**Re.: PROPOSED AMENDMENT TO SEPP (PENRITH LAKES) 1989**

On behalf of the Penrith Valley Chamber of Commerce ("the Chamber"), I write in regard to the above proposed amendment.

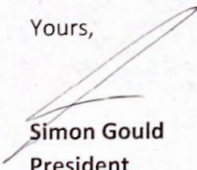

The mission of the Chamber is '*To promote and support free enterprise, trade and commerce for the benefit of all.*'

With this end in mind, the Chamber is supportive of those projects that contribute to our local community insofar as they:

- create and sustain local employment,
- directly and/or indirectly stimulate investment in the local economy,
- enhance the development and maintenance of necessary local infrastructure, AND
- do not adversely impact the social and environmental needs and expectations of the business and broader community.

While we are not in a position to review the complete information relating to the specific amendment presented, on the basis of the information that is available to us, we are of the view that it has sufficient merit to warrant further consideration.

Yours,

  
Simon Gould  
President
