Submission:

I live on a [REDACTED] property when we purchased this both my sons were living at home, they enjoyed the wide-open spaces and the freedom to roam going fishing down the creek, horse riding as we were able to own a horse having the property. A lot of our family life has been spent outside entertaining having friends over for BBQ.

My husband runs a transport business from this property as does our son. He is a wall and floor tiler storing all his material and equipment on the property as well.

While I do agree that the airport will be great for all it will come at a cost for my family at the moment I am so stressed it's keeping me awake at night with the government trying to zone our land Environmental & recreational and now I am also finding we will come under the flight path meaning the aircraft noise levels will be above 25 – 35 ANEC meaning we will not be able to live here.

I do not agree with the zoning that is trying to be passed if it should be zoned environmental & recreational then I believe the government should acquire the land prior to the opening of the first runway in 2026 and the land should be bought for a fair and reasonable price for its best use.

At this stage in our life we need to know what's happening as we are coming up to retirement if we need to move on it needs to be sooner rather than later like most of my neighbours.
