Submission: Hi My family have been living in [REDACTED], we have had a wonderful life living on our farm until the [REDACTED] airport was announced. We cannot tell you the stress this has caused our family and our future plans for our retirement. we have been advised that an Ezone will apply to the SCP which we are affected in. Why isn't the Government bodies using Liverpool Council land that is in the Grange (200acres) before placing any green zone on residents? Why are Thompson Creek residents being acquired when they sit doors away from SCP residents that are not being acquired and they sit on the same zone land today RU4? Why haven't Governments done a new flood study before zoning as we all know the flood maps are over 16 years old and we know that mitigation has changed the flow of the water? We know for a fact that Governments need green space/environmental space or recreational space so why are they not acquiring what they need as done in every other development in NSW? How can governments justify environmental zone on our properties when fact is that their is no environmental significance in this area? If land is needed for any type of recreational/environmental open space, simply Buy it!
