We have been on this land for 20 years we started our hydroponics business at that time To see that the area were we operate is r2 small lots 1/100 year .but now the mfv that you require for the Aerotropolis and our land as non urban is totally not Australian I want fair compensation for my land as the south creek is the spine and all the future residents / business will benefit We are not anti development and believe this will be a great future city that the world can be proud of. This has given our family a lot of sleepless nights and stress., our business is our livelihood and our family are wondering were we stand as nobody will buy our land or our business .
so what do we do ...
