legal advice. We also contacted local council as this type of business operations are not permitted under the buildings DA. We have had no course of redress identified.

In the meantime, we now have a rotating door of people coming and going in our property with full access to common areas and the underground parking. This includes renters and also cleaning staff who block our driveway and have no identification. We asked Astra to comply with our by-laws by providing 21 days notice of the changing of tenants however they have refused. We now have a situation where we do not know who is accessing our building and Astra are flouting the same by-laws that all other owners are complying with.

I am concerned that Astra will continue to lease more apartments in the building and that it will effectively become a hotel. I am also concerned about the security threat that this poses.

For the Greater Sydney Region , I think THE 180 days per annum Cap of Unhosted STHR is a reasonable number , and should remain , for all properties that are the principal residence of an owner , or one or more of the owners where there are joint owners.

THIS SHOULD NOT BE CHANGED , and any efforts to put the Cap at 60days as I have seen recently , are unnecessary , and going way too far the other way.

I also feel that the recent proposal to not count individual stays of greater than 21 days against the above Cap makes sense , as those types pf stays are not where the really short term problems are .

We have been renting out within the 180 days Cap for many years , through an Agency, and have had NOT A SINGLE

COMPLAINT FROM OUR OC , OR OTHER OWNERS, IN THAT WHOLE TIME.

As a holiday rental property manager of 35 properties in the Jervis Bay area I wish to make a few points:

1. The proposed maximum of 2 guests per bedroom is too restrictive and highly punitive. Many of our properties have tri-bunks or two sets of bunks in a room. The proposed changes do not take into account the size of property or of the size of rooms. Why should a hotel room be allowed to have 4 or 6 guests (in a single room) but a larger holiday home is restricted? A couple with a young baby cannot sleep in the same room as their child - this is ridiculous.
2. The requirements to meet bushfire regulations would be financially prohibitive to owners and would force many owners out of the industry. This would have a major impact on towns that rely on tourism. A more sensible option would be that STR's in bushfire areas must clearly disclose this in their advertising and have a bushfire evacuation

plan clearly displayed at the property.

3. Why would restrictions be placed on short-term accommodation providers and the same rules not placed on long-term rentals? - particularly with regard to fire safety.

4. We support having an industry that has professional standards and a clear framework in place in order to eliminate unprofessional operators

5. We hope that the process to add guests to an exclusion register is a straightforward one as currently guests that cause damage or issues at properties often escape punishment due to the protection of the booking platforms

6. The restriction of 180 nights on properties in the Blue Mountains would be extremely damaging to tourism in this area and should be abolished

7. The maximum number of guests set at 12 is too low. This will force properties out of business, particularly those catering for events. We have a property that has 7 bedrooms and sleeps 28 guests that would be forced out of business.

8. We believe that properties that are a specific distance from others e.g. 0.5km should be exempt due to their being no possibility of noise

9. Property managers should be supported throughout the changeover process by a designated government body including free legal advice on the changes and a specific account manager that we can receive support from

10. The changes should be supported by significant investment in technology in order to reduce manual processes (e.g. guest exclusion register portal)

Please feel free to contact me should you require further input.

For the past 15 years my husband and I have been the owner/operators of a small accommodation business consisting of 3 holiday cottages on a rural property.

When we built we were required to apply for a DA with strict conditions about building structure and safety, guest amenities and guest safety. We are required to continue to meet these standards, as we should be. We have smoke alarms, fire extinguishers and fire blankets in all kitchens, set number of guests we can accommodate, entry doors openable from the inside without a key, an evacuation plan and a public liability policy for paying guests at a \$20 million level. We also pay GST and all taxes on our earnings as well as being possibly liable for capital gains tax.

We now find our selves in competition with others who are not required to meet these standards. It's not a level paying field. We are listed on Airbnb and get bookings from them. We have to be because that's where people look

these days. But Airbnb keep trying to get us to lower our prices to compete with others who have supposedly similar accommodation. We find it interesting that their recommended price for our 2 bedroom cottage with garden spa bath is much less than for our lesser option.

Since the development of Airbnb we are struggling to survive.

I write as an owner occupier of a strata apartment. We bought our home with the understanding that all apartments are occupied by owners or lessees with a minimum 6 months lease. Now you want to change the zonings to allow people to rent out their apartments by the night for up to half of each year. I don't think this is fair to owners in strata buildings who do not wish to have short term letting in their buildings. I think that the strata committees should have the right to restrict short term letting if the majority of owners vote accordingly. We are responsible for the management and maintenance of our buildings and should not have to deal with added wear and tear expense and anti social behaviour of un-screened short tenants.

I don't think you can make one law to cover all types of housing in NSW and short term letting may be suitable and acceptable in some areas or building types but I definitely do not think it should be mandatory in strata buildings if the majority of owners do not wish to allow it.

Please consider that apartment owners should have the right to a peaceful home and also to abide by By Laws which have been formulated and approved by owners. That should include the right to determine whether Short Term letting is accepted in their Stata Building.

Att: Director, Housing and Infrastructure Policy  
NSW Department of Planning, Industry and Environment

Estimated public servants, I have these concerns and feedback related to the last draft about the regulation of short term accommodation

1- I can see that studio apartments are not considered in a different way. We have many studios apartments used for short accommodation in Potts Point, Elizabeth Bay, Rushcutters Bay and Darlinghurst in NSW. If the idea is avoid party-guests . It is very difficult to do a party in a 20-40 sqm unit. These apartments should be treated as on-site-host. The definition of studio to be aligned with the spirit of the law should be linked to unit size.

In the same line of thinking all the fire safety requirement does not make sense ask for them for studios since important is that the building meet the safety rules. A fire extinguisher takes a lot of space in a studio apartment

and also does not make sense if it is only 5 meters out your door

2- My second enquiry is better understanding of the 180 period. It means that I can host anytime through the year and stop when I reach a 180 days occupancy. Or, it means that I am able to rent for example from January 1st to July 30th independent if I am successful or not to get full bookings for that period. I much believe has to be based in total 180 days through the year.

Finally I have to say that I have seen the short accommodation brings very good outcomes for small-working class - residential areas. In these areas host trend to do renovations , care more about the aesthetic of the building inside and outside. The guest are usually with better manners and more respectful than average residents. With a final outcome of better living for all the building residents. With expensive units maybe is the different. Guest may use more the social areas, care less than residents, try to get more for their money ( since they pay high accommodation fees) inviting friends over, doing parties, usually they can guest more than 2 people ... I do not see that the current draft acknowledge and tackle this situation properly

Best regards,  
Cesar Moreno  
Australian Citizen

To whom it may concern;

I have owned between 2 to 3 apartments since 1994 at One Darling apartment block at 50 Murray Street Pyrmont. The building was managed by Accor and was called the Grand Mercure Darling Harbour Apartments. It was managed by Accor for some 17 years, ending in 2010. As an owner investor we privately short term let one of our apartments and the other two we short term let through Accor. After Accor finished their management of the building, the body corp voted to adopt a special by law to stop short term letting. The remaining owners who short term let their apartments, sought legal advice and asked for this special by law to be repealed or invalidated. They took their case to be heard at the Consumer Trader and Tenancy Tribunal Strata and community Schemes division on the 30th of September 2011.

The Strata Schemes Adjudicated ruled in favour of the owners who short term let their apartments and repealed the special by law and ruled it invalid.

Many owners of private apartments have short term let their apartments in this building for over 26 years for 365

days per year and the ability to short term let, has always been part of the reason they purchased in the first place. How will your new rules effect these owners especially your 180 day maximum for short term letting in the Sydney area. We hope it is not your intension to remove their existing rights. One would think if a building was built for short term letting in a tourism precinct in 1993 these rights would continue to be maintained.

My background is 40 years experience in hospitality and I have served on many industry and Government boards including Tourism Commissioner 1992 to 1996 for the NSW Government.

I agree with having a code of conduct and fire safety standards provided they are operated correctly and fairly. Short term letting or holiday letting is not new and has been part of the tourism industry as far back as I can remember.

I look forward to your feedback.

Yours sincerely

Bruce Campbell F.A.I.M

Good morning, I am an 80 yr. old pensioner who lives in a one bedroom unit and I do ABNB. Most Owners are particular abt. who is renting their property hence no party people wanted.

The tourists are a bonus for our economy

I am able to supplement my pension with this extra cash and that makes a huge difference to my living standard. If this changes I will be forced to rent .

There is another person in my building doing abnb and we have had no complaints.

I see no reason to change what is a help to the people that need it, pensioners.

G. Stevenson

I own an apartment unit within the One Darling Harbour building which was historically a short term stay serviced apartment and had been used as such since the 90s. Purchasing this unit was a decision predicate on the nature of this building to be able to generate income for me if I were to not live there.

As the land on which this building sits is state-owned and this is essentially lease-hold property, measures made to curtail the viability of the building as a short term rental unit would grossly impact the capital value of this property.

I feel that the nature of the building should be taken into account before making sweeping generalizations. I do understand that perhaps newer developments not built with the commercial intent in mind should be controlled.

On that note, I feel that allowances be made in regards to certain older buildings that may have been built with specific short term purposes in mind.

Strata should be have the ability to make their building impervious to short term rentals with a 75% vote at an AGM or EGM.

We have purchased in a secure building that requires FOB's to get into any of the facilities, car parks and separate floors.

These units were purchased with this level of security in mind.

Short term rentals will totally void this security and the feel of safety within our area.

**Subject:** Re: Proposed regulations for Holiday rental in NSW

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

**Categories:** Purple category, sent

Dear Minister,

Regarding the proposed changes to the Short-term rental accommodation sector, I would like to convey my thoughts to you please.

As an owner of a holiday rental unit in Forster and a service apartment in Port Macquarie, I would like to think that not only am I a contributor to the tourism sector, the economic growth of NSW but also an employer of services contractors in NSW.

I do think that some regulation in the sector is necessary but please be careful in over regulating the industry by capturing all operators under the one umbrella. As you can appreciate the industry is diverse and ranges from the professional manager who looks after hotels motels, caravan parks and even serviced apartments (as is the case with my property in Port Macquarie), right through to the lower end where individuals (Mum & Dad investors) offer vacation rentals (as I do in Forster). I know from my own experience the operating of these is vastly different.

To put all of these into the one bucket would result in over regulation for our sector and make it untenable in many ways for smaller operators like myself (with regards to my Forster property), who offer modest accommodation, based on traditional family holiday experiences.

When I was growing up my parents used to take myself and my brothers on driving holidays around NSW. Sometimes we travel North, sometimes West and other times South. Dad would pack up the Holden; Mum would make cordial and sandwiches for the drive; and my brothers and I would constantly get elbows in the ribs as we sat on the vinyl seats for the next 6 to 8 hours to our destination. We would finally get to our destination, which Mum & Dad found in the NRMA Holiday guide, and make ourselves at home for the next 7 days having a terrific family holiday. It was the best of times in a time when families had much less disposable income.

It is based on these experiences that lead me to decide to buy a Holiday Unit in Forster. In some way I felt I owed it to others to have the opportunity to enjoy what I did as a youngster in the 70's & 80's. A comfortable unit, in a sleepy seaside town, where families could spend time together doing family things.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many small holiday homeowners like myself the income needed to make the property pay for itself. In fact, what it will do is destroy the simple holiday home rental market, as only the larger serviced apartment complexes, motels and hotels will be able to survive as they will have multiple rooms and scale, to offset the increased overhead and restrictions.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should ensure that any regulatory framework is diverse enough that it segregates the individually owned and operated properties from those that are centrally managed. There is no way Minister that my property in Forster should fall under the same regulatory framework applied to Wyndham Ramada or Best Western. If I am forced to, then the dream I have for others to experience the best family holidays in NSW will die and I will be forced to stop offering my unit to holiday renters. What that will do is drive the tourist to book into the larger complexes, who are mostly owned and operated by Trusts or companies who are Head Quartered overseas.

I fully appreciate we need to make sure the tourist and traveller have a minimum standard to expect, and hence why I support the Code of Conduct and registration.

It is really simple Minister, you need to have two frameworks, one for properties owned or managed by companies or trusts, and one framework for properties that are owned and operated by individuals. The former need to abide by a tough regulatory framework with all the bells and whistles (it is what I expect I would do in my Port Macquarie property), while the latter has a more lenient and practical framework which they must also abide to, while giving them opportunity and encouragement to aspire to a higher level, without taking away their simple offering.

Thank you for reading my submission and best of luck navigating through this tricky situation. If ever you decide you want to take the family for a traditional family holiday, let me know - my unit will be available to you.

Best regards

David Mifsud

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

**As a result, regulation for our sector should avoid unnecessary burdens on our operations.**

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

Sincerely yours,

Elizabeth Escandor  
Proprietor  
Becol Investments

I do not believe that the same rules should be applied to holiday homes that are being considered for apartments and room sharing in strata properties in the city. I wish to point out that Short Term Accommodation is not limited to holiday letting but provides a significantly broader service to other members of the community, particularly in regional NSW.

We operate a Short Term Accommodation Business in Wagga Wagga and have done so for the past fifteen years.

Because of our location only a small percentage of our clients are holiday makers. Our clientele includes

Nurses and other health professionals on short term contracts at local hospitals (stays of 4 to 6 weeks)

Emergency housing requirements of FACS and other disability support providers. At present three of our houses are occupied by a disabled client and carer from a couple of days to an extended period of over a year. They are not on a fixed term lease and can depart at any time (e.g. when a foster home can be found for the client)

Patients and/or their families coming to Wagga for medical treatment at either of the hospitals

Defence force personnel and their families relocating to or from the local defence force bases

Researchers and other academic staff plus distance education students attending CSU

Tradesmen coming to Wagga for work projects requiring stays of more than a week.

Our accommodation consists of a home unit, a villa and three and four bedroom homes.

The only alternative to the type of accommodation we provide are motels or hotels. These are architecturally and /or socially unsuited to the type of clients listed above. Disabled people can't get easy access, for example, children awaiting foster care placement need back yards and lawns and more than one room for maybe up to 2 care workers.

Short-Term-Rental is a key part of the visitor and tourist economy of regional cities and towns. If some of the proposed options are put in place, it could be too burdensome to rent out homes on a short term basis.. If this happens then jobs will be lost and the economy will be starved of much needed income in regional New South Wales.

I urge you to treat holiday homes differently to other short term rental and listen to the voices and concerns of homeowners.

Re: Short-term Rental Accommodation (STRA) regulatory framework.

My submission concerns Strata Schemes being able to adopt by-laws totally prohibiting STRA.

I have lived at Grandview Apartments, Strata Plan 61694 since January 2000. The original Grandview Owners Corporation unanimously approved by-laws prohibiting short term rentals with a requirement that any lease or tenancy agreement must be for a minimum period of 90 days. I stress the by-laws were unanimously approved by the lot owners and any new lot owner has purchased their property based on these by-laws.

The majority of lot owners in Grandview are retired and have purchased their apartments due to the quiet and peaceful environment and based on the extensive bylaws protecting lot owners' rights. These by-laws cover issues such as parking, fire and emergency plans, smoke alarms, use of common areas, storage, building works, use of the pool and gym, smoking, use of lifts, security, noise, sorting rubbish, deliveries, mail, laundry items on balconies, permitted use, children in common areas, lease of lots in the strata scheme, to name a view. Grandview's by-laws cover some 50 pages.

How can an owner's corporation ensure compliance and policing of strata plan by-laws, by short term rental tenants? Any by-law change requires a minimum 75% of lot owners votes and surely this should be a matter for individual Owners Corporations. Strata Schemes should be able adopt a by-law that totally prohibits STRA whether or not, a lot is not a host's principal place of residence.

Why are the NSW Department of Planning, Industry and Environment and Department of Customer Service dictating the wording of by-laws concerning STRA when there is already an extensive Strata Schemes Management Act 2015 covering the management and control of Strata Schemes? Surely this should be the right of individual Owners Corporations to decide if they want to prohibit STRA in their buildings?

Councils reiterated the importance of an enforceable planning framework aligned with the Code of Conduct. How will breaches of the code be policed? Councils currently cannot provide sufficient enforcement officers to police noise legislation. The office of Fair Trading does not currently have sufficient staff to police this.

Lot Owners of Strata Plans should be able to enjoy the piece and quiet of their existing strata environments without being subjected to STRA.

Dear Sirs/Mesdames

RE Short Term Rental Accommodation Reforms

Lessons can be learned from areas here and abroad that are overwhelmed and devalued by unlimited hoards of tourists, and tragedies that have resulted.

For instance, Iceland, which has become a popular tourist destination, is currently considering caps on tourist numbers to conserve the very qualities that the tourists wish to experience, and to maintain a quality of life for its citizens who are calling on their government for relief from the tourism influx. Last year In Greece tourists were killed while fleeing along unfamiliar roads during bushfires.

In deciding caps on numbers of rental accommodation in any area in NSW the following factors are important:

\* the nature of the area. Biodiverse areas, where the natural qualities are the tourism draw card, need to have less traffic and less tourist accommodation (short term rental accommodation) in order to preserve the safety of the wildlife and the environment. Natural areas need to be preserved for wildlife to move unimpeded and quietly through the landscape.

\* the ratio of tourist accommodation to permanent accommodation in any rural area is vital for safety. Where tourist accommodation outnumbers the permanent residents' accommodation there will be less fire fighting volunteers in the event of bushfire, so more probability of tragedy, especially with large numbers of people unfamiliar with the country roads and without personal fire plans. Caps on numbers of rental accommodation need to be imposed to maintain safety of residents and of the tourists. The bushfire tragedy of trapped tourists in Greece last year could very easily be replicated in rural tourism areas here.

\* the amenity of permanent residents in any area should be considered especially as tourists in rental accommodation in the country are unaware of how far sound travels in country areas, especially in valleys which act as amphitheatres. Often the rental accommodation will be used for loud parties which disturbs not only neighbours in small towns but also in rural areas.

Please consider allowing councils to set caps on the numbers and locations of short term rental accommodation based on these considerations.

Yours Sincerely

Clarissa Watson

POTTS POINT

**Submission**

I encourage law makers to remember that many of us middle-Australians need freedom and fairness. I live in a block of units where an over-zealous, ill-considered and blanket rule against having paying guests was slapped down with no care or consideration as to why some of us HAVE to do it from time to time to get by.

As an owner of an apartment, I want the freedom to rent my spare room when I want, or my entire place when I go away. It is unfair that a small number of self-interested members of the Strata Committee can decide how I use my own home (or a Government).

It is also unreasonable that as an owner of an apartment, my rights are less than someone who has a free-standing home - we become a second, lesser asset holder than those with houses. All the old people on the Strata Committee and who have time to vote and rabble rouse while the rest of us work 5-6 days and scrape to get by, don't care about us younger and middle aged people who pay an enormous amount (far greater % of income than they ever did) to buy (or rent) our homes.

We need to be able to honour our enormous mortgages (or rent) during times of unemployment or other periods of low income. We are considerate neighbours and make sure that our guests (paying or not) are as well. We need freedom to use our own home, within our own walls, as we see fit.

There are plenty of Laws to prevent bad neighbours already. Why limit us? For every bad Short Term Let home, there is an equally bad permanent resident who parties too loud, is rude to neighbours etc.

**Submission**

Hello,

I am the owner of The Holidays Collection and South Coast Holidays. We manage a combined 250 properties from Kiama to Jervis Bay, and in the Southern Highlands. My key comments are as follows:

1. restricting a property to 12 guests is unfair. We have numerous properties that sleep 14 or 16 or 19 that NEVER have any problem guests or issues that affect neighbours (some are acreage properties). 12 seems to be a very

arbitrary number and would disadvantage many property owners unfairly

2. we like the system of a black list register for guests and properties but in this day and age of INSTANT BOOKING, the system will only work if Airbnb, Homeaway, TripAdvisor, Booking.com etc are forced to integrate their systems in real time to check a guest or property at the time of booking. Forget about agents or homeowners looking up on a separate register! That will not work and is an outmoded solution. It has to be integrated / instant / real time

3. how will you get around a rogue guest booking in another name or via a friend? Rogue guests will be able to evade the system, but a property owner will be black listed for 5 years

4. what if a property sells or changes management company, or is refurbished and repriced? Can the 5 year ban be lifted. A house often attracts the wrong guests if it is in poor condition or cheap

5. the appeal process for a home owner must be very clearly set out. You will open the door for very vindictive owners using the 5 year black list register to unfairly target neighbours who they don't like. I could give you examples of where some neighbours have heard about this legislation and are already doing what they can to nit pick over any issue that will build a case to attempt to have their neighbour's property alienated. And many of my owners will not sit back and take that - they will use every legal right possible to protect their property rights / investment income. I think you are grossly under estimating how many vindictive actions will spring up

Regards, Craig McIntosh

Having stayed in two short stay accommodations since arriving in Australia last month, I'd say there are a few big issues to clean up:

1. Right to privacy. The guy who owned the block we were in (4 apartments used solely for short lets), decided he wanted to sell and gave us less than 24 hours to tidy up so an agent could take photos. He then had a real estate agent send us a viewings schedule for twice per week during our three week stay. That just isn't reasonable.

2. Right to security. The code for the front door is set to the address of the flat. 352, as we're at flat 3, 52 xxx Street. Guess what the code is for the other four flats... Not only that, but the 'front door' is actually an inner glass panelled door, ie not secure and certainly not a fire door.

3. Unreasonable check in requirements. Both accommodations demanded we email them a copy of our passport and credit card and wouldn't give us the access code without it. You just don't send that kind of data over email, it isn't secure. But you don't know they're going to ask for that until you've booked and paid, non-refundable. The card particularly grated as they'd already taken payment via booking.com. Neither company has a privacy policy so who knows what they're doing with my stuff, probably selling it to [www.stealyouridentity.ru](http://www.stealyouridentity.ru)!

4. A clear definition of 'serviced apartment'. I've seen some pretty thin 'service.'

5. Someone to contact on the ground, including out of hours. Not a voicemail in Queensland or an office who don't answer after 5pm if there's an urgent problem!

Both of these accommodations were in the Eastern Suburbs and well over \$200 per night.

**I agree to the above statement**

Yes

Dear Minister,

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

Kind regards  
Anthony

My name is Chris Fozard, and I am responding on behalf of the Budget Motel Chain.

- Regulations for 'Short-Term Rentals' (STRs) should be the same as any other accommodation provider.
- 'STRs' should have to be registered with their local council, pay an annual fee and be inspected yearly by the health inspectors to retain their registration and follow the same rules and laws that apply to any other accommodation provider.

- 'STRs' should have to obtain the same insurance as any other accommodation provider, not just domestic insurance. (The potential implications here for the insurance industry, and their fees, is obvious).
- 'STRs' should have to follow the same fire regulations as any other accommodation provider, in accordance with council, health and state building regulations.

The 'standard accommodation providers, Hotels, Motels, Motor Inns, Caravan Parks, Cabin Parks, Hostels, etc. all have to follow a strict set of laws to ensure the health and safety of the people they accommodate. By allowing 'STRs' to run, unchecked, can risks the lives of those who stay at one of these houses. There are so many reasons that can be argued as to why 'STRs' should be stringently regulated, but protecting the lives of those who stay at these unregulated properties is number one

Kind Regards

Dear Minister,

The idea of restricting only two people to a room seems very unnecessary. Families often have more than two children who like to stay in the same room. Some of my best childhood memories are of holidays where I was able to 'bunk' in with friends, cousins and the like. To try and put in place restrictions on this would be absolute kill joy, have no impact on the safety, lead to a loss of revenue for tourism as a whole - Australians will just go abroad for holidays and fewer foreigners will come to Australia where they dont have to holiday under a nanny state - what is wrong with us??? A more appropriate measure might be to only allow the number of people to sleep in rooms for the number of beds that are available.

Regards  
David Berry

When will the Politicians ever learn always acting after the event heads in the sand over and over .  
Airbnb and holiday homes and apartments can be death traps. The majority of these places have been built to a very poor standard and have avoided proper building procedures. No smoke detectors or detectors out of date ;Electrical wiring illegally installed no safety switches etc , unsafe balconies, Unfenced pools .I have even seen a tent advertised on Airbnb. Personally I would like to see Airbnb banned they have no comeback ,take no responsibility . Every home that is let for short stays should have a up to date building inspection,pool inspection,electrical contracting company inspection and fire brigade inspection this should be carried out at intervals throughout lifetime at least every 5

years .  
Thank you

Having to reside in close proximity to short term rental accommodation and Airb&b's I and my neighbours have suffered from continual partying and drunken brawls at all hours as well as the coming going of noisy guests night and day!

Also the build up of rubbish left by short-term let guests in side and back lanes that emit strong smells are at times unbearable!

There is frequently rubbish stacked in bags and cardboard boxes and left on the curb which collectors are not obliged to pick up unless placed in garbage bins and this entices vermin!

Whilst all this goes on there is never a host/manager in sight and I think that permanent residents that reside near these short term lets be given the genuine names and phone numbers of the owners and managers so we can

directly contact them if we have complaints!

We at times contact the police but because they may be under staffed or busy they can't always respond rapidly!

**I agree to the above statement**

Short-term rental accommodation is an important driver of economic growth and job creation for the NSW tourism industry.

As a result, regulation for our sector should avoid unnecessary burdens on our operations.

As a responsible operator, I strongly support the creation of a register of all holiday rental properties listed on a platform and the code of conduct. However, I oppose the night limits and use restrictions for our properties – restrictions of this kind will put an important holiday tradition at risk and deprive many holiday homeowners of income they have come to rely on.

As holiday rentals like mine become more important to the tourism economy, it's my strong belief the NSW Government should build a regulatory solution that ensures the sector can reach its economic potential.

Thank you reading my submission.

I provide a wheelie bin service for holiday rentals. We make sure bins are emptied on scheduled council collections and that bins are kept clean and in good order. We also handle any excess rubbish and contamination issues. Its a service that property owners use because they care about keeping their property in order and about providing a quality experience for their guests. I employ six people (1 full time, 5 casual). My business is 99% reliant on the holiday rental market in Byron Bay. I sternly object to the suggestion of a CAP to the amount of days owners will be permitted to rent as this will have a dramatic effect on my business and on the lives of those I employ. Thank you for the opportunity to make this submission and for taking it into consideration.

I wish to submit my opposition to any short term rentals in residential occupied apartment buildings. Any term under 6 months should not be allowed. This is to protect permanent residents or owner occupiers from people taking somewhere for a week/ overnight/ and partying in the apartment to the distress of owner occupiers who have to go to work the next day. Hotels/ motels are available for overnight or short term stays.

The problem with Short Stay rentals with absent owners, is that the renters may disturb the other residents. They may also increase the risk profile of the building and jeopardise insurance, and add to the cost of premiums.

The fact that renters conduct might breach the Strata By laws is of no assistance, as the enforcement procedures are so cumbersome and complex and time consuming that enforcement is generally not possible without expensive legal advice. There may well be a right, but for all practical purposes, it is a right without a remedy.

Short term rentals are a business, conducted in residential properties. There needs to be proper and well resourced licensing and monitoring and enforcement-which will never happen.
