Submission: Living in the Campbelltown LGA and studying Conservation and Land Management with a passion for our local flora and fauna, many Threatened species of both, need our community involvement to fight for their protection . On reading this plan I'm not satisfied that this government will place our flora and fauna as a priority over infrastructure and development . Considering our recent drought and catastrophic bushfires and the impact that has Had on flora and fauna , Reason they should Be protected and take priority over infrastructure and development, if we lose our native species to this ignorance, it will be a big shame on our government, and I'm here to stand up and state that this plan is just not good enough in offering more of what community requests for their protection.
