Bdor Aoad and Family

Of [REDACTED]

To whom it may concern

Hello all, my name is Bdor Aoad of [REDACTED] or our property address is also known as [REDACTED] [REDACTED] [REDACTED]. I am married and have 6 children, also have my mother in law lives with us she is an elderly lady 91 years old, we are all concerned about the new proposal of the area that is affecting our land being shaded in the south Creek precinct which will devalue our land, therefore as a response to this action, we are writing this letter to give all clear facts about our land that has been unfairly classified by this rough sketch that clearly states non urban which it signifies from our understanding that it's uncertain of its infrastructure offering to the area and as a result it left us in limbo and worries as we may be victimised by this inconsiderate and impulsive judgement, our land is positioned on the boarder of Thompson Creek which it's a little Creek that runs off to South Creek and it doesn't travel a long distance, and had never been flooded, when We bought this property We had done all the research and gathered the information from council and other sources like realestate agents and conveyancers that showed and proved our land is 95% flood free and shows no risk of flooding, which can be developed on without any issues to verify this information we have supporting evidence can be obtained and provided upon request if needed, our land located in the heart of aretropolis city and sure that our land is in a vital position and will play a significant part in this new project and infrastructure due to come soon, hence we are aware that the Airport is being built and what surrounding it has to be developed as being part of the whole project and the new infrastructure due to come in a few years time we understand that we have to leave this life style and move on with our lives but we want to be fairly compensated and treated with Equality and get our rights, we know that this is just a suggested plan to be consulted but we are strongly against it as it is affecting our land completely, my family and I have been suffering from anxiety, stress and many sleepless nights since we heard the news about the affection of our land being in the section of south Creek precinct, my mother in law got the biggest shock and made her even more sick, as well as everyone in the family, it's affecting us in all aspects and it will play a major part of determining our future, therefore we want the planning department/governments bodies to consider a better zoning that would result in giving our land its rights and to be fairly classified, and if our land need to be acquired we want to be treated fairly and compensated like the Aerotropolis land value as we should because it is right in the middle of the proposed Aerotropolis core we are positive and optimistic about our land as it represents a unique predominant position and it offers a flood free developable block.
