Submission file: [webform_submission:values:submission_file]

Submission: Can I just say, I strongly object to this proposed rezoning for [REDACTED] because there is no legitimate reason for the land to be rezoned, as there is no ecology on the land, it is a bare rural paddock. 1. The land is cleared and managed as a rural residential allotment. 2. The intermittent water course does not impact the property, it intersects the far west property boundary, due to a dam located on the adjoining allotment. 3. The intermittent water course is part of a private residential storm water drainage management scheme and does not have any environmental effects. 4. The dam on the adjoining property has been constructed during the course of the owners development of the their land. I have sent an e-mail to Steve Hartley, Executive Director, Green and Resilient Places Division, Department of Planning, Industry and Environment - 7th September, 2020, expressing my objection. Thank you, Sincerely Elke Illy
