**Content:**

Hello  
Majority of my property is now marked as "non-urban". This is unprecedented and is without any consultation so far. There is no rational or justification behind this decision. There is not enough information provided to understand the logic behind allocation of this 'non-urban' classification.  
The flood data on which this non-urban area boundary is defined, is out-of-date. Since I have been living here, I have hardly seen noticeable amount of water in the creek. The creek is <10 meter wide and has been neglected for years. All it needs is a good clean up and fixing of chock-points.  
IMO - approx 25 Mtrs. is sufficient as a green zone. The rest should be placed in appropriate zones so that people can enjoy water views from their homes and also have recreational facilities on bank of the creek.  
I strongly oppose the idea of creating a 500+ meter 'non-urban' area, it will be unfair to more than 200 residents in Kelvin Park alone. It will seriously impact values of their properties.  
Thanks
