Content:

Keep Sydney Beautiful is a grassroots community organisation. We have written various submissions on changes to planning acts including Biodiversity and Conservation Act

We have several concerns with the proposed Cumberland Plan Conservation Plan.

We do not believe offsets are a conservation tool.

Public reserves must not to be offsets for developers: The Terms of Reference (Section 3.1.5) do not include public bushland reserves in their definition of already-protected bushland. This will allow developers to use the public reserves as their environmental offsets and deny local farmers vital conservation funding to protect bushland on farms.

Section 3.1.5 should be amended to include 'public bushland reserves' in the definition of lands already protected.

The terms do not require the State Government to report on any public participation. The public must have the final say in planning our communities.

The Terms of Reference should require a summary of conservation priorities as stated by local communities from (at a minimum) local, face-to-face community meetings and be on display for at least 3 months
