Content:
I am the owner of [REDACTED] which is towards the [REDACTED]
[REDACTED] The current mapping as shown on page 19 of the Western Sydney Aerotropolis Land Use and Infrastructure Implementation Plan, Stage 1: Initial Precincts shows that my property which is currently zoned rural, may be re-zoned to flexible employment or non-urban land in the future. As the precinct boundary is not clearly defined with regard to property boundaries I cannot clearly assess the impact the-rezoning will have on my land which is a concern. I understand that the rear of my property (Western boundary) is subject to flooding and that the proposed South Creek precinct is to be utilised to manage flooding, however I would want to be involved and understand how the approach to this flood management will impact my property and my possible uses for my property in the future. As a stakeholder in the re-zoning process I want to be ensured that I will have input into the planning and infrastructure delivery process and that any proposals put forward will not limit my ability to maximise the future use of my land.
