

[REDACTED]  
LUDDENHAM.

ATTENTION LEAH TUCKER

Leah

Thank you for your call today we are the owners of the property [REDACTED] Luddenham about the potential rezoning of part of our land to an 'environmental' zoning.

We strongly object to this as it will affect the use of the land generally and result in a drop in the value of the property.

In relation to the dam it was man made and the supply to the dam was as a result of the contours of the property around the dam. The capacity of the dam is minimal and was only useful during the years that the farm was used to grow fruit and vegetables. It is not a natural waterway and I believe that any competent land use professional would quickly support that scenario based on the evidence available.

In any event we would like to be guaranteed that if this course of action is to be pursued, we would like to make a further submission prior to its implementation.

Yours faithfully,

[REDACTED]
