

I have lived at [REDACTED] my whole life (currently [REDACTED]). The house is very uniquely designed with multiple dwellings connected by walkways. My parents and I have always had the intention of building onto the house for me when I have my own family. Similar to the way we added on for my Nan. Zoning our area at E2 would prevent this. All extensions or additions would be done in an environmental respectful way. So we can keep the lifestyle we have and maintain the environment
