Dear sir

My name is Lisa Versi I am 52 years old living at [REDACTED] after a long search for a property that had everything we required. We have [REDACTED] we bought this property with this in mind the extra living space [REDACTED] as the price of housing at the moment is out of most young ones sights with saying that also as we grow older we may need help as well with day to day care.

We are also running a business out of our property as we knew when we purchased it was eventually going to be zoned light industrial. Not changed to non "urban" as the government is trying to do with out notifying any of us we all receive our land rates in the mail so we should have been informed about this the same way not our neighbours knocking on our doors. Flood zoning has also been changed from 1 in 100 hundred behind our back , we are finding this out through our insurance companies.

While I do understand that these changes are being made to allow for the airport and its surroundings it shouldn't come at a cost to all of us that are effected in the area we need to be treated fairly and keep up to date at the end of the day [REDACTED] the land is worth something. Our lives have now been put on hold as we can not sell and who has the money up front to even start looking at another property we don't we have just paid our mortgage off and had renovation plans which are now on hold the sleepless nights I have had since this has matter has come to light [REDACTED] which he never had before.

As I'm sure you are aware what banks are going to give us a loan now at our age and the same as a lot of other people in the area. [REDACTED] where looking forward to retirement house paid of we have our super because we all know the government won't be giving us any pension even though we have paid our taxes all these years and never asked for anything. All I ask is for fairness and that we receive what our property is worth I don't want to move but if we need to I need to find the same style of living to accommodate all of my family and our business.

Regards  
Lisa Versi  
[REDACTED]
