Submission: To Planning NSW I cannot believe there is any justification in excluding the tens of thousands of hectares of Cumberland woodland in Western Sydney from the any recognition in the CPCP 2020. Just because the 150,000 hectares of woodland is on Crown land, water catchment, existing reserves, Defence, National Parks,, Dept of Agriculture and both Western Sydney and Sydney University does not mean that the woodlands should not be included in the total area of the Cumberland plain estate. If this was done there would be very little justification for the Government to steal 5500 hectares of privately owned land to 'offset' the greed of developers who will remove all native vegetation to squeeze as many tiny blocks as they can. Why not consider 'revegetation infilling' ie planting out the tens of thousands of hectares in existing reserves and crown land that are left as grassland when they were originally forest.
