Submission: Draft Cumberland Plain Conservation Plan I believe that this draft plan is driven by housing targets, government planning goals and developer designs on remaining open, green space across this ecosystem. It is a developer and development driven document. The conservation aspects appear secondary to stated government plans to drive, even accelerate more out of control development, an investor bonanza and vast amounts of unaffordable housing across across this plain. The plans to protect and save koalas in identified areas seem inadequate and again the conservation of koalas and specific areas seems secondary to housing plans. Likewise for the conservation for other animals and plants named. I do not endorse further development across the CP and its associated council areas. I had limited time to read and reply, hence my position is very broadly put. Elaine Talbert
