Submission: Hello I live in Bringelly with Mum and Dad and we are devastated that this has happened to our property and our neighbours. We understand that some of our property is 1in100 flood and I would of thought that the Government would of acquired this section as it is harder to build on that section due to the building restrictions but to find out that you would like to put it under a new zoning of Environmental/Recreational for the Aerotropolis which to date has been undefined. We understand and accept that another Airport is coming and were quite thrilled that we would be down the road from this huge development until this was exposed, but what we are upset about is since these maps have been released the depressed state my parents are in not knowing where their future lies. We cannot understand the thinking behind playing with people's lives as this was my mum and dads future pension and super and you placing them in the new zone and not acquiring this land with now be worthless land, how is this possible in this country? And how is this fair? If the government needs green space/environmental space it must be acquired so that they can move on with their lives. Why is the government not using the Rossmore/Grange 200 acres firstly which is currently zoned RE1 and that is owned by Liverpool Council for their open space or green space? Any land required for open spaces/Environment/Recreational/Green spine SHOULD be zoned RE1 and ACQUIRED. Please do the right thing with our parents as this means they cannot help us in the future of purchasing any property in Australia. They worked hard all their lives for this investment and to devalue it with a E-Zoning is just not right, how is it that my mum and dad are being treated differently to their neighbours from Thompson Creek who are being acquired by the Government? Any land you require for open space should be acquired and then zoned to what you want as it would happen in any other development in NSW> THankyou
