I am not happy with the planning departments decision to rezone a large portion of property to parklands
There is exaggerated amount highlighted for parklands in the employment zones, this is not required for this region.
There are many examples where flood zones have been lifted and waterways piped or concreted, this is unfair to the residents who will be rezone parklands. There is currently many examples where land owners have filled already and operating businesses on the land that is zoned rural for farming.
Action is needed urgently to rezone and protect current residents.
We have 10's of thousands of hectares of bush in NSW and plenty of empty parks already , why the need for the parklands in the middle of employment lands, there has to be some green space on all developments now for staff to go outside their office and stretch their legs if needed.
