Dear Sir/Madam

Re: Concern about Western Sydney Aerotropolis Stage 1 Land Use and Infrastructure Implementation Plan

My name is Abdul Jalil. I own [REDACTED] Kemps Creek part of which, in the above implementation plan is fallen in South Creek precinct and part in Rossmore Urban precinct. While I know that the South Creek precinct was determined based on 1 in 100 or PMF flood data, most of such flood affected areas, in my understanding, can be easily flood mitigated and rezoned for residential development.

Since I purchased this property in early 2014, I experienced flash flooding once under an exceptionally high rainfall along with extremely poor maintenance of the creek and its feeding water causeways. Would the causeways and the creek had been cleared and maintained properly, I am sure none of the residents in the area would notice any flood!

I bought this land by taking more than a million dollar loan with the aim of my and my wife's smooth retirement living which is approaching soon and to save the future of our three children. Still, we are carrying on the loan. Any under value of this land would cause my whole family suffer extreme financial hardship.

So, my earnest request to you, please exclude my land and similar others which can easily be made flood free simply by clearing the creek and water causeways, and help make our future safe.

With kind regards

Abdul Jalil
