Submission: I am not going to waste my time taking this seriously. There is hardly a serious interest in what we citizens think, as your so-called information sessions with the airport revealed. My understanding is that this Monstrosity is being built to accommodate the airport at Badgery's Creek, WS Airport. As a teacher and mother, I am convinced that a metropolis being built solely due to an International freight airport will bring nothing but more traffic and more pollution. You might think it will be great, but we will be the ones who pay the cost of this bi-partisan fetish with development and infrastructure. We all know that it is the locals who will suffer and the big businesses who will thrive. Workers and citizens from developing countries will be encouraged to come here to build and man the airport and take advantage of jobs in dirty industry that will surround it and will think the conditions are great - because for them, they will be. For us, this is a loss. If this development is so great - why wait for a pollution-spewing airport to make it?
