Submission: I am a resident of the which has now been confirmed that Governments are trying to make this in a E-zoning greenspine at the cost of landowners. How is it fair from governments to place a E-zone on our properties when we have good developable land? How is it that in the greenspine you are acquiring properties with the same zoned land but want to leave some in existing land rights? If you need Environmental/Recreational space than the fair thing to do it BUY it. why it it that you are trying to leave us under private ownership to achieve more land and not acquire us, we do not agree on re-zoning our land Environmental/Recreational and leaving it under private ownership to achieve more Greenspace at the expense of land owners. Why is it that State Government is using old flood maps from 2004 when clearly the area has changed and water flow has changed. Why is it that Rossmore grange which is approximately 200 acres currently zoned RE1 not being used for open space? Being owned by Liverpool Council, surely this land should be used first for any Green space/ Recreational/ Environmental that is required. Why are Governments acquiring some properties in the spine and not others? how can you say this is fair? this is unjust!
