Content:

I have recently been made aware of the state governments intention to rezone the land upon which i currently live, however having listened to alan jones' program recently i heard that the governments intentions were to buy out current residents prior to any rezoning. As you can see, these two sets of information are in direct contradiction to each other and the intention of the gov to rezone prior to acquiring my families land has caused a lot of distress for myself and my family due to decisions made in 2010 when the planning was first released.

My hopes for this letter are to ensure that our family receives the fair treatment and entitlements promised in the initial zoning outlined in 2010.
