Submission: We have been living in [REDACTED] for a farm type life, I am raising [REDACTED] young children which we thought would be a beautiful upbringing. We cannot tell you the stress that living around these suburbs at the moment as the trucks, the air quality, the traffic, it truly is horrendous, how are residents suppose to put up with this? Understand we are not against progress for a future airport but are gutted that some are in first stage and some are not. We now find ourselves in the middle of a huge development of our surroundings through the construction of a 24/7 airport. We realise that infrastructure and industrial progress is a must for modern society and we not oppose this but what we do oppose is living through this hell. How can residents be put through living on these dangerous roads that have killed many innocent people and the amount of traffic from trucks and many more residents. Why have governments not put us in the first precinct release and released us of this stress. Why haven't Governments done a new flood study before zoning as we all know the flood maps are over 16 years old and we know that mitigation has changed the flow of the water? We know for a fact that Governments need green space/environmental space or recreational space so why are they not acquiring what they need as done in every other development in NSW? How can governments justify environmental zone on our properties when fact is that there is no environmental significance in this area? If land is needed for any type of recreational/environmental open space, simply Buy it!
