Submission: To whom it may concern I object to The Cumberland Plain Conservation Plan . All advice from the Upper House Review into Koala Population makes it clear that housing development or any other development which requires clearing of habitat will be the death knell to this surprisingly healthy Sydney based koala population. The Chief Scientist's recommendation for the area of land required for habitat corridors is being ignored to the peril of driving Koalas to extinction. . Urban spread must not be allowed. Housing consolidation can be best placed near transport hubs . Urban spread is not necessary. This land has previously been deemed offset land. . Loss of rural land, which is already offset land, still contains koalas. This means loss of 20% of the land on which our city food is grown. Building on what's left of Sydney arable land is madness. Surely locally grown food is valuable asset? . This beautiful Cumberland Plain and its biodiversity is important for preventing extinction of the amazing asset, koalas, and ALL the biodiverse native plants and animals contained within. It helps preserve the variety of life on which we humans depend. . As a child I remember seeing koalas close to Manly and all the way up to Palm Beach. The lessons must be learnt. We must cherish and preserve what little is left of our famous unique Australian wildlife for all future generations. Koala habitat must not be depleted in any way shape or form. It must be increased. Yours faithfully, Keelah Lam [REDACTED] Fairlight 2094 Ph [REDACTED]
