Thank you for the opportunity to comment on the Aerotropolis proposal as regards the South Creek Precinct. It came as quite a surprise to see the Stage 1 structure plan with Cadastre map which showed our home property to be part of the planned South Creek Precinct. On the map our land is described as "non-urban"; this description makes no sense and needs to be explained without delay!

Further investigation on Liverpool Council's website showed that our property is listed as 38.7% high flood risk; 29.8% medium and 31.5% low.

We were not aware of this new definition re possible flooding ; we have been here for 20 years and have had 2 incidents where Thompson's Creek has briefly flooded but with no impact on our dwelling which was built well above the old "flood line".

We understand that the land is to be "rezoned" in 2019.

It would seem that it is possible that all or part of our property may be at risk of being acquired to be part of the "Green corridor" which will make the "Aerotropolis" more livable.

Recent news bulletins have shown impressions of what looks like a "Waterworld" surrounding a "Magical Aerotropolis" supplying all that hearts could desire; only the Wizard of Oz was missing!

As my husband and I retired to this neighbourhood with no plans or expectations of having to move elsewhere - we are naturally anxious to know if and when our land is to be "acquired"; at the moment we do not know if it would be wise to undertake any extensive renovations/ repairs to our home in case we need to relinquish occupancy so that people can kayak and canoe in our backyard!
