Subject: [REDACTED] wilton

To whom it may concern,

I have read the Draft Cumberland Plain Conservation Plan 2020 and do not agree with it; finding that my property at [REDACTED] Wilton warrants rezoning to E2.

I note that at Appendix B to the Draft Plan (pgs 89 - 92) I '*may seek to have the urban capable boundary amended prior to finalisation of the Plan*'. This submission seeks that amendment.

Previously all assessment conducted by Planning NSW in relation to my land has been by done remotely using out of date resources which do not reflect its recent and current landuse. Therefore I once again extend an invitation to Planning to conduct a site inspection and for us to discuss the legal landuses afoot with a view to incorporating the land in the urban capable area listed in the Plan

Please note I have a site specific BAM report available for discussion

Yours sincerely

Mikhael & Affifee Dib
