Content:

I have been a resident of Kelvin Park Drive Bringelly now for 22 years. My Husband and I came from very humble childhoods and worked hard for what we have today. We owner-built our home to exactly what we wanted and its been the perfect home to share and raise with our children, grandchildren and friends.

Living on the land is wonderful but also very hard and constant work. There is always something that needs your attention but its worth the effort as our home is our sanctuary.

We thought that we would be here forever, but no, we have now been advised that its time to move due to future development and the airport. All well and good, but in this totally unfair situation we are very, very concerned for our future.

My Husband is 72 and I am 58. We still both work and run out own business of which the office is done from our property. Our home was our future retirement and eventually our children's and grandchildren's. We need to be fairly well compensated for what we are about to loose.

Not knowing what our future is going to be and where we are going to live is quite stressful and heartbreaking.

Living in limbo for the next "however many years" is going to be absolutely devastating.

I am that disappointed in what is happening with our property that I have given up on both the internals and externals of my home. I am no longer going to be renovating any part of the internals of my home (new carpet, blinds, updating the painting of walls) as I had originally planned to do. I also have lost my motivation to go outside and work on the property. I am doing the bare minimum just to keep it neat and tidy, but when I go to plant some new trees or update my vegetable garden I think to myself "what for" ?! I am not going to be here for much longer, so what is the point of putting in my time and money to something that is going to be demolished. What is the point in planting new fruit and vegetable trees that take two to three years to fruit and nurture if I won't be here?! My life is currently frozen.

This was going to be an exciting update for me to do for our home, as we had always planned to retire here and live here forever. I am no longer doing any updates to our home. It is pointless.

Also, I have to think about the farm animals. Where do they go once we move? What do I do with them? They are part of our family.

What I am asking you for is fairness for our future as we appreciate that the airport is going ahead and so is the Western Sydney Aerotropolis Core Mini City.

My land is in the 1/100 year line of limitation which would not be so if the creek at the back of our land ([REDACTED]) was properly maintained. We love our land "it has character!

The re-zoning of the whole of [REDACTED] should be fair on every resident, as most of the residents here have planned their life around where we currently live. This area is our world and we supposed to be our future.

It is with a heavy heart that I now have to think about moving on, not because I want to, but because I HAVE to!
