Submission: The Draft Cumberland Plain Conservation Plan I am very concerned that much of our native flora and fauna are suffering due to climate change, the recent bushfires and overdevelopment of their natural habitat. Australia has a poor record of environmental protection, with an unforgivable number of mammalian extinctions under our belt. Please act to protect our wildlife, and in this instance particularly our fragile koala populations. No development (staged or otherwise) should occur until adequate protection of native vegetation is assured.
