

Dear Planning Ministers

Our names are Mate Herceg and Natasha Herceg and we live at [REDACTED] with Mum and Dad and we are devastated that this has happened to our property and our neighbours. I am 25 years old and my sister is 20 years old and we have lived here since we were 7 which I can tell you that it is the best lifestyle someone can ask for. It saddens us as we both had plans to build another dwelling on our parents property which we can do so as we both can live and save for our own properties for as you would know that the Real estate market is not favorably to millennials.

We understand that some of our property is 1in100 flood and I would of thought that the Government would of acquired this section as it is harder to build on that section due to the building restrictions. My father showed me the PMF (probable Maximum Flood) level to zone the south creek precinct, as we have never been inundated with water so it surprises me.

We understand and accept that another Airport is coming and were quite thrilled that we would be down the road from this huge development until these maps came to life, but what we are upset about is since these maps have been released the depressed state my parents are in not knowing where their future lies.

We cannot understand the thinking behind playing with people's lives as this was my mum and dads' future pension and super.

To be placed in the Green spine is very stressful and worrying and has placed our lives in Limbo as we have noticed within the area of the spine that real estate has devalued.

If the government needs green space or non urban land we must be compensated at the same market value as the residents in the Aerotropolis Core and be treated equally so we can reside our futures down the road and keep living this beautiful lifestyle.

MATE & NATASHA HERCEG
