

For the attention of: The Committee of Western
 Sydney Planning Partnership

I am a resident of Badgerys Creek and have called Badgerys Creek my home for over 40 years. This is prior to an elected government announcing a second airport for Sydney. Over the years, I have seen Badgerys Creek go through changes, solitude and stagnant momentum. It has been a long and unsettling time for the residents of Badgerys Creek that have remained. Finally, a decision was made that Sydney's second airport will go ahead. I welcome the proposed Western Sydney International Airport and, therefore, am also pleased for the Badgerys Creek precinct. I would like to see that the Flexible Employment - Enterprise Zone remains through the planning processes to the gazettment of land in the Badgerys Creek precinct.

My issues/recommendations for the proposed Western Sydney Aerotropolis Plan drafted for public comment dated December 2019 are:

- Confirmation is required if Lawson Road will remain within the Badgerys Creek precinct. I was advised by the NSW Department of Planning at the community consultation in Bringelly on 31st January 2020 that there was no confirmation that Lawson Road will remain. However, at a further community consultation in Bringelly on 19th February 2020 I addressed the same question to an employee of Western Sydney Airport and they confirmed that Lawson Road will remain. I understand at this stage, Lawson Road is a local road governed by Liverpool Council. I am requesting transparency on the status of Lawson Road. Furthermore, I would like to suggest for heritage reasons the name of the road remains as Lawson Road.
- The Water Complex Site on Lawson Road is on Federal Government land, has there been consideration or will there be a change in the consent authority for Lawson Road?
- I recommend and seek continued community transparency with the Federal and State Government departments with the proposal of the Western Sydney Airport to all residents in the Badgerys Creek precinct area.
- Finally, I would like to recommend that the NSW Government consider acquiring or compensating land use rights for those in the Environment and Recreating Zone.
