I am making a submission to Council concerning the new South Creek precinct of which part of my land is in. You are saying that is in a flood zone, I have live here for 30 plus years and it has never flooded my neighbours land has never flooded only land at the very bottom of my street and that was 30 years ago and that was only a part of the back of their land. As I said we have lived here for 30 plus years and raised a family here and most of our grandchildren were born here. When we heard that the airport was being built we were happy because it was needed and it would be fantastic for the community creating jobs, we were going to buy acreage some where else. By making this land non urban you will devalue the land and will we have enough to buy somewhere close. Will government pay us the same as developers will pay for land in the blue zone and the yellow striped zone? And when you aquire the land you will then rezone it for cafes and restaurants and buildings. You cannot and must not devalue our land its not fair and completely unAustralian. Please take into consideration the financial position landowners in the South Creek precinct
