Submission: My name is Poppy, I am a resident in [REDACTED], we are opposing the future plans for the rezoning of our land, we have lived on our property for the last 30 years and never had a flooding problem so I cannot understand this proposal of the SCP and do not agree on rezoning the land Environmental/recreational and leaving it under private ownership, if you need recreational green space the fair treatment would be acquire it. Why isn't the Government bodies using Liverpool Council land that is in the Grange (200acres) before placing any green zone on residents? Why hasn't Department of planning been truthful with the new zone they want to implement on us and saying we have existing land rights when we have been told we cannot do the same things on that part of the land as today? Why are Thompson Creek residents being acquired when they sit doors away from SCP residents that are not being acquired and they sit on the same zone land today RU4? Why haven't Governments done a new flood study before zoning as we all know the flood maps are over 16 years old and we know that mitigation has changed the flow of the water? We know for a fact that Governments need green space/environmental space or recreational space so why are they not acquiring what they need as done in every other development in NSW? How can governments justify environmental zone on our properties when fact is that their is no environmental significance in this area? This has caused myself and family so much stress that we at a wits ends in not knowing our future with this land, how can I help my children for future investments when clearly you are trying to rip us off. Please acquire our lands so we may move on to our retirement. Thank you
