Submission: I am very concerned about the siting of Sydneys second airport being at Badgerys Creek in the Western Sydney Basin. One of my fears is based on the close vicinity to Sydney's main water supply at Warragamba Dam. In the case of jet fuel leakage, from overspill or an aeroplane accident, contamination is paramount. Any fuel leakage could affect the Dam water or one of the many Rivulets. Another of my concerns is based on the Health and Safety of the ever increasing population being extended to the Greater Western Sydney Area. I would like it noted that it is more important to look after people than to make money. I fear that the way this wonderful Country of ours is being Governed, is not in the best interests of its People. There is way too much emphasise on apartment living, overseas lifestyles and money making.
