I was shocked to see that the Western Sydney Aerotropolis stage 1 structure plan has placed my property on the border of the green parkland. I believe it is unfair that my neighbour directly in front, and beside me are in ideal categories, but as a result of a wide, crooked South Creek border (it is the widest in my street), the majority of my property has been categorised as non-urban land, leaving a small piece under flexible employment.

There is no reason for my property to be included in the green space as it's far from South Creek and not flood affected at all. I purchased this property 20 years ago, and all my life savings have been spent on it. I believe my property is part of a prime location and has been wrongfully categorised. I feel victimised, robbed and why do we have to suffer for others gain?

I'm strongly opposing this green parkland and we as private landowners have rights to fight concerning our loss of property values and development rights. The department of planning should find new ways of meeting the conservation and environmental targets in the area, to achieve green space without unfairly hurting property owners.
