Submission file: [webform_submission:values:submission_file]

Submission: Why is the Department of planning trying to subject land that has been cleared for decades ! to be put into these conservation areas ! They would be better off protecting the areas they have allowed housing growth and destroying natural vegetation areas that are already there . But allow the bull dozers and shredders to mulch every thing on site leaving no where for the native animals to live . Yes we need growth economical and socially. But it should not be at the expense of existing native vegetation . Why destroy native vegetation that has been their for centuries and Try to replicate it some where else .
