**Content:**

I would like to submit the following points in relation to the Cumberland Plain Conservation Plan:

# Public reserves must not be used as offsets for developers: The Terms of Reference (Section 3.1.5) do not include public bushland reserves in their definition of already-protected bushland. I do not believe it is in the best interest of this ecological community for developers to use the public reserves we fought and paid for as their environmental offsets and deny local farmers vital conservation funding to protect bushland on farms. Section 3.1.5 must be amended to include 'public bushland reserves' in the definition of lands already protected.

# Real public input: The terms do not require the State Government to report on any public participation. The public must have the final say in planning our communities.

# I ask that the Terms of Reference require a summary of conservation priorities as stated by local communities from (at a minimum) local, face-to-face community workshops
